

# NJ Cool Grant Program

- \* **\$50,000 - \$1 million grant award per approved project**
- \* Supports retrofit construction projects that reduce operating greenhouse gas emissions from existing commercial, industrial, and institutional (non-profit) buildings
- \* Grant award will reimburse 50% of eligible hard construction costs
- \* **First come, first served—simplified application process at [www.njeda.gov/njcool](http://www.njeda.gov/njcool)**
- \* Grants stackable with most NJ BPU/Utility incentives and federal tax credits

## Who should apply?

- \* **Commercial, industrial, or institutional building owners OR tenants**
- \* Buildings must be located in **Newark, Edison, or Atlantic City**

A complete list of eligibility criteria and application details are available at [www.njeda.gov/njcool](http://www.njeda.gov/njcool)

## NJ Cool Supports a “Whole Building” Retrofit Approach

Replacing fossil fuel combustion heating systems with non-combustion (electric) alternatives

and/or

Replacing high global warming potential (GWP) refrigerants in cooling systems

+

Additional work that reduces building emissions or improves energy efficiency\*\*

\*\*Not eligible independently

## Potential Project Benefits

- ⇒ Reduced building greenhouse gas & co-pollutant emissions
- ⇒ Improved air quality
- ⇒ Reduced energy costs
- ⇒ Improved thermal comfort

## \*Additional Eligible Supporting Work:

- \* On-site renewables & storage
- \* Weatherization & insulation
- \* LED lighting and controls upgrades
- \* Energy management systems
- \* Heat recovery equipment
- \* Appliance electrification
- \* Enabling electric/structural upgrades
- \* And more!
