

Pre-Application Form

This is a pre-application form and **not a formal application** for NJ Cool Funding. It aims to streamline project reviews and facilitate discussions with the NJ Cool team. All projects must submit a full application online. Visit the [NJ Cool website](#) for detailed information of requirements.

NJ Cool funding is reserved for commercial, industrial, or institutional building retrofit projects located in State-designated [Overburdened Communities and Formally Designated Block Groups](#).

NJ Cool requires projects to switch 75% of a building's heating load from fossil fuel-based systems to non-combustion systems or replace existing high Global Warming Potential (GWP) refrigerants (700+ GWP) with lower GWP refrigerants. Projects must have at least \$100,000 in eligible expenses, including direct costs (materials, labor, equipment) for emissions reductions, energy efficiency improvements, or supporting work that further reduces operating emissions and enhance energy efficiency. Projects not meeting these criteria are ineligible for NJ Cool but may qualify for other State programs.

Please be advised, all contractors on NJ Cool funded projects must be registered as Public Works Contractors with the New Jersey Department of Labor and Workforce Development (DOL). Additionally, they must comply with prevailing wage regulations and state affirmative action requirements.
