PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New Jersey Public-Community Water-Supply Wells
Source: Department of Environmental Protection, Geological Survey
Telephone: 609-984-6587

New Jersey Ambient Ground Water Quality Network Data
Source: Department of Environmental Quality
Telephone: 609-984-6587
Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

STORET Water Quality Monitoring Stations
Source: Department of Environmental Protection
Telephone: 609-984-6831
STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database. A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

Water Well Permit Information
Source: Department of Environmental Protection
Telephone: 609-984-6831
Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

OTHER STATE DATABASE INFORMATION

RADON

State Database: NJ Radon
Source: Department of Environmental Protection
Telephone: 609-984-5425
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

SITE ASSESSMENT PLAN

Introduction

The site assessment plan for the Allied Builders Supply Co. facility has been formulated to evaluate whether soil contamination is present in the vicinity of the UST to be decommissioned. The site assessment plan formulated will be followed for the sole tank excavation to be performed.

The site assessment plan will consist of the following two tasks:

Task I: Soil Screening/Field Testing
Task II: Soil Sampling and Analyses

Task I: Soil Screening/Field Testing

During tank removal activities, observations will be made of the soils removed at the top of the tank and around any fill pipes, as well as in the excavation walls and floor. Observations will consist of visually inspecting the soils, examining the soils for odors, staining, and free product and screening the soils with an Organic Vapor Analyzer (OVA).

The screening evaluation will be especially applied to the base of the tank excavation in an effort to locate any "hot spots" that may indicate that a discharge or discharges have occurred in the past. In the event that soil contamination is indicated, additional soils will be excavated and the OVA will be used to screen the soils and assure that all impacted soils have been removed.

F. Contractor personnel, using Level B (supplied air) protection will enter tank to conduct decontamination procedures.

G. Decontamination procedures will consist of scraping all residue from walls and floor of tank. Next a biodegradable degreaser will be applied and walls and floor squeegeed and pumped dry. The final step will be to wipe clean and dry the entire interior of tank using clean, dry rags.

H. All residue will be pumped into appropriate holding drums or portable tanker for manifesting and disposal to an approved facility.

4. TANK REMOVAL

A. After decontamination is completed, excavation will occur to remove the tank from the ground. The tank will be secured and examined for corrosion holes or signs of leakage. If any evidence of a discharge is found the NJDEPE Hotline will be called immediately.

B. If no evidence of discharge is present the tank will be prepared for disposal by labelling with appropriate data and removed to an acceptable facility.

5. SITE ASSESSMENT - POST EXCAVATION

Throughout the entire excavation, decommissioning and post excavation procedures, observations will be made for evidence of contamination . If any indication of a discharge is suspected the NJDEPE Hotline will be immediately notified.

A. During and after removal of tank, soil surrounding the tank will be examined, incuding soil around any fill lines and piping for evidence of contamination.

B. If evidence of contamination is discovered, the NJDEPE Hotline will be notified and field tests performed to determine how much additional soil must be excavated and stockpilled utilizing the guidelines and procedures outlined in the Management of Excavated Soils .

6. SOIL SAMPLING

Soil sampling will occur based on the requirements outlined in NJDEPE Division of Water Resources Technical Guidance Document and Field Sampling Prodecure Manual. Samples collected will be delivered to N.J. Certified Laboratory for analyses. The soil sampling tasks are discussed in the following Site Assessment Plan.

7. BACK FILL OF EXCAVATION

After testing is complete, the tank void will be back-filled with clean, inert backfill material to current grade. If determined on site to be necessary, the excavation will be lined with plastic liner to segregate clean fill in tank void from surrounding host soils for future remediation.

TANK DECOMMISSIONING PLAN

1. GENERAL SCOPE OF WORK

Allied Builders Supply Co. has contracted with JCB Environmental Contractors to decommission, via removal, (1) 1000- gallon UST which contains unleaded gasoline. Tri-State Environmental Consultants, Inc. (TEC) has been subcontracted to perform all Site Assessment services. This site is located at 101 West Elizabeth Avenue in Linden, NJ.

2. SITE PREPARATION

As a safety precaution all ignition sources will be removed from the excavation site. Safety and protective equipment will be staged on site. Utility lines will be marked out to prevent hitting them during excavation activities. Tank product level will be verified prior to UST decommissioning activities.

3. TANK CLEANING PROCEDURE

Following API 1604 recommended practice for "Removal and Disposal of Used Underground Petroleum Storage Tanks":

A. Excavation of soil on top of tank exposing upper section of U.S.T.

B. Drain all piping back to tank and disconnect.

C. Render tank vapor free.

D. Plug all openings except vent.

E. Contractor will, if necessary, cut access hole in tank to allow entry for cleaning.

Following the removal of the tank from the excavation and completion of the soil screening operations, field tests will be performed to further evaluate if discharges have occurred. In the event that free product is present when the tank is removed, field testing will be implemented to ascertain the extent of contaminated soils.

Field testing will consist of the soil/water agitation method to determine if dissolved product is present within the soils. In addition, the field sorption test will be utilized to determine if free product is present within the soils.

Task 2: Soil Sampling and Analyses

Soil sampling and analyses will be performed whether or not evidence of a discharge from the tank is present. In the event that a discharge did occur soil sampling and analyses will be performed following the removal of impacted soils to confirm that all contaminated soils have been successfully removed from the tank area.

Soil sampling and analyses will be performed on soil samples collected at 5-foot intervals from the tank bed. It is anticipated that up to three soil samples will be collected and tested for PP VO+10. In the event that any of the soil samples collected from the gasoline UST beds indicate any contamiansts above NJDEPE standards, additional soil "hotspots" will be re-excavated and samples for PP VO+10.

All soil samples will be collected with stainless steel trowels. Prior to sampling and between sampling episodes the trowels will be decontaminated in the following manner:

- washed in a liquinox and water solution
- tap water rinse
- distilled water rinse
-10% nitric acid rinse
-distilled water rinse
- acetone rinse
- air dry
- distilled water rinse

Collected soil samples will be placed into laboratory supplied glassware and then placed in a cooler on ice. Following their collection the soil samples will be immediately transported to the laboratory for analysis.

All analyses will be conducted by a NJDEPE-certified laboratory.

Figure 1 illustrates the proposed soil sampling locations. In the event that any discharges are noted during any part of the Site Assessment activities the NJDEPE Hotline will be immediately notified.

TRI-STATE ENVIRONMENTAL CONSULTANTS

IMPLEMENTATION SCHEDULE

Tank removal activities will commence within two weeks following approval from the NJDEPE. The local fire inspector will be notified 1 week prior to UST removal. A permit will be obtained from the local building department immediately following approval from the NJDEPE. Site assessment activities including soil sampling will commence throughout the UST decommissioning process. Soil samples will be delivered to the laboratory immediately following their collection. It is anticipated that the soil sampling data will be generated in 1-2 weeks follwing receipt by the laboratory. The Closure Plan Implementation Summary Report will be produced one week following receipt of the laboratory data analyses.

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

JUN 01 1988

Bureau of Ground Water Quality Management
Underground Storage Tank Section
(609)984-9736

COMPLIANCE WITH THIS REGISTRATION WILL MEET ALL REGISTRATION REQUIREMENTS OF THE FEDERAL LAW, P.L. 93-616, THE HAZARDOUS AND SOLID WASTE AMENDMENTS OF 1984, SUBTITLE I, SECTIONS 9001-9010.

General Facility Information

1. Facility name: ALLIED BUILDING SUPPLY CO

2. Facility location: 1011 WEST ELIZABETH AVENUE
NUMBER AND STREET
LINDEN
CITY OR MUNICIPALITY
UNION — COUNTY; NJ — STATE; 07036 — ZIP CODE

3. Owner's mailing address: 581 RAHWAY AVENUE
NUMBER AND STREET
UNION
CITY OR MUNICIPALITY
UNION — COUNTY; NJ — STATE; 07083 — ZIP CODE

4. Owner's name: DANIELI WINTERS

5. Contact person (Facility Operator) JOHN SAUER
PERSON OR TITLE

6. Contact telephone number: 201 — AREA CODE; 862 — EXCHANGE; 4070 — NUMBER

7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)

8. Total facility underground storage tank capacity (gallons): 0002000

9. Type and status of owner (mark all that apply).

A. ☒ CURRENT B. ☐ FORMER C. ☐ STATE OR LOCAL GOVERNMENT D. ☐ PRIVATE OR CORPORATE E. ☐ OWNERSHIP UNCERTAIN F. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)

10. Two copies of a site plan are submitted with this registration. A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or closed, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. 12948

11. All underground tanks used after January 1, 1974 including those taken out of operation, **(UNLESS THE TANK WAS REMOVED FROM THE GROUND)** must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or Closed C.

5. Contact person (Facility Operator) JOHN SAUER (PERSON OR TITLE)
6. Contact telephone number: 201 (AREA CODE) 862 (EXCHANGE) 4070 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)
8. Total facility underground storage tank capacity (gallons): 0002000
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner: (mark one) A. ☐ STATE OR LOCAL GOVERNMENT B. ☒ PRIVATE OR CORPORATE C. ☐ OWNERSHIP UNCERTAIN D. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)
11. Two copies of a site plan are submitted with this registration. A. ☑ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or out of service, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. _____

ALL underground tanks, including those taken out of operation. **(UNLESS THE TANK WAS REMOVED FROM THE GROUND)** must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or out of service, C.

SCHEDULE OF OPERATIONS

During the entire period beginning no later than December 31, 1983, the Property has been continuously owned by 101 West Elizabeth Avenue Corp., a New Jersey Corporation, of which the principal Shareholder, Chairman of the Board of Directors and President was, and continues to be, Daniel J. Winters. Also, during the aforesaid period, the sole occupant of the Property has been, and continues to be, Allied Building Supply Co., a New Jersey Limited Partnership, of which the sole General Partner has been, and is the same Daniel J. Winters. The nature and extent of the business operations conducted at the Property during said period was, and continues to be, a lumber and other building materials dealer at retail, that is, sale of such materials to consumers, homeowners and contractors. The said materials are either provided to the customers of the business at the Property or, particularly in the case of the contractor customers, delivered to the construction site for ultimate incorporation in residences then under construction or additions thereto. The said building materials consist of lumber, millwork (that is, interior and exterior molding, doors, sashes, paneling and windows), and to a lesser extent some siding, sheetrock, wallboard and similar building materials and supplies, related hardware and tools. In no case, however, are any of the foregoing building materials manufactured, fabricated, assembled, processed or changed by the owner and/or occupant of the Property except that the aforesaid building materials are typically received into the inventory of the occupant in bulk and then reassembled in smaller units suitable for resale, but the essential packaging, as received, remains unchanged although on occasion, larger dimensional lumber may be sawed to accommodate the particular specifications of a customer. In such latter events, de minimus sawdust is produced but is entirely accumulated, packaged, sealed and properly disposed of off-premises.

Additionally, in conjunction with the aforesaid lumber and building materials business, clerical offices are maintained at the Property.

RE: Allied Building Supply Co.
101 W. Elizabeth Ave.
Lot 10, Block 254
Linden City, Union County
#N90870

Dear Mr. Nelson:

This is in response to your application dated 1/26/89, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the cessation of operations at the above referenced premises. On the basis of the sworn statements set forth in the affidavit signed by Daniel Winters, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of an industrial establishment as defined within the Standard Industrial Classification numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits.

In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

New Jersey is an Equal Opportunity Employer
Recycled Paper

Should you have any further questions regarding this matter, please contact Deborah Ethington at (609) 633-7141.

Sincerely,

Michael DeTalvo

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Applicability and Compliance
Registration and Billing Section
1-800-722-TANK

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO
2. Facility Location: 1011 WEST ELIZABETH AVE. (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   00254 (BLOCK) 0010 (LOT)
3. Owner's mailing address: P.O. BOX 3817 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 070833817 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): AL FIORE (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1555 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 000200
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☒ YES ☐ NO

Liability (Type)
Royal INS. (Company/Carrier)
N-SP-214064-000 (Policy Number)
5/4/92 (Expiration Date)

UST NO. 0129486

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?

☐ YES ☒ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)
_____ Other (please specify)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?

☐ YES ☒ NO

If Yes, does the secondary containment system comply with all provisions of these regulations?

☐ YES ☐ NO

2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(c) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?

☐ YES ☒ NO

If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).

3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☒ NO

If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO

If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☒ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

Royal Insurance / Brownell, Kramon, Waldron & Co. Agency — Carrier/Issuing agency

9, 4, 91 — Date Effective

N-SP-214064-0U5 — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
- : For corporations, by the vice president or higher
- : For sole proprietorships, by the proprietor
- : For partnerships, by the general partner
- : For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

RE: Allied Building Supply Co.
101 West Elizabeth Avenue
Linden, New Jersey

Dear Mr. Bono:

Enclosed please find the Applicability/Nonapplicability Affidavit and the required $200 review fee in connection with the above-referenced property. Please be advised that Allied Building Supply Co. utilized the subject property as a lumber and building materials retail supply business and is not considered an industrial establishment under the ECRA regulations. In addition, please note that a Letter of Nonapplicability was issued by the Department for this business on March 7, 1989 for the cessation of operations. Accordingly, it appears that the Department's issuance of a Letter of Nonapplicability is warranted.

If you have any questions or require any additional information, please do not hesitate to contact me. Thank you for your consideration in this matter.

Very truly yours,

BRESSLER, AMERY & ROSS

ENVIRONMENTAL CLEANUP RESPONSIBILITY ACT (ECRA)

APPLICABILITY/NONAPPLICABILITY AFFIDAVIT

The purpose of this Affidavit is to obtain an Applicability/Nonapplicability Determination from the New Jersey Department of Environmental Protection pursuant to the Environmental Cleanup Responsibility Act, N.J.S.A. 13:1K-6 et seq. and N.J.A.C. 7:268-1.9. Fee is $100.

PLEASE TYPE OR PRINT

Date: April 20, 1993

A. Determination of Applicability/Nonapplicability should be mailed to the following:

Name David W. Reger, Esq., Bressler, Amery & Ross

Address P. O. Box 1980

City of Town Florham Park County Morris

State New Jersey Zip Code 07962 Tele. No. (201) 514-1200

B. Name of Business Allied Building Supply Co., a New Jersey Limited Partnership

Standard Industrial Classification (SIC)No.(if known) 5030

C. Property Location for which request is being transmitted:

Street Address 101 West Elizabeth Avenue

Tax Block(s) 254 Tax Lot(s) 10

Municipality City of Linden County Union

State New Jersey Zip Code 07036

D. Transaction for which the Applicability/Nonapplicability Determination is requested: (Check appropriate transaction)
* Please attach a detailed description of these transactions.
** Please attach the most recent Consolidated Financial Statements for all companies involved in the proposed transaction.

1. x Sale of Property
2. ___ Sale of Business
3. ___ Business Ceasing Operations
4. __ Refinancing/Construction Loan
5. ___ Sale of Stock in Corporation
6. ___ Condemnation
7. ___ Bankruptcy
8. ___ Corporate Merger*
9. ___ Partnership Situation Change*
10. ___ Intra Family
11. ___ Corporate Reorganization**
12. ___ Sale of Assets

___ Other: (Explain)

Date of Planned Transaction: Approximately 60 days after receipt of Letter of Nonapplicability.

Purchaser:

Name: New Jersey Transit - Att: Rudolph P. Geurds

Address: One Penn Plaza East

City or Town Newark County Essex

State New Jersey Zip Code 07105-2246

E. Operations:

1.) The property owner and/or operator must completely describe in detail the operations and processes conducted at the site including a list of all tenants, their operations and processes, occupying any part of the property since December 31, 1983. (Attach additional sheets if necessary.)

See Exhibit A.

2.) If the property described above is vacant land, is this property contiguous to other property under the control of the person or business described in F below: ___ Yes ____ No N/A

F. Current Owner of Property for which an Applicability/Nonapplicability Determination is requested:

Name 101 West Elizabeth Avenue Corporation, a New Jersey Corporation

Street Address 581 Rahway Avenue Municipality Union

State New Jersey Zip Code 07083 Tele. No. (908) 964-1555

G. 1. Previous Owners and history of on-site activities since December 31, 1983 (Attach additional sheets, if necessary):

Name	Address	Date/Operations
101 West Elizabeth Avenue Corp.	58 Rahway Avenue, Union, NJ 07083	Owner, 1979 - Present
Allied Building Supply Co.	101 West Elizabeth Avenue, Linden, NJ 07036	Operator, 1979 - 2/89; 2/91 - 6/91

2. Is this site currently or has this site previously been the subject of any other ECRA review? Please submit copies of previous submittals or approvals.

x Previous LNA Application
___ Administrative Consent Order
___ Active Case
___ Negative Declaration
___ Approved Cleanup Plan
___ No prior ECRA Review

A Letter of Nonapplicability was issued by the Department on March 7, 1989 for the cessation of operations of Allied Building Supply Co. See documents attached as Exhibit B.

H. Hazardous Substances or Wastes: (This information is only required if the facility or business has a subject SIC.)

List all types and quantities of hazardous substances or wastes including petroleum products that are generated, manufactured, refined, transported, treated, stored, handled or disposed at the property, both above and below ground, which are included in the Department's "List of Hazardous Substances" at Appendix A of N.J.A.C.7:1E and any amount of any waste substances required to be reported to the Department on special waste manifest forms pursuant to N.J.A.C.7:26-74, designated as a hazardous waste pursuant to N.J.A.C.7:26-8, or as otherwise provided by law. (Attach additional sheets if necessary.)

2,000 gallon gasoline UST*

500 gallon diesel above ground storage tank*

I. How is the building(s) heated? (Oil, Gas, Electric) If oil, how many tanks? 1-500 gal. #2 fuel oil- UST*
Storage Capacity of each office building - oil Above or below ground 1-500 gal. propane*
warehouse/store - propane above ground tank

J. Was the building(s) ever heated by oil? x Yes ___ No If so, when? 1979-Present.**
(office building)

*The subject property is not an industrial establishment under the ECRA regulations.
** The building has not been utilized since 1991.

K. CERTIFICATIONS:

1. The following certification shall be signed by the highest ranking individual at the site with overall responsibility for that site or activity. Where there is no individual at the site with overall responsibility for that site or activity, this certification shall be signed by the individual having responsibility for the overall operation of the site or activity.

I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of N.J.S.A. 13:1K-6 et seq. I am personally liable for the penalties set forth at N.J.S.A. 13:1K-13.

EXHIBIT A

OPERATIONS

From 1979 through February 1989[1], Allied Building Supply Co., a New Jersey Limited Partnership, conducted a retail lumber and other building materials business at the property. The operations involved the sale of the materials to consumers, homeowners and contractors. The materials were either provided to the customers at the property or, in the case of contractor customers, delivered to the construction site. The building materials consisted of lumber, millwork (interior and exterior molding, doors, sashes, paneling and windows) and, to a lesser extent, siding, sheetrock, wallboard and similar building materials and supplies, related hardware and tools. However, none of these building materials were manufactured, fabricated, assembled, processed or changed by the owner and/or occupant of the property, except that the building materials were typically received into inventory in bulk and reassembled in smaller units suitable for resale. On occasion, larger pieces of lumber were sawed to accommodate the particular specifications of a customer.

From February 1991 through June 1991, Allied Building Supply Co. reopened and conducted a retail lumber and other building materials business at the property. Clerical offices were also maintained at the property during this time.

---

[1]A Letter of Nonapplicability was issued by the Department on March 7, 1989 for the cessation of operations of Allied Building Supply Co. See documents attached as Exhibit B.

Lot 10, Block 254
LINDEN CITY, UNION COUNTY
N31246

Dear MR REGER ESQ:

This is in response to your application received 04/26/1993, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the sale of the above referenced premises. On the basis of the sworn statements set forth in the affidavit signed by Daniel J. Winters, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of an industrial establishment as defined within the Standard Industrial Classification numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits. In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

Should you have any further questions regarding this matter, please contact Charles Salter at (609) 633-7141.

Sincerely,

James J. Bono, Supervisor

Site Plan
Allied Builder's Supply Co.
101 West Elizabeth Avenue
Linden, NJ

TRI-STATE ENVIRONMENTAL CONSULTANTS

SITE ASSESSMENT PLAN

Introduction

The site assessment plan for the Allied Builders Supply Co. facility has been formulated to evaluate whether soil contamination is present in the vicinity of the UST to be decommissioned. The site assessment plan formulated will be followed for the sole tank excavation to be performed.

The site assessment plan will consist of the following two tasks:

Task I: Soil Screening/Field Testing
Task II: Soil Sampling and Analyses

Task I: Soil Screening/Field Testing

During tank removal activities, observations will be made of the soils removed at the top of the tank and around any fill pipes, as well as in the excavation walls and floor. Observations will consist of visually inspecting the soils, examining the soils for odors, staining, and free product and screening the soils with an Organic Vapor Analyzer (OVA).

The screening evaluation will be especially applied to the base of the tank excavation in an effort to locate any "hot spots" that may indicate that a discharge or discharges have occurred in the past. In the event that soil contamination is indicated, additional soils will be excavated and the OVA will be used to screen the soils and assure that all impacted soils have been removed.

F. Contractor personnel, using Level B (supplied air) protection will enter tank to conduct decontamination procedures.

G. Decontamination procedures will consist of scraping all residue from walls and floor of tank. Next a biodegradable degreaser will be applied and walls and floor squeegeed and pumped dry. The final step will be to wipe clean and dry the entire interior of tank using clean, dry rags.

H. All residue will be pumped into appropriate holding drums or portable tanker for manifesting and disposal to an approved facility.

4. TANK REMOVAL

A. After decontamination is completed, excavation will occur to remove the tank from the ground. The tank will be secured and examined for corrosion holes or signs of leakage. If any evidence of a discharge is found the NJDEPE Hotline will be called immediately.

B. If no evidence of discharge is present the tank will be prepared for disposal by labelling with appropriate data and removed to an acceptable facility.

5. SITE ASSESSMENT - POST EXCAVATION

Throughout the entire excavation, decommissioning and post excavation procedures, observations will be made for evidence of contamination . If any indication of a discharge is suspected the NJDEPE Hotline will be immediately notified.

A. During and after removal of tank, soil surrounding the tank will be examined, incuding soil around any fill lines and piping for evidence of contamination.

B. If evidence of contamination is discovered, the NJDEPE Hotline will be notified and field tests performed to determine how much additional soil must be excavated and stockpilled utilizing the guidelines and procedures outlined in the Management of Excavated Soils .

6. SOIL SAMPLING

Soil sampling will occur based on the requirements outlined in NJDEPE Division of Water Resources Technical Guidance Document and Field Sampling Prodecure Manual. Samples collected will be delivered to N.J. Certified Laboratory for analyses. The soil sampling tasks are discussed in the following Site Assessment Plan.

7. BACK FILL OF EXCAVATION

After testing is complete, the tank void will be back-filled with clean, inert backfill material to current grade. If determined on site to be necessary, the excavation will be lined with plastic liner to segregate clean fill in tank void from surrounding host soils for future remediation.

TANK DECOMMISSIONING PLAN

1. GENERAL SCOPE OF WORK

Allied Builders Supply Co. has contracted with JCB Environmental Contractors to decommission, via removal, (1) 1000- gallon UST which contains unleaded gasoline. Tri-State Environmental Consultants, Inc. (TEC) has been subcontracted to perform all Site Assessment services. This site is located at 101 West Elizabeth Avenue in Linden, NJ.

2. SITE PREPARATION

As a safety precaution all ignition sources will be removed from the excavation site. Safety and protective equipment will be staged on site. Utility lines will be marked out to prevent hitting them during excavation activities. Tank product level will be verified prior to UST decommissioning activities.

3. TANK CLEANING PROCEDURE

Following API 1604 recommended practice for "Removal and Disposal of Used Underground Petroleum Storage Tanks":

A. Excavation of soil on top of tank exposing upper section of U.S.T.

B. Drain all piping back to tank and disconnect.

C. Render tank vapor free.

D. Plug all openings except vent.

E. Contractor will, if necessary, cut access hole in tank to allow entry for cleaning.

Following the removal of the tank from the excavation and completion of the soil screening operations, field tests will be performed to further evaluate if discharges have occurred. In the event that free product is present when the tank is removed, field testing will be implemented to ascertain the extent of contaminated soils.

Field testing will consist of the soil/water agitation method to determine if dissolved product is present within the soils. In addition, the field sorption test will be utilized to determine if free product is present within the soils.

Task 2: Soil Sampling and Analyses

Soil sampling and analyses will be performed whether or not evidence of a discharge from the tank is present. In the event that a discharge did occur soil sampling and analyses will be performed following the removal of impacted soils to confirm that all contaminated soils have been successfully removed from the tank area.

Soil sampling and analyses will be performed on soil samples collected at 5-foot intervals from the tank bed. It is anticipated that up to three soil samples will be collected and tested for PP VO+10. In the event that any of the soil samples collected from the gasoline UST beds indicate any contamiansts above NJDEPE standards, additional soil "hotspots" will be re-excavated and samples for PP VO+10.

All soil samples will be collected with stainless steel trowels. Prior to sampling and between sampling episodes the trowels will be decontaminated in the following manner:

- washed in a liquinox and water solution
- tap water rinse
- distilled water rinse
-10% nitric acid rinse
-distilled water rinse
- acetone rinse
- air dry
- distilled water rinse

Collected soil samples will be placed into laboratory supplied glassware and then placed in a cooler on ice. Following their collection the soil samples will be immediately transported to the laboratory for analysis.

All analyses will be conducted by a NJDEPE-certified laboratory.

Figure 1 illustrates the proposed soil sampling locations. In the event that any discharges are noted during any part of the Site Assessment activities the NJDEPE Hotline will be immediately notified.

TRI-STATE ENVIRONMENTAL CONSULTANTS

IMPLEMENTATION SCHEDULE

Tank removal activities will commence within two weeks following approval from the NJDEPE. The local fire inspector will be notified 1 week prior to UST removal. A permit will be obtained from the local building department immediately following approval from the NJDEPE. Site assessment activities including soil sampling will commence throughout the UST decommissioning process. Soil samples will be delivered to the laboratory immediately following their collection. It is anticipated that the soil sampling data will be generated in 1-2 weeks follwing receipt by the laboratory. The Closure Plan Implementation Summary Report will be produced one week following receipt of the laboratory data analyses.

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A

REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?
☐ YES ☑ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)
_____ Other (please specify)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

If NO, please complete the remainder of this form and return to this office.

SECTION B

MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?
☐ YES ☑ NO
If Yes, does the secondary containment system comply with all provisions of these regulations?
☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?
☐ YES ☑ NO
If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☑ NO
If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☑ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

Loyal Insurance / Brovell, Farmer, Walker & Kino Agency — Carrier/Issuing agency

9, 4, 92 — Date Effective

N-SP-214064-000 — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

*** ANNUAL CERTIFICATION ***
UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Applicability and Compliance
Registration and Billing Section
1-800-722-TANK

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO
2. Facility Location: 107 WEST ELIZABETH AVE (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   00254 (BLOCK) 0010 (LOT)
3. Owner's mailing address: P.O. BOX 3817 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 070830817 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): AL FIORE (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1555 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 002000
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☒ YES ☐ NO

Liability (Type)
Royal INS. (Company/Carrier)
N-SP-21406V-000 (Policy Number)
9/1/93 (Expiration Date)

UST NO. 0129486

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

RE: Confirmation Report
101 West Elizabeth Avenue
Linden, Union County, New Jersey
Block 254, Lot 10
Case No. 93-6-24-1425-2

Gentlemen:

This firm represents 101 West Elizabeth Avenue Corporation, the owner of the above-referenced property, in connection with environmental matters. On Thursday, June 24, 1993, a 2,000 gallon gasoline underground storage tank ("UST") was removed by JCB Environmental Contractors, Greenbrook, New Jersey, pursuant to an NJDEPE approved Closure Plan. At the same time, a 500 gallon #2 fuel oil UST was closed in place. The property was formerly used as a lumber yard.

During excavation activities, a few small holes were observed on the side of the 2,000 gallon gasoline UST and small streaks of contamination were observed in the surrounding soil. On this basis, the NJDEPE non-emergency hotline was notified of the condition. Pursuant to N.J.A.C. 7:1E-5.8, kindly accept this

letter as 101 West Elizabeth Avenue Corporation's Confirmation Report.

1. The condition was reported by the subsurface evaluator, Mr. Steven Hambos of Tri-State Environmental Consultants, 389 Mayer Court, Ridgefield, New Jersey.

2. The owner or operator of the property at the time the condition occurred was 101 West Elizabeth Avenue Corporation.

3. The source of the condition is the 2,000 gallon gasoline UST. 101 West Elizabeth Avenue Corporation intends to take soil samples to confirm that the 500 gallon #2 fuel oil UST is not a source.

4. The chemical abstract service number for gasoline is 8006-61-9.

5. The quantity of the hazardous substance involved is unknown. Approximately 70 tons of soil have been stockpiled on-site. 101 West Elizabeth Avenue Corporation is in the process of arranging for the proper disposal of this soil.

6. The date on which the condition began is unknown. However, the condition was discovered on Thursday, June 24, 1993 and reported to the NJDEPE's non-emergency hotline.

7. In order to evaluate these issues, 101 West Elizabeth Avenue Corporation has retained Edward N. Sailer of Sailer Environmental, Inc., 724 Boston Post Road, Madison, Connecticut 06443, telephone number (203) 245-7744.

If you have any questions concerning this matter or require additional information, please do not hesitate to contact me.

Very truly yours,

BRESSLER, AMERY & ROSS

Re: Allied Building Supply Co.
101 West Elizabeth Avenue
Linden, Union County, New Jersey
SEI Project No. 105-01

Dear Ms. Connors:

On July 26, 1993, Sailer Environmental, Inc. (SEI) inspected two underground tank excavations at the above referenced property, and collected soil samples from the former location of a 2,000 gallon underground storage tank. This letter report sets forth SEI's observations on that date, the sampling procedures that were employed, and a discussion of the sampling results.

BACKGROUND

Two underground storage tanks (USTs) were previously closed by JCB Environmental Contractors (JCB). These tanks were a 2,000 gallon UST that contained gasoline, and a 500 gallon #2 fuel oil tank. We understand that the 2,000 gallon UST was closed by removal in accordance with an Underground Storage Tank Closure Plan dated May 1993, prepared by Tri-State Environmental Consultants, Inc. (Tri-State). A copy of the Tri-State Closure Plan is provided as Attachment 1. The 500 gallon UST was closed by in place abandonment, because it is located beneath the office building on site.

At the time that the tanks were closed, JCB and/or Tri-State determined that both tanks were leaking, and reported the leaks to the NJDEPE Hotline. This verbal notification was subsequently confirmed in a July 22, 1993 letter to the NJDEPE from environmental counsel for Allied Building Supply Co. A copy of that letter is provided in Attachment 2.

SEI was contracted to collect soil samples from the open tank graves to determine the level of contamination, if any, that remained in the soils.

SOIL SAMPLING

On July 26, 1993, SEI inspected the two tank graves in preparation for soil sampling. It was determined that soil samples could not be obtained from the 500 gallon UST that had been abandoned in place because the excavation had collapsed, and access to the open end of the tank could not be gained. The 2,000 gallon UST grave, located immediately north of the warehouse, was found to be in stable condition and was sampled.

The 2,000 UST grave was approximately 23' by 10' in area, and was approximately 11.75' in depth at the center. Depth to standing water in the excavation was measured at 11.25', and is believed to represent the water table. A sketch of the tank grave is provided in Attachment 3.

Seven soil samples, including one duplicate sample were collected from the tank grave in accordance with the sampling procedures set forth in the New Jersey Department of Environmental Protection and Energy (NJDEPE) Technical Requirements for Site Remediation (NJAC 7:26E-1 et seq.). All samples were screened with an HNu model HW-101 photoionization detector equipped with a 10.2 ev probe. The results of the screening are provided in Attachment 3.

Four side wall samples were collected at approximately 0.5' above the water table elevation. These samples were numbered 105-T1-01, 105-T1-02, 105-T1-03, and 105-T1-04, and their locations are shown on Attachment 3. These samples were collected from a 0.5' -1.0' increment through the side wall. Two samples (105-T1-05 and 105-T1-06) were collected from the excavation floor at the 0 - 0.5' interval above the water table. A duplicate sample 105-T1-D was taken of sample 105-T1-01. A Trip Blank (105-T1-TB1) was provided for Q uality Control/Quality Assurance (QA/QC) for the VOA+10 samples. A Field Blank was not provided by the laboratory. The decision was made to proceed without this blank.

The samples were submitted to International Hydronics Corporation, and analyzed for volatile organic compounds calibrated for xylene with a library search (VOA +10), and lead in accordance with the requirements set forth at Table 2-3 (25 NJR 2447).

SAMPLE RESULTS

International Hydronics Corporation's analytical report for these samples is provided in Attachment 4. A summary of the VOA sample results is provided below.

TABLE 1-1
SUMMARY OF VOA SAMPLE RESULTS[1] (mg/kg)

SAMPLE NUMBER	TOLUENE	ETHYLBENZENE	XYLENE (Total)
105-T1-01	0.33	ND	47
105-T1-02	ND	ND	ND
105-T1-03	ND	ND	ND
105-T1-04	ND	ND	ND
105-T1-05	32	4.7	48
105-T1-D	6.2	7.5	194
105-T1-TB1	ND	ND	ND

The sample results indicate that the soils in the 2,000 gallon UST grave meet the current NJDEPE Soil Cleanup Criteria[2], including the Impact to Groundwater Soil Cleanup Criteria, for all parameters except total xylene. The total xylene results for three of the samples meet the Residential Direct Contact, and Non Residential Direct Soil Cleanup Criteria, but exceed the Impact to Groundwater Soil Cleanup Criteria of 10 mg/kg.

The sample results for total lead indicate that the lead levels in the soils are well below the current NJDEPE Soil Cleanup Criteria.

---

[1]Trichloroflouromethane and methylene chloride were also reported in these sample results at or near the Quantitation Limit. These compounds are common laboratory contaminants and are not reported in the table. Tentatively Identified Compounds (TICs) were also reported in some samples. See Attachment 4 for a listing of TICs reported.

[2]The "Soil Cleanup Criteria" used in this evaluation is the criteria attached to a January 20, 1993 Memorandum of Karl Delaney, Director of the Division of Responsible Party Site Remediation, to Site remediation Program Staff.

DISCUSSION

Based on the above sample results, the NJDEPE may require the installation of a groundwater monitoring well within the tank grave to determine impact to groundwater. Depending on the results of the groundwater sampling, NJDEPE could require a full Remedial Investigation. However, because this site is proposed to be used as a parking area, and because there is a reasonable probability that off-site potable wells are not, and will not be impacted, we recommend that this matter be assigned to an NJDEPE BUST Case Manager for review before proceeding at risk. We also recommend that the 500 gallon UST access be re-excavated to allow sampling to assess the impact of that tank on the surrounding soils.

Should you have any questions or require any additional information, please call me.

Sincerely,

SAILER ENVIRONMENTAL, INC.

Edward N. Sailer
President

RE: Allied Building Supply Co.
101 West Elizabeth Avenue
Linden, Union County, New Jersey
Case No. 93-6-24-1425-2

UST # 0129486

Dear Mr. Miller:

This firm represents Allied Building Supply Co. ("Allied") in connection with environmental matters. Please be advised that a 2,000 gallon gasoline underground storage tank ("UST") and a 500 gallon #2 fuel oil UST were recently removed from the above-referenced property. During the removal of the 2,000 gallon gaso line UST, it was determined that the tank had been leaking and notification was made to the NJDEPE Hotline. Enclosed please find the soil sampling report prepared by Sailer Environmental, Inc., as well as the analytical data, in connection with the excavation of the 2,000 gallon gasoline UST. Allied is performing additional delineation activities to determine the extent of the contamination.

Please be advised that a sale of the property is pending. Therefore, we request that a case manager be assigned so that Allied may move forward with this matter as quickly as possible.

If you have any questions concerning this matter or require additional information, please do not hesitate to contact me. Thank you for your consideration.

Very truly yours,

BRESSLER, AMERY & ROSS

RETURN RECEIPT REQUESTED

Re: Allied Building Supply Co., Linden, Union County, UST# 0129486
C93-2092, Case# 93-06-24-1425

Dear Ms. Connors:

On June 24, 1993, the New Jersey Department of Environmental Protection and Energy (Department) received notification of a discharge of hazardous substances from the above referenced facility which is regulated under the Underground Storage of Hazardous Substance Act (N.J.S.A. 58:10A-21 et seq). The Department received a remedial investigation report from Sailer Environmental indicating that the following actions were taken in compliance with our requirements.

One 2,000 gallon gasoline UST was removed, while one 500 gallon #2 heating oil UST was abandoned-in-place. There was a release from both UST's, and the Hotline was called. Soil samples were collected from the gasoline UST, but none were collected from the heating oil UST.

I. Deficiencies/Requirements

Based upon a review of the remedial investigation completed to date, the following deficiencies shall be addressed as required below.

A. Remedial Investigation

1. Soil

Three of the seven soil samples, (01, 05, and T1-D), collected from the gasoline UST excavation exceed the Department's current cleanup goal for xylenes. These sample areas shall be further delineated, and remediated to below the Department's current cleanup goal of 10 ppm. Since groundwater was encountered, only horizontal delienation is necessary. Sampling also needs to be conducted around the heating oil ust. Samples may be collected via borings which can be installed around the UST. These samples shall be analyzed for TPHC, with 25% of the results which exceed 1000 ppm, (minimum of 1), being further analyzed for VO+10. The number of borings to be installed shall be a minimum of four. Please follow the Technical Rules for Site Remediation for further guidance.

If any soil is disposed of off-site, please supply the documentation as to the final destination of these soils. Include all waste classification analysis, as well as all receipts/manifests.

2. Ground Water

One monitoring well shall be placed within 10 feet and downgradient of each of the UST's. The well near the gasoline UST shall be sampled for VO+10, calibrated for TBA and MTBE, using EPA method 624. The well near the heating oil excavation shall be analyzed for VO+10 and B/N+15, the B/N analysis shall follow EPA method 625. Please submit a copy of the well permit numbers, as well as "as built diagrams". Also include the soil logs for the wells.

B. Quality Assurance

1. All data submitted shall conform to the "Reduced Laboratory Deliverables Format" consistent with the guidance contained in the rule "Technical Requirements for Site Remediation", N.J.A.C. 7:26E.

C. General

1. **Notify the assigned case manager at least 14 calendar days prior to implementation of all field activities.**

2. After remediation of the soil and ground water has been completed the responsible party is requested to submit the total capital costs involved in performing and confirming a cleanup as well as the costs associated with the proper disposal of all wastes generated during the cleanup. Costs to be reported include monitoring systems, equipment and mobilization costs; operational and maintenance costs, including all labor, utilities and repairs; consulting and labor costs, and sample costs; all disposal costs, including transport, waste transfer and facility tipping fees as well as regulatory review fees.

II. Reporting Requirements

A written report (RI Addendum Report) shall be submitted to this Bureau at the above address, within 90 days of receipt of this letter, specifying all activities conducted in compliance with the requirements listed in this letter. To facilitate processing, please reference the Case number and UST number in the report. In addition, if soil or ground water contamination is present, a Remedial Action Workplan shall be submitted with RI Addendum Report. If no further remediation is required for the site, a proposal for no further action shall be submitted.

III. Certification

It is important to note that effective April 25, 1992, all persons performing tank services must be certified per N.J.S.A. 58:10A-24.1-8. All work related to any tank service shall now be conducted by, or under the immediate on site supervision of an individual certified in the activity being conducted. All documents (permit applications, reports, proposals) submitted to the Department shall be prepared and signed by a certified individual.

IV. Technical Requirements

The "Technical Requirements for Site Remediation" rules (N.J.A.C. 7:26E) appeared in the June 7, 1993 New Jersey Register and became effective on July 1, 1993. These rules contain the minimum technical requirements concerning the environmental investigation

and remediation at contaminated sites or sites at which contamination is suspected. These rules are being used as the Department's primary technical document, replacing the Division of Responsible Party Site Remediation's Remedial Investigation Guide, the ECRA Cleanup Plan Guide, the Bureau of Underground Storage Tanks' (BUST) Scope of Work document (and appendices) and the BUST Technical Guidance Document. A copy of these rules can be obtained from your local library or through the Office of Administrative Law Publications at (609) 588-6606.

It should be noted that technical requirements are included in subchapters 7, 8 and 9 of the regulations implementing the Underground Storage of Hazardous Substances Act (N.J.A.C. 7:14B-1-13 and 15). The responsible person(s) that are conducting an environmental investigation/remediation should be following the "Technical Requirements for Site Remediation" to accomplish the investigation. This will allow for consistent evaluation of any discharges and potential impacts.

V. Cleanup Criteria

The Department's most recent general guidance on contaminant cleanup criteria can be found in the April, 1993 edition of the "Site Remediation Newsletter". It must be remembered, however, that the actual cleanup goal at a particular site is determined by the Department on a case-by-case basis and may be different than that in the above referenced newsletter. This variation may be due to many factors, including, site specific human health and environmental exposure pathways, the presence of site contaminants not addressed in the newsletter, and site specific physical characteristics. In case specific situations, when the cleanup criteria is modified from one previously established for that specific site, the Department will make every effort to expeditiously notify the responsible party. Please consult the Case Manager listed below to discuss any modifications which may impact upon your remedial actions.

If the person conducting a cleanup does not wish to remediate a contaminated site consistent with the newsletter, they shall submit a proposal to their Case Manager listed below that details the site specific circumstances and technical rationale for cleanup goals on a case-by-case basis.

Please note that the Ground Water Quality Standards (N.J.A.C. 7:9- 6) have been adopted and appeared in the February 1, 1993 New Jersey Register. This rule adoption may impact upon the requirements for ground water remediation and soil cleanup (i.e. where the soil may contribute contaminants to the ground water above the applicable standards) for a particular site and should be referenced and discussed with the Case Manager listed below.

VI. Compliance

As per N.J.A.C. 7:14B-12.1, the owner and operator of regulated underground storage tanks are joint and severally liable for compliance with these regulations.

Failure to comply with the requirements in this letter may result in the assessment of penalties as provided for by law. Pursuant to the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq, violators are liable for penalties of up to $50,000 per day for each day of continuing violation.

If you have any questions, please contact Timothy Nuss, of the Bureau of Underground Storage Tanks, Tank Management Section, Phase I at (609) 984-3156.

Sincerely,

Kevin F. Kratina, Chief
Bureau of Underground Storage Tanks

BUREAU OF UNDERGROUND STORAGE TANK

RE: Allied Builders Supply
101 W. Elizabeth Avenue
Linden, NJ
UST Case Number: 93-6-24-1425-02

Dear Mr. Nuss:

Please be advised that Mr. Dan Winters of the above-referenced facility originally retained JCB Environmental Excavating (JCB) to decommission (1) 550-gallon heating oil UST and (1) 2,000-gallon gasoline UST. Tri-State Environmental Consultants, Inc. (TEC) was retained by JCB to conduct all environmental Site Assessment activities associated with the decommissioning of the gasoline UST. Following the discover of a larger than expected amount of contaminated soil in the gasoline UST excavation, Mr. Winters fired JCB and hired another consultant to finish the UST decommissioning effort.

The other consultant hired to complete the fieldwork is Sandler Environmental from somewhere in Connecticut. Please note that TEC checked with the NJDEPE and the Bureau of Revenue (Ms. Chrissy Hauck) as to the qualifications of the other consultant that was hired to complete the project. TEC was told, by both the NJDEPE and the Bureau of Revenue, that ***Sandler Environmental is not certified*** by the BUST Program to perform UST decommissioning or environmental Site Assessment activities.

It should be noted that JCB has the disposal manifests for the gasoline UST and for the products removed from both UST's. In addition, these manifests along with the UST Site Assessment Summary Form are needed by the "Department" to complete this case. It should also be noted that because JCB decommissioned both UST's, JCB is the only outfit that can legally sign that section of the UST Site Assessment Summary Form pertaining to tank decommissioning.

The following is a summary of field activities, pertaining to the decommissioning of the two underground storage tanks (UST's) performed at the above-referenced facility. All field work activites were conducted in accordance with the NJDEPE Bureau of Underground Storage Tanks tank decommissioning and environmental site assessment protocols.

On June 24, 1993, JCB began to uncover the 2,000-gallon gasoline UST. TEC entered the site during the excavating of the overlying soils covering the gasoline UST. TEC immediately began to screen the soils with a Photovac Micro-Tip 2000 Photoionization Detector (PID). PID readings ranged from less than 5 ppm to more than 100 ppm, indicating that the overlying soils had been impacted by discharges probably due to overfilling of this UST.

Following the removal of overlying soils, JCB personnel added dry ice to the gasoline UST, while other JCB personnel began to uncover the 550-gallon heating oil UST.

During the removal of overlying soils from the heating oil UST, a concrete pad was discovered lying over the tank. While JCB attemted to break through the concrete with the backhoe, TEC and Mr. Bert Conlan went to the latters shop to bring to the site a jackhammer to break through the concrete pad.

TEC and Mr. Conlan returnrd to the site to find that JCB had 1. broken through the concrete pad immediately overlying the heating oil and 2. uncovered soils overlying this UST. These overlying soils

had been impacted by heating oil due to overfilling of this UST. In addition, JCB discovered a number of holes in the upper section of this UST.

It should be noted that up to this point, TEC was not to be involved with the decommissioning of this UST. However, once a discharge was discovered, it was the responsilbility of JCB to aquire the services of a Certified Subsurface Evaluator to conduct a Site Assessment for the proper decommissioning and environmental Site Assessment of this heating oil UST.

While Mr. Conlan removed additional concrete with the jackhammer, TEC and JCB removed the gasoline UST from the tank excavation. This UST was examined for holes and three holes were initiall discovered at the bottom of the tank. Pictiure #1 show the holes that were spray painted and photographed by TEC. Mr. Winters was present at the site and he was made aware of these holes. Prior to lifting the UST onto the trailer for disposal, three additional holes, located at the bottom of the UST opposite the first group of holes, were discovered by JCB. At this point Mr. Winters and TEC looked inside the tank and confirmed that the additional holes did exist. TEC did photograph these holes from the inside of the UST. Pictures #2 and #3 illustrate the second group of holes.

Following the removal of the UST, soil contamination was present in the UST excavation were the gasoline UST once sat. However, due to the lateness of the day further field work could not be conducted. While JCB transported the gasoline UST to the disposal facility, Mr. Winters and TEC waited for the fire inspector to examine the UST excavations.

On the following day JCB and TEC continued to excavate the gasoline UST excavation. While JCB excavated TEC screened the soils with the PID. PID readings exceeded 1000 ppm, which is not uncommon considering that gasoline was leaking from six holes beneath the tank for an unknown period of time.

It was during these excavating operations that heavy soil contamination was discovered in the soils immediately underlying the former location of the pump island for the gasoline UST. This type of contamination is very common for gasoline pumps are notorious for leaking. Picture #4 illustrates the soil contamination under the pump.

Soil excavating operations continued to a depth of approximately 14-feet below grade. PID screenings of these soils and the presence of strong gasoline odors indicated the continued presence of contamination. At this point TEC called Mr. Winters office to notify him of the severity of the soil contamination in the gasoline UST excavation. When he entered the site TEC gave him the PID and let him observe the PID readings from soils excavated from the UST excavation.

All field work ceased when Mr. Winters became upset with the presence of soil contamination and the size of the excavated soil pile. It should be noted that groundwater was noted at the base of the UST excavation, in an area of high PID readings.

A few weeks ago, JCB observed at the site, that someone had taken the contaminated soil pile and scattered it into smaller piles, in an effort to aerrate the soils. The soil piles are situated on plastic, and are left uncovered and completely exposed to the elements. Pictures #5 and #6 illustrate the smaller, scattered soil piles. Please note that it is illegal to vent contaminated soils without approval from the NJDEPE in the form of a discharge to air permit.

If you have any questions pertaining to information please call me at (201) 941-2056.

Sincerely,

Steve Hambos

RETURN RECEIPT REQUESTED

Re: Allied Building Supply Co., Linden, Union County, UST# 0129486
C93-2092, Case# 93-06-24-1425

Dear Ms. Connors:

On June 24, 1993, the New Jersey Department of Environmental Protection and Energy (Department) received notification of a discharge of hazardous substances from the above referenced facility which is regulated under the Underground Storage of Hazardous Substance Act (N.J.S.A. 58:10A-21 et seq). The Department received a remedial investigation report from Sailer Environmental indicating that the following actions were taken in compliance with our requirements.

One 2,000 gallon gasoline UST was removed, while one 500 gallon #2 heating oil UST was abandoned-in-place. There was a release from both UST's, and the Hotline was called. Soil samples were collected from the gasoline UST, but none were collected from the heating oil UST.

I. Deficiencies/Requirements

Based upon a review of the remedial investigation completed to date, the following additional deficiencies were found, and shall be addressed as required below, along with the deficiencies that were noted in the Department's September 23, 1993 letter.

A. General

Please complete the enclosed Site Assessment Summary Form. This form needs to be signed by the Certified Individual who performed the tank decommissioning, and the individual who performed the subsurface evaluation. The form also needs to be signed by the highest ranking person responsible for the facility. It has been found that Sailer Environmental is not certified by the NJDEPE to do work involving underground storage tanks, nor is any individual from Sailer certified to perform tank decommissioning or subsurface evaluation with regard to underground storage tanks in the state of New Jersey. The Department will not accept any further reports from Sailer Environmental, until the company, and individuals within the company who wish to perform work on underground storage tanks become certified. (See Certification Section Below).

II. Reporting Requirements

A written report (RI Addendum Report) shall be submitted to this Bureau at the above address, by December 23, 1993, specifying all activities conducted in compliance with the requirements listed in this letter. To facilitate processing, please reference the Case number and UST number in the report. In addition, if soil or ground water contamination is present, a Remedial Action Workplan shall be submitted with RI Addendum Report. If no further remediation is required for the site, a proposal for no further action shall be submitted.

III. Certification

It is important to note that effective April 25, 1992, all persons performing tank services must be certified per N.J.S.A. 58:10A-24.1-8. All work related to any tank service shall now be conducted by, or under the immediate on site supervision of an individual certified in the activity being conducted. All documents (permit applications, reports, proposals) submitted to the Department shall be prepared and signed by a certified individual.

IV. Technical Requirements

The "Technical Requirements for Site Remediation" rules (N.J.A.C. 7:26E) appeared in the June 7, 1993 New Jersey Register and became effective on July 1, 1993. These rules contain the minimum technical requirements concerning the environmental investigation and remediation at contaminated sites or sites at which contamination is suspected. These rules are being used as the Department's primary technical document, replacing the Division of Responsible Party Site Remediation's Remedial Investigation Guide, the ECRA Cleanup Plan Guide, the Bureau of Underground Storage Tanks'(BUST) Scope of Work document (and appendices) and the BUST Technical Guidance Document. A copy of these rules can be obtained from your local library or through the Office of Administrative Law Publications at (609) 588-6606.

It should be noted that technical requirements are included in subchapters 7, 8 and 9 of the regulations implementing the Underground Storage of Hazardous Substances Act (N.J.A.C. 7:14B-1-13 and 15). The responsible person(s) that are conducting an environmental investigation/remediation should be following the "Technical Requirements for Site Remediation" to accomplish the investigation. This will allow for consistent evaluation of any discharges and potential impacts.

V. Cleanup Criteria

The Department's most recent general guidance on contaminant cleanup criteria can be found in the April, 1993 edition of the "Site Remediation Newsletter". It must be remembered, however, that the actual cleanup goal at a particular site is determined by the Department on a case-by-case basis and may be different than that in the above referenced newsletter. This variation may be due to many factors, including, site specific human health and environmental exposure pathways, the presence of site contaminants not addressed in the newsletter, and site specific physical characteristics. In case specific situations, when the cleanup criteria is modified from one previously established for that specific site, the Department will make every effort to expeditiously notify the responsible party. Please consult the Case Manager listed below to discuss any modifications which may impact upon your remedial actions.

If the person conducting a cleanup does not wish to remediate a contaminated site consistent with the newsletter, they shall submit a proposal to their Case Manager listed below that details the site specific circumstances and technical rationale for

cleanup goals on a case-by-case basis.

Please note that the Ground Water Quality Standards (N.J.A.C. 7:9- 6) have been adopted and appeared in the February 1, 1993 New Jersey Register. This rule adoption may impact upon the requirements for ground water remediation and soil cleanup (i.e. where the soil may contribute contaminants to the ground water above the applicable standards) for a particular site and should be referenced and discussed with the Case Manager listed below.

VI. Compliance

As per N.J.A.C. 7:14B-12.1, the owner and operator of regulated underground storage tanks are joint and severally liable for compliance with these regulations.

Failure to comply with the requirements in this letter may result in the assessment of penalties as provided for by law. Pursuant to the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq, violators are liable for penalties of up to $50,000 per day for each day of continuing violation.

If you have any questions, please contact Timothy Nuss, of the Bureau of Underground Storage Tanks, Tank Management Section, Phase I at (609) 984-3156.

Sincerely,

Kevin F. Kratina, Chief
Bureau of Underground Storage Tanks

Re: Allied Building Supply Co.
Case #93-6-24-142502

Dear Mr. Nuss:

I am in receipt of a letter dated January 13, 1994 sent from Steve Hambos to you. As you know, a dispute exists between Allied and Mr. Hambos concerning the services performed at the Allied property. For this reason, Mr. Hambos was removed from the job. Accordingly, he has no authority or right to contact you regarding this matter.

Further, pursuant to DEPE regulations, Mr. Hambos has no right to retain the generator's copy of the manifest. Simply put, it appears that he is attempting to extort funds from Mr. Winters by holding the manifests.

I will contact you to discuss this matter.

Very truly yours,

David W. Reger

Case No. 93-06-24-1425

Dear Mr. Nuss:

Kindly accept this letter as Allied Building Supply Co.'s request for a three week extension to submit the Remedial Investigation Addendum Report requested by the Department. We are in the process of reviewing this report and anticipate that it will be submitted to the Department by February 14, 1994.

Thank you for your consideration in this matter.

Very truly yours,

BRESSLER, AMERY & ROSS

1.0 INTRODUCTION

This Remedial Investigation Addendum Report summarizes the following activities which have taken place at the Allied Building Supply Company site at 101 West Elizabeth Avenue, Linden, New Jersey:

- Gasoline UST removal in June 1993.
- Gasoline UST excavation site assessment conducted in July 1993.
- Soil boring investigation and installation of one monitoring well in August 1993.
- Installation of three additional monitoring wells for contaminant delineation, soil boring sample collection from former gasoline tank excavation, post excavation soil sampling from heating oil UST excavation, and collection of soil samples from the soil pile associated with the gasoline tank excavation, to evaluate soil quality for disposal or reuse options in November 1993.
- A well search for potable wells within a one-mile radius of the site.

The well search has been ordered but not yet received, and will be forwarded to the agency when it has been received. Due to extreme weather conditions and snow cover, the elevation of the well casings have not yet been surveyed; this activity should be completed the week of 2/18/94 and the Form Bs will be submitted under separate cover.

2.0 PREVIOUS INVESTIGATIONS

2.1 Tank Closure Activities

The gasoline tank was removed on June 24, 1993 in accordance with an approved closure plan submitted by **Tri-State Environmental Consultants, Inc.** in Fort Lee, New Jersey in May 1993. The tank was removed by **JCB Environmental Contractors** of Greenbrook, New Jersey. A few small holes were noted in one side of the tank and small streaks of visibly impacted soil were noted. The Environmental Hotline was called and a discharge reported (Case No. 93-06-24-1425-2).

Approximately 70 tons of soil was removed during the tank removal and stockpiled onsite. A confirmation report was sent by **Bressler, Amery & Ross,** attorneys for the owner.

2.2 Investigation of Tank Grave

On July 26, 1993 soil samples were collected from the tank grave by **Sailer Environmental Incorporated** of Madison, Connecticut. Four side wall samples, two floor samples, and one duplicate sample were collected from the tank grave. Sample results are presented in Table 1, and sample locations are shown on Figure 1.

Based upon the analytical results from the soil samples, only two samples exceeded soil cleanup criteria for only one parameter, total xylenes, by a marginal amount. The report recommended installation of a ground water monitoring well.

2.3 Soil Boring/Well Installation

Three soil borings and one monitoring well were installed at the site on August 30, 1993 under the direction of **American Resource Consultants** of Doylestown, PA. Soil samples were collected from each soil boring and analyzed for volatile organic compounds. Results are summarized in Table 2, and boring locations are shown on Figure 2. A ground water sample was collected from the well on September 3, 1993.

The only soil sample exceeding the NJDEPE proposed soil "impact to ground water" cleanup guidelines was at the water table in well MW-1, and only exceeded the cleanup criteria for xylene (10 mg/kg). No other sample in the vicinity of the tank reported any exceedences of cleanup criteria, and the report recommended no further action for soils. The ground water sample reported anomalous levels of gasoline constituents.

3.0 FIELD ACTIVITIES

Field activities for this investigation included the following tasks:

Task 1 - Installation of Ground Water Monitoring Wells

Task 2 - Collection of Soil Samples

Task 3 - Collection of Ground Water Samples

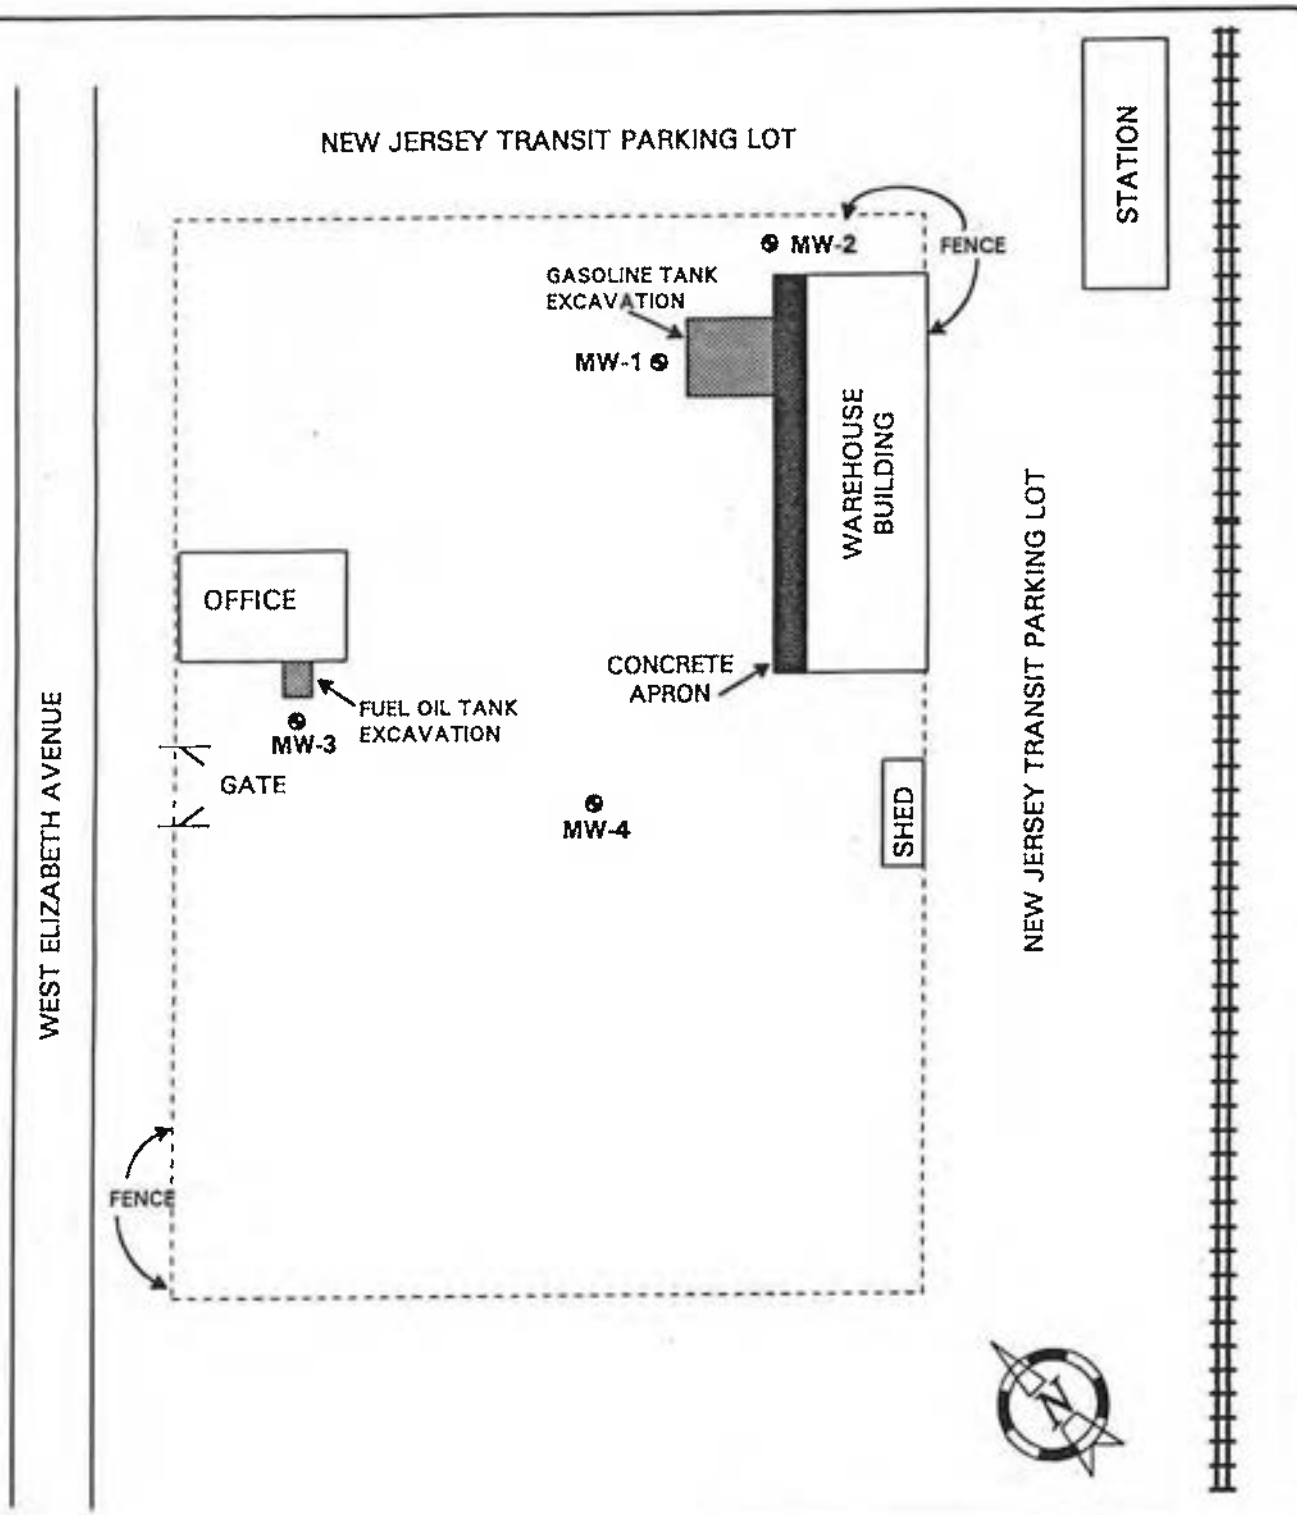
Details of each task are presented in the following sections.

3.1 Task 1 - Installation of Ground Water Monitoring Wells

Three 4" diameter ground water monitoring wells designated as MW-2, MW-3 and MW-4 were installed at the **Allied** site on November 19, 1993. The monitoring wells were installed utilizing a truck mounted air rotary drilling rig operated by **Summit Drilling Company** and supervised by a **Vectre Corporation** hydrogeologist. Figure 3 is a site plan depicting the location of the newly installed wells, as well as existing well MW-1 (installed in August 1993 by a previous consultant). Well logs and copies of the well permits are provided in Appendix A.

Borings for monitoring wells MW-2 and MW-4 were advanced to a depth of 20 feet below grade, and well MW-3 was advanced to a depth of 15 feet below grade. Drill cuttings were field screened with a ThermoEnvironmental Model 580B organic vapor meter (OVM) utilizing a photoionization detector. No OVM readings above zero were noted in any well.

After drilling to the appropriate depth the wells were completed in accordance with **NJDEPE** guidance documents and specifications. Each well was constructed with 4-inch diameter PVC solid casing and 0.020-inch slotted well screen. Each well was developed with a bailer and completed with a flush-mounted manhole and locking cap. Well construction details are presented in Appendix A.



SITE PLAN		
ALLIED BUILDING SUPPLY 101 WEST ELIZABETH AVENUE LINDEN NEW JERSEY		
NOT TO SCALE		
FIGURE NUMBER 3	PROJECT NUMBER SEL-V1	VECTRE Corporation

Subsurface materials consisted of seven to nine feet of red silty clay, overlying a fine to medium-grained sand varying in thickness from three to seven feet, underlain by red silty clay to the bottom of the hole. Well MW-3 was the most productive well, due to the thickest sand unit and shallowest water table. Wells MW-2 and MW-4 exhibited slow recharge characteristics, due to a lack of saturated thickness in the sand unit in MW-2 and a thinner sand unit in MW-4. Based upon purge rates during sampling, well MW-1 also has a relatively slow recharge rate.

Based upon local topography and surface hydrology, ground water flow is inferred to be southwest, towards Peach Orchard Brook. Well MW-2 was installed upgradient, well MW-3 was installed to assess the heating oil tank, and well MW-4 was installed to assess downgradient ground water conditions.

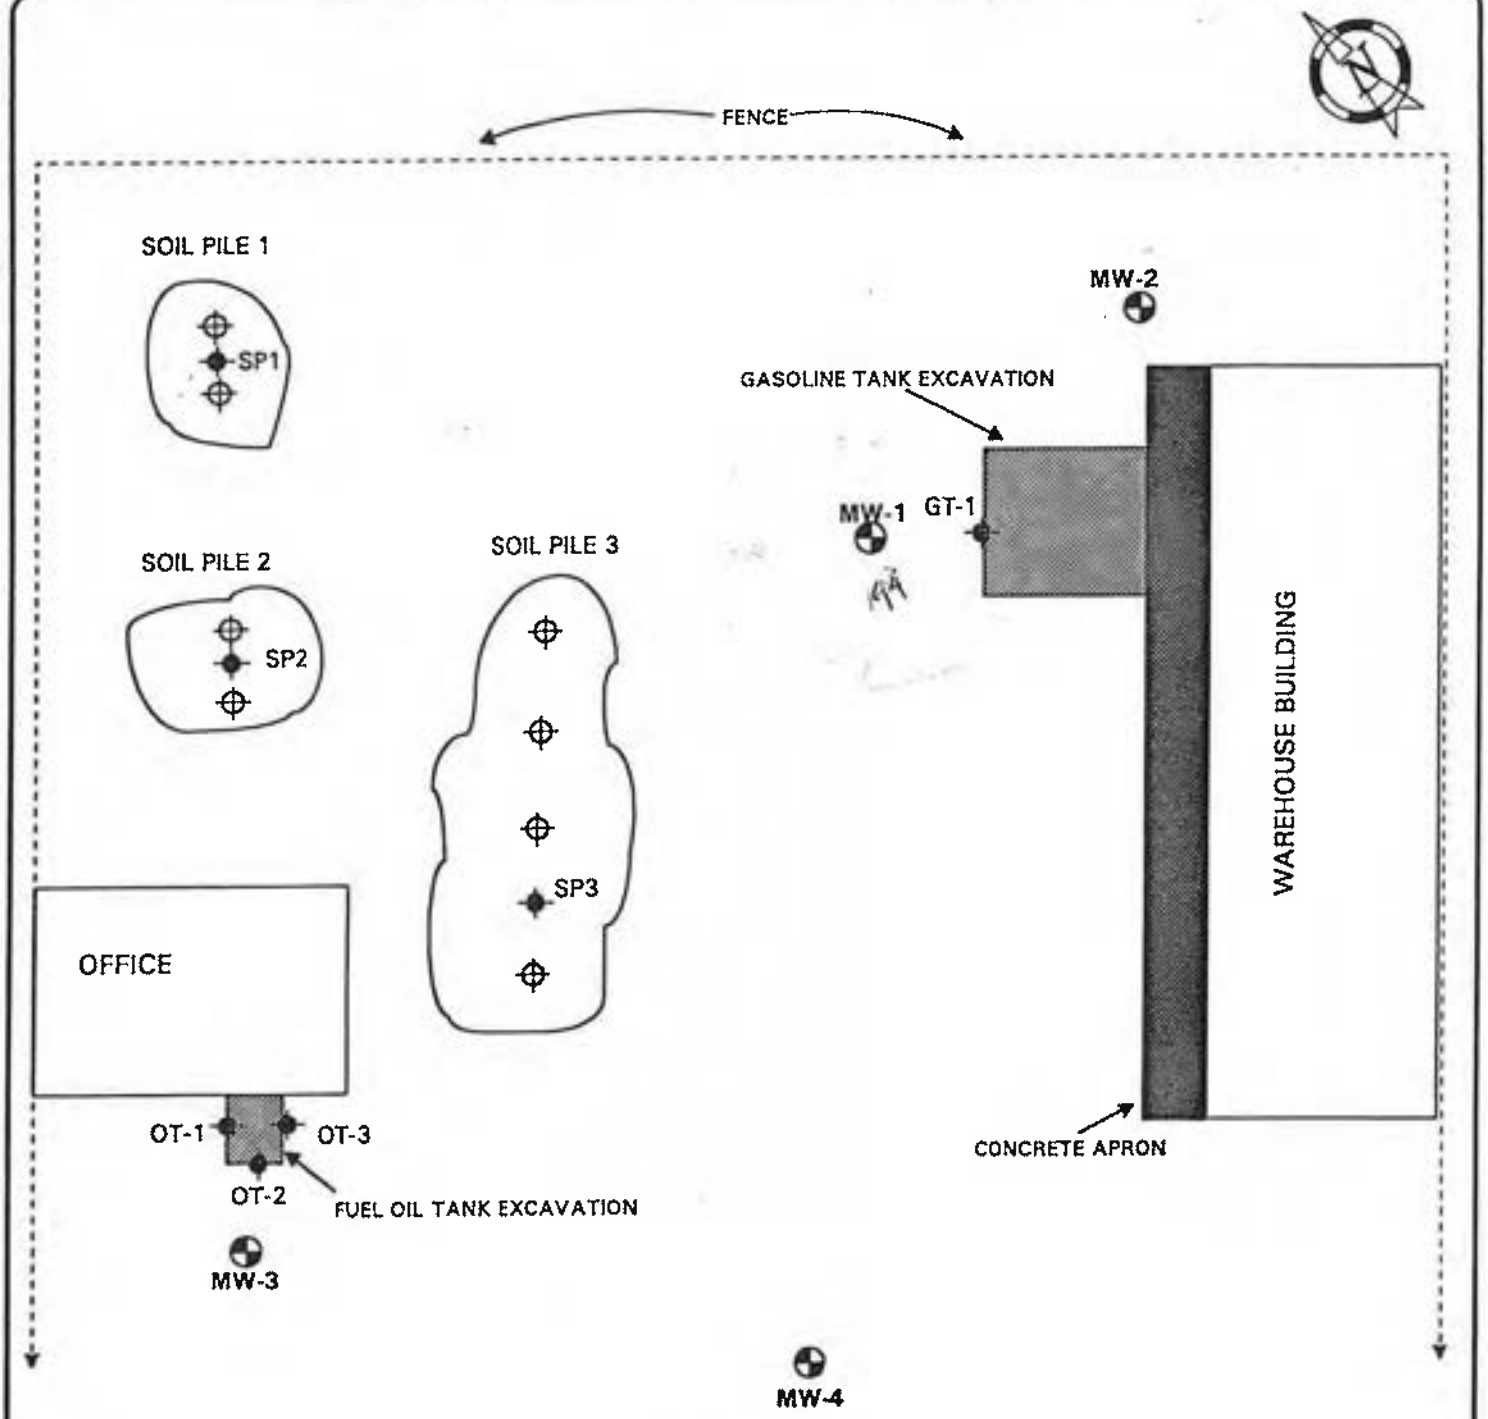
3.2 Soil Sample Collection

Soil samples were collected on November 24, 1994. A total of seven soil samples plus a field blank were collected. Soil sample locations are shown on Figure 4.

Soil Pile Samples

Soil excavated during removal of the gasoline tank was accumulated in three distinct piles at the **Allied** site. Location of the piles is shown on Figure 4. Soil pile #1 (sample SP1) is approximately 20 yd^3, soil pile #2 (sample SP2) is approximately 10 yd^3, and soil pile #3 (sample SP3) is approximately 45 yd^3 in volume. Each soil pile is approximately two to three feet high over most of its area, and SP1 is approximately four feet high at its highest point. The excavated material was generally sandy, with some clay, and concrete and asphalt pieces mixed in.

Each pile was screened with an OVM to identify the presence of organic vapors. Holes were dug using a shovel through the depth of the pile at several locations. No OVM readings above zero were recorded, and no odor or discoloration was observed. Screening locations are shown on Figure 4.



KEY

- FIELD SCREENED PROFILE
- SAMPLE LOCATION

SOIL SAMPLING LOCATIONS		
ALLIED BUILDING SUPPLY 101 WEST ELIZABETH AVENUE LINDEN NEW JERSEY		
NOT TO SCALE		VECTRE™ Corporation
FIGURE NUMBER 4	PROJECT NUMBER SEL-V1	

Because field screening procedures did not identify contaminated areas and could not be used to bias the sample locations, a soil sample was collected from each pile at a central location in the thickest section of each pile, to minimize the possibility of collecting samples that had been subjected to intensive weathering and volatilization.

Soil samples for laboratory analysis were retrieved directly from the soil pile with a decontaminated stainless steel trowel by a **Vectre** geologist wearing clean disposable latex gloves. Prior to collection of soil samples, the sampling trowel was thoroughly cleaned and decontaminated using the following procedures:

. Device washed with laboratory cleaner and water
. Device rinsed 3 times with distilled water
. Device rinsed with reagent grade methanol and allowed to dry
. Device rinsed with distilled water
. Device allowed time to dry

The samples were stored in a cooler at approximately 4° C and transported to the laboratory. Samples from the soil piles were analyzed for volatile organic compounds +10 peaks using EPA Method 8240. Analytical results are presented in Section 4.

Heating Oil Tank Excavation Soil Samples

Three samples were collected from the excavation which formerly contained a 550-gallon heating oil tank for the office building on site. Samples were collected from the sidewalls of the excavation, approximately six inches above the water table. Each sample was collected from approximately six to eight inches into the sidewall, to avoid sampling material that was intensively weathered. The samples were comprised of a reddish silty clay. Each sample was collected with a trowel, labeled, and handled as described above. The samples were analyzed for total petroleum hydrocarbons using EPA Method 418.1. Analytical results are presented in Section 4.

Tank Grave Soil Sample Collection

A soil sample was collected from the location of former sample 105-T1-D. The sample was collected approximately 0.5 feet above the water table, using a long-handled soil trier. The sample submitted for analysis was collected from approximately eight to ten inches in the wall, to mitigate the effect of weathering in the open excavation. The sample was comprised of red silty clay. The sample was labeled GT-1 and submitted to a laboratory for analysis of volatile organics plus 10 peaks using EPA Method 8240.

3.3 Ground Water Sample Collection

Groundwater samples were collected from all four monitoring wells on December 7, 1994. Each well was purged at least 3 well volumes using a centrifugal pump, with the exception of MW-2, which was purged 91% of three volumes due to slow recharge. Depth to water and purging data are presented in Table 3.

After purging, each well was sampled using a new, disposable PVC bailer which was used for that well only. The samples were labelled and stored in a cooler at approximatley 4° C for transport to the laboratory. A trip blank and field blank were prepared for quality control/quality assurance and submitted for analysis. All samples were analyzed for volatile organic compounds plus 10 peaks using EPA Method 624. Analytical results are presented in Section 4.

* One foot of water in a 4-inch well equivalent to 0.653 gal

4.0 ANALYTICAL RESULTS

4.1 Soil Sample Results

Soil sample results are summarized on Table 4. A complete laboratory analytical report including QA/QC procedures is provided in Appendix B.

Soil Pile Samples

Analytical results for the soil pile samples reported no target compounds above detection limits. No non-target compounds were reported in samples SP-1 and SP-2, and sample SP-3 reported a total of 0.50 mg/kg non-target compounds.

Heating Oil Tank Samples

Analytical results for the samples collected from the heating oil excavation reported concentrations of total petroleum compounds ranging from 29 mg/kg in OT-1 to 45 mg/kg in OT-3.

Former Gasoline Tank Excavation Soil Boring Sample Results

Analytical results for sample GT-1, collected from the location of previous sample 105-T1-D, reported concentrations of 0.015 mg/kg for total xylenes and 3.95 mg/kg for non-target compounds.

4.2 Ground Water Sample Results

Ground water sample results are summarized on Table 5, and a copy of the laboratory data package is included as Appendix C. No target or non-target compounds were reported above detection limits in monitoring wells MW-2, MW-3, and MW-4. Well MW-1 reported detectable concentrations of benzene, toluene, ethylbenzene, and xylene.

table 4

tab 5

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

Soil Piles

Field screening and analytical results for soil samples collected from the soil piles indicate that no volatile organic compounds were identified in any of the soil piles. Because no compounds were identified above levels of regulatory concern, there are no restrictions on further use of the soil.

Heating Oil Tank Excavation

None of the post-excavation samples collected from the heating oil tank excavation reported concentrations of petroleum hydrocarbons above levels of regulatory concern.

Tank Grave Soil Sample

The soil sample collected from the gasoline tank excavation reported no compounds at concentrations above levels of regulatory concern.

Ground Water

Field screening of drill cuttings and analytical results for ground water samples indicate that none of the three wells installed for this investigation are impacted to any degree by volatile organic compounds. Analytical results for the sample collected from MW-1 report similar levels of BTEX as were reported during an earlier sampling round. Borings conducted in the area during previous investigation reported no soil contamination other than in the borehole converted to MW-1. It is apparent that the problem is very localized, because even in the presence of a transmissive sand no contaminants have been identified in the three other wells installed at the site.

5.2 Recommendations

Soil Piles

As there have been no contaminants detected in the soil piles above levels of regulatory concern, no further action is required and it is recommended that the soil be replaced in the excavation and clean backfill used to restore the site to grade.

Oil Tank Samples

As there have been no contaminants above levels of regulatory concern reported in the oil tank excavation, no further action is recommended beyond restoring to grade.

Tank Excavation

As there have been no contaminants above levels of regulatory concern reported in the resampling of the former soil boring 105-MW1-11 location, no further action is recommended.

Ground Water

The presence of gasoline constituents in MW-1 indicates that a very localized zone of contamination may exist in the immediate area. It is recommended that MW-1 be sampled again in approximately three months to document the natural remediation of ground water in its vicinity through biodegradation and attenuation. It is also recommended that all four monitoring wells be sampled within six months to reconfirm the stability of existing ground water conditions. The ground water samples should be analyzed for BTEX using EPA Method 602.

RE: Well Search Request - 1 Mile Radius
Linden, New Jersey

Dear Mr. Gheen:

Please find attached a USGS topographic map depicting the location for:

Allied Building Supply
101 West Elizabeth Avenue
Linden, New Jersey (Union County)

USGS Coordinates
Latitude - 40° 38' 54" North
Longitude - 74° 13' 57" West

Please forward a 1-mile radius well search at your earliest convenience. A check for $230.00 is enclosed. Thank you for your consideration.

Sincerely yours,
Vectre Corporation

Stephen E. Tappert
Technical Director

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office? * ☐ YES ☐ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complese the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

* TANKS WERE REMOVED IN ACCORDANCE WITH AN UNDERGROUND STORAGE TANK CLOSURE PLAN DATED MAY 1993

X Other (please specify) Tanks Removed, Property Sold

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

N/A

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations? ☐ YES ☐ NO
   If Yes, does the secondary containment system comply with all provisions of these regulations? ☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)? ☐ YES ☐ NO
   If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☐ NO
   If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
   If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☐ NO

N/A

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☐ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☐ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☐ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☐ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☐ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☐ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☐ NO

SECTION D N/A

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

_____ Type

_____ Carrier/Issuing agency

___/___/___ Date Effective

_____ Policy Number

$_____ Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Applicability and Compliance
Registration and Billing Section

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: Allied Building Supply Co.
2. Facility Location: 1011 West Elizabeth Ave. (NUMBER AND STREET)
   Linden (CITY OR MUNICIPALITY)
   Union (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   Block 99254 Lot 00110
3. Owner's mailing address: P.O. Box 13817 (NUMBER AND STREET)
   Union (CITY OR MUNICIPALITY)
   Union (COUNTY) NJ (STATE) 07083 (ZIP CODE)
4. Owner's name: Daniel Winters
5. Contact person (Facility Operator): Daniel Winters (PERSON OR TITLE)
6. Contact telephone number: 908 964 1515 (AREA CODE / CHANGE / NUMBER)
7. Total number of facility underground storage tanks: 0 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): ☐☐☐☐☐☐
9. Status of owner: (mark one) A. ☐ CURRENT B. ☒ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☐ YES B. ☐ NO N/A

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☐ YES ☐ NO N/A

_____ (Type) _____ (Company/Carrier)

_____ (Policy Number) _____ (Expiration Date)

UST NO. 0129486.

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

Re: Review of Remedial Action Workplan
Allied Building Supply
Linden, New Jersey

Dear Mark:

Enclosed for review please find three (3) copies of the Remedial Action Workplan ("RAW") for the above facility. For the reasons outlined herein, I request an expedited review of this matter.

Background

The Allied property is located in the city of Linden adjacent to the railroad's primary right-of-way. It was recently sold to New Jersey Transit for use as a parking lot. In connection with the closure of the facility, an underground storage tank (UST) utilized for the storage of gasoline was removed from the ground. The consultant advised that a few pinholes were identified in the tank. In addition, an odor of gasoline was noted within the excavation. Approximately seventy (70) tons of soil were immediately removed from the pit before post-excavation samples were taken.

A remedial investigation was undertaken by Allied's consultants in order to determine the nature and extent of contamination.

1. Post-excavation soil samples were taken within the excavation pit. Elevated levels of BTEX were identified at the base of the excavation pit approximately at the level of groundwater.

2. Soil borings were installed to determine the lateral extent of soil contamination. The results from this study show that the BTEX contaminants are localized at the location of MW-1.

3. Four monitoring wells were installed at the property. MW-1 was installed at the location of highest soil contamination. Only MW-1 showed evidence of groundwater impact.

Based upon the above results, it is Allied's position that it has delineated the extent of soil and groundwater contamination at the property. Further, given that the impact is extremely localized, Allied's consultant, Vectre Corporation, has recommended a natural attenuation program. I urge the Department to approve this proposal.

Soil Reuse

As noted, approximately 70 tons of soil were excavated in connection with the removal of the UST. This soil was sampled and analyzed by Vectre. The results show that the material meets the Department's residential cleanup criteria. Accordingly, Allied has proposed to reuse this soil by placing it in the excavation pit.

The excavation pit has been open for several months. For safety reasons, it is extremely important that this pit be filled. We request the Department's immediate approval to take such action.

UST Removal

The UST was removed by JCB Environmental Contractors. Due to a dispute that arose between this consultant and Allied, the consultant has been unwilling to prepare a report outlining the specific actions taken in connection with the UST removal. However, the report of Sailer Environmental fully discusses the conditions at the excavation pit shortly after the tank was removed.

A remedial investigation was undertaken by Allied's consultants in order to determine the nature and extent of contamination.

1. Post-excavation soil samples were taken within the excavation pit. Elevated levels of BTEX were identified at the base of the excavation pit approximately at the level of groundwater.

2. Soil borings were installed to determine the lateral extent of soil contamination. The results from this study show that the BTEX contaminants are localized at the location of MW-1.

3. Four monitoring wells were installed at the property. MW-1 was installed at the location of highest soil contamination. Only MW-1 showed evidence of groundwater impact.

Based upon the above results, it is Allied's position that it has delineated the extent of soil and groundwater contamination at the property. Further, given that the impact is extremely localized, Allied's consultant, Vectre Corporation, has recommended a natural attenuation program. I urge the Department to approve this proposal.

Soil Reuse

As noted, approximately 70 tons of soil were excavated in connection with the removal of the UST. This soil was sampled and analyzed by Vectre. The results show that the material meets the Department's residential cleanup criteria. Accordingly, Allied has proposed to reuse this soil by placing it in the excavation pit.

The excavation pit has been open for several months. For safety reasons, it is extremely important that this pit be filled. We request the Department's immediate approval to take such action.

UST Removal

The UST was removed by JCB Environmental Contractors. Due to a dispute that arose between this consultant and Allied, the consultant has been unwilling to prepare a report outlining the specific actions taken in connection with the UST removal. However, the report of Sailer Environmental fully discusses the conditions at the excavation pit shortly after the tank was removed.

Summary

For the reasons outlined above, Allied has characterized this site pursuant to the requirements of the technical regulations. Given the conditions that exist, the appropriate course of action to address the presence of BTEX in MW-1 is a natural attenuation program. We request that the Department approve this proposal.

I request that a case manager be assigned to this matter as quickly as possible in order that the RAW can be reviewed and this case can be resolved.

If you have any questions, please do not hesitate to contact me.

Best regards.

Very truly yours,

David W. Reger

1.0 INTRODUCTION

This Remedial Action Work Plan has been prepared on behalf of Allied Building Supply Company (Allied) under the supervision of David Reger, Esq. of Bressler, Amery & Ross, Morristown, New Jersey. Vectre Corporation (Vectre) completed a remedial investigation and submitted the report to the New Jersey Department of Environmental Protection and Energy (NJDEPE) in February 1994. The report concluded that volatile organic compounds (VOCs) were present at the location MW-1 above NJDEPE's Ground Water Standards (N.J.A.C. 7:9-6).

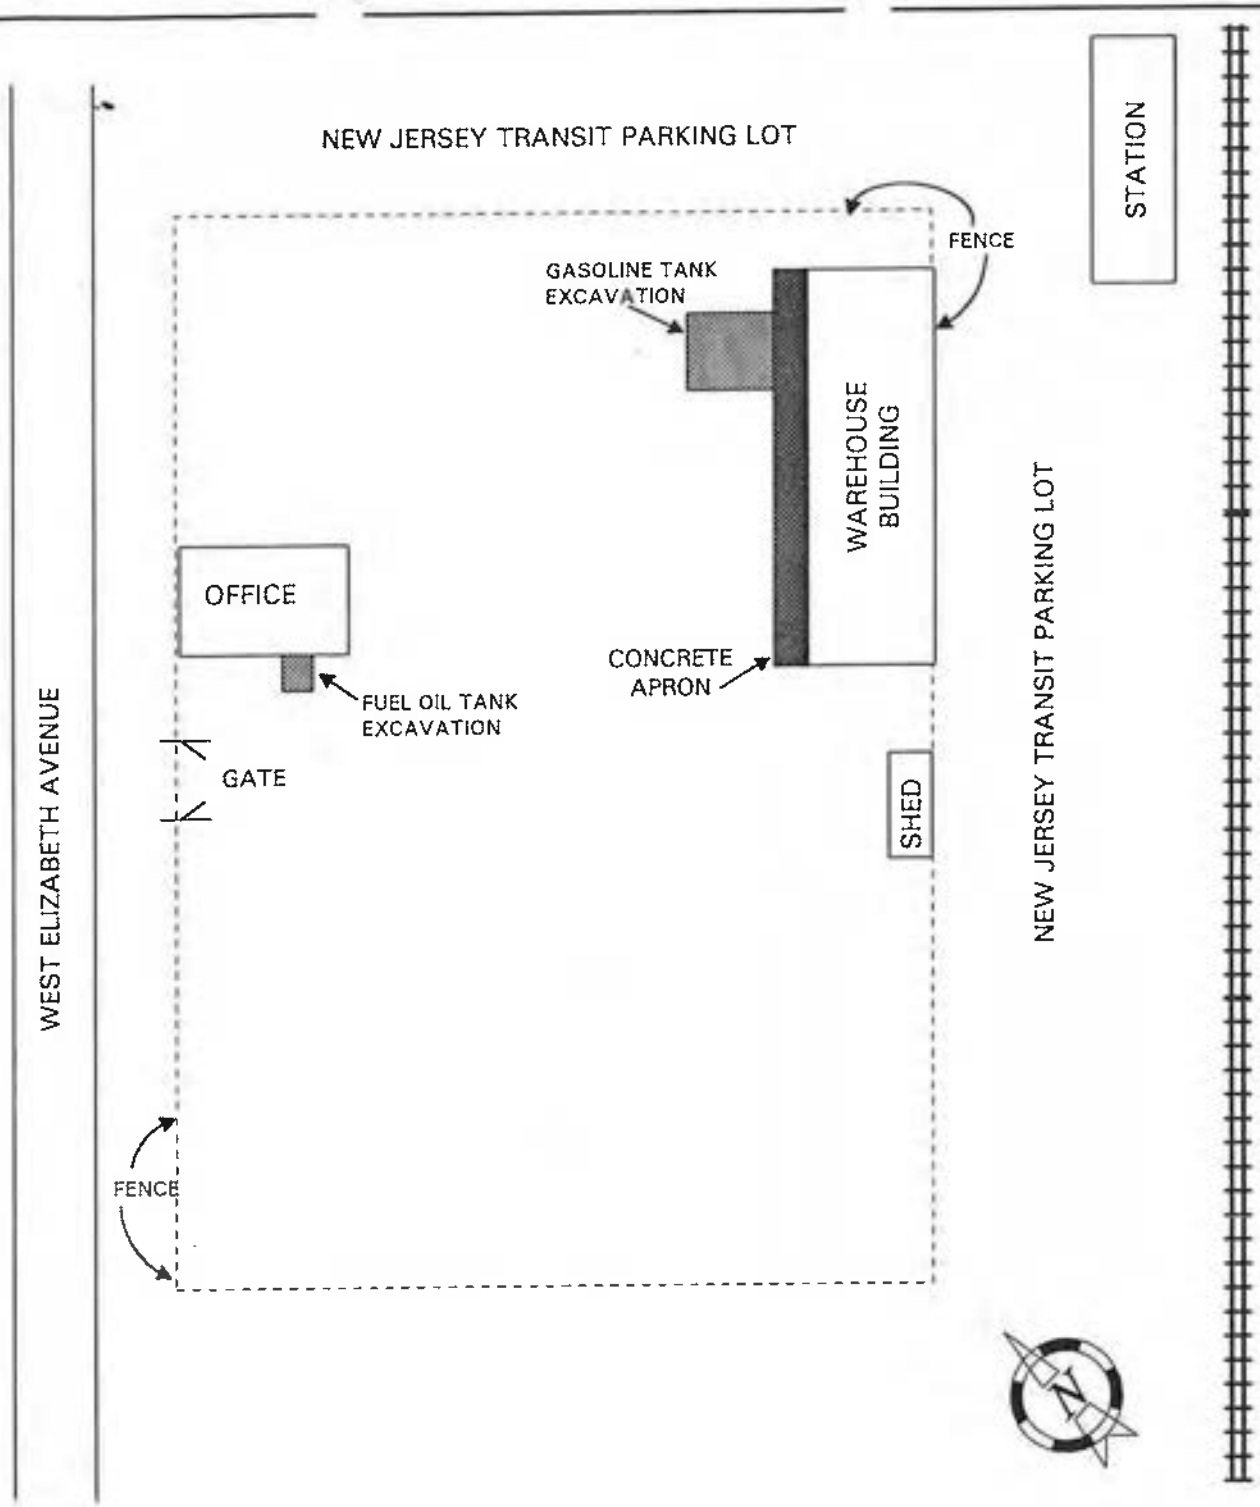
This work plan summarizes our previous investigations and outlines our proposed remedial measure for the site. This work plan was prepared in accordance with the NJDEPE's Technical Requirements for Site Remediation N.J.A.C. 7:26E.

1.1 Site Description

The Allied site is located at 101 West Elizabeth Avenue, Linden, New Jersey. Allied supplied building materials (i.e. lumber, cement and hardware) to both the wholesale and retail markets. The Allied site is located in a commercial area of Linden, New Jersey and is serviced by public water and sewer. Figure 1 is a site map.

1.2 Local Geology

The Allied site is located within the Piedmont physiographic province of New Jersey. The geology of this province consists of consolidated sediments of the Jurassic Period. The Piedmont province is characterized by red-brown sediments that consist of siltstones, sandstones and conglomerates. In places, these sediments have been subject to volcanic activity (i.e. Watchung Mountains).



SITE PLAN

ALLIED BUILDING SUPPLY

FIGURE NUMBER	PROJECT NUMBER
1	SEL-V4

VECTRE™ Corporation

The base of the tank excavation consists of a red-brown sand. During the installation of the monitoring wells, fill, red sand and silty clays were encountered. The soil classification for each well is summarized in Table 1 and the boring logs for the well installation (except for MW-1) can be found in Vectre's Remedial Investigation Report, February 1994.

TABLE 1

Monitoring Well Soils Classification

Location	MW-2	MW-3	MW-4
Soil Classification			
Fill	0.0 - 1.5	1.0 - 7.0	0.0 - 3.0
Silty Clay	1.5 - 9.5	7.0 - 14.0	1.0 - 3.0
Sand	9.5 - 14.0	3.0 - 7.0	3.0 - 11.0
Silty Clay	14.0 - 20.0	14.0 - 15.0	11.0 - 20.0

NOTES:
All depths in feet
MW-1 was installed by others and boring data are not available.

1.3 Site Hydrology

The ground water monitoring wells have been installed in the unconsolidated sediments. Ground water was observed in the monitoring wells at a depth of 9 - 11 feet below surface grade. Ground water elevation measurements were collected December 7, 1993. Based upon these measurements, a ground water contour map was prepared and is shown in Figure 2. Ground water flow direction is toward the southeast. Downgradient receptors include the adjacent railroad area, storm/sanitary sewers, and basements.

1.4 Well Search

A one-mile radius search of all domestic, industrial, potable and monitoring wells was completed for the vicinity surrounding the Allied site. Information used in the well search was obtained from the NJDEPE Bureau of Water Allocation and from Ms. Nancy Koblis of the Linden Health Department.

The well search identified ninety-three (93) monitoring wells, seven (7) industrial wells, one (1) potable well, six (6) piezometers, one (1) recovery well and three (3) domestic wells located within a mile radius of the subject site. Information concerning the wells is summarized in Appendix A.

1.5 Survey

In the February 1994 report, Vectre stated that the monitoring wells could not be surveyed as a result of the snow pack from last winter (1993/1994). These wells have now been surveyed by a New Jersey licensed surveyor for location and elevation. Form Bs have been prepared and can be found in Appendix B.

2.0 PREVIOUS INVESTIGATIONS

2.1 June 1993

In June 1993, a 2,000-gallon gasoline tank was removed by Tri-State Environmental Consultants, Fort Lee, New Jersey. A few small holes located in one side of the tank and small streaks of visibly stained soil were reported. Approximately, seventy tons of soil were removed from the excavation and stockpiled on-site. The NJDEPE hotline was contacted and the discharge was reported (Case No. 93-06-24-1425-2).

2.2 July 1993

In July 1993, seven soil samples (i.e. 105-TI-01 through 105-TI-06, duplicate 105-T1-D) were collected from the base and sidewalls of the excavation, by Sailer Environmental, Madison, Connecticut. Figure 3 is a soil boring location map. Table 2 summarizes the analytical results. Xylene was detected at locations 105-T1-01 and 105-T1-05 at concentrations 47 and 48 mg/kg (duplicate 194 mg/kg), respectively. Based upon the analytical results and the observed ground water in the excavation, Sailer Environmental recommended that a ground water monitoring well be installed.

[1]From Report Dated 8-11-93 by Sailer Environmental, Inc.

2.3 August 1993

In August 1993, Allied retained American Resource Consultants, Doylestown, Pennsylvania to install three borings and one monitoring well in the former gasoline tank area. Figure 4 is a soil boring and well location map. Soil samples were collected from each soil boring and analyzed for VOCs. One ground water sample was collected and analyzed for VOCs. Soil results indicated acetone, benzene, toluene, ethylbenzene. The acetone is probably a field or laboratory cleaning contaminant. These concentrations are below NJDEPE guidance values for industrial and residential soils. Trichlorofluoromethane (refrigerant) was detected in the field and trip blanks. Analytical results are summarized in Table 3. The only sample parameter exceeding soil guidance criteria for industrial and residential soils was the impact to ground water standard for xylene. The xylene concentration was 131 mg/kg. The ground water sample from MW-1 contained benzene, toluene, ethylbenzene and xylene (BTEX). These concentrations exceed NJDEPE cleanup standards.

2.4 December 1993

Based upon the August 1993 investigation, Vectre installed three additional ground water monitoring wells and collected soil and ground water samples for laboratory analyses. Soil samples were collected from the excavated soil piles and from an excavation which formerly contained a 550-gallon used to store and supply heating oil for the office building.

[2]From American Resources Consultants, Inc., Report Dated 9-17-93

The three soil samples collected from the excavated soil piles (SP-1, SP-2, SP-3) were analyzed for VOCs + 10. The samples collected from the former oil tank area were analyzed for petroleum hydrocarbons. Targeted VOCs were not detected in any of the soil piles. Petroleum hydrocarbons were below NJDEPE standards.

Ground water analytical results indicated no targeted or non-targeted (TIC) compounds above detection limits in monitoring wells MW-2, MW-3 and MW-4. Monitoring well MW-1 contained concentrations of benzene, toluene, ethylbenzene and xylene above NJDEPE ground water standards.

Vectre's analytical data is summarized in Table 4 and a soil boring and well location map is shown in Figure 5.

Methylene chloride is a common laboratory contaminant associated with volatile organic analysis.

sel-v4/340.9405Mb

In Vectre's Remedial Investigation Work Plan (February 1994), Vectre concluded and recommended the following:

* Analytical results from both rounds of ground water sampling (September 1993 and December 1993) indicated similar concentrations of BTEX in the ground water at MW-1.

* The presence of gasoline constituents in MW-1 indicates that a very localized zone of contamination exists in the immediate area of MW-1 since VOC's were not detected in the soil borings surrounding the former excavation except for the borehole converted to MW-1, nor were they detected in any of the other on-site monitoring wells.

* The stockpiled soil from the gasoline tank should be returned to the excavation and clean backfill used to restore the site to grade.

* In the oil tank area, no soil samples exceeded regulatory guidance values. No further action is warranted in this area.

3.0 PROPOSED REMEDIAL ALTERNATIVES

3.1 Preferred Remedial Methods

The previous investigations have identified gasoline constituents, notably BTEX, in the ground water at monitoring well MW-1. Since the area of contamination is localized, Vectre recommends natural remediation and attenuation as the preferred remedial method. For the stockpiled soil, Vectre is proposing to reuse this material as on-site backfill. A soil reuse request can be found in Section 3.3.

3.2 Contaminant Degradability and Attenuation Capacity

Natural remediation and attenuation have been selected as the preferred method for the ground water remediation. This selection is justified because the extent of contamination is localized and the contaminants have physical characteristics ideal for natural remediation. These properties include: volatility, low solubility, adsorption characteristics and biodegradability. Although all hydrocarbons generally have low solubilities as a function of the number of carbon atoms, the aromatics tend to attenuate more easily than heavier hydrocarbons.

Many naturally-occurring microorganisms have been identified which are capable of degrading aromatic compounds. While both aerobic and anaerobic activity has been reported, most case studies have been aerobic in nature. Oxygen, nutrients such as

phosphorus and nitrogen, and appropriate pH conditions are required for efficient biodegradation. Under ideal conditions, aerobic biodegradation in shallow unconfined aquifers can be remarkably successful even without enhancement. A key factor in the success of natural biodegradation is maintaining a relatively low organic carbon concentration in the affected media, since most natural microbes are adapted to a low organic carbon ecosystem. Since the aquifer consists of primarily of sand, a natural low organic carbon environment can be maintained for the natural remediation/biodegradation process to be effective.

3.3 Soil Reuse Request

Approximately seventy tons of soil were excavated and stockpiled during the gasoline tank removal. At the time of sampling, each soil pile was screened with an photo-ionization detector (OVM) to identify the presence of organic vapors. Holes were dug into each pile and total ionization readings were recorded. No OVM readings above zero were recorded, and no odors or discoloration were observed. As noted in Section 2.3 , one soil sample was collected from each pile and analyzed for VOCs+10. Targeted VOC's were not detected in any of the samples.

Vectre is requesting NJDEPE permission to backfill the former excavation with this material. Once backfilled, additional clean fill will be brought in and the former excavation will be brought up to grade. The schedule for completing this task is within two weeks upon approval from NJDEPE.

3.4 Ground Water Flow Rate

Ground water hydraulic gradients range from 0.003 feet per foot (as calculated for MW-1 to MW-2) to 0.0005 feet per foot as calculated for MW-3 to MW-4.

A horizontal ground water flow rate was determined from the calculated gradient and an estimated permeability for a fine sand[3]. The permeability used was one meter per day (i.e. 3.28 feet per day) with an average effective porosity of 35 percent.

The horizontal flow rate was calculated using the following equation:

$$V = \frac{Ki}{p}$$

V = horizontal velocity
K = permeability (ft/day)
i = hydraulic gradient
p = average porosity

$$V = \frac{(3.28 \text{ ft/day})(0.003)}{0.35}$$

$$V = 0.028 \text{ ft/day} = (10.26 \text{ feet/year})$$

[3]G.P. Kruseman and N.A. de Ridder, Analysis and Evaluation of Pump Test Data, 1990.

3.5 Effectiveness Analysis and Certification

The Effectiveness Analysis and Certification can be found in Appendix C.

4.0 GROUND WATER MONITORING AND REPORTING

4.1 Ground Water Monitoring

A one year ground water monitoring program will be implemented at the Allied site. Ground water samples will be collected on a quarterly basis. During the first sampling event all four wells will be sampled as a baseline. Ground water samples will be analyzed for BTEX. During the remainder of the year (i.e. quarters 2, 3, and 4) only monitoring wells MW-1 and MW-2 will be sampled. Ground water samples will be analyzed for BTEX.

Ground water measurements (i.e. depth) will be collected using an electronic water level indicator capable of measuring to one-hundredth of an inch.

Each well will be purged with a centrifugal pump and sampled with a clean bailer in accordance with the NJDEPE *Field Sampling Procedures Manual* (May 1992). A duplicate, field and trip blanks will be collected for quality assurance/quality control.

4.2 Submission of Remedial Action Report

After the ground water analytical data have been received, a Remedial Action Report (RAR) will be prepared in accordance with the regulations at N.J.A.C. 7:26E-6.6. The report will present all of the data collected during the remedial action, including laboratory data, scaled site maps, and appropriate tables and figures. The RAR will be submitted to the NJDEPE in accordance with the schedule presented in Section 5.

4.3 Submission of Progress Reports

The results of each sampling round will be submitted to the NJDEPE in quarterly progress reports. The reports will provide a sampling summary table and a narrative description of the remedial activities undertaken during that quarter. The fourth quarter progress report will include an evaluation of the effectiveness of the remedial activities up to that date, and will include recommendations for any modifications or revisions to the proposed remedial actions, including but not limited to sampling frequency, sampling parameters, additional sentinel wells, or other activities which may be indicated.

5.0 PROJECT SCHEDULE AND COST ESTIMATED

5.1 Project Schedule

The tentative schedule for completing the monitoring program is presented.

Task	Completion Date
Initial round of sampling	July 1994
Submission of RAR	September 1994
Subsequent sampling rounds	October 1994 January 1995 April 1995
Submission of progress reports	December 1995 March 1995 June 1995
Annual evaluation	Included in June 1995 progress report

This schedule assumes approval of the RAW by the NJDEPE before July 1, 1994. Delays in approval could require an adjustment to this schedule.

5.2 Cost Estimate

The estimated costs for the proposed soil reuse and ground water monitoring programs include:

Vectre Labor	
Ground Water Sampling	$ 2,100.00
Report Preparation	3,300.00
Vectre Expenses	1,600.00
Subcontractor Expenses	
Backhoe and Clean fill	1,500.00
Laboratory	2,800.00
Contingency Costs (5%)	600.00
Total	$11,900.00

Regulatory Program Requiring Well UST Case I.D. # 93-6-28-1604-00
CONSULTING FIRM/FIELD SUPERVISOR (if applicable) Aqua-Sol Tele. # 201 716-9010

WELL CONSTRUCTION

Total depth drilled 20 ft.
Well finished to 20 ft.
Borehole diameter:
Top 12 in.
Bottom 12 in.
Well was finished: ☐ above grade ☒ flush mounted
If finished above grade, casing height (stick up) above land surface ____ ft.
Was steel protective casing installed? ☐ Yes ☒ No

	Depth to Top (ft.) [From land surface]	Depth to Bottom (ft.)	Diameter (inches)	Type and Material
Inner Casing	0'	5'	4"	PVC
Outer Casing (Not Protective Casing)	NA	NA	NA	
Screen (Note slot size)	5'	20'	4"	PVC Slot .020
Tail Piece	NA	NA	NA	
Gravel Pack	3'	20'	12"	# 1 Gravel
Annular Seal/Grout	0'	3'	12"	Cement
Method of Grouting	Tremie Pressure			

Static water level after drilling 6 ft.
Water level was measured using M Scope
Well was developed for 1 hours at 2+ gpm
Method of development submersible Pump
Was permanent pumping equipment installed? ☐ Yes ☒ No
Pump capacity NA NA gpm
Pump type: NA
Drilling Method Hollow Stem Augers
Drilling Fluid NA Type of Rig Mobile B-61
Name of Driller Chris O'Shaughnessy
Health and Safety Plan submitted? ☐ Yes ☐ No
Level of Protection used on site (circle one) None D C B A
N.J. License No. 1419
Name of Drilling Company ENVIRONMENTAL DRILLING, INC.

GEOLOGIC LOG (Copies of other geologic logs and/or geophysical logs should be attached.)

0'-10' stone, silty sand
10'-15' silty sand
15'-20' silty sand & clay

I certify that I have drilled the above-referenced well in accordance with all well permit requirements and all applicable State rules and regulations.

WELL CONSTRUCTION

Total depth drilled 29.5 ft.
Well finished to 29.5 ft.
Borehole diameter:
Top 8 in.
Bottom 8 in.
Well was finished: ☐ above grade ☒ flush mounted
If finished above grade, casing height (stick up) above land surface _____ ft.
Was steel protective casing installed? ☐ Yes ☒ No

	Depth to Top (ft.) [From land surface]	Depth to Bottom (ft.)	Diameter (inches)	Type and Material
Inner Casing	0	4.5	4	PVC
Outer Casing (Not Protective Casing)	—	—	—	—
Screen (Note slot size)	4.5	29.5	4	PVC-.020
Tail Piece	—	—	—	—
Gravel Pack	3.5	29.5	8	Morie #2
Annular Seal/Grout	3 0	3.5 3	8 8	Ben Plets portland
Method of Grouting	Gravity			

Static water level after drilling 29 ft.
Water level was measured using tape
Well was developed for 1/2 hours at 2 gpm
Method of development Bailed
Was permanent pumping equipment installed? ☐ Yes ☒ No
Pump capacity _____ gpm
Pump type: _____
Drilling Method Rotary Type of Rig Mobil B50
Drilling Fluid NA
Name of Driller Sean Carey
Health and Safety Plan submitted? ☒ Yes ☐ No
Level of Protection used on site (circle one) None (D) C B A
N.J. License No. 1522
Name of Drilling Company SUMMIT WELL DRILLING

GEOLOGIC LOG (Copies of other geologic logs and geophysical logs should be attached)

I certify that I have drilled the above-referenced well in accordance with all well permit requirements and all applicable State rules and regulations.

LAND SURVEYOR'S CERTIFICATION

Well Permit Number (As assigned by NJDEP's Water Allocation Section, 609-984-6831): 26-35298

This number must be permanently affixed to the well casing.

Longitude (one-tenth of a second): West 74°-15'-13.5"
Latitude (one-tenth of a second): North 40°-37'-44.3"
Elevation of Top of Casing (cap off) (one-hundredth of a foot): 28.19
Owners Well Number (As shown on the application or plans): M.W. #4

AUTHENTICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.

APPENDIX C

APPENDIX C

EFFECTIVENESS ANALYSIS AND CERTIFICATION

ALLIED BUILDING SUPPLY
101 West Elizabeth Avenue
Linden, New Jersey

Proposed Remedial Action - The proposed remedial actions are soil reuse and natural degradation and attenuation for the ground water. Allied will monitor the effectiveness of the ground water remediation by way of a ground water monitoring program.

Long And Short Term Effectiveness - Since the area of contamination is localized and the contaminants are biodegradable, Vectre believes that natural remediation and attenuation are the most effective remedial approach for the BTEX compounds.

Many natural-occurring microorganisms have been identified which are capable of degrading aromatic compounds. While both aerobic and anaerobic activity has been reported, most case studies have been aerobic in nature. Oxygen, nutrients such as phosphorus and nitrogen, and appropriate pH conditions are required for efficient biodegradation. Under ideal conditions, aerobic biodegradation in shallow unconfined aquifers can be remarkably successful even without enhancement.

Implementation and Timeliness - The natural degradation of the contaminant compounds is already occurring. The ground water monitoring program can be implemented upon NJDEPE approval of this plan.

Cost Differential - The proposed remedial measure is the most cost effective action for the site.

Community Concerns - There are no foreseen community concerns at this time based upon the following: the area of contamination is localized, depth to ground water is between 9-11 feet, and the community is served by public water.

RE: Allied Builders Supply, NJ/ Case #: 93-6-24-1425-02

Dear Mr. Motter:

It has come to my attention that two of the items you need to close the above-reference case are the manifests for the disposal of the gasoline underground storage tank (UST) and the disposal manifests for the heating oil and gasoline products. Please be advised that Tri-State Environmental Consultants, Inc. (TEC) has both manifests, which will be sent to your attention as soon as Allied Builders Supply pays all outstanding invoices. As per our recent conversation, these manifests will be sent to you, under a seperate cover, containing my signature and professional certification seal. **Please do not accept any other manifests (as these two in question) unless they contain my signature and professional certification seal.**

If you have any questions regarding this matter please call me at (201) 941-2056.

Sincerely,

Steve Hambos

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

I am in receipt of a copy of correspondence to you dated July 11, 1994 from Mr. Steve Hambos of Tri-State Environmental Consultants. Please be advised that a dispute exists between Allied Building Supply Co. and Mr. Hambos concerning the services performed at the above property. On this basis, Mr. Hambos was removed from the job. Accordingly, he is not authorized to contact you concerning this matter. In addition, pursuant to New Jersey Department of Environmental Protection and Energy regulations, Mr. Hambos has no right to retain the generator's copy of the manifests generated in connection with the UST removals. It appears that Mr. Hambos is attempting to extort funds from Allied Building Supply Co. by retaining the manifests.

If you have any questions or comments concerning this matter, please do not hesitate to contact me.

Very truly yours,

BRESSLER, AMERY & ROSS

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

As you know, we represent Allied Building Supply Co. ("Allied") in connection with the above matter. Allied's consultant, Vectre Corporation, submitted a Remedial Action Work Plan ("RAW") to the Department for review. It was my understanding that you would be in a position to provide us with your comments by the end of July. Accordingly, I will contact you next week regarding same.

Thank you for your consideration.

Very truly yours,

David W. Reger

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors:

On June 24, 1993, the New Jersey Department of Environmental Protection (Department) received notification of a discharge of hazardous substances, regulated under the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21 et seq), which occurred from the above referenced facility. On September 23, 1993 and October 7, 1993, the Department sent letters stating the requirements for the proper investigation and the initiation of corrective action at Allied Building Supply's facility. The Department received a report from Tri-State Environmental Consultants, Inc. dated May, 1993 a report from Sailer Environmental Incorporated dated August 11, 1993 and two reports from Vectre Corporation dated February, 1994 and May, 1994 for Allied Building Supply indicating that the following steps were taken in compliance with our requirements.

In June, 1993, a 2,000-gallon steel gasoline underground storage tank (UST) was removed by JBC Environmental and Tri-State Environmental Consultants. Holes were discovered in the tank and visually stained soils observed. Approximately 70 tons of soils were excavated and stockpiled on site. The NJDEP hotline was notified of the discharge. A 550-gallon heating oil UST was abandoned in place at the same time as the 2,000-gallon tank was removed. In July, 1993, seven soil samples were collected from the base and sidewalls of the gasoline tank excavation by Sailer Environmental. Xylene was found to exceed the soil cleanup criteria in two samples and a duplicate. The base sample reported 48 ppm xylenes and the sidewall sample reported 47 ppm xylenes with the sidewall duplicate reporting 194 ppm xylenes. In August, 1993, American Resource Consultants installed three borings around the excavation area and collected six soil samples. All samples were within soil cleanup criteria except sample 105-MW1-11 which exhibited 131 ppm xylenes. This boring was developed into a monitoring well (MW-1). In December, 1993, Vectre Corporation installed three additional groundwater monitoring wells, collected one confirmatory soil sample from the 2,000-gallon gasoline UST excavation and collected three soil samples from the 550-gallon fuel oil tank excavation as well as collecting one soil sample from each soil pile. All soil sample results were below soil cleanup criteria.

Four groundwater monitoring wells are located on site. MW-1 is adjacent to and upgradient of the 2,000-gallon gasoline UST excavation area and recorded elevated levels of BTEX in September, 1993 (7.8 ppm) and December, 1993 (18.150 ppm). MW-2, MW-3 and MW-4 were sampled in December, 1993 with results below the method detection limits for all parameters. December 7, 1993 groundwater data indicates that depth to groundwater is between nine feet and eleven feet and groundwater flow is in an easterly/southeasterly direction. Given the groundwater flow direction, no downgradient wells exist for MW-1 or the 2,000-gallon gasoline UST excavation. No free phase product was observed in the groundwater monitoring wells.

The Allied Building Supply facility is located at 101 West Elizabeth Avenue in a commercial section of Linden, New Jersey. The site is bordered to the northeast and southeast by the new Jersey Transit Parking Lots, to the northwest by Elizabeth Avenue and to the southwest by commercial properties. A well search of the area indicated ninety-three monitoring wells, seven industrial wells, one potable well, six piezometers, one recovery well and three domestic wells within a one mile radius of the site.

Pursuant to the Authority vested in the Commissioner of the New Jersey Department of Environmental Protection (Department) by the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21 et seq.) and duly delegated to the Chief of the Bureau of Underground Storage Tanks, the above referenced Remedial Investigation Workplan, submitted on behalf of Allied Building Supply, is hereby approved by the Department as conditioned below:

I. **Remedial Investigation**

A. **Soil**

Allied Building Supply should indicate the linear distance between sample point GT-1 and former sample point 105-MW1-11.

B. **Ground Water**

Allied Building Supply shall install additional ground water monitoring wells to fully delineate the horizontal and vertical extent of ground water contamination. Contamination shall be delineated to the Ground Water Quality Standards, N.J.A.C. 7:9-6, unless otherwise approved by the Department. At a minimum, ground water monitoring wells shall be installed within the 2,000-gallon gasoline UST excavation area and downgradient of the 2,000-gallon gasoline UST excavation area given that MW-1 is upgradient of the excavation area and contains elevated levels of BTEX. If it is necessary to install wells off-site, Allied Building Supply shall provide documentation of written requests seeking access to install said monitoring wells on off-site properties within thirty (30) calendar days of receipt of this correspondence. Please be advised that N.J.S.A. 58:10B, a statute concerning site remediation, provides a cause of action for persons to obtain access to properties not owned by that person for the purpose of conducting remedial activities at that site. Please see the attached information on this provision of N.J.S.A. 58:10B for further information.

Allied Building Supply shall submit boring logs and the monitoring well construction details (Well Certification Forms A and B, enclosed) for all newly installed monitoring wells.

Allied Building Supply shall sample every monitoring well which does not contain free product and analyze the samples for volatile organics, methyl tertiary butyl ether (MTBE) and tertiary butyl alcohol (TBA) using EPA Method 624 calibrated for xylenes, with a library search (VOs) and for lead using EPA Method 200.7 (ICAP) or EPA 239.2 (Graphite Furnace) calibrated to achieve a method detection limit of 10 ppb. The SW-846 equivalent for this procedure is ICAP 3010/6010, sample prep 3050/6010 Furnace 3020/7421 sample prep 3050/2421.

For each sampling event, Allied Building Supply shall submit a table to include for each monitoring well: 1.) top of casing elevation; 2.) top of screen elevation; 3.) ground water elevation (corrected for free phase product if present); 4.) free phase product elevation (if present); and 5.) free phase product thickness (if present).

For each sampling event, Allied Building Supply shall construct a scaled isopleth map of free product thickness where free product exists, and scaled isopleth maps for dissolved product concentrations. Allied Building Supply shall submit the updated maps with each subsequent submittal.

Allied Building Supply shall construct and submit scaled, ground water table contour maps for each ground water sampling event.

C. **Receptor Evaluation**

The Department has no further requirements at this time.

II. Quality Assurance

All data submitted shall conform to the Reduced Laboratory Deliverables Format in accordance with the "Technical Requirements for Site Remediation", N.J.A.C. 7:26E (also see Enclosure #2), except where specifically indicated.

III. Other

A. **Certification Requirements**

It is important to note that effective April 25, 1992, all persons performing tank services must be certified per N.J.S.A. 58:10A-24.1-8. **All work related to any tank service must now be conducted by, or under the on-site immediate supervision of an individual certified in the activity being conducted.** All documents (permit applications, reports, proposals) submitted to BUST must be prepared and signed by a certified individual.

B. **Field Activity Notification**

Allied Building Supply shall notify the assigned BUST Case Manager at least 14 calendar days prior to implementation of all field activities. If Allied Building Supply fails to initiate sampling within 30 calendar days of the receipt of this letter, any requests for an extension of the required time frames may be denied.

C. **Billing**

On April 5, 1993, the UST Fee Rule (Amendments and New Rules at N.J.A.C. 7:14B) was proposed. This rule appeared in the February 22, 1994, New Jersey Register. Effective February 22, 1994, the Department will be billing you for the Department's oversight of all work conducted at your site. Documents submitted to the Department in accordance with the "Technical Requirements for Site Remediation" (N.J.A.C. 7:26E) will help reduce the time necessary for the Department oversight of your case. At this time, the Department intends to process bills on a semi-annual basis. Please consult the April 5, 1993 and February 22, 1994, State Registers for details. Copies can be obtained by contacting the Office of Administrative Law at (609) 588-6500. Your case manager should be contacted with any additional questions.

IV. Administrative Requirements

Based upon the above requirements and the data generated to date, Allied Building Supply is required to submit a RAW in accordance with N.J.A.C. 7:26E-6.2 and P.L. 1993, c.139 (S-1070). This document shall be submitted to this Bureau at the above address, within **ninety (90)** days upon receipt of this letter. The RAW shall detail all activities conducted to achieve compliance with the requirements listed in this letter (in the form of a Remedial Investigation Report (RIR) in accordance with N.J.A.C. 7:26E-4.9) and present a comprehensive remedial proposal for all soil and ground water contamination present as the result of the discharge(s) based upon all data collected to date. Please note that only one copy of the Quality Assurance/Quality Control Deliverables is needed. Guidance regarding the minimum requirements and presentation format for this document are provided below and in the enclosures.

It should be noted that if Allied Building Supply completes all of the above requirements and the data indicate that the remedial investigation has not been completed (i.e. contamination not completely delineated), Allied Building Supply shall submit a Remedial Investigation Workplan (RIW) in accordance with N.J.A.C. 7:26E-4.8 within the specified time frame. The RIW shall include a schedule of implementation of the remaining remedial investigation required and the submittal date of the RAW. Allied Building Supply also has the option of completing the remaining remedial investigation in accordance with N.J.A.C. 7:26E-4, followed by the submission of the RIR/RAW. If the latter option is selected, Allied Building Supply shall notify the Case Manager listed below, in writing, within two weeks prior to the specified time frame referenced above. This notification shall include a generic discussion of activities conducted to date and activities to be conducted, as well as a detailed schedule of implementation which includes the submission of the RIR/RAW.

The "Technical Requirements for Site Remediation" rules (N.J.A.C. 7:26E) appeared in the June 7, 1993, New Jersey Register and became effective on July 1, 1993. These rules contain the minimum technical requirements concerning the environmental investigation and remediation at contaminated sites or sites at which contamination is suspected. These rules are being used as the Department's primary technical document, replacing the Division of Responsible Party Site Remediation's Remedial Investigation Guide, the ECRA Cleanup Plan Guide, the Bureau of Underground Storage Tanks' (BUST) Scope of Work document (and appendices) and the BUST Technical Guidance Document.

It should be noted that technical requirements are included in subchapters 7, 8 and 9 of the regulations implementing the Underground Storage of Hazardous Substances Act (N.J.A.C. 7:14B-1-13 and 15). The responsible person(s) that are conducting an environmental investigation/remediation should be following the "Technical Requirements for Site Remediation" to accomplish the investigation. This will allow for consistent evaluation of any discharges and potential impacts.

V. Cleanup Criteria

The Department's most recent general guidance on contaminant cleanup criteria can be found in the April, 1994, edition of the Site Remediation Newsletter. It must be remembered, however, that the actual cleanup goal at a particular site is determined by the Department on a case-by-case basis and may be different than that in the above referenced newsletter. This variation may be due to many factors, including site specific human health and environmental exposure pathways, the presence of site contaminants not addressed in the newsletter, and site specific physical characteristics. In case specific situations, when cleanup criteria are modified from one previously established for that specific site, the Department will make every effort to expeditiously notify the responsible party. Please consult the Case Manager listed below to discuss any modifications which may impact your remedial actions.

If the person conducting a cleanup does not wish to remediate a contaminated site consistent with the newsletter, they shall submit a proposal to the Case Manager listed below that details the site specific circumstances and technical rationale for cleanup goals on a case-by-case basis.

Please note that the Ground Water Quality Standards (N.J.A.C. 7:9-6) have been adopted and appeared in the February 1, 1993, New Jersey Register. This rule adoption may impact requirements for ground water remediation and soil cleanup (i.e. where the soil may contribute contaminants to the ground water above the applicable standards) for a particular site and should be referenced and discussed with the Case Manager listed below.

VI. Remedial Action Workplan Submission

A. The Remedial Action Workplan Format (N.J.A.C. 7:26E-6)

To ensure a complete and timely review of the submittal, the RAW shall be a self-supporting document. As a guide to this process, the following elements shall be included in the formation of the plan:

1. Table of Contents

2. Introduction. Include site acreage, site use during the release, current site use, local land use, local topography, geology, and hydrogeology.

3. Summary of UST-Related Environmental Concerns. This shall include the results of all previous soil and ground water sampling in tabular form, including scaled site maps in the form of a Remedial Investigation Report in accordance with N.J.A.C. 7:26E-4.9. A detailed presentation of the items required (above) in this letter shall be included.

4. Effectiveness Analysis and Certification. This shall include an analysis and certification that the proposed remedial action meets the criteria contained in Section 35 (g) of P.L. 1993, c.139, including an analysis of long and short term effectiveness, implementability, timeliness, cost differential of permanent and nonpermanent remedies (if applicable), and community concerns. Please note that the Effectiveness Analysis and Certification supersedes the Remedial Alternative Analysis in N.J.A.C. 7:26E-5.

5. Summary of Proposed Remedial Actions. This shall include a detailed description of the remedial action and remedial technology(s) to be utilized for each area of concern for site cleanup, the media to be affected by each technology, scaled site maps detailing the areas where remedial action will be conducted (N.J.A.C. 7:26E-6.2(a)6), supporting technical information appropriate to the technology and volumes of each media to be remediated (including vertical and horizontal extent). The following technical information shall be included, where applicable to the remedial technology chosen:

   a. the hydraulic conductivity of the affected aquifer(s), including calculations;
   b. calculations and maps showing the predicted capture zones;
   c. calculations of the optimum pump rate and number of ground water and/or air withdraw points, or trench configuration required to control the plume;
   d. calculation of the ground water velocity prior to pumping;
   e. grain size analyses; and,
   f. soil total organic carbon content and pH.

   Also included shall be a map(s) and description of the ground water monitoring wells to be used to monitor the effectiveness of the remediation, both at the source and at down gradient compliance points.

6. Identification of the treatment and disposal methods to be employed for any ground water or soil to be removed.

7. Cleanup levels to be achieved. Be specific with regard to media and compounds.

8. Summary of any permits necessary to implement the cleanup. Please note that the Department will not approve a RAW which proposes to discharge to a publicly-owned treatment works (POTW) without the prior written consent of the POTW.

9. The RAW shall detail the specific activities that will be used to complete the proposed cleanup objectives.

10. A post-remedial sampling and monitoring plan for each media to be remediated.

11. A specific Schedule of Implementation of the RAW which includes milestones in the project in accordance with N.J.A.C. 7:26E-6.5(a).

12. A proposal for Quarterly Remedial Action Progress Reports for the duration of the cleanup in accordance with N.J.A.C. 7:26E-6.5(b) and (c).

13. Estimate of costs for the proposed remedial actions, which shall include:

a. capital costs;
b. operation and maintenance costs;
c. monitoring system costs;
d. laboratory costs;
e. engineering, legal and administrative costs;
f. contingency costs; and
g. summary of all remedial costs incurred to date (see below).

14. A summary of the total costs of the remedial actions conducted to date shall be submitted with any RAW or request for No Further Action. These costs shall be broken down as follows:

a. tank removal and disposal costs;
b. capital costs including monitoring systems and equipment;
c. mobilization costs, operation and maintenance including labor, utilities and repairs;
d. consulting and labor costs including engineering, environmental, legal and administrative costs;
e. analytical/laboratory costs;
f. sample collection costs; and
g. disposal costs including transportation, waste transfer fees and facility tipping fees.

15. A quality assurance plan including proposed sampling and analytical methods pursuant to N.J.A.C. 7:26E-2.2.

16. A description of the soil and sediment erosion control and monitoring plan, and dust and odor control and monitoring plan, if applicable.

17. An administrative checklist is provided (Enclosure #1) and should be used as additional guidance when formulating the RAW.

B. Data Presentation

Summarized analytical results shall be provided in accordance with N.J.A.C. 7:26E-4.9. Please note that N.J.A.C. 7:26E-4.9 includes, but is not limited to, the requirement that compound specific data presentation is provided in tabular form. The Department recommends that Allied Building Supply refer to the attached "Guidelines for Data Presentation" for additional guidance in the preparation of its submittal (Enclosure #2). Allied Building Supply shall collect all samples in accordance with the sampling protocol outlined in the May 1992 edition of the "NJDEPE Field Sampling Procedures Manual".

C. Permit Applications

All appropriate permit applications shall be submitted either prior to or in concert with the RAW submission. Copies of all permit application cover letters shall be provided with the RAW. In addition, the Department has recently established the Office of Permit Information Assistance (OPIA). OPIA's responsibilities include providing permit information to the public and assisting permit applicants through the permit coordination process when a project requires permits from various programs. OPIA can be reached at (609) 984-0857.

As a reminder, a New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Ground Water (DGW) permit will be required for any remedial system which involves a direct discharge to ground water (re-injection, overland flow, etc.) and some on-site soil treatment technologies which include a discharge to ground water. Since the case manager will be processing the NJPDES-DGW permit, the NJPDES-DGW permit application shall be submitted directly to the BUST Case Manager listed below. The DGW Permit for re-injection will also act as the Treatment Works Approval for the site. However, a licensed operator is required for the treatment system in accordance with N.J.A.C. 7:10-13 et seq. Please note that if ground water remediation activities result in a discharge to surface water, Allied Building Supply shall also obtain a NJPDES Discharge to Surface Water Permit (DSW), Category B (Industrial/Commercial Surface Water Discharge) or Category B4B (General Ground Water Petroleum Products Clean-up (GPPC) Permit). Any

discharge to a POTW in excess of 25,000 gallons per day requires a NJPDES Significant Indirect User Permit (NJPDES-SIU), Category L (Indirect Discharge to POTW). If ground water will be treated prior to discharge to surface water or to a POTW, a Treatment Works Approval (TWA) shall also be obtained. Air discharges from any remedial systems also require permit applications to be submitted to the Bureau of New Source Review. Finally, surface or ground water withdrawal in excess of 100,000 gallons per day (or 10,000 gallons or more in critical aquifers) requires approval by the Department. For further information contact, the Bureau of Permit Management (NJPDES-DSW or SIU) at (609) 984-4428, the Bureau of Connection and Construction (TWA) at (609) 984-4429, the Bureau of New Source Review (Air Permits) at (609) 292-6716, or the Bureau of Water Allocation (ground water withdrawal) at (609) 292-2957.

If Allied Building Supply fails to submit the required report within the referenced due date, this case will be referred to the Bureau of Applicability and Compliance (BAC) for review. The Department may initiate enforcement action including, but not limited to, the assessment of penalties and revocation of tank operating registrations pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B-12. The Department reserves the right to implement all enforcement measures, including the right to revoke tank operating registrations and assess penalties from the original due date.

If the tank(s) at the referenced facility is/are regulated under the federal Hazardous and Solid Waste Amendments of 1984 and Allied Building Supply fails to comply with the above requirements, this case may be referred to the United States Environmental Protection Agency (USEPA) for violations of 40 CFR Part 280.

Please note, pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B et seq., the owner and operator of the regulated underground storage tanks are strictly liable for compliance with these requirements. Violators are liable for penalties of up to $50,000 per day for each day of continuing violation and revocation of tank registrations.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Please be advised that the soil formerly stockpiled at the above-referenced property has been reused on-site to fill the tank excavations since the soil sampling results indicate that no compounds were present at levels of regulatory concern.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

BRESSLER, AMERY & ROSS

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office? * ☐ YES ☐ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complese the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

* TANKS WERE REMOVED IN ACCORDANCE WITH AN UNDERGROUND STORAGE TANK CLOSURE PLAN DATED MAY 1993

X Other (please specify) Tanks Removed, Property Sold

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

N/A

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations? ☐ YES ☐ NO
   If Yes, does the secondary containment system comply with all provisions of these regulations? ☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)? ☐ YES ☐ NO
   If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☐ NO
   If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
   If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☐ NO

N/A

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☐ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☐ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☐ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☐ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☐ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☐ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☐ NO

SECTION D N/A

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

_____ Type

_____ Carrier/Issuing agency

___/___/___ Date Effective

_____ Policy Number

$_____ Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Applicability and Compliance
Registration and Billing Section

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: Allied Building Supply Co.
2. Facility Location: 1011 West Elizabeth Ave. (NUMBER AND STREET)
   Linden (CITY OR MUNICIPALITY)
   Union (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   Block 99254 Lot 00110
3. Owner's mailing address: P.O. Box 13817 (NUMBER AND STREET)
   Union (CITY OR MUNICIPALITY)
   Union (COUNTY) NJ (STATE) 07083 (ZIP CODE)
4. Owner's name: Daniel Winters
5. Contact person (Facility Operator): Daniel Winters (PERSON OR TITLE)
6. Contact telephone number: 908 964 1515 (AREA CODE / CHANGE / NUMBER)
7. Total number of facility underground storage tanks: 0 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): ☐☐☐☐☐☐
9. Status of owner: (mark one) A. ☐ CURRENT B. ☒ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☐ YES B. ☐ NO N/A

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☐ YES ☐ NO N/A

_____ (Type) _____ (Company/Carrier)

_____ (Policy Number) _____ (Expiration Date)

UST NO. 0129486.

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A

REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?
☐ YES ☑ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)
_____ Other (please specify)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

If NO, please complete the remainder of this form and return to this office.

SECTION B

MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?
☐ YES ☑ NO
If Yes, does the secondary containment system comply with all provisions of these regulations?
☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?
☐ YES ☑ NO
If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☑ NO
If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☑ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

Loyal Insurance / Brovell, Kenner, Walker & Kuo Agency — Carrier/Issuing agency

9, 4, 92 — Date Effective

N-SP-214064-000 — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?

☐ YES ☒ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modificattion(s)
_____ Other (please specify)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?

☐ YES ☒ NO

If Yes, does the secondary containment system comply with all provisions of these regulations?

☐ YES ☐ NO

2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(c) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?

☐ YES ☒ NO

If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).

3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☒ NO

If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO

If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☒ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

Royal Insurance / Brownell, Kramon, Waldron & Co. Agency — Carrier/Issuing agency

9, 4, 91 — Date Effective

N-SP-214064-0U5 — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
- : For corporations, by the vice president or higher
- : For sole proprietorships, by the proprietor
- : For partnerships, by the general partner
- : For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, incaccurate or incomplete information, including fines and/or imprisonment."

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and The Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE	The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payable to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing of your certification.
PENALTY	Failure by owner or operator of a regulated underground storage tank to comply with any requirement of the State UST Act of regulations may result in the penalties set forth in N.J.S.A. 58:10A-10.
EMERGENCY	If a discharge or spill occurs, the NJDEP Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

DATES TO KNOW (critical deadlines)

December 22, 1989 -	All tank systems installed before 1965 (or of unknown age) must have installed leak detection (federally regulated tanks only).
December 22, 1990 -	All tank systems installed between 1965-1969 must have leak detection (federally regulated tanks only).
December 22, 1990 -	All pressure piping must have line leak detection and have done a precision test if tank system lacks a monitoring system (federally regulated tanks only).
September 3, 1991 -	All regulated tanks must install cathodic protection, monitoring systems, and spill/overfill protection (except residential heating oil).
December 22, 1993 -	All agricultural tanks installed before September 3, 1986 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 -	All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A

REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?
☒ YES ☐ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
✓ Contact Person

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Underground Storage Tanks
Registration Section
1-800-722-TANK

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO
2. Facility Location: 1011 WEST ELIZABETH AVE.
   NUMBER AND STREET: LINDEN
   CITY OR MUNICIPALITY: UNION
   COUNTY: NJ (STATE) 07036 (ZIP CODE)
   BLOCK: 00257 LOT: 00110
3. Owner's mailing address: P.O. BOX 1387
   NUMBER AND STREET: UNION
   CITY OR MUNICIPALITY: UNION
   COUNTY: NJ (STATE) 07083-1387 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): ALFIORE
   PERSON OR TITLE
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1515 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 00020000
9. Status of owner: (mark one) A. ☐ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☑ YES ☐ NO

Liability (Type)

CIGNA (Company/Carrier)

MFC) 1985168 (Policy Number)

1/1/92 (Expiration Date)

UST NO. _____

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

RECEIVED MAR 15 1988

ANNUAL CERTIFICATION
QUESTIONNAIRE

SECTION A:

Have there been any changes in this facility's registration status during the past twelve months that have not already been reported to the Bureau of Underground Storage Tanks on a Standard Reporting Form?

☒ NO ☐ YES

If NO, please complete Sections B, D, E and return this form with the top half of the billing invoice and the appropriate fee.

If YES, please check the appropriate type of change (s) below that occurred and complete the enclosed Registration Questionnaire with the NEW information ONLY and sign the questionnaire and return it along with the top half of the billing invoice, this form and the appropriate fee.

____ Company Name and Address (ownership change)

____ Facility location

____ Operator(s)

____ Contact Person(s)

____ Type of product(s) stored

____ Spills, accidents or leaks

____ Other (explain)

(OVER)

SECTION B:

Are inventory records maintained on-site?

☐ NO ☒ YES

Have any unaccountable losses been discovered at your facility?

☒ NO ☐ YES

NOTE It is required that all leaks be reported to the NJDEP within 24 hours of discovery by contacting the NJDEP Hotline telephone number (609) 292-7172.

SECTION C:

Failure by owner or operator of an underground storage tank to comply with any requirement of the State Act or this chapter may result in the penalties set forth in N.J.S.A. 58:10A-10.

SECTION D:

CERTIFICATION

*** This registration form shall be signed by the highest ranking individual at the facility with overall responsibility for that facility. (7:14B-2.3 (a) 1). ***

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment.

*** ANNUAL CERTIFICATION ***
UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Underground Storage Tanks
Registration Section
1-800-722-TANK

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility name: ALLIED BUILDING SUPPLY CO
2. Facility location: 1011 WEST ELIZABETH AVENUE (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
3. Owner's mailing address: 581 RAHWAY AVENUE (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07083 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator) JOHN SAUER (PERSON OR TITLE)
6. Contact telephone number: 201 (AREA CODE) 862 (EXCHANGE) 4070 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)
8. Total facility underground storage tank capacity (gallons): 0002000
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner: (mark one) A. ☐ STATE OR LOCAL GOVERNMENT B. ☒ PRIVATE OR CORPORATE C. ☐ OWNERSHIP UNCERTAIN D. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)
11. Two copies of a site plan are submitted with this registration. A. ☑ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or out of service, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. _____

ALL underground tanks, including those taken out of operation. **(UNLESS THE TANK WAS REMOVED FROM THE GROUND)** must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or out of service, C.

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Underground Storage Tanks
Registration Section
1-800-722-TANK

COMPLIANCE WITH THIS REGISTRATION WILL MEET ALL REQUIREMENTS OF STATE LAW, P.L. 1986, c. 102, THE UNDERGROUND STORAGE OF HAZARDOUS SUBSTANCES ACT, N.J.S.A. 58:10A-21. 8/3

General Facility Information

1. Facility name: ALLIED BUILDING SUPPLY CO
2. Facility location: 1011 WEST ELIZABETH AVENUE
   NUMBER AND STREET
   LINDEN
   CITY OR MUNICIPALITY
   UNION COUNTY | NJ STATE | 07036 ZIP CODE
3. Owner's mailing address: 5811 RAHWAY AVENUE
   NUMBER AND STREET
   UNION
   CITY OR MUNICIPALITY
   UNION COUNTY | NJ STATE | 07083 ZIP CODE
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator) JOHN SAUER
   PERSON OR TITLE
6. Contact telephone number: 201 AREA CODE | 862 EXCHANGE | 4070 NUMBER
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)
8. Total facility underground storage tank capacity (gallons): 0002000
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner: (mark one) A. ☐ STATE OR LOCAL GOVERNMENT B. ☒ PRIVATE OR CORPORATE C. ☐ OWNERSHIP UNCERTAIN D. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)
11. Two copies of a site plan are submitted with this registration. A. ☐ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or out of service, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. 0129486

ALL underground tanks, including those taken out of operation. (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or out of service, C.

SPECIFIC TANK INFORMATION

	TANK NO. 0001	TANK NO.	TANK NO.	TANK NO.	TANK NO.
12. Tank Identification Number					
13. CASRN Number (Hazardous Substances Only)					
14. Tank Age (Years)	UNKNOWN				
15. Tank Size (gallons)	10,000				
16. Tank Contents (MARK ONE X)					
A. Leaded gasoline	X	☐	☐	☐	☐
B. Unleaded gasoline	☐	☐	☐	☐	☐
C. Alcohol enriched gasoline	☐	☐	☐	☐	☐
D. Light diesel fuel (No. 1-D)	☐	☐	☐	☐	☐
E. Medium diesel fuel (No. 2-D)	☐	☐	☐	☐	☐
F. Waste oil	☐	☐	☐	☐	☐
G. Kerosene (No. 1)	☐	☐	☐	☐	☐

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

JUN 01 1988

Bureau of Ground Water Quality Management
Underground Storage Tank Section
(609)984-9736

COMPLIANCE WITH THIS REGISTRATION WILL MEET ALL REGISTRATION REQUIREMENTS OF THE FEDERAL LAW, P.L. 93-616, THE HAZARDOUS AND SOLID WASTE AMENDMENTS OF 1984, SUBTITLE I, SECTIONS 9001-9010.

General Facility Information

1. Facility name: ALLIED BUILDING SUPPLY CO

2. Facility location: 1011 WEST ELIZABETH AVENUE
NUMBER AND STREET
LINDEN
CITY OR MUNICIPALITY
UNION — COUNTY; NJ — STATE; 07036 — ZIP CODE

3. Owner's mailing address: 581 RAHWAY AVENUE
NUMBER AND STREET
UNION
CITY OR MUNICIPALITY
UNION — COUNTY; NJ — STATE; 07083 — ZIP CODE

4. Owner's name: DANIELI WINTERS

5. Contact person (Facility Operator) JOHN SAUER
PERSON OR TITLE

6. Contact telephone number: 201 — AREA CODE; 862 — EXCHANGE; 4070 — NUMBER

7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)

8. Total facility underground storage tank capacity (gallons): 0002000

9. Type and status of owner (mark all that apply).

A. ☒ CURRENT B. ☐ FORMER C. ☐ STATE OR LOCAL GOVERNMENT D. ☐ PRIVATE OR CORPORATE E. ☐ OWNERSHIP UNCERTAIN F. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)

10. Two copies of a site plan are submitted with this registration. A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or closed, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. 12948

11. All underground tanks used after January 1, 1974 including those taken out of operation, **(UNLESS THE TANK WAS REMOVED FROM THE GROUND)** must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or Closed C.

Re: F-70H - Allied Building Supplies, Linden

Dear Mr. Motter,

This is in follow-up to our conversation, (9/13/94, 8:10 a.m.) regarding the Allied Building Supplies property. This is to officially inform you that NJ TRANSIT is the owner of the property under discussion, and in the future should be copied on all correspondence between the Department and any party regarding the site. Our discussion also indicated that the Department has approved a remedial investigation workplan for the site, which is different from a remedial action workplan. Further, as I understand from our conversation, until the plume of contamination has been identified and mapped, pursuant to Department oversight, a remedial action workplan will not be approved.

Should you need any additional information, please contact me at (201) 491-7214. Thank you for your assistance.

Sincerely,

Carlynne Abrams

RE: Allied Builders Supply, NJ/ Case #: 93-6-24-1425-02

Dear Mr. Motter:

Please be advised that Mr. John C. Bossany of JCB Environmental Contractors was the individual who decommissioned the underground storage tanks at the Allied Builders Supply facility. Mr. Bossany has not signed off on the ***Underground Storage Tank Site Assessment Summary*** form for Tank Decommissioning Certification section. Mr. Bossany is the only individual who can complete this form in a proper and legal manner. Tri-State Environmental Consultants, Inc. (TEC) conducted all initial Environmental Site Assessment activities.

In addition, it has come to my attention that two additional items you need to close the above-reference case are the manifests for the disposal of the gasoline underground storage tank (UST) and the disposal manifests for the heating oil and gasoline products. Please be advised that TEC has both manifests, which will be sent to your attention, along with the completed ***Underground Storage Tank Site Assessment Summary*** form as soon as Allied Builders Supply pays all outstanding invoices. As per our recent conversation, these materials will be sent to you, under a seperate cover, containing my signature and professional certification seal. **Please**

do not accept any other manifests or Underground Storage Tank Site Assessment Summary form unless you receive them under seperate cover from Tri-State Environmental Consultants, Inc., containing my signature and Professional Certification Seal.

If you have any questions regarding this matter please call me at (201) 941-2056.

Sincerely,

Steve Hambos

Re: Extension for Submittal of Report
Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors and Mr. Winters:

This letter is in response to Bressler, Amery & Ross's letter dated November 14, 1994 requesting an extension for the submission of the Remedial Action Workplan (RAW) required pursuant to N.J.A.C. 7:14B et seq. and the New Jersey Department of Environmental Protection's (Department) letter, dated August 12, 1994. The report was due on November 15, 1994. This request has been approved and the new deadline for submission is January 31, 1995.

This letter is only an extension and does not relieve Allied Building Supply Co. of any obligation and/or responsibilities set forth in the regulations promulgated pursuant to the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq. No further extensions will be granted for the submittal of the required RAW.

Please note, pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B et seq., the owner and operator of the regulated underground storage tanks are strictly liable for compliance with these requirements. In addition, all state regulated USTs, with the exception of heating oil for on-site consumption, are regulated under 40 CFR Part 280. Non-compliance with these federal and state regulations exposes the tank owner and operator to the penalty and liability specified in 40 CFR Part 280, N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B et seq.

On April 5, 1993, the UST Fee Rule (Amendments and New Rules at N.J.A.C. 7:14B) was proposed. This rule appeared in the February 22, 1994, New Jersey Register. Effective

February 22, 1994, the Department will be billing you for oversight of all work conducted at your site. Documents submitted in accordance with the "Technical Requirements for Site Remediation" (N.J.A.C. 7:26E) will help reduce the time necessary for oversight of your case. At this time, the Department intends to process bills on a semi-annual basis. Please consult the April 5, 1993 and February 22, 1994, State Registers for details. Copies can be obtained by contacting the Office of Administrative Law at (609) 588-6500. Your case manager should be contacted with any additional questions.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Pursuant to our recent telephone conversation, this letter serves as Allied Building Supply Co.'s formal request for an extension until approximately January 31, 1995 for the submission of the information requested by the Department in its August 12, 1994 correspondence. Please be advised that Allied has retained Brinkerhoff Environmental Services, Inc. ("Brinkerhoff") of Manasquan, New Jersey as its environmental consultant. Brinkerhoff is in the process of obtaining the necessary well permits for the installation of the two monitoring wells at the above property and the well installation has been scheduled for Tuesday, November 29, 1994. It is anticipated that these wells will be sampled during the week of December 12, 1994. Once the analytical data from the ground water sampling is received, Brinkerhoff will prepare the Remedial Action Work Plan Addendum Report for submission to the Department.

Based on our recent conversation, it is my understanding that this extension request will be granted by the Department. I will

contact you shortly in order to discuss this matter. Thank you for your consideration.

Very truly yours,

BRESSLER, AMERY & ROSS

Re: **Allied Building Supply Co.**
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Please be advised that the installation of the two monitoring wells at the above-referenced property originally scheduled for Tuesday, November 29, 1994 has been postponed until Wednesday, November 30, 1994 due to a conflict in the driller's schedule. The well installation is scheduled to begin at approximately 8:00 a.m. Based on our recent telephone conversation, it is my understanding that you intend to observe the well installation.

If you have any questions concerning this matter, please do not hesitate to contact me.

Very truly yours,

Re: Site Inspection/Well Installation
Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors and Mr. Winters:

On November 29, 1994, the New Jersey Department of Environmental Protection (Department), represented by Allan Motter, Case Manager, inspected the Allied Building Supplies site and observed the installation of two (2) additional monitoring wells. The following observations were made:

Drilling of well to the southeast of the main on site building (between property and Pennsylvania Railroad) was in progress when Mr. Motter arrived on site. Mr. Motter met with Doug Harm of Brinkerhoff Environmental Services, Inc. who is serving as Allied Building Supplies' consultant. Diamond Drilling Co. of Jackson, NJ steam cleaned the hollow stem augers and set the well at seventeen feet (17') in depth (with ten feet [10'] of screen); the new well is forty-five feet (45') from the eastern corner of the building on the southeastern side and is ten feet (10') from the building wall adjacent to the garage door. The boring for second monitoring well was started at thirty-one feet (31') from the northern corner of the building and five feet (5') from the wall within the gasoline tank excavation. Water was encountered at two feet (2') and well was screened from two to twelve feet (2' - 12').

Mr. Motter observed that MW-1 had been excavated during backfilling of the gasoline tank excavation and observed the concrete which had surrounded the standpipe and the excavated standpipe with a portion of the PVC casing still attached. Mr. Motter and Mr. Harm could not locate the previous position of MW-1. Mr. Motter and Mr. Harm proceeded to measure distances between buildings, excavations and monitoring wells. It was observed that MW-3 is approximately twenty-five feet (25') from the heating oil tank excavation.

Mr. Motter observed five (5) drums labelled: MW-1 soil 8/29/93; MW-1 Development Water 8/30/93; MW-1 Soil 8/29/93; MW-1 Soil 8/29/93; and SB-2 Soil 8/29/93 located on the concrete pad. These drums were filled with material. Five (5) empty or partially rubble filled drums were also observed scattered throughout the site.

Based upon the observations during the site investigation, the following deficiencies shall be addressed as required below. The results of the additional remedial investigations required shall be submitted as part of a Remedial Action Workplan (RAW), previously required by the Department's August 12, 1994 letter to Allied Building Supplies' representatives and due January 31, 1995.

Remedial Investigation

A. Monitoring Well MW-1

Allied Building Supplies shall either locate and restore monitoring well MW-1 or locate and properly abandon monitoring well MW-1 and re-install a replacement monitoring well MW-1A within ten feet (10') of the former MW-1 location. Allied Building Supplies shall submit boring logs and the monitoring well construction details (Well Certification Forms A and B, enclosed) for all newly installed monitoring wells. Allied Building Supplies shall submit a Well Abandonment Form for all abandoned monitoring wells.

B. Waste Disposal

Pursuant to N.J.A.C. 7:26-8.5, Allied Building Supplies shall determine if the drummed wastes are hazardous wastes. Allied Building Supplies shall provide any sample results and the rationale used for the categorization of all wastes generated by this investigation and/or cleanup to assure proper handling and disposal. Please be advised that improper waste treatment, storage or disposal of hazardous wastes is a violation of State and Federal Hazardous Waste Regulations. As a reminder, all non-hazardous waste must be removed from the site to an approved facility within six months after generation. Allied Building Supplies shall remove all hazardous waste to an approved facility within 90 days after generation. Interim storage of hazardous waste shall be in accordance with N.J.A.C. 7:26-9. The storage of hazardous waste in piles is strictly prohibited. Please be advised that all soils reuse plans must be prepared in accordance with the "Management of Excavated Soils" guidance document and shall receive prior approval from the Department before their implementation.

C. Heating Oil Tank and MW-3

Oversite of the 550-gallon fuel oil tank which was abandoned in place is being transferred to the Bureau of Field Operations, Case Assignment Section for reassignment. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Mark Pederson
401 E. State Street, 4th Floor
CN 028
Trenton, NJ 08625

Enclosed find a Memorandum of Agreement (MOA) package which will allow Allied Building Supplies to address this area of concern under an MOA managed by the Bureau of Field Operations. It should be noted that the monitoring well installed to monitor the abandoned tank is located over twenty-five feet from the abandoned tank in a side gradient direction.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors and Mr. Winters:

On November 29, 1994, the New Jersey Department of Environmental Protection (Department), represented by Allan Motter, Case Manager, inspected the Allied Building Supplies site and observed the installation of two (2) additional monitoring wells. The following observations were made:

Drilling of well to the southeast of the main on site building (between property and Pennsylvania Railroad) was in progress when Mr. Motter arrived on site. Mr. Motter met with Doug Harm of Brinkerhoff Environmental Services, Inc. who is serving as Allied Building Supplies' consultant. Diamond Drilling Co. of Jackson, NJ steam cleaned the hollow stem augers and set the well at seventeen feet (17') in depth (with ten feet [10'] of screen); the new well is forty-five feet (45') from the eastern corner of the building on the southeastern side and is ten feet (10') from the building wall adjacent to the garage door. The boring for second monitoring well was started at thirty-one feet (31') from the northern corner of the building and five feet (5') from the wall within the gasoline tank excavation. Water was encountered at two feet (2') and well was screened from two to twelve feet (2' - 12').

Mr. Motter observed that MW-1 had been excavated during backfilling of the gasoline tank excavation and observed the concrete which had surrounded the standpipe and the excavated standpipe with a portion of the PVC casing still attached. Mr. Motter and Mr. Harm could not locate the previous position of MW-1. Mr. Motter and Mr. Harm proceeded to measure distances between buildings, excavations and monitoring wells. It was observed that MW-3 is approximately twenty-five feet (25') from the heating oil tank excavation.

Mr. Motter observed five (5) drums labelled: MW-1 soil 8/29/93; MW-1 Development Water 8/30/93; MW-1 Soil 8/29/93; MW-1 Soil 8/29/93; and SB-2 Soil 8/29/93 located on the concrete pad. These drums were filled with material. Five (5) empty or partially rubble filled drums were also observed scattered throughout the site.

Based upon the observations during the site investigation, the following deficiencies shall be addressed as required below. The results of the additional remedial investigations required shall be submitted as part of a Remedial Action Workplan (RAW), previously required by the Department's August 12, 1994 letter to Allied Building Supplies' representatives and due January 31, 1995.

Remedial Investigation

A. Monitoring Well MW-1

Allied Building Supplies shall either locate and restore monitoring well MW-1 or locate and properly abandon monitoring well MW-1 and re-install a replacement monitoring well MW-1A within ten feet (10') of the former MW-1 location. Allied Building Supplies shall submit boring logs and the monitoring well construction details (Well Certification Forms A and B, enclosed) for all newly installed monitoring wells. Allied Building Supplies shall submit a Well Abandonment Form for all abandoned monitoring wells.

B. Waste Disposal

Pursuant to N.J.A.C. 7:26-8.5, Allied Building Supplies shall determine if the drummed wastes are hazardous wastes. Allied Building Supplies shall provide any sample results and the rationale used for the categorization of all wastes generated by this investigation and/or cleanup to assure proper handling and disposal. Please be advised that improper waste treatment, storage or disposal of hazardous wastes is a violation of State and Federal Hazardous Waste Regulations. As a reminder, all non-hazardous waste must be removed from the site to an approved facility within six months after generation. Allied Building Supplies shall remove all hazardous waste to an approved facility within 90 days after generation. Interim storage of hazardous waste shall be in accordance with N.J.A.C. 7:26-9. The storage of hazardous waste in piles is strictly prohibited. Please be advised that all soils reuse plans must be prepared in accordance with the "Management of Excavated Soils" guidance document and shall receive prior approval from the Department before their implementation.

C. Heating Oil Tank and MW-3

Oversite of the 550-gallon fuel oil tank which was abandoned in place is being transferred to the Bureau of Field Operations, Case Assignment Section for reassignment. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Mark Pederson
401 E. State Street, 4th Floor
CN 028
Trenton, NJ 08625

Enclosed find a Memorandum of Agreement (MOA) package which will allow Allied Building Supplies to address this area of concern under an MOA managed by the Bureau of Field Operations. It should be noted that the monitoring well installed to monitor the abandoned tank is located over twenty-five feet from the abandoned tank in a side gradient direction.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Please be advised that Allied Building Supply Co.'s environmental consultant, Brinkerhoff Environmental Services, Inc., was able to locate and repair MW-1 at the above-referenced property. Therefore, pursuant to the Department's correspondence dated August 12, 1994, the on-site wells will be sampled on Monday, January 16, 1995. Once the analytical data from the ground water sampling is received, Brinkerhoff will prepare the Remedial Action Workplan Addendum Report for submission to the Department.

If you have any questions or comments, please do not hesitate to contact me. I will keep you advised of the status of this matter.

Very truly yours,

BRESSLER, AMERY & ROSS

Case No. 93-06-24-1425

Dear Mr. Motter:

Pursuant to our telephone conversation of Wednesday, January 25, 1995, this letter will confirm that an extension of 30 days has been granted for the submission of the Remedial Action Workplan Addendum Report in connection with the above-referenced matter. Accordingly, the Report will be submitted to your attention by Thursday, March 2, 1995.

Thank you for your consideration in this matter.

Very truly yours,

Linden, Union County, New Jersey

UST #0129486
NJDEP Case #93-06-24-1425

February 23, 1995

1.0 Introduction

Brinkerhoff Environmental Services, Inc. (BES) was retained by SELRITE Millwork Corporation to prepare a Remedial Action Workplan (RAW) Addendum for Allied Building Supplies (Allied) in accordance with the August 12, 1994 NJDEP correspondence addressed to Mr. Daniel Winters of Allied. The site is located at 101 West Elizabeth Avenue, Linden, Union County (see Figure 1). The RAW Addendum included the installation of two (2) groundwater monitoring wells, groundwater sampling and laboratory analysis.

During previous site activities, the casing and upper two (2) feet of monitoring well MW-1 had been damaged. This well was repaired two weeks before sampling was performed.

The following report presents the results of the investigation, including a request for natural attenuation at this site.

2.0 Groundwater Investigation

2.1 Monitoring Well Installation and Repair

On November 30, 1994, two (2) four (4) inch PVC monitoring wells were installed at the site by Diamond Drilling Company, Inc. Monitoring well MW-5 was installed within the former UST excavation at the downgradient edge and MW-6 was installed downgradient of the former excavation (see Figure 2). Monitoring well records are included as Exhibit I of this report.

During previous site activities monitoring well MW-1 was damaged. On December 29, 1994, MW-1 was repaired by Diamond Drilling. The protective casing and upper two feet of solid PVC were repaired. With the exception of the upper two feet of the well, MW-1 was relatively free of debris. The well was purged to assure any debris in the well was removed.

Wells MW-1, MW-5 and MW-6 were surveyed to a site bench mark by a licensed surveyor. All six (6) wells are tied to the same benchmark. Certification Forms A and B are included in Exhibit I of this report.

2.2 Groundwater Sampling

On January 16, 1995, the six (6) monitoring wells located on the property were sampled by BES personnel in accordance with the May 1992 NJDEP *Field Sampling Procedures Manual*. The samples were collected within two feet of the static water level after purging the wells a minimum of three standing columns of water. The monitoring well samples were collected with a dedicated stainless steel and Teflon bailer which was laboratory cleansed, then transferred to sealed laboratory glassware suitable for volatile organic compounds and lead. Monitoring well data forms are included in Exhibit II of this report.

2.3 Groundwater Analytical Summary

The samples collected, designated MW-1 through MW-6 and a field and trip blank, were submitted to a New Jersey certified laboratory, Accredited Laboratories, Inc., for analysis. Samples were analyzed for volatile organic compounds with a forward library search (VO+10), MTBE, TBA, and lead. Laboratory analytical results are included as Exhibit III of this report and summarized in Table I, below.

TABLE I
Groundwater Sampling Results
Volatile Organic Compounds, MTBE, TBA and Lead
Allied Building Supply
January 16, 1995
(results in ppb)

Sample ID	Benzene	Toluene	Ethylbenzene	Total Xylenes	MTBE	TBA	Lead	TIC's
MW-1	~~35~~ 5	79	60	267	50U	50U	~~46~~ 12	~~189~~ 263
MW-2	5U	5U	5U	5/10U	50U	50U	10U	~~298~~
MW-3	5U	5U	5U	5/10U	50U	50U	10U	ND
MW-4	5U	5U	5U	5/10U	50U	50U	10U	ND
MW-5	5U	5U	5U	5/10U	50U	50U	~~12~~ 46	ND
MW-6	5U	5U	5U	5/10U	50U	50U	15.8	ND
Field Blank	5U	5U	5U	5/10U	50U	50U	10U	ND
Trip Blank	5U	5U	5U	5/10U	50U	50U	-	ND
*NJDEP Standard	1	1,000	700	40	700	500	10	-

U-Not detected above instrument detection limit. Preceding number is detection limit; ND-Compound not detected; *NJDEP Class II-A Specific Groundwater Quality Criteria; Please note that MW-1 and MW-5 were inadvertently mislabeled during sampling activities. Corrections have been made on the attached laboratory data.

Volatile organic compounds and lead were detected in sample MW-1. Benzene was detected at a concentration of 35 parts per billion (ppb), total xylenes were detected at a concentration of 267 ppb, and lead was detected at a concentration of 46 ppb. Lead was also detected in samples MW-5 and MW-6 at concentrations of 12 ppb and 15 ppb, respectively. No other volatile organic compounds were detected, with the exception of trace levels of methlyene chloride and acetone, common laboratory contaminants.

Groundwater sampling results show a decrease in the level of petroleum related compounds in MW-1 since the previous sampling event conducted by Vectre, Inc. in December 1993. The December 1993 sampling event reported benzene at 350 ppb, toluene at 7,500 ppb, ethylbenzene at 1,600 ppb and xylenes at 2,230 ppb.

2.4 Site Hydrogeology

Subsurface soil consists of red clayey fine sand with some medium coarse sand pebbles and shale fragments to a depth of 17.5 feet below grade, the maximum depth of stratigraphic section drilled.

Depth to groundwater ranged from 2.17 feet in MW-5 to 12.43 feet in MW-6. The shallow depth of groundwater in MW-5, located within the former UST excavation, is likely due to perched water within the former tank field area. Groundwater flow direction is toward the northeast as shown on Figure 3 - Groundwater Contour Map. A small anomaly in flow direction is present at MW-5. This well is located within the former tank excavation and shows a false high in depth to groundwater, caused by water perched within the former excavation. Monitoring well data is presented in Table II, below.

TABLE II
Monitoring Well Data
Allied Building Supply
January 16, 1995
(results in feet)

	MW-1	MW-2	MW-3	MW-4	MW-5	MW-6
Casing Elevation	29.23	30.29	27.98	28.19	29.71	30.60
Well Depth	15.15	19.55	14.45	19.45	12.61	17.09
Depth to Screen	2.98	N/A	N/A	N/A	N/A	7.52
Depth to Groundwater	9.76	11.11	8.18	8.49	2.17	12.43
Product Thickness	0.0	0.0	0.0	0.0	0.0	0.0
Groundwater Elevation	19.47	19.18	19.80	19.70	27.54	18.17

3.0 Recommendations

BES conducted a remedial investigation at Allied Building Supplies, which included the installation and sampling of groundwater monitoring wells.

Groundwater sampling results showed gasoline related volatile organic compounds in only one (1) of the six (6) monitoring wells on-site. Benzene was detected at 35 ppb and xylenes were detected at 267 ppb in well MW-1, which is located on the immediate upgradient edge of the former tank excavation. Monitoring wells MW-2, MW-5 and MW-6, located downgradient to slightly side gradient of the former UST excavation, reported no detectable gasoline related volatile organics.

Lead was detected in three (3) monitoring wells at levels ranging from 12 ppb in MW-5, 15 ppb in MW-6 and 46 ppb in MW-1.

BES recommends natural attenuation be considered as a mechanism for remediation at this site. Laboratory analytical data and site specific geologic and hydrogeologic conditions favor natural attenuation. Only one (1) well has shown localized levels of gasoline related volatile organics and no gasoline related volatile organics were detected in downgradient wells. The abundant clay in subsurface sediment and the perched water present within the former tank excavation suggest a slow groundwater flow rate at this site. The combination of both a limited extent of impacted groundwater and a slow migration rate indicate natural attenuation will be effective in preventing any off-site migration of contaminants.

An in-depth discussion of natural attenuation as an appropriate remedial method for this site is set forth in the Remedial Action Workplan dated May 1994, which was previously submitted to your attention.

This report was prepared and is respectfully submitted by:

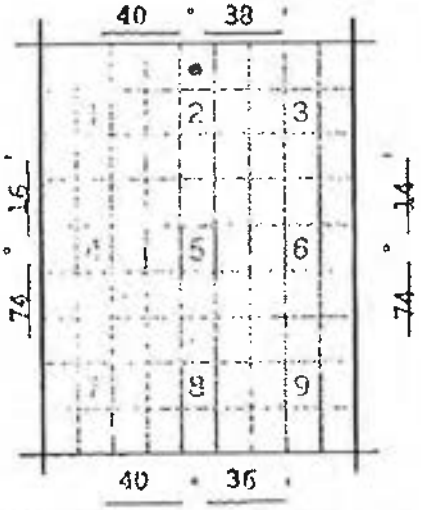
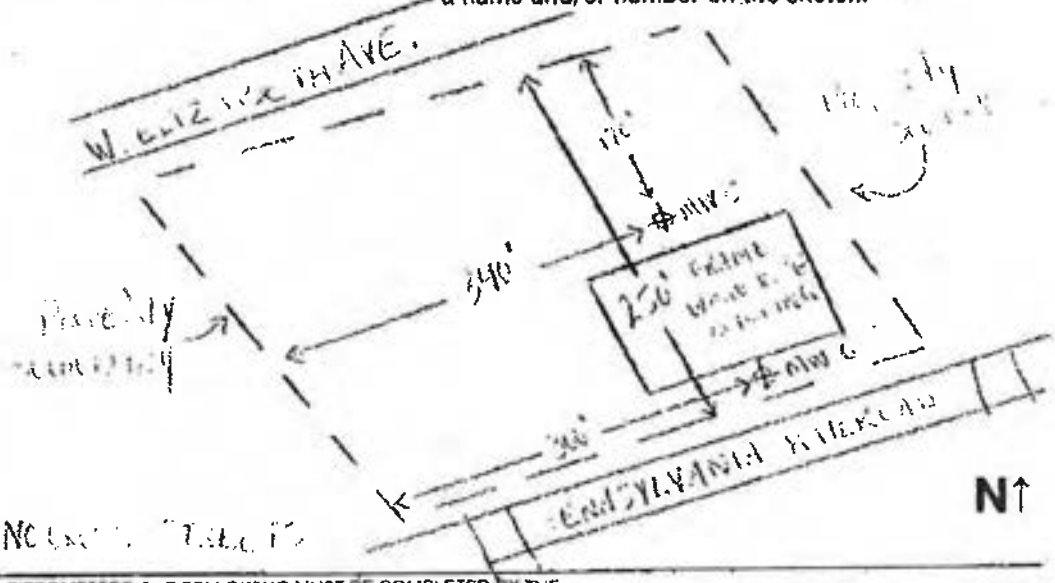
State Atlas Map No. 26



Draw sketch of well(s) nearest roads, buildings, etc. with marked distances in feet. Each well MUST be labeled with a name and/or number on the sketch.



FOR MONITORING WELLS, RECOVERY WELLS, OR PIEZOMETERS, THE FOLLOWING MUST BE COMPLETED BY THE APPLICANT. PLEASE INDICATE WHY THE WELLS ARE BEING INSTALLED:

- ☐ Spill Fund Case
- ☐ ECRA Case
- ☐ CERCLA (Superfund) Site
- ☐ RCRA Site
- ☒ Underground Storage Tank
- ☐ NJPDES Municipal Discharge Permit
- ☐ NJPDES Industrial Discharge Permit
- ☐ Water and Hazardous Waste Enforcement Case
- ☐ Water Supply Aquifer Test Observation Well
- ☐ Other (explain)

MONITORING WELL CERTIFICATION - FORM A - AS-BUILT CERTIFICATION

(One form must be completed for each well)

Name of Owner: Selrite Millwork Corp.
Name of Facility: Allied Building Supply
Location: 101 West Elizabeth Ave., Linden, NJ
UST Registration No.: 0129486 BUST case No.: 93 . 06 . 24 . 1425

CERTIFICATION

Well Permit Number:	2 6 3 8 8 5 1
Owner's Well Number (As shown on the application or plans):	MW-5
Well Completion Date:	11/30/94
Distance from Top of Casing (cap off) to ground surface (one-hundredth of a foot):	0.00
Total Depth of Well to the nearest 1/2 foot:	12.98
Depth to Top of Screen (or Top of Open Hole) From Top of Casing (one-hundredth of a foot):	2.98
Screen Length (or length of open hole) in feet:	10'
Screen or Slot Size:	020
Screen or Slot Material:	PVC
Casing Material: (PVC, Steel or Other-Specify):	PVC
Casing Diameter (inches):	4"
Static Water Level From Top of Casing at the Time of Installation (one-hundredth of a foot):	2.61
Yield (gallons per minute):	1-2 GPM
Development Technique (specify):	pump
Length of Time Well is Developed/ Pumped or Bailed:	Hours 30 Minutes
Lithologic Log:	Attach

Authentication

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

METHODOLOGY SUMMARY

Volatile Organics - EPA 8240 (aqueous)

Volatile organic compounds are purged from a 5 ml sample by bubbling an inert gas through the aqueous sample. The purgeables are trapped in a sorbent column. When purging is completed, the sorbent column is heated and back-flushed with the inert gas to desorb the purgeables onto a GC column. The GC is temperature-programmed to separate the purgeables which are then detected with a mass spectrometer.

Metals (aqueous)

A 100 ml portion of aqueous is digested with nitric acid on a hot plate and evaporated to near dryness cautiously. The digestate is then refluxed with either nitric acid or hydrochloric acid. Diluted hydrochloric acid is used as the final reflux acid for the flame AA or ICAP of Ag, Al, Ba, Be, Cd, Cr, Co, Cu, Fe, Pb, Ni, Sb, Sn, Tl and Zn. Diluted nitric acid is employed as the final dilution acid for the furnace AA analysis of As, Pb and Se. For the graphite furnace analysis, an aliquot of the digestate is spiked with modifier solution and is placed into the graphite furnace. The aliquot is then slowly evaporated to dryness, charred and atomized. The absorption of the EDL radiation during atomization is proportional to the element concentration. For the flame AA, the digestate is aspirated and atomized into a flame. The absorption of the HCL radiation during atomization is proportional to the element concentration. The basis of the ICAP method is the measurement of the atomic emission by an optical spectroscope technique. The emission spectra are dispersed by a grating spectrometer and the intensities of the line are measured and processed by a computer system. For mercury analysis, a 100 ml portion of sample is digested with potassium permanganate and persulfate at acidic conditions in a water bath at 95°C. The mercury in the sample is reduced to the elemental state and detected by the cold vapor technique in a closed system. The analytical procedures associated with the Atomic Absorption technique are derived from "EPA Methods for Chemical Analysis of Water and Wastes" - EPA Method 200 Series. The analytical procedures associated with ICAP techniques are derived from EPA Method 200.7.

CONFORMANCE/NON-CONFORMANCE SUMMARY

Accredited Labs received 8 aqueous samples (Project: Allied Bldg 94193; ALI Case #1149) from Brinkerhoff Environmental Services on 1/17/95 for the analyses of Volatile Organics +10, MTBE, TBA and Lead.

All analyses were performed within the required holding time.

"The laboratory has reviewed the quality assurance and quality control measurements for the sample analysis stated above."

Yun-shen Lee, Ph.D.
Technical Director

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Enclosed for your review please find two copies of the Remedial Action Workplan ("RAW") Addendum prepared by Brinkerhoff Environmental Services, Inc. ("Brinkerhoff") in connection with the above-referenced matter. As you will see, the data indicates a significant downward trend in the levels of contaminants detected in the ground water samples taken at the site. The data demonstrates that localized levels of gasoline related volatile organic compounds have been detected in only one well (MW-1). Brinkerhoff is recommending natural attenuation as an appropriate remedial method for this site. Accordingly, we request that the Department issue an RAW approval on the basis of this Report, as well as the RAW dated May 1994 prepared by Vectre Corporation.

The information requested in the Department's August 12, 1994 correspondence concerning sample point GT-1 will be provided shortly.

Once you have had an opportunity to review the enclosed, I will contact you so that we may discuss same.

Very truly yours,

BRESSLER, AMERY & ROSS, P.C.

Re: Extension for Submittal of Report
Allied Building Supply Company
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors and Mr. Winters:

This letter is in response to Bressler, Amery & Ross's letter for Allied Building Supply Company dated January 26, 1995 requesting an extension for the submission of the Remedial Action Workplan (RAW) required pursuant to N.J.A.C. 7:14B et seq. and the New Jersey Department of Environmental Protection's (Department) letter, dated August 12, 1994. The report was originally due on November 15, 1994. An extension request was approved and the new due date was January 31, 1995. The current request has been approved and the new deadline for submission is March 2, 1995.

This letter is only an extension and does not relieve Allied Building Supply Company of any obligation and/or responsibilities set forth in the regulations promulgated pursuant to the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq. **No further extensions will be granted for the submission of the required RAW.**

If Allied Building Supply Company fails to submit the required report within the referenced time frame, this case will be referred to the Bureau of Applicability and Compliance (BAC) for review. The Department may initiate enforcement action including, but not limited to, the assessment of penalties and revocation of tank operating registrations pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B-12. The Department reserves the right to implement all enforcement measures, including the right to revoke tank operating registrations and assess penalties from the original due date.

If the tank(s) at the referenced facility is/are regulated under the federal Hazardous and Solid Waste Amendments of 1984 and Allied Building Supply Company fails to comply with the above requirements, this case may be referred to the United States Environmental Protection Agency (USEPA) for violations of 40 CFR Part 280.

Please note, pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B et seq., the owner and operator of the regulated underground storage tanks are strictly liable for compliance with these requirements. Violators are liable for penalties of up to $50,000 per day for each day of continuing violation and revocation of tank registrations.

On April 5, 1993, the UST Fee Rule (Amendments and New Rules at N.J.A.C. 7:14B) was proposed. This rule appeared in the February 22, 1994, New Jersey Register. Effective February 22, 1994, the Department will be billing you for oversight of all work conducted at your site. Documents submitted in accordance with the "Technical Requirements for Site Remediation" (N.J.A.C. 7:26E) will help reduce the time necessary for oversight of your case. At this time, the Department intends to process bills on a semi-annual basis. Please consult the April 5, 1993 and February 22, 1994, State Registers for details. Copies can be obtained by contacting the Office of Administrative Law at (609) 588-6500. Your case manager should be contacted with any additional questions.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

In response to the request for additional information concerning sample point GT-1 set forth in the Department's August 12, 1994 correspondence, enclosed please find a copy of correspondence dated March 16, 1995 which I received from Allied Building Supply Co.'s environmental consultant, Mr. Doug Harm of Brinkerhoff Environmental Services, Inc. Mr. Harm estimates that the linear distance between GT-1 and 105-MW1-11 is 5 feet.

If you have any questions concerning this matter or require additional information, please do not hesitate to contact me.

Very truly yours,

BRESSLER, AMERY & ROSS, P.C.

RE: Location of Sampling Point GT-1 and 105-MW1-11
Allied Building Supplies, Linden, New Jersey
NJDEP No. 93-06-24-1425

Dear Ms. Conners:

The linear distance between GT-1 and 105-MW1-11 is estimated to be 5 feet. This estimate is based on maps prepared by Vectre Corporation and American Resource Consultants, Inc. presented in the Remedial Action Workplan dated May 1994, the measured distance of well MW-1 and field observations of what appears to be the edge of the former excavation.

If you have any questions or comments, please call the undersigned at 908-223-2225.

Sincerely,
Brinkerhoff Environmental Services, Inc.

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486
Remedial Action Workplan Dated: February 23, 1995

Dear Ms. Connors and Mr. Winters:

Pursuant to the Authority vested in the Commissioner of the New Jersey Department of Environmental Protection (Department) by the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21 et seq.) and duly delegated to the Assistant Director of the Industrial Site Evaluation Element, the above referenced Remedial Action Workplan (RAW), submitted by Allied Building Supplies, is hereby approved by the Department as conditioned below:

Allied Building Supplies shall initiate the RAW, as conditioned in this RAW Approval, within forty-five (45) days of receipt of this letter and begin implementation of this RAW according to the proposed time schedule. If any current or anticipated delay is caused by events beyond the control of Allied Building Supplies, then Allied Building Supplies shall notify the Department in writing within 10 calendar days of such event. Allied Building Supplies shall precisely describe the cause of the delay and request an extension. Increases in the costs or expenses incurred in fulfilling the requirements outlined in this letter shall not be considered a basis for an extension and such extension requests will not be granted.

I. Approved Cleanup Levels

A. Soil Cleanup Levels

Allied Building Supplies shall remediate the soil contamination to the Department's most recent general guidance on contaminant cleanup criteria, which can be found in the April, 1994, edition of the Site Remediation Newsletter. Properties that meet the most restrictive soil criteria throughout the soil column are considered "clean" and are appropriate for unrestricted use depending on the following criteria.

1. When the "Residential Direct Contact soil cleanup criteria" are more stringent than the "Impact to Ground Water soil cleanup criteria", the entire soil column shall be remediated to the applicable "Residential Direct Contact soil cleanup criteria" to avoid institutional controls for any remaining contamination. This ensures that future site activities will not enable contaminated materials to be brought to the surface creating a potential environmental or health threat.

2. When the "Impact to Ground Water soil cleanup criteria", which are intended to be protective of ground water, are more stringent than the "Residential Direct Contact soil cleanup criteria", the entire soil column shall be remediated to the applicable "Impact to Ground Water soil cleanup criteria". Remediation of the entire soil column to the "Impact to Ground Water soil cleanup criteria" ensures continued remediation of ground water to levels above the applicable ground-water cleanup standards does not occur.

3. Soil contaminant levels must be remediated to a level below 1,000 parts per million (ppm) total volatile organic contaminants (TVO) and 10,000 ppm total organic contaminants (TOC) throughout the soil column.

4. All future data submissions for soils should be evaluated using the Department's latest evaluation criteria.

Following are the site cleanup levels which shall be achieved for unrestricted use/protection of ground water.

Soil Cleanup Criteria (ppm)	Resident Direct Contact Soil Cleanup Criteria	Impact to Ground Water Soil Cleanup Criteria
Volatile Organics		
Benzene	3	1
Ethylbenzene	1,000	100
Toluene	1,000	500
Xylenes (Total)	410	10
Other		
Lead	400	

December, 1993 (18.150 ppm). MW-2, MW-3 and MW-4 were sampled in December, 1993 with results below the method detection limits for all parameters. December 7, 1993 groundwater data indicates that depth to groundwater is between nine feet and eleven feet (9' - 11') and groundwater flow is in an easterly/southeasterly direction. No free phase product was observed in the groundwater monitoring wells.

Two (2) additional groundwater monitoring wells (MW-5 and MW-6) were installed on November 30, 1994 to fully delineate the horizontal and vertical extent of ground water contamination. MW-5 was installed to a depth of thirteen feet (13') with ten feet (10') of screen within the 2,000-gallon gasoline UST excavation area. MW-6 was installed to a depth of seventeen and one half feet (17.5') with ten feet (10') of screen in the downgradient direction of the 2,000-gallon gasoline UST excavation area. MW-1, which had been damaged during the backfilling of the 2,000-gallon gasoline UST excavation area, was restored on December 29, 1994. MW-1, MW-5 and MW-6 were then surveyed. MW-1 through MW-6 were sampled on January 16, 1995. MW-2 through MW-6 were below the method detection limits for BTEX. MW-1 through MW-6 were below the method detection limits for MTBE and TBA. MW-1 exhibited benzene at an estimated concentration of 3 ppb, toluene at 79 ppb, ethylbenzene at 60 ppb and xylenes at 267 ppb. Tentatively identified compounds (TICs) were found in MW-1 at 263 ppb and MW-2 at 8 ppb. Pb was found in MW-1 at 12 ppb, MW-5 at 46.1 ppb and MW-6 at 15.8 ppb. MW-2, MW-3 and MW-4 were ND for Pb. The January 16, 1995 groundwater data indicates that depth to groundwater is between two feet (2') in MW-5 and eight to twelve feet (8' - 12') in the remaining wells. Groundwater flow was in an easterly/northeasterly direction during the January 16, 1995 sampling event. No free phase product was observed in the groundwater monitoring wells.

III. Remediation Proposal/Conditions of Approval

A. Summary of Remedial Action Proposal

Given the small amount of soil contamination remaining on the western edge of the 2,000-gallon gasoline tank excavation and the decreasing levels of BTEX contamination in MW-1 as well as ND levels of BTEX in downgradient and sidegradient monitoring wells (MW-2, MW-4, MW-5 and MW-6), Allied Building Supplies proposes natural attenuation as the course of remedial action for the site. Allied Building Supplies proposes to sample the monitoring wells for the period of one (1) year with all monitoring wells being sampled in the first quarter and MW-1 and MW-6 being sampled quarterly. Delineation of the contaminant is completed in the downgradient and side gradient directions. No receptors in the area are threatened based on downgradient and side gradient contaminant concentrations.

B. Ground-Water Cleanup Levels in accordance with the Ground Water Quality Standards.

Volatile Organics	Cleanup Levels (ppb)
Benzene	1
Ethylbenzene	700
Methyl-Tert-butyl ether (MTBE)	700
Tert-butyl alcohol (TBA)	500
Toluene	1,000
Other	
Lead	10

II. Areas of Concern

A. Soils

In June, 1993, a 2,000-gallon steel gasoline underground storage tank (UST) was removed by JBC Environmental and Tri-State Environmental Consultants. Holes were discovered in the tank and visually stained soils observed. Approximately 70 tons of soils were excavated and stockpiled on site. The NJDEP hotline was notified of the discharge. In July, 1993, seven soil samples were collected from the base and sidewalls of the gasoline tank excavation by Sailer Environmental. Xylene was found to exceed the soil cleanup criteria in two samples and a duplicate. The base sample reported 48 ppm xylenes and the sidewall sample reported 47 ppm xylenes with the sidewall duplicate reporting 194 ppm xylenes. In August, 1993, American Resource Consultants installed three (3) borings around the excavation area and collected six (6) soil samples. All samples were within soil cleanup criteria except sample 105-MW1-11 which exhibited 131 ppm xylenes. This boring was developed into a monitoring well (MW-1). In December, 1993, Vectre Corporation collected one (1) confirmatory soil sample from the 2,000-gallon gasoline UST excavation and one (1) soil sample from each soil pile. All soil sample results were below soil cleanup criteria. Allied Building Supply was required to indicate the linear distance between sample point GT-1 and former sample point 105-MW1-11. In a letter dated March 16, 1995, Brinkerhoff Environmental Services, Inc. estimated the distance to be five feet (5') based on maps prepared by Vectre Corporation and American Resource Consultants, Inc.; however, these maps were not drawn to scale.

B. Ground Water

One (1) groundwater monitoring well (MW-1) was installed on site on August 30, 1993 and three (3) additional groundwater monitoring wells (MW-2, MW-3 and MW-4) were installed on site on November 19, 1993. MW-2, MW-3 and MW-4 were installed to a depth of fifteen to twenty feet (15' - 20') with ten feet (10') of screen. Well certification Form A and boring logs were not presented for MW-1. MW-1 is adjacent to and upgradient of the 2,000-gallon gasoline UST excavation area and recorded elevated levels of BTEX in September, 1993 (7.8 ppm) and

Case No. 93-06-24-1425

Dear Mr. Motter:

Pursuant to our earlier telephone conversation, please be advised that the costs for remediation at the above property to date are approximately $45,000. In addition, it is estimated that future monitoring and reporting costs will be approximately $12,000. Enclosed please find the Effectiveness Analysis and Certification of Allied Building Supply Co.'s environmental consultant, Brinkerhoff Environmental Services, Inc.

If you have any questions or require additional information, please do not hesitate to contact me.

Very truly yours,

EFFECTIVENESS ANALYSIS AND CERTIFICATION
Allied Building Supply
101 West Elizabeth Avenue
Linden, New Jersey

Proposed Remedial Action
The proposed remedial actions for the subject site are soil reuse and natural attenuation for the groundwater.

Effectiveness of the Proposed Remedial Action
Soil sampling results showed target compounds and analytes were below the New Jersey Department of Environmental Protection's (NJDEP's) most stringent proposed cleanup standards, including impact to groundwater, for soil excavated from the former tankfield areas. Based on these facts, soil reuse at the subject site is the most effective remedial action for excavated soil.

Since the area of impacted groundwater is localized, groundwater flow rates are relatively slow and the contaminants present, specifically benzene, toluene, ethylbenzene, and xylenes, are either biodegradable or will readily volatilize over time, natural remediation and attenuation are the most effective remedial approach for this site.

Implementation and Timeline
Natural degradation and attenuation of the contaminants are occurring at present. A groundwater monitoring program could be implemented to verify natural degradation and attenuation is requested by the NJDEP.

Cost Differential
The proposed remedial measures are the most cost effective action for the subject site.

Community Concerns
There are no foreseeable community concerns associated with the proposed remedial action.

Case #93-06-24-1425
UST #0129486
Site Status/Future Actions

Dear Mr. Winters:

This letter is to provide clarification of the current status and future remedial actions necessary at the Allied Building Supplies site in Linden. The New Jersey Department of Environmental Protection (Department) approved Allied Building Supplies' Remedial Action Workplan on March 30, 1995. The approved remedial actions consisted of natural remediation for residual soil and ground water contamination.

In June, 1993, a 1,000 gallon gasoline underground storage tank (UST) was excavated. Approximately 70 tons of soil was excavated, sampled, and reused as backfill in the UST excavation. Post excavation soil sampling was conducted and the analyses showed xylene levels up to 131 ppm. As a result, on January 24, 1996, Allied Building Supplies opted to excavate and dispose an additional 15 tons of soil. Post excavation soil samples were again collected and the xylene levels ranged from undetected to <0.1 ppm. Based on the Department's review of the information submitted, it was determined that Allied Building Supplies complied with the Department's existing requirements regarding remediation of the soils in Area of Concern (AOC) 1 which contained the former gasoline UST. In the Department's May 13, 1996 letter, the Department determined that no further action was required for the soils in AOC 1.

Historically, six (6) ground water monitoring wells were installed and four rounds of ground water samples were collected and analyzed. Upon the Department's review of the ground water data (dated 12/93, 1/96, 12/95, and 3/96), a decreasing trend in contamination was not evident. The xylene levels in MW-1 increased in each round of sampling from January, 1995 and are presently at 7,700 ppb. Current site conditions at MW-1, the source well, showed increasing levels of xylenes (7,700 ppb), toluene (4,900 ppb), and lead (14.1 ppb). It was noted in the Department's review that the January, 1996 soil excavation was conducted in heavy rains. The Department recommended that ground water sampling shall continue as required in the March 30, 1995 RAW approval letter.

Our recent conversations with Karl Delaney of the Alman Management Group, prompted our reducing the parameters required for the ground water analyses. The Department waives the RAW requirements to analyze for MTBE and TBA on all wells. In addition, the total volatile organic analysis required in the annual sampling in September shall be reduced to a BTEX analysis.

Given that the source has been removed, the organic contaminants are biodegradable, and the lack of proximate receptors, the Department expects that the continuing ground water monitoring program outlined in the RAW will demonstrate decreasing contaminant concentrations and a non-migrating plume. Allied Building Supplies may then petition the Department for "no further action" by establishing a Classification Exception Area (CEA) for the ground water at the site.

If you should have any questions, please contact Diane Seigel, Case Manager, of the Bureau of Underground Storage Tanks at (609) 777-1366.

Sincerely,

Mary Anne Kusek

Re: Allied Building Supply Co.
Linden, New Jersey
Case No. 93-06-24-1425

Dear Mr. Motter:

Pursuant to our recent telephone conversation and your recent discussion with David W. Reger, Esq. of this office, this letter will confirm that Allied is required to take three soil samples (two samples in the area of MW-1 and one sample in the area of the former tank excavation) and that these samples may be analyzed only for xylenes.

If you have any questions or comments, please do not hesitate to contact me.

Very truly yours,

BRESSLER, AMERY & ROSS, P.C.

Re: Allied Building Supply Co.
Linden, NJ
Case No. 93-06-24-1425

Dear Mr. Kinsel:

Based upon our recent telephone conversations, this letter will confirm the next phase of site activities which will be performed by Allied Building Supply Co. ("Allied") at the above-referenced property. Based upon our discussions, it is my understanding that the following activities have been approved by the NJDEP.

Soil. Three post-excavation soil borings, 105-T1-01, 105-T1-05 and 105-MW1-11, exhibited xylene at the following concentrations: 47 ppm, 48 ppm (194 ppm-duplicate) and 131 ppm, respectively. Boring 105-MW1-11 was developed into a monitoring well (MW-1). These levels are above the NJDEP's impact to ground water cleanup criteria. In order to address the levels of xylene detected in the soil, Allied will first excavate and stockpile the clean fill in the former UST excavation. Soil will then be excavated in the area of sampling locations 105-T1-01 and 105-T1-05. This soil will be separately stockpiled. This stockpiled soil will be sampled and analyzed for benzene, toluene, ethylbenzene and xylene. If the sampling results do not show levels of contamination above the NJDEP's standards, this soil will be used to backfill the excavation. Pursuant to the Technical Regulations, the appropriate number of post-excavation soil samples will also be taken and analyzed for xylene.

Ground Water. Allied will also perform the required ground water sampling and analysis and slug test in order to establish a Classification Exception Area ("CEA") for the contaminants detected in the ground water at the site.

We will advise you when the site work will be performed. If you have any questions or comments, please do not hesitate to contact me. Thank you for your assistance in this matter.

Very truly yours,

BRESSLER, AMERY & ROSS, P.C.

Comments: Allied Building Project, Case No. 93-06-24-1425

Dear Dan,

The following is the tentative schedule for the above referenced site.

December 21, 1995	Sampling monitoring wells, conduct slug test
January 10, 1996	Excavation of contaminated soil, load and transport contaminated soil, conduct post excavation soil sampling
February 2, 1996	Receive results for laboratory, receive disposal documentation from disposal company
February 13, 1996	Complete report for review
February 20, 1995	Submit report to NJDEP

Remedial Action Report
Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County, New Jersey
UST #0129486
NJDEP Case #93-06-24-1425

February 27, 1996

1.0 TECHNICAL OVERVIEW

The Allied Building Supplies (Allied) site is located at 101 West Elizabeth Avenue in the City of Linden, Union County, New Jersey (see Figure 1). A Remedial Action Workplan (RAW) was submitted by Vectre Corporation for the Allied site in May of 1994. The RAW proposed natural remediation/attenuation as the remedial alternative for the site.

In January of 1995, Brinkerhoff Environmental Services, Inc. (BES) was retained by SELRITE Millwork Corporation to conduct a site investigation for the Allied site. The remedial investigation was conducted to provide supportive data to the May 1994 RAW, and included the installation of two (2) ground water monitoring wells (MW-5 & MW-6), and collection and analysis of ground water samples. Figure 2 is a site map depicting well locations relative to property boundaries and structures.

Following the investigation, BES prepared a Remedial Action Workplan Addendum (RAWA) dated February 23, 1995, summarizing well installation, ground water sampling and results. Elevated levels of lead were detected in Wells MW-1, MW-5, and MW-6, and elevated levels of benzene and xylenes were detected in Well MW-1, during the January 6, 1995 ground water sampling event. Hydrogeological data collected during the investigation indicated a ground water mound was present in the area of the former gasoline underground storage tank (UST) excavation area surrounding Well MW-5 (see Figure 3).

The following Remedial Action Report (RAR) addresses outstanding issues regarding the Allied investigation, including recommendations for Case Closure through natural attenuation and designation of a Classification Exception Area (CEA). Activities conducted as part of this RAR are discussed below.

Previous soil sampling and analysis indicated elevated levels of xylenes remained in the soil surrounding the former gasoline UST excavation. BES supervised excavation of soil in the area of the elevated xylene samples, collected postexcavation soil samples, and disposed of contaminated soil removed from the excavation.

Four (4) on-site ground water monitoring wells were resampled using the "Low Flow" sampling methodology to reduce turbidity and sediment within the samples. A Ground water contour map was prepared for the sampling event. To assess aquifer characteristics necessary for calculating

contaminant transportation and degradation rates, rising head slug tests were conducted on Wells MW-2 and MW-6.

Activities associated with this RAR were conducted in accordance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E. Sampling was performed in accordance with May 1992 NJDEP *Field Sampling Procedures Manual*. Cleanup Standards were based on the Soil Cleanup Criteria, revised on February 3, 1994 and Ground Water Quality Standards, N.J.A.C. 7:9-6.

2.0 SOIL REMEDIATION

Since previous soil sampling results indicated elevated levels of xylenes remained in the soil along the southern perimeter of the former gasoline UST excavation, BES proposed to excavate and dispose of additional soil in this area. Previous soil sampling results are summarized in Table 1, below, and depicted on Figure 4.

Table 1
Previous Soil Sampling Results
(Results in ppm)

Sample #	Xylenes	*NJDEP
105-T1-01 [1]	**47**	10
105-T1-D [1]	**194**	10
105-T1-05 [1]	**48**	10
105MW1-11 [2]	**131**	10

*NJDEP - NJDEP Impact to Ground Water Soil Cleanup Criteria; [1]Samples collected by Sailer Environmental in July 1993; [2]Samples collected by American Resources Consultants, Inc. and reported in September 1993.

On January 24, 1996, under the supervision of BES, Disposal Systems Inc. excavated additional soil in the area of the former gasoline UST and as depicted in Figure 4. Approximately 15 tons of soil were removed from the area, and disposed of through Soil Remediation of Philadelphia. A soil disposal manifest is included in Exhibit I of this report.

Soil types encountered during the excavation included a brown to red-brown sandy silt loam and gravel fill material (within the former excavation area) and a red silty clay loam native soil (outside the former excavation area). At a depth of 10 feet below grade, soil lithology changed from a red silty clay loam to a fine sandy loam. Soil was excavated to a depth of 12.5 feet below grade. Samples were collected at 10.5 feet below grade, where soil was moist to wet, but not saturated. Soils were completely saturated at 11 feet below grade. Ground water was encountered at 10.5 feet below grade during excavation.

Three (3) postexcavation soil samples (EXS-1, EXS-2 and EXS-3) were collected from the west and south sidewalls of the excavation, as depicted on Figure 4. Postexcavation soil sampling results are summarized in Table 2 below, and presented in Exhibit II of this report.

The excavated soil was field screened using an Hnu photoionization detector. Readings ranged from 150 to 200 meter units for the soil excavated. Headspace readings on split samples collected at the location of soil samples ranged from five (5) to 25-meter units (see Table 2).

Table 2
Post-Excavation Soil Sampling Results
January 24, 1996
(Results in ppm)

Sample #	Depth	Hnu Readings	Xylenes	*NJDEP
EXS-1	10.5'	5 - 10	<0.1	10
EXS-2	10.5'	< 5	ND	10
EXS-3	10.5'	20 - 25	<0.1	10

Hnu Readings are reported in meter units; ND - Denotes compound was not detected above the method detection limit; *NJDEP Impact to Ground Water Soil Cleanup Criteria.

Postexcavation soil sampling results indicate xylene concentrations are below NJDEP Impact to Ground Water Soil Cleanup Criteria.

3.0 GROUND WATER INVESTIGATION

3.1 Ground Water Monitoring, Sampling & Analysis

On December 21, 1995, four (4) of the six (6) on-site monitoring wells, MW-1, MW-2, MW-5 and MW-6, were sampled by BES personnel. Samples were collected within two (2) feet of the static water level after purging the wells a minimum of three (3) standing columns of water using the NJDEP approved "Low Flow" purging methodology for metals in ground water. Ground water samples were collected using dedicated bailers, then transferred to laboratory-cleansed glassware suitable for volatile organic compounds and lead. Monitoring well sampling data forms, detailing well gauging information, are included in Exhibit III of this report.

3.2 Ground Water Analytical Results

Samples MW-1, MW-2, MW-5 and MW-6, including a field and trip blank, were analyzed by a New Jersey certified laboratory, Accredited Laboratories, Inc. Samples were analyzed for volatile organic compounds with a forward library search (VO+10) calibrated for xylenes, methyl tertiary butyl-ether (MTBE), tertiary butyl-alcohol (TBA), and lead. Laboratory analytical results are summarized in Table 3 below, and presented in Exhibit IV of this report.

Table 3
Ground Water Sampling Results
Volatile Organic Compounds, MTBE, TBA and Lead
December 21, 1995
(Results in ppb)

Compound	MW-1	MW-2	MW-5	MW-6	*NJDEP Standard
Benzene	120	ND	ND	ND	1
Toluene	4400	ND	ND	ND	1000
Ethylbenzene	3200	ND	ND	ND	700
Xylenes	6400	ND	3.5	ND	~~40~~ (1000)
MTBE	ND	ND	ND	ND	~~700~~ (70)
TBA	ND	ND	ND	ND	500
Lead	12.6	ND	ND	ND	10

ND - Denotes compound was not detected above the method detection limit *NJDEP Class II-A Ground Water Quality Standards.

Benzene, toluene, ethylbenzene, xylenes (BTEX) and lead were detected in Sample MW-1, at concentrations above the NJDEP Class II-A Ground Water Quality Standards (GWQS). Xylenes were detected in Sample MW-5 at 3.5 parts per billion (ppb), below the NJDEP Class II-A GWQS of 40 ppb.

Historical ground water sampling results indicate a general decreasing trend in the level of petroleum-related volatile organic compounds in MW-1 since the initial sampling event conducted by Vectre, Inc. in December 1993. Table 4 is a summary of historical Ground Water Data.

Table 4
Historical Ground Water Sampling Results
Wells MW-1, MW-5 & MW-6
(Results in ppb)

	MW-1			MW-5			MW-6			*NJDEP
Compound	12/93	1/95	12/95	12/93	1/95	12/95	12/93	1/95	12/95	
Benzene	350	35	120	NI	ND	ND	NI	ND	ND	1
Toluene	7500	79	4400	NI	ND	ND	NI	ND	ND	1000
Ethylbenzene	1600	60	3200	NI	ND	ND	NI	ND	ND	700
Xylenes	8700	267	6400	NI	ND	3.5	NI	ND	ND	~~40~~ (1000)
Lead	NA	46	12.6	NI	12	ND	NI	15	ND	10

NA - Denotes sample was not analyzed for compound; NI - Denotes well was not yet installed; ND - Denotes compound was not detected above the method detection limit; *NJDEP - NJDEP Class II-A Ground Water Quality Standards.

From January of 1995 to December of 1995, lead concentrations have decreased from 46 ppb to 12.6 ppb in Well MW-1, and from 12 ppb and 15 ppb to nondetect in Wells MW-5 and MW-6, respectively. The decrease in lead concentrations is most likely due to implementation of the "Low Flow" sampling methodology for metals in ground water. The nondetectable levels reported

in MW-5 and MW-6, after using the low flow purging method, indicated that the lead previously detected was likely the result of suspended solids and not impacted ground water.

Previous sampling for volatile organic compounds and lead reported nondetectable levels in Wells MW-2, MW-3, and MW-4.

The reason for the increase in sampling results from January 1995 and December 1995 may be the result of the use of the slow purge sampling method, which would cause less volatilization of organic compounds during purging and sample collection.

3.3 Well Search

A well search was conducted by Vectre Corporation as part of the May 1994 RAW. The search included all domestic, industrial, potable and monitoring wells within a one (1) mile radius of Allied. The search identified three (3) domestic wells, seven (7) industrial wells, one (1) potable well, six (6) piezometers, one (1) recovery well and 93 monitoring wells within one (1) mile of the site. The depth of the domestic wells and potable well are greater than 100 feet and the wells do not draw water from the shallow water table aquifer. A canvass of the area revealed no wells located within 500 feet of the site. Basements were not identified immediately downgradient of the site.

3.4 Aquifer Characteristics & Classification Exception Area Application

On December 21, 1995, prior to well purging and sampling, the six (6) on-site ground water monitoring wells were gauged. Monitoring well gauging data is presented in Table 4, below.

Table 5
Monitoring Well Gauging Data
December 21, 1995
(Results in feet)

Monitoring Well	MW-1	MW-2	MW-3	MW-4	MW-5	MW-6
Headspace Reading	60	0	0	0	0	0
Casing Elevation	29.23	30.29	27.98	28.19	29.71	30.60
Well Depth	12.61	19.55	14.45	19.45	15.15	17.09
Depth to Screen	2.98	N/A	N/A	N/A	N/A	7.52
Depth to Ground Water	9.59	10.72	7.93	7.73	2.05	11.89
Product Thickness	0.00	0.00	0.00	0.00	0.00	0.00
Ground Water Elevation	19.64	19.57	20.05	20.46	27.66	18.71

N/A - Data not available.

Depth to ground water ranged from 2.05 feet in Well MW-5 to 11.89 feet in Well MW-6 during the December 21, 1995 sampling event. Ground water flow is toward the north to north-northeast, as depicted on Figure 5 - Ground Water Contour Map. This flow direction represents a

increased precipitation during the past 60 days. The ground water flow direction in January 1995 was toward the northeast. A small anomaly in flow direction is present surrounding Well MW-5, located within the former gasoline UST excavation, and may be due to mounded water within the former tank field area.

3.4.1 Hydraulic Conductivity

To evaluate hydraulic conductivity, BES field personnel conducted aquifer "slug" testing on Wells MW-2 and MW-6. A volume of water was removed from each well using a dedicated stainless steel bailer while monitoring changes in static water level over time using a Hermit Data Logger. A quantitative hydrogeologic assessment of the data was performed using the AQTESOLV ground water modeling program. The slug test data was analyzed using the Bouwer and Rice method for unconfined aquifers. Hydraulic conductivity and ground water and pollutant transport rates were calculated using the slug test data and AQTESOLV modeling calculations. Slug test data is included in Exhibit V of this report.

3.4.2 Ground Water Velocity

The rate of ground water movement in the area of concern was determined using the ground water velocity equation derived from a combination of Darcy's law and the velocity equation of hydraulics. Ground water velocity was then expressed as:

$$Vs = K \times i/ne$$

Where:

Vs = seepage velocity
K = hydraulic conductivity (calculated from slug test data)
i = hydraulic gradient (calculated from ground water flow data)
ne = effective porosity (assumed at 20%)
x = multiplication symbol

Ground water velocity in the area of concern was then calculated:

$$Vs = 0.0002592 \text{ ft/min} \times 0.01 \text{ ft/ft} / 0.20 \qquad 1.296 \times 10^{-4} \text{ cm/sec}$$
$$Vs = 0.000013 \text{ ft/min}$$

Assuming a porosity of 20%, and using a calculated hydraulic gradient of 0.01 feet per foot obtained from the most recent ground water contour map, ground water velocity is determined to be 6.83 feet per year.

3.4.3 Pollutant Transport Rate

Applying a pollutant transport rate calculation to the ground water velocity rate, calculated above, the following retardation factor is derived:

$$Rd = 1 + (KOC \times foc \times pb/ne)$$

Where:

Rd = retardation factor
KOC = soil sorption coefficient (63 - standard benzene coefficient)
foc = fraction of organic carbon (assumed at 0.005)
pb = bulk density (assumed at 1.5 g/ml.)
ne = effective porosity (assumed at 20%)

The retardation factor is then calculated:

$$Rd = 1 + (63 \times 0.005 \times 1.5/0.20)$$
$$Rd = 3.36$$

The pollutant (benzene) transport rate is then calculated as follows:

$$Vpt = V/Rd$$
$$Vpt = 6.83 \text{ ft/yr.}/3.36$$

Using this formula, assuming a bulk density of 1.5 grams per milliliter, a fraction of organic carbon content of 0.5%, and a porosity of 20%, the benzene transport rate is calculated to be approximately 2.03 ft/yr. This slow contaminant transport rate explains why gasoline related volatile compounds have not been detected in Well MW-2, located down gradient of the former UST's.

Based on the benzene transport rate calculated above, an average benzene half-life of 200 days, and an initial benzene concentration of 350 ppb, dissolved benzene concentrations are expected to naturally degrade to 1.0 ppb within approximately 4.6 years and 9.3 feet downgradient of Well MW-1. A CEA designation is requested, using natural attenuation as the method of remediation, for a duration of five (5) years and 20 feet downgradient of Well MW-1, as depicted on Figure 6 - Classification Exception Area Designation Map.

4.0 CONCLUSIONS AND RECOMMENDATIONS

BES conducted a remedial investigation at Allied Building Supplies, located at 101 West Elizabeth Avenue in the City of Linden, Union County, New Jersey. The investigation included additional soil removal in the former gasoline UST excavation area, disposal of contaminated soil removed from the excavation, collection and analysis of postexcavation soil samples, and collection and analysis of ground water samples from Wells MW-1, MW-2, MW-5 and MW-6.

4.1 January 24, 1996 Postexcavation Soil Sampling

Postexcavation soil sampling results reported xylenes below Impact to Ground Water Soil Cleanup Criteria in the area of the former gasoline UST excavation area. Less than one-tenth (0.1) of one part per million (ppm) of xylenes were detected in two (2) of the three (3) soil samples (EXS-1 & EXS-3). Xylenes were not detected above the method detection limit in sample EXS-2. Therefore, No Further Action (NFA) is requested with regard to soils in the subject area.

4.2 December 21, 1995 Ground Water Sampling

Benzene, toluene, ethylbenzene, xylenes, and lead were detected in Well MW-1 at concentrations above the NJDEP Class II-A GWQS. Xylenes were detected in Well MW-5 at 3.5 ppb, below the NJDEP Class II-A GWQS of 40 ppb. Lead was not detected above the method detection limit in samples MW-2 and MW-6.

Historical ground water sampling results indicate a decreasing trend in BTEX compounds detected in Well MW-1. Lead concentrations have decreased from 46 ppb to 12.6 ppb in Well MW-1, and from 12 ppb and 15 ppb to nondetect in Wells MW-5 and MW-6, respectively, when the slow purge methodology is applied to sampling protocol. The decrease in lead using the slow purge methodology suggests that the elevated lead levels were the result of suspended solids and not impacted ground water. Lead levels have decreased in MW-1 to just over the GWQS for lead of 10 ppb (sample reported lead at 12.6 ppb).

4.3 Recommendations

BES recommends natural attenuation be considered as a mechanism for remediation and case closure at this site. Laboratory analytical data and site specific geologic and hydrogeologic conditions favor natural attenuation. Only one (1) well, MW-1, showed elevated levels of gasoline-related volatile organics. Abundant clay content in subsurface sediments, and the mounded water present within the former tank excavation, suggest a slow ground water flow rate at this site, which has been verified through evaluation of aquifer slug test data. The combination of a limited extent of impacted ground water, a slow migration rate, the presence of a low permeability soil type, the removal of the source, and the lack of receptors in the area suggest natural attenuation will be an effective option for this site.

Based on the benzene transport rate calculated above, an average benzene half-life of 200 days, and an initial benzene concentration of 350 ppb, dissolved benzene concentrations are expected to naturally degrade to 1.0 ppb within approximately 4.6 years and 9.3 feet downgradient of Well MW-1. A CEA designation is requested, using natural attenuation as the method of remediation, for a duration of five (5) years and 20 feet downgradient of Well MW-1, as depicted on Figure 6 - Classification Exception Area Designation Map.

Regarding the slightly elevated levels of lead detected in MW-1, BES is proposing that the CEA include the lead detected in this well. The level of lead present in MW-1 was just slightly over the GWQS for lead of 10 ppb (sample reported lead at 12.6 ppb). It is BES' opinion that the lead level in MW-1 should decrease further over time and that lead will not migrate beyond the proposed CEA boundary at a level over the GWQS.

A five (5) year CEA should allow for the variations in subsurface conditions, which affect the natural remediation process, and provide adequate time for natural remediation to occur. Completed CEA and Well Restriction Forms are attached in Exhibit VI.

A well search conducted by Vectre Corporation as part of the May 1994 RAW identified three (3) domestic wells, seven (7) industrial wells, one (1) potable well, six (6) piezometers, one (1) recovery well and 93 monitoring wells within a one (1) mile radius of the site. A canvass of the area did not reveal wells within 500 feet of the site. Basements were not identified within the immediate area of the site.

BES is proposing no additional sampling and analysis for the subject site. Based on the slow contaminant transport rate, lack of receptors in the area and lack of migration to date, BES is proposing implementation of the CEA for five (5) years. After five (5) years, the CEA can be removed with one (1) confirmation sample collected in the former excavation area.

METHODOLOGY SUMMARY

Volatile Organics - EPA 8240 (soil)

An inert gas is purged through a 5 g sample at elevated temperature. Alternatively the soil is extracted with methanol. A portion of extract is spiked into a purging vessel and purged by an inert gas. The vapor is swept through a sorbent column where the purgeables are trapped. After purging is completed, the sorbent column is heated and back-flushed with the inert gas to desorb the purgeables onto a GC column. The GC is temperature programmed to separate the purgeables which are then detected with a mass spectrometer.

CONFORMANCE/NON-CONFORMANCE SUMMARY

Accredited Labs received 3 soil samples (Project: Allied Bldg Supply; ALI Case #6045) from Brinkerhoff Environmental Services on 1/26/96 for the analyses of Xylenes.

All analyses were performed within the required holding time.

All analyses were reported on a dry weight basis.

"The laboratory has reviewed the quality assurance and quality control measurements for the sample analysis stated above."

MEMORANDUM

To: Our Clients
From: Yun-Shen Lee, Ph.D.
Technical Director
Subject: Organic Data Reporting
Date: July 25, 1995

****

Accredited Laboratories, Inc. is streamlining its computer processing for organic data reporting formats in order to decrease data processing time while ensuring the highest data quality, and eliminating the possibility of human error.

You will now receive a data sheet for each analysis when the detected analyte(s) in the initial analysis is (are) exceeding the instrument linear range. In this instance, the detected analyte which exceeds the highest calibration standard is flagged with a "E" qualifier marked next to the detected concentration. Subsequently a diluted analysis, which is indicated with a suffix "DL" to the lab sample #, is performed. All detected analytes in the diluted analysis are flagged with a "D" qualifier marked next to the detected concentration. When you receive more than one result sheet for one analysis, you should use all reported values, including the not detected results, presented in the original analysis except for the analyte(s) with an "E" qualifier. The proper concentration of the analyte with "E" qualifier in the original analysis is reported in the diluted analysis and flagged with a "D" qualifier.

It is our intention to continue providing quality data with speedy turn-around. If you have any questions regarding the change on the data reporting formats, or any other questions please feel free to call our client service department at 1-800 ALI-LABS, ext. 315.

METHODOLOGY SUMMARY

Metals (aqueous)

A 100 ml portion of aqueous is digested with nitric acid on a hot plate and evaporated to near dryness cautiously. The digestate is then refluxed with either nitric acid or hydrochloric acid. Diluted hydrochloric acid is used as the final reflux acid for the flame AA or ICAP of Ag, Al, Ba, Be, Cd, Cr, Co, Cu, Fe, Pb, Ni, Sb, Sn, Tl and Zn. Diluted nitric acid is employed as the final dilution acid for the furnace AA analysis of As, Pb and Se. For the graphite furnace analysis, an aliquot of the digestate is spiked with modifier solution and is placed into the graphite furnace. The aliquot is then slowly evaporated to dryness, charred and atomized. The absorption of the EDL radiation during atomization is proportional to the element concentration. For the flame AA, the digestate is aspirated and atomized into a flame. The absorption of the HCL radiation during atomization is proportional to the element concentration. The basis of the ICAP method is the measurement of the atomic emission by an optical spectroscope technique. The emission spectra are dispersed by a grating spectrometer and the intensities of the line are measured and processed by a computer system. For mercury analysis, a 100 ml portion of sample is digested with potassium permanganate and persulfate at acidic conditions in a water bath at 95°C. The mercury in the sample is reduced to the elemental state and detected by the cold vapor technique in a closed system. The analytical procedures associated with the Atomic Absorption technique are derived from "EPA Methods for Chemical Analysis of Water and Wastes" - EPA Method 200 Series. The analytical procedures associated with ICAP techniques are derived from EPA Method 200.7.

Volatile Organics - EPA 624 (aqueous)

Volatile organic compounds are purged from a 5-ml sample by bubbling an inert gas through the aqueous sample. The purgeables are trapped in a sorbent column. When purging is completed, the sorbent column is heated and back-flushed with the inert gas to desorb the purgeables onto a GC column. The GC is temperature programmed to separate the purgeables which are then detected with a mass spectrometer.

CONFORMANCE/NON-CONFORMANCE SUMMARY

Accredited Labs received 6 aqueous samples (Project: Selrite; ALI Case #5642) from Brinkerhoff Environmental Services on 12/22/95 for the analyses of Volatile Organics +10, Xylenes, MTBE, TBA and Lead.

All analyses were performed within the required holding time.

"The laboratory has reviewed the quality assurance and quality control measurements for the sample analysis stated above."

Classification Exception Area Information

Site Name/Location: Allied Building Supplies, 101 West Elizabeth Ave, Linden, Union County, N.J.

Site Identification #: NJDEP Case # 93-06-24-1425
(if applicable - i.e. EPA ID #, ISRA Case #, etc.)

Site Contact Person: Mr. Daniel Winters

Lead Program: NJDEP Bureau of Underground Storage Tanks

Description of CEA: Identify classification of the aquifer to which the CEA applies; provide narrative description of CEA boundaries (including impacted aquifer/formation); identify contaminants exceeding applicable GWQS; and include projected longevity of CEA.

Maps: Site/Plume boundaries on USGS 7.5 minute quadrangle
Affected lots and blocks

Proposed Water Use Restrictions: Domestic and Irrigation wells in shallow water table aquifer.

MEMORANDUM

TO: Bureau of Water Allocation
Water Supply Element

FROM: Allied Building Supplies, 101 West Elizabeth Ave, Linden, N.J.

SUBJECT: Well Restriction Area (WRA)

1) A WRA has been established in the City of Linden, Union County. A list of affected blocks and lots is attached as well as a map of the area. These blocks and lots were obtained from the tax map dated _____.
Lot 10, Block 254

2) The point of contact for all questions concerning the delineation of the WRA is NJDEP Case Manager

3) The following is a list of wells that may be drilled and under what conditions and/or construction requirements:

Dear Ms. Segel:

On March 26, 1996, Brinkerhoff Environmental Services, Inc. (Brinkerhoff) collected a representative ground water sample from Monitoring Well MW-1 located at the above-referenced site. The well was purged using the slow purge sampling methodology. A summary of the analytical results is as follows:

Compound/Metal	**3/26/96**	12/95	1/95	12/93
Benzene	**37 ppb**	120 ppb	35 ppb	350 ppb
Toluene	**4,900 ppb**	4,400 ppb	79 ppb	7,500 ppb
Ethylbenzene	**1,300 ppb**	3,200 ppb	60 ppb	1,600 ppb
Xylenes	**7,700 ppb**	6,400 ppb	267 ppb	8,700 ppb
Lead	**14.1 ppb**	12.6 ppb	46 ppb	---

I am faxing the laboratory "verbal" results for your review. The laboratory "hard copy" will be submitted with this letter and should be mailed today. If you have questions or require additional information, do not hesitate to contact me at (908) 223-2225.

Sincerely,

BRINKERHOFF ENVIRONMENTAL SERVICES, INC.

DOUG HARM, P.G.
Principal Consultant/Hydrogeologist

METHODOLOGY SUMMARY

Metals (aqueous)

A 100 ml portion of aqueous is digested with nitric acid on a hot plate and evaporated to near dryness cautiously. The digestate is then refluxed with either nitric acid or hydrochloric acid. Diluted hydrochloric acid is used as the final reflux acid for the flame AA or ICAP of Ag, Al, Ba, Be, Cd, Cr, Co, Cu, Fe, Pb, Ni, Sb, Sn, Tl and Zn. Diluted nitric acid is employed as the final dilution acid for the furnace AA analysis of As, Pb and Se. For the graphite furnace analysis, an aliquot of the digestate is spiked with modifier solution and is placed into the graphite furnace. The aliquot is then slowly evaporated to dryness, charred and atomized. The absorption of the EDL radiation during atomization is proportional to the element concentration. For the flame AA, the digestate is aspirated and atomized into a flame. The absorption of the HCL radiation during atomization is proportional to the element concentration. The basis of the ICAP method is the measurement of the atomic emission by an optical spectroscope technique. The emission spectra are dispersed by a grating spectrometer and the intensities of the line are measured and processed by a computer system. For mercury analysis, a 100 ml portion of sample is digested with potassium permanganate and persulfate at acidic conditions in a water bath at 95°C. The mercury in the sample is reduced to the elemental state and detected by the cold vapor technique in a closed system. The analytical procedures associated with the Atomic Absorption technique are derived from "EPA Methods for Chemical Analysis of Water and Wastes" - EPA Method 200 Series. The analytical procedures associated with ICAP techniques are derived from EPA Method 200.7.

CONFORMANCE/NON-CONFORMANCE SUMMARY

Accredited Labs received 1 aqueous sample (Project: Allied Bldg/Selrite; ALI Case #6961) from Brinkerhoff Environmental Services on 3/27/96 for the analyses of Lead.

All analyses were performed within the required holding time.

"The laboratory has reviewed the quality assurance and quality control measurements for the sample analysis stated above."

METHODOLOGY SUMMARY

Volatile Organics - EPA 624 (aqueous)

Volatile organic compounds are purged from a 5-ml sample by bubbling an inert gas through the aqueous sample. The purgeables are trapped in a sorbent column. When purging is completed, the sorbent column is heated and back-flushed with the inert gas to desorb the purgeables onto a GC column. The GC is temperature programmed to separate the purgeables which are then detected with a mass spectrometer.

CONFORMANCE/NON-CONFORMANCE SUMMARY

Accredited Labs received 3 aqueous samples (Project: Allied Bldg./Selrite; ALI Case #6960) from Brinkerhoff Environmental Services on 3/27/96 for the analyses of Volatile Organics +10 including Xylenes.

All analyses were performed within the required holding time.

"The laboratory has reviewed the quality assurance and quality control measurements for the sample analysis stated above."

Remedial Action Report Dated: February 27, 1996
Ground Water Sample Results for MW-1 Dated: April 9, 1996

Dear Mr. Winters:

On February 28, 1996 the New Jersey Department of Environmental Protection (Department) received the February 27, 1996 Remedial Action Report. On April 10, 1996 the Department received the March 26, 1996 ground water sample results from monitoring well MW-1. Based upon a review of the information submitted, the Department's comments are as follows:

I. **Soils**

Previous soil sampling results showed xylene levels below the Department's Impact to Ground Water Soil Cleanup Criteria (IGWSCC) down to the water table (approximately 10.5 feet) on the northern and eastern boundaries of the excavation. Additional soil was excavated on January 24, 1996 to a depth of 12.5 feet and to the south and west of the original excavation to address levels of xylenes above the IGWSCC. Post excavation sampling showed xylene levels below the IGWSCC on the southern boundary of the excavation and on the western boundary.

The xylene level in the soil at monitoring well MW-1 (soil sample number 105MW1-11) historically was 131 ppm at a depth of 11 feet in 1993. Following the additional excavation, the xylene level in the post excavation soil sample located adjacent to MW-1 was <0.1 ppm at a depth of 10.5 feet. It should be noted that the January, 1996 excavation was conducted in heavy rains.

Based on our review of the information submitted, we find that Allied Building Supplies has complied with the Department's existing requirements regarding remediation of the soils in Area of Concern 1 (AOC 1) which contained the former gasoline UST. Therefore, no further action will be required at this time for the soils in AOC 1.

II. **Ground Water**

Upon the Department's review of the ground water data (dated 12/93, 1/95, 12/95, and 3/96), a decreasing trend in contamination is not yet evident. The xylene levels in MW-1 increased in each round of sampling from January, 1995 and are presently at 7,700 ppb. Current site conditions at MW-1, the source well, showed increasing levels of xylenes (7,700 ppb), toluene (4,900 ppb), and lead (14.1 ppb).

Therefore, ground water sampling shall continue as required in the Department's March 30, 1995 RAW approval letter.

If you should have any questions regarding this matter, please contact Diane Seigel, Case Manager, of the Bureau of Underground Storage Tanks at (609) 777-1386.

Sincerely,

Mary Anne Kuserk

RE: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case #93-06-24-1425
Remedial Action Workplan Approval Letter Dated March 30, 1995

Dear Mr. Kinsel:

Pursuant to a telephone discussion with Ms. Diane Seigel, Case Manager for the referenced case, I am formally requesting, on behalf of Mr. Daniel Winters, a modification of the Ground Water Sampling Frequency and Analysis contained in the referenced RAWA letter based upon existing site conditions. Specifically, I am requesting that Methyl tertiary butyl ether (MTBE), Tertiary butyl alcohol (TBA) and Total Volatile Organics by GC/MS be deleted from Tables 1 and 2 (i.e. Quarterly Sampling Requirements for ground water monitoring wells 1 and 6 and Annual Sampling Requirements for ground water monitoring wells 2 and 5).

As you are aware, on May 13, 1996, the Department issued a finding of No Further Action for soil based upon the February 27, 1996 Remedial Action Report. The Department has required the continuation of ground water monitoring pending the demonstration of a decreasing trend in ground water contamination. The remaining contaminants of concern in the groundwater are xylene, toluene, and lead. Based upon these facts, I believe that this request is reasonable.

Please advise Mr. Winters at your earliest convenience of your decision in this matter as Mr. Winters is currently in the process of planning for the June ground water sampling event. If you have any questions, please contact me at your convenience at 609-268-8007 or by fax at 609-268-7506.

Sincerely,

Karl J. Delaney, Vice President
for Environmental Affairs

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case #93-06-24-1425
UST #0129486
Site Status/Future Actions

Dear Mr. Winters:

This letter is to provide clarification of the current status and future remedial actions necessary at the Allied Building Supplies site in Linden. The New Jersey Department of Environmental Protection (Department) approved Allied Building Supplies' Remedial Action Workplan on March 30, 1995. The approved remedial actions consisted of natural remediation for residual soil and ground water contamination.

In June, 1993, a 1,000 gallon gasoline underground storage tank (UST) was excavated. Approximately 70 tons of soil was excavated, sampled, and reused as backfill in the UST excavation. Post excavation soil sampling was conducted and the analyses showed xylene levels up to 131 ppm. As a result, on January 24, 1996, Allied Building Supplies opted to excavate and dispose an additional 15 tons of soil. Post excavation soil samples were again collected and the xylene levels ranged from undetected to <0.1 ppm. Based on the Department's review of the information submitted, it was determined that Allied Building Supplies complied with the Department's existing requirements regarding remediation of the soils in Area of Concern (AOC) 1 which contained the former gasoline UST. In the Department's May 13, 1996 letter, the Department determined that no further action was required for the soils in AOC 1.

Historically, six (6) ground water monitoring wells were installed and four rounds of ground water samples were collected and analyzed. Upon the Department's review of the ground water data (dated 12/93, 1/95, 12/95, and 3/96), a decreasing trend in contamination was not evident. The xylene levels in MW-1 increased in each round of sampling from January, 1995 and are presently at 7,700 ppb. Current site conditions at MW-1, the source well, showed increasing levels of xylenes (7,700 ppb), toluene (4,900 ppb), and lead (14.1 ppb). It was noted in the Department's review that the January, 1996 soil excavation was conducted in heavy rains. The Department recommended that ground water sampling shall continue as required in the March 30, 1995 RAW approval letter.

Our recent conversations with Karl Delaney of the Alman Management Group, prompted our reducing the parameters required for the ground water analyses. The Department waives the RAW requirements to analyze for MTBE and TBA on all wells. In addition, the total volatile organic analysis required in the annual sampling in September shall be reduced to a BTEX analysis.

Given that the source has been removed, the organic contaminants are biodegradable, and the lack of proximate receptors, the Department expects that the continuing ground water monitoring program outlined in the RAW will demonstrate decreasing contaminant concentrations and a non-migrating plume. Allied Building Supplies may then petition the Department for "no further action" by establishing a Classification Exception Area (CEA) for the ground water at the site.

If you should have any questions, please contact Diane Seigel, Case Manager, of the Bureau of Underground Storage Tanks at (609) 777-1386.

Sincerely,

Mary Anne Kuserk

Dear Mr. Jurow:

Please be advised that Allied Building Supply Co.'s environmental consultant, Brinkerhoff Environmental Services, Inc. has scheduled the sampling of the monitoring wells at the above referenced property for July 30, 1996. Pursuant to the Site Access Agreement, Allied requests site access so that the sampling may be performed.

If you have any questions concerning this matter, please do not hesitate to contact me.

Re: Allied Building Supply
101 West Elizabeth Avenue
Linden, New Jersey
UST # 129486, C93-2092
Case # 93-06-24-1425

Dear Mr. Brown:

This letter shall confirm our telephone conversation of August 12, 1996. In that conversation I advised you that we believe that petroleum impacted soils excavated from the above referenced site were treated by venting and were subsequently reused to backfill underground storage tank excavation(s) in violation of the Department's regulations.

BACKGROUND

Sailer Environmental Inc. (SEI) and two other firms who provided environmental consulting services at this site have sued Allied Building Supply, 101 West Elizabeth Avenue Corp., Daniel Winters, and Selrite Millworks for refusal to pay for services rendered. In connection with this matter, SEI copied documents from the Department's file on or about January 17, 1996 in order to respond to Interrogatories. During a recent review of these documents, SEI found documents in the file that we believe confirm that the petroleum impacted soils at the site were vented without a permit and reused on site. At least one of those documents (a letter dated September 30, 1993 from Tri-State Environmental Consultants (Tri-State) to Mr. Tim Nuss of the Department) suggests that SEI may have been involved in this act.

STATEMENT OF THE FACTS

1) SEI was retained by Selrite Millworks to perform post excavation soil sampling in connection with the transfer of the property to New Jersey Transit with the explicit understanding that SEI did not, at the time, have its NJDEP BUST certification for Subsurface Evaluation.

2) On July 26, 1993, I met David W. Reger, Esq. at the site and performed the soil sampling in accordance with our agreement with Selrite Millworks. While on site Mr. Reger and I inspected the gasoline impacted soil that had been stockpiled by the former contractor. At that time the soils were covered with plastic and exhibited a strong gasoline odor. Mr. Reger suggested to me that the soils be broken into small piles and left uncovered so that they could vent. I specifically advised Mr. Reger that this activity would be a violation of the Department's regulations and therefore could not be performed. Mr. Reger replied to me that there was no regulation about the size or number of piles allowed to be maintained and that if questioned by the Department about the lack of a plastic covering, the Department would be told that the plastic had blown off. I advised Mr. Reger against such activity and stated that SEI would have no involvement in the matter.

3) According to Tri-State's September 30, 1993 letter to the Department, the soils were broken into smaller piles, without SEI's knowledge, sometime between September 1, 1993 and September 30, 1993. (I was at the site for the last time on August 30, 1993 and do not recall seeing the smaller piles.)

4) According to a July 1, 1994 Memorandum to File From Allan Motter the soils were subsequently sampled, found to meet the Department's criteria for reuse, and reused on site.

Prior to telephoning you I had discussed this matter with the former case manager, Diane Segal, who advised me that the Department already suspected that the soils had been treated on site. She suggested that I make this report to you to clarify the record and to ensure that SEI had fulfilled its reporting requirements to the Department.

Please do not hesitate to call me if you have any questions concerning this matter.

Sincerely,

Re: Remedial Action Progress Report, July 1996
Allied Building Supplies, 101 West Elizabeth Avenue
Linden, Union County, Case No. 93-06-24-1425

Dear Ms. Segel:

On July 31, 1996, Brinkerhoff Environmental Services, Inc. (Brinkerhoff) collected representative ground water samples from Monitoring Wells MW-1 and MW-6 located at the above-referenced site. The wells were purged using the slow purge sampling methodology. A summary of the analytical results are attached along with the laboratory reduced deliverables package. Also attached is a ground water contour map generated from data collected on July 31, 1996.

Ground water analytical results show a relatively consistent level of target compounds over time with a slight decrease or increase in the concentrations of some compounds. The level of xylenes has shown an increase.

General ground water flow direction is toward the north/northwest to north/northeast as shown on the attached contour map. This flow direction varies from the previous sampling event in March 1996, but is similar to the flow direction calculated during for the December 1995 event. Mounding in the former tankfield excavation may be influencing flow direction.

If you have any questions, please contact either Mr. Karl Delaney at 609-268-8007 or the undersigned at 908-223-2225.

Sincerely,

BRINKERHOFF ENVIRONMENTAL SERVICES, INC.

Data Reporting Conventions

Data for soils are reported on a dry weight basis.

The qualifiers used are in accordance with the Contract Laboratory Program (CLP) protocols and are summarized below:

Data Flag	Data Interpretation
B	This flag is used when the analyte is found in the associated blank as well as in the sample. It indicates possible/probable blank contamination and warns the data user to take appropriate action.
J	Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the quantitation limit, but greater than zero, or when reporting an estimated concentration for a tentatively identified compound.
U	Indicates compound was analyzed for but not detected. The sample quantitation limit is corrected for dilution.

Methodology Review

Modified EPA Method 602:

Method 602 is used to determine volatile organic compounds in liquid matrices. The volatiles are introduced into a gas chromatograph by the purge and trap capillary method. The components are separated via the gas chromatograph and detected using a photoionization detector as the primary detector for qualitative and quantitative analysis. When the flame ionization detector is used for quantitation, this is noted on the raw data. The method is modified to include client requested target analytes.

LABORATORY AUTHENTICATION STATEMENT

I certify under penalty of law, where applicable, this laboratory meets the Laboratory Performance Standards and Quality Control requirements specified in N.J.A.C.7:18, 40 CFR Part 136 for Water and Wastewater Analyses and SW846 for Solid Waste Analyses. I have personally examined and I am familiar with the information contained in this report, and based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate, complete, and meets the standards specified in N.J.A.C.7:18, 40 CFR Part 136, and/or SW 846. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment.

Susan Uhler
Laboratory Director

Note for VOA GC: Default is quantitation from PID (Channel 2), confirmation from FID (Channel 1) unless otherwise manually noted on chromatograms.

9 Comments:
Method 602 in Water:
Batch QC. Matrix Spike and Matrix Spike Duplicate not performed. Due to insufficient sample. Supporting data batch laboratory control sample(s) demonstrate accuracy and precision.

Samples M6080045-01, M6080045-02, and M6080045-04. Lab anomaly. No impact. Method Blank BW08039616B > ½ reporting limits, Toluene, 0.6 ug/L bias. Not detected in samples.

Sample M6080045-03. Lab anomaly. Method Blank BW08039616B > ½ reporting limits, Toluene, 0.6 ug/L bias. Due to cross-contamination. Sample results > 10x Blank. No action required.

Dear Doug Harm:

Enclosed please find the analytical results for the samples received by GTEL Environmental Laboratories, Inc. on 08/02/96.

A formal Quality Assurance/Quality Control (QA/QC) program is maintained by GTEL, which is designed to meet or exceed the EPA requirements. Analytical work for this project met QA/QC criteria unless otherwise stated in the footnotes. This Analytical report shall not be reproduced except in full.

GTEL is certified by the State of New Jersey under certificaion #70003.

If you have any questions regarding this analysis, or if we can be of further assistance, please call our Customer Service Representative.

Sincerely,
GTEL Environmental Laboratories, Inc.

Susan C. Uhler
Laboratory Director

REPORTING CONVENTIONS

The table below summarizes the reporting conventions which appear on the enclosed QC Package for inorganic analyses.

Flag	Interpretation
Column Heading: C	Concentration qualifier:
U	The analyte was analyzed for but not detected > reporting limit.
B	Reported value was obtained from a reading that was < Reporting Limit, but > or ≥ Instrument Detection Limit.
Column Heading: Q	Qualifier -Specified entries and their meanings as follows:
N	Spiked sample recovery not within control limits
*	Duplicate analysis not in control
Column Heading: M	Method Used:
F	Furnace AA
P	Inductively Coupled Plasma (ICP)
CV	Cold Vapor AA
FP	Closed-cup Tester
C	Colormetric
E	Electrode
T	Titrimetric
IR	Infra-Red
G	Gravimetric

Data for soils are reported on a wet weight basis unless otherwise indicated.

Methodology Review

Lead in Soil by EPA Method 7421:

Samples are acid-digested then loaded into a graphite furnace. The furnace is brought through a temperature program that includes dehydration, atomization and cleaning. A path of light having an element-specific wavelength is passed through the furnace and its intensity is measured during the atomization step. The intensity of the light is inversely proportional to the amount of analyte present in the atomic vapor produced during the atomization step. The concentration of a given sample is estimated by comparing the change in intensity during atomization between samples and standards containing known concentrations. Lead is analyzed according to EPA Method 7421 using a Perkin-Elmer PE5100 with an Ammonium Phosphate matrix modifier and a wavelength of 283.3 nm.

LABORATORY AUTHENTICATION STATEMENT

I certify under penalty of law, where applicable, this laboratory meets the Laboratory Performance Standards and Quality Control requirements specified in N.J.A.C.7:18, 40 CFR Part 136 for Water and Wastewater Analyses and SW846 for Solid Waste Analyses. I have personally examined and I am familiar with the information contained in this report, and based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate, complete, and meets the standards specified in N.J.A.C.7:18, 40 CFR Part 136, and/or SW 846. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment.

Date of Report: Aug 20, 1996

Footnotes and Comments

Symbol keys (may appear beside values)

* - Indicates the analyte has been qualified in the narrative section of the report.
d - Indicates the analyte was reported from a dilution other than that indicated on the report page.
B - Organic Analyses - Indicates the analyte is found in the associated blank as well as in the sample.
B - Inorganic Analyses - Indicates an estimated value below the EPA Contract Required Detection Limit.
G - Indicates an estimated surrogate recovery due to dilutions.
J - Indicates an estimated value below the reporting limit.
U - Indicates the analyte was analyzed for but not detected.
NA - Matrix Spike Results - Not Applicable, since the Sample Conc. exceeded four times the Spike Added.
NA - Matrix Spike Duplicate RPD Results - Not Applicable, since the Sample Conc. exceeded four times the Spike Added.
NA - Serial Dilution RPD Results - Not Applicable, since the Sample Conc. was less than five times the CLP Contract Required Detection Limit.

Inorganics

Method: EPA 7421
"Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW-846, Third Edition including promulgated Update 2.
"U" indicates that the analyte was analyzed for but not detected at or above the reporting limit indicated.
Digestion is Method Specific.

Dear Mr. Jurow:

Please be advised that Allied Building Supply Co.'s environmental consultant has scheduled the pumping and sampling of monitoring wells at the above referenced property for November 7, 1996. Pursuant to the Site Access Agreement, Allied hereby notifies you that it requires site access to perform this activity.

If you have any questions concerning this matter, please do not hesitate to contact me at 609-268-8007.

Sincerely,

Re: Allied Building Supply Company, Inc.
101 Elizabeth Avenue, Linden, Union County, NJ

Dear Mr. Jurow:

Please be advised that Allied Building Supply Co.'s environmental consultant has scheduled the sampling of monitoring wells at the above referenced property for December 18, 1996. Pursuant to the Site Access Agreement, Allied hereby notifies you that it requires site access to perform this activity. As we discussed and with your approval, Allied Building Supply Co.'s environmental consultant has placed a lock in tandem with NJT's lock. Therefore, we are able to gain physical access to the site to perform this activity.

If you have any questions concerning this matter, please do not hesitate to contact me at 609-268-8007.

Sincerely,

Karl J. Delaney, Vice President
for Environmental Affairs

Re: Remedial Action Evaluation Report, February 1997
Allied Building Supply, 101 West Elizabeth Avenue
Linden, Union County, Case No. 93-06-24-1425

Dear Mr. Brown:

On December 18, 1996, representatives from Compliance Management Incorporated collected ground water samples from Monitoring Wells MW-1, MW-2, MW-5, and MW-6 located at the above-referenced site. A summary of the analytical results are attached along with the laboratory reduced deliverables package. Also, attached is a ground water contour map generated from data collected during this sampling event.

As you will note, the contaminants in the ground water are stable or decreasing. Based upon this data, we propose to submit to the Department, in the near future, a remedial action work plan addendum for no further action with the establishment of a classification exception area (CEA) for the contaminants remaining above the ground water quality criteria. As has been previously discussed with the Bureau of Underground Storage Tanks, the current owner of the property, New Jersey Transit (NJT) has expressed a willingness to accept such a finding for the property by the Department consistent with the terms of the contract of property sale between my client and NJT.

We believe that our intention to submit a proposal for no further action with a CEA is reasonable based upon the demonstrated removal of all sources of contamination from the site, the existence of a localized plume distribution, a low ground water seepage and contaminant migration velocities, and highly degradable plume concentrations. Furthermore, NJT has recently demolished the building and other improvement on the property and is in the process

364 PARSIPPANY ROAD
PARSIPPANY, NJ 07054
TEL 201-428-6050
FAX 201-428-6052

of constructing a parking structure on site. It is reasonable to assume that these demolition and construction activities, as well as future use pattern, may render the monitor wells damaged, useless or inaccessible by my client.

In the worst case, the presence of a large number of motor vehicles on site for construction and parking present a significant risk of a discharge of hazardous substances entering the monitor wells should they not be abandoned properly and in the near future. Our intended proposal for a finding of no further action with a classification exception area is consistent with the planned use of the property, the lack of receptors, and the chemical and physical characteristics described above.

We believe that we have met the threshold criteria for such a finding by the Department. We recognize that in order to make this determination, the Department will require the establishment of a CEA. Upon your concurrence, we will prepare the necessary documentation for your review in accordance with the Department's final guidance for CEAs.

It will take approximately 60 days from the date of your concurrence for our data collection, preparation, and submission of this additional documentation. Your expeditious response will allow us to proceed with this effort in a timely manner. Please advise accordingly.

If you have any questions, please contact either Mr. Karl Delaney at 609-268-8007 or myself at 201-428-6050.

Sincerely,

COMPLIANCE MANAGEMENT INC.

SCOPE OF WORK

Compliance Management Incorporated was retained by Selrite Millwork Corporation to prepare a Remedial Action Evaluation Report (RAER) for Allied Building Supply (Allied) in accordance with NJDEP letter, dated May 28, 1996 (Appendix III). The site is located at 101 West Elizabeth, Linden, Union County, NJ (Figures 1 & 2). This report discusses the remediation performed, ground water sampling, laboratory analysis and results. The two part certification is included in Appendix IV.

REMEDIAL ACTIVITIES

On November 18, 1996, monitoring well, MW-1 was purged for approximately 7 hours by utilizing a vacuum truck (vac truck). Approximately 700 gallons of ground water were removed from the well. The water was contained in a tanker compartment and transported to the S & M Waste Oil Facility for disposal as a petroleum mixture liquid, non-RCRA regulated waste. The load was assigned non-hazardous waste manifest # 5631 (Appendix II).

GROUND WATER SAMPLING

On December 18, 1996 four monitoring wells located on the subject property were sampled by CMI in accordance with the May 1992 NJDEP *Field Sampling Procedures Manual*. The samples were collected within two feet of the water level after purging the wells of three times the volume of the water column of each well. The monitoring well samples were collected with a decontaminated, dedicated Teflon bailer, then transferred to laboratory prepared containers suitable for volatile organic compounds and lead. Monitoring well data forms are included in Appendix I of this report.

Ground water samples were obtained from MW-1, MW-2, MW-5, and MW-6. A field blank was also collected as part of this sampling event, and a trip blank was provided by the laboratory. The samples were submitted to W.A.T.E.R Works Laboratory, New Jersey certification # 07673, for analysis. Samples were analyzed for benzene, toluene, ethylbenzene, total xylenes, and lead. Laboratory analytical results are included in Appendix V of this report and summarized in Table I below.

TABLE I
Ground Water Sampling Results
December 18, 1996
(results in $\mu g/\ell$)

Sample ID	Benzene	Toluene	Ethylbenzene	Total Xylenes	Lead
MW-1	ND (20)	3,500	2,200	8,000	0.12
MW-2	ND (1)	ND (2)	ND (1)	ND (2)	0.01
MW-5	ND (1)	ND (2)	ND (1)	ND (2)	0.16
MW-6	ND (1)	ND (2)	ND (1)	ND (2)	0.08
Field Blank	ND (1)	ND (2)	ND (1)	ND (2)	NS
Trip Blank	ND (1)	ND (2)	ND (1)	ND (2)	NS
NJDEP Standard	1	1,000	700	40	10

ND = Compound not detected
( ) = MDL, Method Detection Limit
$\mu g/\ell$ = micrograms per liter
NS = not sampled

Toluene, ethylbenzene, total xylenes, and lead were detected in MW-1. With the exception of lead, all of these compounds were above NJDEP criteria. Lead was also detected in MW-2, MW-5, and MW-6, but below the NJDEP criteria. No other target substances were found in any of the wells.

Benzene was not detected this sampling event. Toluene, total xylenes, and lead have all decreased in concentration since the last sampling event.

SITE HYDROLOGY

Depth to ground water ranged from 1.22 feet in MW-5 to 10.89 feet in MW-6. Ground water flow direction is toward the northeast as shown on the ground water contour map (Figure 3).

A small anomaly in flow direction is present at MW-5. This well is located within the

former tank excavation and shows an artificially elevated ground water level. We believe this is due to water perched within the former excavation. Monitoring well data are presented in Table II.

TABLE II
Monitoring Well Data
December 18, 1996
(results in feet)

	MW-1	MW-2	MW-3	MW-4	MW-5	MW-6
Casing Elevation	29.23	30.29	27.98	28.19	29.71	30.60
Well Depth	15.15	19.55	14.45	19.45	12.61	17.09
Depth to Ground Water	8.76	10.22	7.02	7.51	1.22	10.89
Product Thickness	0.0	0.0	0.0	0.0	0.0	0.0
Ground water Elevation	20.47	20.07	20.96	20.68	28.49	19.71

SUMMARY

Ground water sampling results showed gasoline related volatile organic compounds (BTEX) in only one of the four monitoring wells sampled. This concurred with previous sampling by others (Table III). This continues to demonstrate a highly localized contaminant plume. Benzene was not detected at this sampling event. Although ethylbenzene levels increased since the last sampling event, all other contaminants had decreased in MW-1. Monitoring well MW-1 is located on the immediate upgradient edge of the former tank excavation. Monitoring wells MW-2, MW-5, and MW-6, which are located downgradient to slightly side-gradient of the former UST excavation did not have any reportable levels of BTEX. Lead was found to be below the NJDEP criteria in all wells.

NA = data not available
ND = none detected above the method detection limit
NI = well was not yet installed
NS = not sampled
$\mu g/\ell$ = micrograms per liter

CONCLUSIONS/RECOMMENDATIONS

1. The sources of contamination, the leaking UST and surrounding soils, have been removed.
2. Concentrations of volatile organic compounds (BTEX) associated with gasoline are generally decreasing, most probably due to natural attenuation.
3. The plume of contamination has not spread to adjacent monitoring wells.
4. The utilization of the vac truck to purge MW-1 appears to have expedited the rate of decrease of the target compounds.
5. We recommend that natural attenuation be continued as the primary remedial measure.
6. We recommend that analysis for lead be removed from any future sampling events.

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case #93-06-24-1425
UST #0129486
Site Status/Future Actions

Dear Mr. Winters:

This letter is to provide clarification of the current status and future remedial actions necessary at the Allied Building Supplies site in Linden. The New Jersey Department of Environmental Protection (Department) approved Allied Building Supplies' Remedial Action Workplan on March 30, 1995. The approved remedial actions consisted of natural remediation for residual soil and ground water contamination.

In June, 1993, a 1,000 gallon gasoline underground storage tank (UST) was excavated. Approximately 70 tons of soil was excavated, sampled, and reused as backfill in the UST excavation. Post excavation soil sampling was conducted and the analyses showed xylene levels up to 131 ppm. As a result, on January 24, 1996, Allied Building Supplies opted to excavate and dispose an additional 15 tons of soil. Post excavation soil samples were again collected and the xylene levels ranged from undetected to <0.1 ppm. Based on the Department's review of the information submitted, it was determined that Allied Building Supplies complied with the Department's existing requirements regarding remediation of the soils in Area of Concern (AOC) 1 which contained the former gasoline UST. In the Department's May 13, 1996 letter, the Department determined that no further action was required for the soils in AOC 1.

Historically, six (6) ground water monitoring wells were installed and four rounds of ground water samples were collected and analyzed. Upon the Department's review of the ground water data (dated 12/93, 1/95, 12/95, and 3/96), a decreasing trend in contamination was not evident. The xylene levels in MW-1 increased in each round of sampling from January, 1995 and are presently at 7,700 ppb. Current site conditions at MW-1, the source well, showed increasing levels of xylenes (7,700 ppb), toluene (4,900 ppb), and lead (14.1 ppb). It was noted in the Department's review that the January, 1996 soil excavation was conducted in heavy rains. The Department recommended that ground water sampling shall continue as required in the March 30, 1995 RAW approval letter.

Our recent conversations with Karl Delaney of the Alman Management Group, prompted our reducing the parameters required for the ground water analyses. The Department waives the RAW requirements to analyze for MTBE and TBA on all wells. In addition, the total volatile organic analysis required in the annual sampling in September shall be reduced to a BTEX analysis.

Given that the source has been removed, the organic contaminants are biodegradable, and the lack of proximate receptors, the Department expects that the continuing ground water monitoring program outlined in the RAW will demonstrate decreasing contaminant concentrations and a non-migrating plume. Allied Building Supplies may then petition the Department for "no further action" by establishing a Classification Exception Area (CEA) for the ground water at the site.

If you should have any questions, please contact Diane Seigel, Case Manager, of the Bureau of Underground Storage Tanks at (609) 777-1386.

Sincerely,

Mary Anne Kuserk

W.A.T.E.R. WORKS LABORATORY, INC.

On December 19, 1996 W.A.T.E.R. Works Laboratory, Inc. received from Compliance Management Inc four aqueous samples, a field blank, and a trip blank from the Allied Building Supply site in Linden, New Jersey. The enclosed chain of custody details the parameters that were analyzed.

Reduced deliverables were requested, enclosed please find the detailed analysis.

If you have any further questions concerning these results, please do not hesitate to contact this laboratory.

Method Summary For Acid Digestion For Total Metals.

Method 3005 *	Acid Digestion of water for Total Recoverable or Dissolved Metals by Flame AA.
Method 3050 *	Acid Digestion of Aqueous samples for Total Metals by Flame AA.
Method 3050 *	Acid Digestion of Aqueous samples for Total Metals by Furnace AA.
Method 3050 *	Dissolution Procedure for Oils, Greases, or Waxes.
Method 3050 *	Acid Digestion of Sediments, Sludges, and Soils.

Scope and Application :

These methods are acid digestion procedures used to prepare samples for analysis by flame or furnace atomic absorption spectroscopy.

A representative sample is digested in nitric acid and hydrogen peroxide. This is then refluxed with nitric acid or hydrochloric acid. Dilute hydrochloric acid is used as the final reflux acid for flame analysis. Dilute nitric acid is used as the final reflux acid for furnace analysis.

Metals analyzed by atomic absorption using the 7000 series methods listed in EPA SW 846.

* EPA Method SW 846. Third Edition

W.A.T.E.R. WORKS LABORATORY, INC.

Method Summary: METALS

Samples are prepared for analysis using approved USEPA or SW846 digestion protocols. Then analyzed by the following methods.

AQUEOUS SAMPLES.

Aluminum	202.2	Antimony	204.2
Arsenic	206.2	Barium	208.2
Beryllium	210.2	Cadmium	213.2

Source : Test Methods for Evaluating Solid Waste SW846 3rd Edition.

These methods utilize Atomic Absorption techniques, both by direct aspiration and graphite furnace. In the case of Mercury, a manual cold vapor method is used.

W.A.T.E.R. WORKS LABORATORY, INC.

Method Summary

GC/MS Volatile Organic Methodology :

Aqueous samples are analyzed in accordance with USEPA Method 624, 40 CFR Ch. 1 Part 136 (7-1-85 Edition). A five mL portion of sample is purged at ambient temperature and then rapidly desorbed onto a GC/MS.

Soil samples are analyzed in accordance with USEPA SW-846 Methods for Evaluating Solid Waste (9/86) Rev. O Method 8240 and 5030. 5 grams of a sample are purged at 40°C and then rapidly desorbed onto a GC/MS.

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case #93-06-24-1425
UST #0129486
Site Status/Future Actions

Dear Mr. Winters:

This letter is written in response to correspondence from Compliance Management Incorporated, dated February 11, 1997. The historical ground water data has not established a decreasing trend of contaminants. Of the five contaminants of concern only one (toluene) has decreased for two consecutive sampling events. The submitted data indicates ethylbenzene and lead have increased.

By way of clarification, the lead concentrations are erroneously reported in Table III. The laboratory summary sheet shows that the lead results were above the GWQS of 10 *ug/l*. A copy of the summary sheet is enclosed for your reference. Based upon the data collected thus far, Allied Building Supplies shall continue to sample ground water for BTEX and lead. Allied Building Supply may reduce the sampling frequency to an annual basis. The next required sampling event shall be in September of this year. The annual RAW progress report shall be submitted the following November.

In the event the monitoring wells are damaged or abandoned in place during construction activities, the case manager shall be notified immediately. The case manager shall approve all new monitoring well construction and location details prior to installation.

The Department recommends that Allied Building Supplies evaluate the site for a possible CEA and NFA after the next sampling event, if the data supports such. If you should have any questions, please contact Bill Brown, Case Manager, of the Bureau of Underground Storage Tanks at (609) 777-1386.

Sincerely,

Kevin Kratina, Chief
Bureau of Underground Storage Tanks

TRENTON NJ
AUG 17 1998

Dear Sir:

Enclosed please find the results of laboratory analyses performed on groundwater samples collected from the monitoring wells located at the Allied Building Supply site on Elizabeth Avenue, Linden, NJ. Table 1 presents the field analyzed well parameters for each of the wells for the May, 1998 sampling episode. Table 2 presents the summary of the historical data for these wells.

The historical data indicates that the BTEX concentration at the source well, MW#1, is declining. Also, the data confirms that the contaminant plume has not migrated to the downgradient wells (MW#2 and MW#6). The analyses for lead at MW#1 has shown two excursions during the December, 1996 and May, 1998 sampling episodes. The sampling technique for the July, 1998 sampling episode was modified to use the trickle flow method. Using this sampling methodology, the lead content was measured to be only 6.18 μg/liter. Based on this result and the earlier historical analyses, the lead results measured during the December, 1996 and May, 1998 sampling episodes are believed to be due to the sampling methodology.

The owner of the property is interested in establishing a Classification Exception Area (CEA) for this site. If additional information is required, please advise. Thank you for your consideration.

Very truly yours,

J. David Calvert, PE, CSP

Data for sampling rounds from December , 1993 to December, 1996 based on data presented by Compliance Management Inc.
Sampling for lead analysis in July, 1998 accomplished by trickle flow.
Lead analyses for May, 1998 and December, 1996 presumed to be due to particulate contamination.
Lead data presented by Compliance Management Inc. may not be accurate based on NJDEP comments in letter dated March 26, 1997.

Re: Allied Building Supply
101 West Elizabeth Avenue
Linden, NJ
Case No. 93-06-24-1425

Dear Sir:

Presented herein is an application for a Classification Exception Area for the property located at 101 West Elizabeth Avenue, Linden, NJ. Attached are analytical data, calculations and drawings to support this application. These attachments include historical analytical data on the monitoring wells on this site, a drawing which displays the historical groundwater gradient on the site, and the results of the modeling calculations to predict the fate and transport of BTEX at this site. The data and modeling predict a very slow rate of transport of the contaminants and does not predict that potential receptors will be impacted.

This site had a discharge from an underground gasoline storage tank and/or piping prior to 1993. A total of six groundwater monitoring wells have been installed on or near this site as part of the site investigation. Through the eight rounds of sampling which has occurred over the past five years, only MW#1 has indicated contaminants at levels above the applicable Groundwater Quality Standards. Furthermore, the level of these contaminants have been significantly reduced over this period through natural processes.

It has been reported that a well search was previously performed in support of the management of this case and the results were submitted to the NJDEP. This well search indicated no downgradient wells to be within ¼ miles of the site.

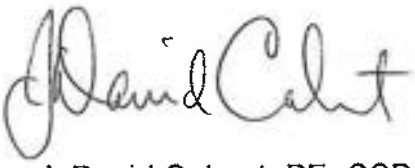
The direction of groundwater flow is indicated to be toward the east. The closest potential receptor in this direction is the storm sewer collection system which is located in the parking lot for the Linden Rail Station. This system is approximately 75 feet from the property line of this site.

during well installations. Based on this characterization, the hydraulic conductivity at this site has been estimated to be approximately 3E-3 ft/day. Groundwater elevations have been measured in the various monitoring wells during each sampling episode. These data indicate that the groundwater gradient is approximately 0.005 ft/ft (See Figure 1). The porosity of the silty clay soils has been estimated to be <0.5. Based on the foregoing data, the actual groundwater flow rate is calculated to be 3E-5 ft/day. At this flow rate, the plume is predicted to be essentially stagnant. Even using other more conservative assumptions, the maximum distance for the migration of the BTEX plume is predicted to be less than 15 feet from the source located at or near MW#1. Therefore, the plume is predicted not to impact receptors and is predicted not to travel beyond the limits of the property boundary.

Based on these analyses, a Classification Exception Area is proposed for this site to the limits of the property boundaries.

Thank you for your consideration. If you have any questions on this matter, please contact me at your convenience.

Very truly yours,



J. David Calvert, PE, CSP

Data for sampling rounds from December , 1993 to December, 1996 based on data presented by Compliance Management Inc.
Sampling for lead analysis in July, 1998 accomplished by trickle flow.
Lead analyses for May, 1998 and December, 1996 presumed to be due to particulate contamination.
Lead data presented by Compliance Management Inc. may not be accurate based on NJDEP comments in letter dated March 26, 1997.

Re: Allied Bldg. Supply
101 West Elizabeth Ave., Linden,NJ
Case # 93-06-24-1425

Dear Mr. Brown,

I am the owner of the above referenced site. On August 13, 1998 you received the results of laboratory analysis on the groundwater samples from Matrix Engineering Inc., wherein a request for a CEA was made.

On August 26, 1998, Matrix forwarded analytical data supporting our request for a CEA.

Two months have passed since our application was made but we have not yet heard from you. I realize that you have a work file, but I cannot logically conceive that you could not find time in 60 days to review our short application.

We had a substantial amount of escrow monies withheld from us at our closing with the New Jersey Transit since Dec. 18, 1993. These monies will be released upon our receipt of the NFA/CEA letter. New Jersey Transit is presently using this site as a parking lot.

In view of the above, your immediate attention to this matter shall be most appreciated. Please advise.

Very truly yours,

ALLIED BUILDING SUPPLY

Closure #C93-2092.

NOV 16 1998

Dear Mr. Winters:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area of concern as specifically referenced above, except as noted below, so long as Allied Building Supplies did not withhold any information from the Department. This action is based upon information in the Department's case file and Allied Building Supplies' final certified report dated August 26, 1998. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Remedial Investigation and Remedial Action pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the 2,000 gallon Gasoline Underground Storage Tank and no other areas.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination Allied Building Supplies as well as each subsequent owner, lessee and operator (collectively "Successors") shall comply with each of the following:

Name and Address Changes

Pursuant to N.J.S.A. 58:10B-12, Allied Building Supplies and the Successors shall inform the Department in writing whenever its name or address changes, within 14 calendar days after the change.

Well Sealing

Pursuant to N.J.S.A. 58:4A, Allied Building Supplies and the Successors shall properly seal all monitoring wells installed as part of a remediation that will no longer be used for ground water monitoring. A certified and licensed well driller shall seal the wells in accordance with the requirements of N.J.A.C. 7:9-9. The well abandonment forms shall be completed and submitted to the Bureau of Water Allocation. Please call (609) 984-6831 for forms and information.

Monitoring of Compliance

Pursuant to N.J.S.A. 58:10B-13.1, Allied Building Supplies and the Successors shall conduct monitoring for compliance and effectiveness of the institutional control specified in this document and submit a certification to the Department biennially in writing that the institutional control is being properly maintained and continues to be protective of public health and safety and the environment. Any such certification shall include the information relied upon to determine that no changes have occurred.

CLASSIFICATION EXCEPTION AREA (CEA)
AND WELL RESTRICTION AREA (WRA)

Because concentrations of contaminants remain above the Ground Water Quality Standards, N.J.A.C. 7:9-6 et seq., a CEA and WRA are required, at this time, as institutional controls.

This CEA and WRA are based, in part, on the aquifer and contaminant data and evaluations provided in the above referenced report and/or case file. The CEA and WRA is the area defined by the property boundary and identified on the enclosed map. Any special conditions or restrictions for water use within the WRA will be administered by the Department's Bureau of Water Allocation.

This CEA and WRA apply to benzene, toluene, ethylbenzene and xylenes only. All other constituent standards apply within the CEA. All constituent standards (N.J.A.C. 7:9-6) apply at the designated boundary. All designated ground water uses within this area are suspended for the duration of the CEA. Pursuant to N.J.A.C. 7:9-6.4, "designated use" means a present or potential use of ground water within a ground water classification area as determined by N.J.A.C. 7:9-6.5. Pursuant to N.J.A.C. 7:9-6.5, this area is presently designated as Class II-A. The primary designated use for Class II-A ground water is potable water; secondary uses include agricultural and industrial water.

The duration of the CEA and WRA is set at three years from the date of this letter. This is greater than the predicted duration for contaminant degradation in the above referenced report. The Ground Water Quality Standards that apply to the compounds of concern are: benzene 1 ppb; toluene 1000 ppb; ethylbenzene 700 ppb and xylenes 1000 ppb. Should concentrations of contaminants reach their respective criteria prior to the CEA and WRA expiration date as demonstrated through ground water sampling, the Department will consider any requests to terminate the CEA and WRA. However, the expiration of the three year period prior to contaminant concentrations reaching the Ground Water Quality Standards would not constitute approval to utilize the ground water for its designated purposes. Compliance with the Ground Water Quality Standards may be determined by Allied Building Supplies by demonstrating that the Ground Water Quality Standards have been met for the referenced constituent(s) through ground water sampling from monitoring well: MW-1. Please note that Allied Building Supplies has the option of maintaining these wells for sampling purposes or sealing these wells and utilizing an acceptable method of ground water sampling to demonstrate compliance with the Ground Water Quality Standards. Compliance may be determined by Allied Building Supplies at the termination of the CEA and WRA or sooner. The Department's evaluation of the ground water sampling results, to determine compliance with the Ground Water Quality Standards, would be through a Memorandum of Agreement (MOA) or other oversight document, executed between Allied Building Supplies and the Department.

The Department issues this Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.1. That statute requires a covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against the following:

(a) the person who undertook the remediation;
(b) subsequent owners of the subject property;
(c) subsequent lessees of the subject property; and
(d) subsequent operators at the subject property,

for the purposes of requiring remediation to address contamination which existed prior to the date of the final certified report for the area of concern specifically referenced above, or payment of cleanup and removal costs for such additional remediation.

Any person who may benefit from this Covenant is barred from making a claim against the Spill Compensation Fund, N.J.S.A. 58:10-23.11i, and the Sanitary Landfill Facility Contingency Fund, N.J.S.A. 13:1E-105, for any costs or damages relating to the remediation covered by this Covenant. All other claims against these funds will be controlled by the corresponding statutes and their implementing regulations.

Allied Building Supplies, and each subsequent owner, lessee and operator, during that person's ownership, tenancy or operation, shall maintain those controls and conduct periodic compliance monitoring in the manner the Department requires.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that either:

(a) any person with the legal obligation to comply with any condition in this No Further Action Letter has failed to do so; or
(b) any person with the legal obligation to maintain or monitor any engineering or institutional control has failed to do so.

This Covenant Not to Sue, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant Not to Sue in the lines supplied below and the Department has received one copy of this document with original signatures of the Department and the person who undertook the remediation.

NOTICES

Bureau of Field Operation's Case Assignment

This No Further Action Determination specifically does not address the 550 gallon fuel oil underground storage tank. Allied Building Supply was notified of the case transfer to the Bureau of Field Operation's Case Assignment Section by letter on December 8, 1994.

Pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C) you may have an opportunity to remediate the site, or portion of the site, on a voluntary basis under a Memorandum of Agreement (application enclosed) or otherwise. Please direct all correspondence to:

New Jersey Department of Environmental Protection

Direct Billing

Please be advised that pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C et seq.) Allied Building Supplies is required to reimburse the Department for oversight of the remediation. The Department will be issuing a bill within the next four months.

Thank you for your attention to these matters. If you have any questions, please contact Bill Brown, Case Manager at (609) 777-1386.

Biennial Report for Classification Exception Area (CEA) Approval

Re: Biennial Report for CEA
Allied Building Supply Co
101 Elizabeth Ave
Linden, NJ 07036
SRP PI# 012948
EA ID #: SUB100001

Dear Mr. Judd:

The New Jersey Department of Environmental Protection (Department) has completed review of the Biennial Report for CEA received on January 6, 2010. The Department has determined that the Biennial Report for CEA is in compliance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E and other applicable requirements. The Department hereby approves the Biennial Report for CEA effective the date of this letter.

Please be advised that your CEA expired on November 16, 2001. Pursuant to the Technical Requirements for Site Remediation, N.J.A.C. 7:26E 8.6 (a) 7, you shall assess ground water quality as follows:

Collect at least two rounds of ground water samples such that the time between sampling events shall account for seasonal fluctuations in the ground water table and the number of ground water samples collected are representative of the entire horizontal and vertical extent of the ground water classification exception area. Sampling parameters shall include benzene, ethylbenzene, toluene, and total xylenes. If groundwater sampling identifies contaminant levels are above the GWQS, a revised CEA proposal must be submitted to the Department. The proposal must include fate and transport modeling. If

both rounds of ground water sampling indicate contaminant levels to be below the GWQS, a CEA closure report should be submitted to the Department.

Pursuant to the schedule applicable to the site you shall submit a either a revised CEA or a request for no further action on or before September 2, 2010. Please submit the document by that date, or submit a written request for an extension at least 2 weeks prior to the due date. Failure to submit the required document in accordance with the schedule may result in the initiation of enforcement action. For your convenience, the regulations concerning the Department's remediation requirements can be found at http://www.state.nj.us/dep/srp/regs/ .

Thank you for your cooperation in this matter. If you have any questions call me at (609) 633-2279.

Sincerely,

Biennial Certification Monitoring Report for a Ground Water Classification Exception Area (CEA)

I. Site Background Information

A. Facility Name and Location:

Site Name at the time the CEA was issued: Allied Building Supply
Current Site/Property Name *(if different than above)*: NJ TRANSIT Linden Station Commuter Parking Lot
Site/Property Street Address: 101 West Elizabeth Avenue
Municipality (-ies): Linden County (ies): Union
Blocks (Impacted On-Site): 254 Lots (Impacted On-Site): 10
Blocks (Impacted Off-Site): _____ Lots (Impacted Off-Site): _____
Year of Tax map from which this information is obtained: 1973

B. Person Submitting Biennial Certification for the CEA:

Person Responsible (Name of Individual or Legal Entity): Martin Judd
Name of Business responsible for submitting this report: New Jersey Transit Corporation
Relationship to the Site (check as appropriate): Owner ☒, Operator ☐, Lessee ☐,
Person Conducting Cleanup ☐, Other ☐(describe) _____
Street Address: One Penn Plaza East, 8th Floor
City: Newark State: NJ Zip: 07105

D. Case Specific Information (Complete all that apply)

- Program Interest Name: BOMM
- Program Interest Number: 012948
- Known Contaminant Site List (KCSL) Number (if available): NJL600081798
- Incident Report Number (10 or 12 Digit Case Number): 93-06-24-1425
- Industrial Site Recovery Act Number: NA
- UST Registration Number (7 digits): NA
- Date Department approved CEA: Accepted 11/16/98
- Name and Bureau of assigned Case Manager at the time the CEA was issued: Bill Brown

E. Existing Site Conditions

- Describe the physical characteristics of the site

The site is an active NJ TRANSIT Rail Station located at 101 Elizabeth Avenue in Linden, New Jersey. The site consists of an asphalt-paved commuter parking lot. The site is surrounded by commercial and retail properties in a downtown setting. The property was previously occupied by Allied Building Supply.

A dissolved benzene, toluene, ethylbenzene, and total xylenes (BTEX) plume exists within the boundaries of the site and is the result of a point-source release of gasoline prior to 1993 from a former 2,000-gallon underground storage tank (UST) located in the northern portion of the former site. This BTEX plume forms a single groundwater impact area in the overburden soils at the site. The impacted aquifer is comprised of unconsolidated silty clay.

- Describe the current site operations

The remedial action implemented at the site to address the BTEX plume included natural attenuation and establishment of a Classification Exception Area (CEA). The CEA was approved by the NJDEP on November 16, 1998. Six monitoring wells (MW-1 through MW-6) located on site were sampled from 1994 through 1998. The monitoring wells were likely compromised during the construction of the NJ TRANSIT commuter parking lot at the site. The current status of the wells is not known.

- Describe each remedial action that included the CEA. Please check and describe, as required, the appropriate selection below.

☒ Natural Attenuation
☐ Other (please describe below)

II. CEA Protectiveness Evaluation

A. Inspection and Evaluation of the CEA

(The appropriate box on the left must be checked for each of the following items.)

1. Changes to Laws and Regulations

a. Are there any subsequently promulgated or modified laws or regulations, which apply to the remedial action, which includes the CEA? **Complete Columns 1 and 2 of Attachment 1: Comparison of Applicable Laws and Regulations.**

Yes ☒ No ☐ (If No, proceed to #2 below)

If Yes, complete **Column 3 of Attachment 1: Comparison of Applicable Laws and Regulations** providing the actions taken to demonstrate how the remedial action, which includes the CEA, conforms to current statutes and regulations.

2. Evaluation of Future Water Uses

a. Are there any planned changes within the 25-year water use planning horizon for the aquifer(s), in which the CEA is located, since the Department established the CEA or the last completed biennial review, whichever is more recent? Ensure that all sources in **Attachment 2: Results of the 25-Year Water Use Planning Review** have been reviewed and are checked off.

Yes ☐ No ☒ (If No, proceed to #3)

If **Yes,** provide details of the changes in **Attachment 2: Results of the 25-Year Water Use Planning Review.**

b. Will any of the proposed changes in the ground water use, identified above, possibly influence the protectiveness of the remedial action that includes the ground water CEA?

Yes ☐ No ☐ (If No, proceed to #3)

Provide explanations in **Attachment 2: Results of the 25-Year Water Use Planning Review.**

c. Is there a need to reevaluate the fate and transport of the ground water contamination plume and to revise the CEA to ensure that the remedial action remains protective of the public health and safety and the environment?

Yes ☐ No ☐ (If No, proceed to #3)

If **Yes**, provide a brief explanation below and attach the revised CEA model prepared in accordance with N.J.A.C. 7:26E-8.6(b) 10. Provide calculations and a scaled map including delineation of the plume extent and all Blocks and Lots that are within the extent of the CEA and include this in **Attachment 3: Revised CEA.**

---

3. Well Search

a. Have there have been any actual changes in ground water use, pursuant to N.J.A.C. 7:26E-8.6(a) 3., since the Department established the ground water CEA or the last completed biennial review, whichever is more recent? Provide results of well searches in **Attachment 4: Well Search**

Yes ☐ No ☒ (If No, proceed to #4 below)

b. Have any of the actual changes in the ground water use, identified above, influenced or may influence the protectiveness of the remedial action that includes the ground water CEA?

Yes ☐ No ☐ (If No, proceed to #4 below)

If **Yes**, provide explanations in **Attachment 4: Well Search.**

4. Ground Water Monitoring Wells associated with the CEA

a. During inspections was the physical integrity of each well acceptable and the security measures adequate as documented in an inspection log? Include the inspection logs in **Attachment 5: Maintenance Records for Monitoring Wells.**

Yes ☐ No ☒ (If Yes, proceed to #5 below)

If No, describe the associated problem(s) and how each of the situations was corrected.

After the establishment of the CEA on November 16, 1998, the site was acquired and redeveloped by NJ TRANSIT into an asphalt-paved commuter parking lot servicing the Linden Rail Station. The monitoring wells were most likely covered over during construction and rendered useless. NJ TRANSIT will attempt to locate the wells to properly abandon them. Based on the August 13, 2009 NJDEP correspondence regarding the CEA and the subject site, NJ TRANSIT will comply with N.J.A.C. 7:26E-8.6(a)7 and assess groundwater quality by installing six new monitoring wells and collecting two rounds of groundwater samples to account for seasonal fluctuations of the groundwater table. The results of the groundwater sampling events will be summarized in a report and forwarded to the NJDEP for review.

b. Include in **Attachment 6: Well Abandonment Forms** copies of the well abandonment forms for all monitoring well(s) used to establish the ground water CEA that have been decommissioned since the previously submitted biennial certification or establishment of the CEA, whichever is

later.

5. Land Use Disturbance

a. Has there been any land use disturbance, such as the installation of a detention basin, that intercepted the water table within the area of the ground water CEA?

Yes ☐ No ☒ (If No, proceed to #6 below)

If **Yes**, present the data and evaluation required in accordance with N.J.A.C. 7:26E-8.6(a) 5 and 8.6(b) 7. Present the sampling results, and the associated reduced laboratory data deliverables Quality Assurance/Quality Control (QA/QC) package as per N.J.A.C. 7:26E-2.1 (a) 13ii. and evaluation in **Attachment 7: Results of Land Use Disturbance Analysis**.

6.CEA Status (check the appropriate box below)

Present the sampling results, the associated reduced laboratory data deliverables Quality Assurance/Quality Control package pursuant to N.J.A.C. 7:26E-2.1 (a) 13ii and evaluation in **Attachment 8: Results of Ground Water Analysis** for the appropriate situation, as necessary.

☐ The currently effective termination date of the CEA has not passed and no ground water sampling has been conducted.

☒ The currently effective termination date of the CEA has passed and the required ground water samples were collected and evaluated in accordance with N.J.A.C. 7:26E-8.6(a) 7ii, or reference 8.6(a) 8. Do the sampling results confirm that the contaminant concentrations are at or below the applicable Ground Water Quality Standards throughout the entire ground water CEA?

Yes ☐ No ☒ If **Yes** provide the results of the analysis in **Attachment 8: Results of Ground Water Analysis** and then proceed to III. Certification, below.

If **No**, present the data, an explanation of why ground water contamination is still present and a re-evaluation of the ground water quality standards pursuant to N.J.A.C. 7:26E-8.3(b), 8.6(b) 10 and 8.6(b) 13. Present this information in **Attachment 8: Results of Ground Water Analysis**

☐ The currently effective termination date of the CEA has not passed, however ground water samples have been voluntarily collected and evaluated in accordance with N.J.A.C. 7:26E-8.6(a) 7ii or 8.6(a) 6ii.

III. Certification

A. Certification, Copying and Reporting Requirement

Provide both a paper and an electronic copy of this certification, in accordance with N.J.A.C. 7:26E-8.6(c)2, to the following people. Provide documentation in **Attachment 9 Name and Address Copy List** confirming that each of the following groups of people received a copy of the Certification:

1. The municipal and county clerks for each municipality and county in which any real property overlying the CEA is located;
2. The local, county and regional health department for each municipality and county in which any real property overlying the CEA is located;
3. Each owner of the real property which is overlying the CEA; and
4. Each current operator at the real property which is overlying the CEA.

B. Person Responsible for the Biennial Certification: *(The following certification shall be signed according to N.J.A.C. 7:26E-1.5, N.J.A.C. 7:26C-1.2 and the covenant not to sue (if issued) as follows:*

1. For a Limited Liability Company a member of the Limited Liability Company; or
2. For a Corporation by a person authorized by a resolution of the board of directors to sign the document. A copy of the resolution, certified as a true copy by the secretary of the corporation, shall be submitted along with the certification; or
3. For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or
4. For a municipality, State, federal or other public agency by either a principal executive officer or ranking elected Official.

"I certify under penalty of law that I have personally examined and am familiar with the information submitted herein and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge I believe that the submitted information is true, accurate, and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate, or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement, which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties."

I also understand that in order to maintain the benefits of the Covenant Not to Sue, the engineering and institutional controls (as applicable) must be evaluated and maintained to remain protective of public health and safety and of the environment.

Based upon all of the information that I have provided above, I hereby certify that the remedial action(s) for which this Classification Exception Area was established remain protective of public health and safety and of the environment.

Attachments to the CEA Biennial Certification

Attachment 1: Comparison of Applicable Laws and Regulations

Evaluation of Laws and Regulations must include, but is not limited to the following list. These Statutes and Regulations can be found at the following web sites http://www.njleg.state.nj.us/ or http://www.state.nj.us/dep/legal/nj_env_law.htm.

List all statutes and regulations that are applicable.	Subsequent changes that apply to the CEA	Actions taken to conform the CEA with current statutes and regulations
Spill Compensation Control Act, N.J.S.A. 58:10-23.11 et seq.	NA	NA
Brownfields and Contaminated Site Remediation Act, N.J.S.A. 58:10B-1 et seq.	NA	NA
Water Pollution Control Act, N.J.S.A. 58:10A-1, et seq.	NA	NA
Technical Requirements for Site Remediation, N.J.A.C. 7:26E	NA	NA
Procedures for Department Oversight of the Remediation of Contaminated Sites, N.J.A.C. 7:26C	NA	NA
Underground Storage Tank Regulations, N.J.A.C. 7:14B	NA	NA
Industrial Site Recovery Act Regulations, N.J.A.C. 7:26B	NA	NA
Others (Specify) See Attachment 1.	See Attachment 1.	See Attachment 1.

Attachment 2: Evaluation of Future Water Uses (Results of the 25-Year Water Use Planning Review)

All plans, records and other relevant information shall be obtained from the following sources, without limitation. Please check the following boxes to confirm that the following sources were evaluated.

☒ i. The New Jersey Water Master Plan;
☒ ii. Department of Environmental Protection, Bureau of Water Allocation
☒ iii. Municipal master plans;
☒ iv. Zoning Plans;
☒ v. Local water purveyor plans and planning data pertaining to the existence of water lines and proposed future installation of water lines;
☒ vi. Local Planning Officials;
☒ vii. Local and county ordinances restricting installation of potable wells; and
☒ viii. County and local boards of health

a. Changes within the 25-year water use planning horizon (as appropriate):
See Attachment 2.

b. Determination of actual or proposed changes in the ground water use above have influenced or may influence the protectiveness of the remedial action that includes the ground water CEA (as appropriate):
Per Attachment 2, no actual or proposed changes in groundwater use exist.

Attachment 3: **Revised CEA**

Attachment 4: **Well Search**

See Attachment 4.

Attachment 5: **Maintenance Records for Monitoring Wells**

☐ No monitoring wells, associated with this site, are present.
☐ Monitoring wells and records, associated with this site, are enclosed.
No maintenance records are available for the monitoring wells. For information regarding the status of the wells, see Section 4 - Ground Water Monitoring Wells associated with the CEA.

ATTACHMENT 1

COMPARISON OF APPLICABLE LAWS AND REGULATIONS

ATTACHMENT 1

COMPARISON OF APPLICABLE LAWS AND REGULATIONS

Additional statutes and regulations not included in the table identified as "Attachment 1-Comparison of Applicable Laws and Regulations" but evaluated as part of the CEA Biennial Certification include the following:

- Site Remediation Reform Act (N.J.S.A. 58:10C-1 et seq., dated May 7, 2009, adopted November 4, 2009, and expires on May 4, 2011)
- Administrative Requirements for the Remediation of Contaminated Sites Rule (N.J.A.C. 7:26C, adopted November 4, 2009)
- NJDEP Ground Water Quality Standards (N.J.A.C. 7:9C, amended November 7, 2005 and last revised, November 4, 2009)

Based on a review of the applicable statutes and regulations listed under Attachment 1-Comparison of Applicable Laws and Regulations, there was a subsequent change noted that would affect the CEA. Under the Site Remediation Reform Act (N.J.S.A. 58:10C-1 et seq.), it is indicated that, in the interim rule (known as the Administrative Requirements for the Remediation of Contaminated Sites [ARRCS] Rule, Section 7:26C-2.3(a)(6)), the person responsible for conducting remediation activities initiated prior to November 4, 2009 must obtain and comply with all permits necessary for remediation. An operation and maintenance permit associated with the CEA will be required for subject property by the NJDEP after January 15, 2010.

A review of the NJDEP Ground Water Quality Standards revealed no necessary revisions of the CEA for the property.

ATTACHMENT 2

RESULTS OF 25-YEAR WATER USE PLANNING REVIEW

ATTACHMENT 2

RESULTS OF 25-YEAR WATER USE PLANNING REVIEW

In its correspondence dated August 13, 2009, the NJDEP indicated that, since there were no significant changes in the 25-year groundwater use planning horizon for New Jersey's aquifers, the Department will not require persons' responsible for CEA Biennial Certifications to review the New Jersey Water Supply Master Plan. The NJDEP does require person's responsible to contact the local municipality and/or county governments, as well as water purveyors, to determine if there are any changes that have occurred or are planned for the water supply master plan applicable to the location of the subject property. Dewberry placed an Open Public Records Act request for this information to the City of Linden on December 2, 2009, per the attached email correspondence. Dewberry received the attached letter from Mr. George R. Vircik, City Engineer, dated December 4, 2009 indicating that there is no water supply master plan for the City of Linden and that the City's water is supplied by the New Jersey American Water Company of Plainfield, New Jersey.

Mr. Joseph Bodek
City Clerk
Linden, New Jersey

Dear Mr. Bodek:

Re: REQUEST OF THOMAS CUMELLO (December 3, 2009)

We have reviewed the above request and report the city does not have a 25 year water use plan. Water is supplied to Linden by the New Jersey American Water Co. of Plainfield, New Jersey.

Very truly yours,

George R. Vircik

Subject: Evaluation of Future Water Uses-25 Year Water Use Plan for Linden

Importance: High

To whom it may concern,

Does your department or another department, such as building, planning, zoning, and health, have a copy of the City of Linden 25 Year Water Use Plan or document summarizing future water use evaluation? I am completing an NJDEP Classification Exception Area Biennial Certification report for a site in Linden (NJ TRANSIT Linden Rail Station), and one of the requirements for this document is to review the city or township's 25-Year water use plan to report if there will be any changes in water use (install new water lines, ordinances restricting the installation of potable wells) from such documents as the Municipal Master Plan, Zoning Plans, and ordinances.

I appreciate any assistance from these departments. Please contact me if you have any questions. Thank you.

Tom C.

WELL SEARCH

ATTACHMENT 4

WELL SEARCH

Dewberry performed a CEA Biennial Certification Well Search by Atlas Grid following the directions posted on NJDEP's website. Attached is a figure (plotted using NJDEP's I-Map program) centered on the subject property. A one-mile radius circle was drawn around the site to identify the applicable atlas grids within one mile of the site. The identified atlas grids within this area include:

2621896	2621983	2631233	2631319	2631335	2631354
2621898	2621984	2631235	2631321	2631336	2631355
2621899	2621985	2631236	2631322	2631337	2631356
2621971	2621986	2631238	2631323	2631338	2631361
2621972	2621987	2631239	2631324	2631339	2631362
2621973	2621988	2631263	2631325	2631341	2631364
2621974	2621989	2631311	2631326	2631342	
2621975	2621991	2631312	2631327	2631343	
2621976	2621994	2631313	2631328	2631344

2621978	2621997	2631315	2631331	2631346	
2621979	2621998	2631316	2631332	2631351	
2621981	2621999	2631317	2631333	2631352	
2621982	2631232	2631318	2631334	2631353	

No changes in groundwater usage were identified based on available information from the well records obtained from the NJDEP database for the period of November 16, 1998 and December 2, 2009. Results from the well search summarized in detail below identified industrial, recovery, and injection wells within the one-mile radius of the subject property.

A well search for CEA Biennial Certification by Atlas Grids was completed from the time of the approval of the CEA well search (November 16, 1998) to the present (December 2, 2009). One hundred and four additional well records were identified. In addition, 19 well permits were identified in the well search. Attached are printouts of the well search certificates and the individual well information details and Table 1, which summarizes the well search information.

One well (001 as shown on the attached figure) identified from the NJDEP modified well search was Well Permit Number 2600064094, with the status of the permit indicated as completed. General information includes proposed primary use listed as Industrial with an approval date of March 26, 2002. The well owner is identified as John Backes, and the well location is listed as 1261 West Elizabeth Avenue, Linden, New Jersey, which is estimated to be more than 850 feet south and cross-gradient of the CEA location. A finished depth of 205 feet is indicated on the document, with a capacity of 10 gallons per minute.

Sixteen proposed wells were identified from the NJDEP modified well search. All of these wells have different permit numbers (200900563-200900574, P200904181-P200904184). General information includes primary use listed as recovery, permit approval dates of January 20, 2009 and April 17, 2009, no Drilling End Dates, and status identified as proposed. The well owner is identified as Starwood Ceruzzi, LLC, and the well locations are listed for 701 West Edgar Road, Linden, New Jersey. Well information includes proposed depths of 110 feet and 300 feet. These are proposed wells and were not included in the total number of wells identified in the well search.

Three proposed wells identified from the NJDEP modified well search with Well Permit Numbers 2600062024 through 2600062026, with the status of the permit indicated as proposed. General information includes proposed primary use listed as recovery with an approval date of July 17, 2001. The well owner is identified as Safety-Kleen Corporation, and the proposed well location is listed as 1200 Sylvan Street, Linden, New Jersey. A proposed depth of 50 feet is indicated on the document. These are proposed wells and were not included in the total number of wells identified in the well search.

The next well (002 as shown on the attached figure) identified from the NJDEP modified well search was Well Permit Number 2600062593, with the status of the permit indicated as completed. General information includes proposed primary use listed as Recovery with an approval date of September 18, 2001 and a Drill End Date of October 17, 2001. The well owner is identified as Dock Resins, and the well location is listed as 1512 West Elizabeth Avenue, Linden, New Jersey, which is estimated to be more than 1,100 feet southwest and up gradient of the CEA location. A finished depth of 4 feet is indicated for this recovery well on the document.

The next well (003 as shown on the attached figure) identified from the NJDEP modified well search was Well Permit Number 2600055225, with the status of the permit indicated as completed. General information includes proposed primary use listed as Industrial with an approval date of September 22, 1999 and a Drill End Date of October 13, 1999. The well owner is identified as M&E Properties, LLC, and the well location is listed as 1427 South Wood Avenue, Linden, New Jersey, which is estimated to be more than 1,200 feet east and downgradient of the CEA location. A finished depth of 200 feet and reported capacity of 50 gallons per minute is indicated for this recovery well on the document.

The next well (004 as shown on the attached figure) identified from the NJDEP modified well search was Well Permit Number 2600063157, with the status of the permit indicated as completed. General information includes proposed primary use listed as Recovery with an approval date of November 28, 2001 and a Drill End Date of March 30, 1999. The well owner is identified as Merck & Company, and the well location is listed as 126 East Lincoln Avenue, Linden, New Jersey, which is estimated to be more than 450 feet south and cross gradient of the CEA location. A finished depth of 252 feet is indicated for this recovery well on the document.

Twenty-two wells (005-027 as shown on the attached figure) were identified from the NJDEP modified well search. All of these wells have different permit numbers (2600081313-2600081330, 2600081334, 2600081335, 2600082497, 2600082498). General information on these wells includes primary uses listed as recovery and injection, permit approval dates of

November 6, 2006, December 13, 2006 and February 7, 2007, Drilling End Dates of December 13, 2006, and February 21-23, 2007, and status identified for all wells as completed. The well owner is identified as Gennaro Nigro, and the well locations are listed for 217 Academy Terrace, Linden, New Jersey. Well information includes proposed depths of 8, 14, 15, 19, and 20 feet. The wells are located over 1,400 feet northwest and upgradient from the CEA location. Below is a summary of the information for these 22 wells.

Notes:
NA - No information available

Seventy-six wells (028-104 as shown on the attached figure) were identified from the NJDEP modified well search. All of these wells have different permit numbers (2600063028-2600063037, 2600072211-2600072278, 2600072450-2600072455). General information on these wells includes primary uses listed as injection, permit approval dates of November 8, 2001, September 3, 2004 and September 24, 2004, Drilling End Dates of September 29, 2004, October 1, 2004, and October 4-7, 2004, and the status identified for all wells as authorized. The well owner is identified as Sherman Leather, and the well locations are listed for 22 East St. Georges Avenue, Roselle, New Jersey. Well information includes proposed depths of 3, 20, 25, and 30 feet, and finished depths of 20 and 23 feet. The wells are located over 1,650 feet northwest and upgradient from the CEA location. Below is a summary of the information for these 76 wells.

Well Search for CEA Biennial Certification By Atlas Grids

Please Enter PI Information Below :

PI Name	
Street Address :	
City, State and Zip Code :	

Program Interest ID : 012948

Well Approved During the Period 11/16/1998 to 12/2/2009

Grid Numbers Entered :

2631351, 2631352, 2631353, 2631354, 2631355, 2631356, 2631357, 2631358, 2631359

*All of the grids listed above have been searched. If the following well search table is blank, then no well permits were identified.

Well Search Results :

Well Type	Count
Industrial	1
Recovery	19
Sum:	20

Preparer (Print Name) : Thomas Lunello

Signature : _____ Date : 12/2/2009

Because of limitations on this report, it is recommended that it is only used to review well permit information as part of the Biennial Certification Process for Classification Exception Areas. It is further noted that data quality is reduced on wells permitted prior to 1995

Well Search for CEA Biennial Certification By Atlas Grids

Please Enter PI Information Below :

PI Name	
Street Address :	
City, State and Zip Code :	

Program Interest ID : 012948

Well Approved During the Period 11/16/1998 to 12/3/2009

Grid Numbers Entered :

2631232, 2631233, 2631234, 2631235, 2631236, 2631238, 2631239, 2631263, 2631362, 2631364

*All of the grids listed above have been searched. If the following well search table is blank, then no well permits were identified.

Well Search Results :

Well Type	Count
Sum:	

Preparer (Print Name) : Thomas Cimello

Signature : _____ Date : 12/3/2009

Because of limitations on this report, it is recommended that it is only used to review well permit information as part of the Biennial Certification Process for Classification Exception Areas. It is further noted that data quality is reduced on wells permitted prior to 1985

MAINTENANCE RECORDS FOR MONITORING WELLS

ATTACHMENT 5

MAINTENANCE RECORDS FOR MONITORING WELLS

Following the establishment of the CEA at the subject property, the Allied Building Supply property was purchased by NJ TRANSIT and developed into an asphalt-paved commuter parking lot servicing the adjacent Linden Rail Station. No further information is available on the existence and condition of the six monitoring wells. If the monitoring wells are not found, they will be replaced, sampled twice (six months apart), and the results will be reported to the NJDEP, per the Department's correspondence dated August 13, 2009. As required for the CEA Biennial Certification, at the time of sampling, the monitoring wells will be inspected and their physical integrity documented. Site security measures will also be noted during the two groundwater sampling events.

(NOT APPLICABLE)

ATTACHMENT 8

RESULTS OF GROUNDWATER ANALYSIS

ATTACHMENT 8

RESULTS OF GROUNDWATER ANALYSIS

Groundwater contamination by benzene, toluene, ethylbenzene, and total xylenes is present at the NJ TRANSIT site due to a discharge reported to the NJDEP following the removal and reported discharge of one 2,000-gallon gasoline underground storage tank (UST) from the subject property in June 1993. Following the UST excavation activities conducted in July 1993, groundwater investigation activities were performed from 1993 through 1998, including the installation and sampling of six monitoring wells. The groundwater sampling results identified the compounds benzene, toluene, ethylbenzene, and total xylenes (BTEX). A Classification Exception Area (CEA) with remediation by natural attenuation was approved by the NJDEP on November 16, 1998. No further groundwater sampling was performed since the approval of the CEA.

Subsequent to the establishment of the CEA, NJ TRANSIT purchased the subject property and converted the former Allied Building Supply site to an asphalt-paved commuter parking lot for the adjacent NJ TRANSIT Linden Rail Station. No information was available on the condition of the six monitoring wells at the site. In accordance with NJDEP correspondence dated August 13, 2009, if necessary, NJ TRANSIT will re-install the six monitoring wells, collect two rounds of groundwater samples, and report the results to the NJDEP. NJ TRANSIT will notify the Department when monitoring well installation and subsequent groundwater sampling activities will take place.

Case #93-06-24-1425
UST #0129486
KCSL # NJL600081798
Closure #C93-2092

NOV 16 1998

Dear Mr. Winters:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area of concern as specifically referenced above, except as noted below, so long as Allied Building Supplies did not withhold any information from the Department. This action is based upon information in the Department's case file and Allied Building Supplies' final certified report dated August 26, 1998. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Remedial Investigation and Remedial Action pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the 2,000 gallon Gasoline Underground Storage Tank and no other areas.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination Allied Building Supplies as well as each subsequent owner, lessee and operator (collectively "Successors") shall comply with each of the following:

Name and Address Changes

Pursuant to N.J.S.A. 58:10B-12, Allied Building Supplies and the Successors shall inform the Department in writing whenever its name or address changes, within 14 calendar days after the change.

5

Well Sealing

Pursuant to N.J.S.A. 58:4A, Allied Building Supplies and the Successors shall property seal all monitoring wells installed as part of a remediation that will no longer be used for ground water monitoring. A certified and licensed well driller shall seal the wells in accordance with the requirements of N.J.A.C. 7:9-9. The well abandonment forms shall be completed and submitted to the Bureau of Water Allocation. Please call (609) 984-6831 for forms and information.

Monitoring of Compliance

Pursuant to N.J.S.A. 58:10B-13.1, Allied Building Supplies and the Successors shall conduct monitoring for compliance and effectiveness of the institutional control specified in this document and submit a certification to the Department biennially in writing that the institutional control is being properly maintained and continues to be protective of public health and safety and the environment. Any such certification shall include the information relied upon to determine that no changes have occurred.

CLASSIFICATION EXCEPTION AREA (CEA)
AND WELL RESTRICTION AREA (WRA)

Because concentrations of contaminants remain above the Ground Water Quality Standards, N.J.A.C. 7:9-6 et seq., a CEA and WRA are required, at this time, as institutional controls.

This CEA and WRA are based, in part, on the aquifer and contaminant data and evaluations provided in the above referenced report and/or case file. The CEA and WRA is the area defined by the property boundary and identified on the enclosed map. Any special conditions or restrictions for water use within the WRA will be administered by the Department's Bureau of Water Allocation.

This CEA and WRA apply to benzene, toluene, ethylbenzene and xylenes only. All other constituent standards apply within the CEA. All constituent standards (N.J.A.C. 7:9-6) apply at the designated boundary. All designated ground water uses within this area are suspended for the duration of the CEA. Pursuant to N.J.A.C. 7:9-6.4, "designated use" means a present or potential use of ground water within a ground water classification area as determined by N.J.A.C. 7:9-6.5. Pursuant to N.J.A.C. 7:9-6.5, this area is presently designated as Class II-A. The primary designated use for Class II-A ground water is potable water; secondary uses include agricultural and industrial water.

The duration of the CEA and WRA is set at three years from the date of this letter. This is greater than the predicted duration for contaminant degradation in the above referenced report. The Ground Water Quality Standards that apply to the compounds of concern are: benzene 1 ppb; toluene 1000 ppb; ethylbenzene 700 ppb and xylenes 1000 ppb. Should concentrations of contaminants reach their respective criteria prior to the CEA and WRA expiration date as demonstrated through ground water sampling, the Department will consider any requests to terminate the CEA and WRA. However, the expiration of the three year period prior to contaminant concentrations reaching the Ground Water Quality Standards would not constitute approval to utilize the ground water for its designated purposes. Compliance with the Ground Water Quality Standards may be determined by Allied Building Supplies by demonstrating that the Ground Water Quality Standards have been met for the referenced constituent(s) through ground water sampling from monitoring well: MW-1. Please note that Allied Building Supplies has the option of maintaining these wells for sampling purposes or sealing these wells and utilizing an acceptable method of ground water sampling to demonstrate compliance with the Ground Water Quality Standards. Compliance may be determined by Allied Building Supplies at the termination of the CEA and WRA or sooner. The Department's evaluation of the ground water sampling results, to determine compliance with the Ground Water Quality Standards, would be through a Memorandum of Agreement (MOA) or other oversight document, executed between Allied Building Supplies and the Department.

COVENANT NOT TO SUE

The Department issues this Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.1. That statute requires a covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against the following:

(a) the person who undertook the remediation;
(b) subsequent owners of the subject property;
(c) subsequent lessees of the subject property; and
(d) subsequent operators at the subject property,

for the purposes of requiring remediation to address contamination which existed prior to the date of the final certified report for the area of concern specifically referenced above, or payment of cleanup and removal costs for such additional remediation.

Any person who may benefit from this Covenant is barred from making a claim against the Spill Compensation Fund, N.J.S.A. 58:10-23.11i, and the Sanitary Landfill Facility Contingency Fund, N.J.S.A. 13:1E-105, for any costs or damages relating to the remediation covered by this Covenant. All other claims against these funds will be controlled by the corresponding statutes and their implementing regulations.

Allied Building Supplies, and each subsequent owner, lessee and operator, during that person's ownership, tenancy or operation, shall maintain those controls and conduct periodic compliance monitoring in the manner the Department requires.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that either:

(a) any person with the legal obligation to comply with any condition in this No Further Action Letter has failed to do so; or
(b) any person with the legal obligation to maintain or monitor any engineering or institutional control has failed to do so.

This Covenant Not to Sue, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant Not to Sue in the lines supplied below and the Department has received one copy of this document with original signatures of the Department and the person who undertook the remediation.

NOTICES

Bureau of Field Operation's Case Assignment

This No Further Action Determination specifically does not address the 550 gallon fuel oil underground storage tank. Allied Building Supply was notified of the case transfer to the Bureau of Field Operation's Case Assignment Section by letter on December 8, 1994.

Pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C) you may have an opportunity to remediate the site, or portion of the site, on a voluntary basis under a Memorandum of Agreement (application enclosed) or otherwise. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Section Chief
401 East State Street - 5th Floor
P.O. Box 434
Trenton, NJ 08625-0434

Direct Billing

Please be advised that pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C et seq.) Allied Building Supplies is required to reimburse the Department for oversight of the remediation. The Department will be issuing a bill within the next four months.

Thank you for your attention to these matters. If you have any questions, please contact Bill Brown, Case Manager at (609) 777-1386.

Sincerely,

Kevin F. Kratina, Chief

RE: Classification Exception Area (CEA) Biennial Certification Due
Former Allied Building Supply Co
Currently NJ Transit Rail Station - Linden
101 Elizabeth Ave
Linden, NJ 07036
SRP PI# 012948
Activity # PFR000001 - 012948

Dear Mr. Horne:

Based upon further research and a site inspection of the above referenced facility conducted on July 17, 2009, which were activities in follow-up to the New Jersey Department of Environmental Protection (Department)'s previous attempts to contact the proper responsible person in correspondences dated March 21, 2007, February 8, 2008, March 24, 2009, the Department has determined that you are a person responsible for continuing obligations related to the remediation of the above referenced site. Note that the original site has been developed as a commuter parking lot. For contaminated sites where the remedy includes leaving ground water contamination at levels that exceed the applicable Ground Water Quality Standards in conjunction with the establishment of a Classification Exception Area (CEA), the remedy must be monitored and a Biennial Certification Monitoring Report must be submitted to the Department every 2 years from the date that the CEA was established. Parties responsible for this obligation are specified at N.J.A.C. 7:26E-8.4(a)1 and 2, and include the party who conducted the remediation as well as subsequent owners and operators.

Recall that a Biennial Certification to confirm the protectiveness of the remedy pursuant to N.J.A.C. 7:26E-8.6(c) is overdue and you are required to submit it **within 90 days of your receipt of this letter**. Failure to evaluate site conditions and submit this biennial certification is a violation, subject to penalty assessment in accordance with subchapter 10 of the Department Oversight of the Remediation of Contaminated Sites (Oversight Rules), N.J.A.C. 7:26C.

The Biennial Certification form and directions for completing and submitting the biennial certification can be found on the Department's website at http://www.nj.gov/dep/srp/forms/. The website also contains links to the Technical Requirements (including N.J.A.C. 7:26E-8) and the Oversight Rules, which contain information regarding penalties. Completed Biennial Certifications shall be submitted within **90 days** to:

New Jersey Department of Environmental Protection

Bureau of Operation Maint & Monitoring
401 East State Street , P.O. Box 413
Trenton, NJ 08625-0413
Attn: Robert Soboleski, Bureau Chief

Please be advised, for the purposes of compliance with N.J.A.C. 7:26E-8.6(a)2.i and ii only, regarding the requirement to review the New Jersey Statewide Water Supply Plan, the Department has determined that, relative to the purpose of this section, there are no significant changes in the 25 year ground water use planning horizon for the State's aquifers. Therefore, persons responsible for Biennial Certifications for Classification Exception Areas do not need to review the New Jersey Water Supply Master Plan. However, the local municipality and/or county governments, and water purveyors should be contacted regarding any changes that have occurred or may be planned.

Well searches are also required as part of the evaluation pursuant to N.J.A.C. 7:26E-8.6(a)3. However, the Department is experiencing a delay in the processing of well search requests made through the Bureau of Water System and Well Permitting. In an effort to reduce the number of requests, the Department has developed a web-based tool that identifies new well permits in a given area. This tool is available at http://www.nj.gov/dep/srp/guidance/ceacompliance/, and is an acceptable means of meeting your requirements outlined in N.J.A.C. 7:26E-8.6(a)3. If you prefer to satisfy the well search requirements using the traditional means, information regarding Department's well searches may be found in the Division of Water Supply's website at http://www.nj.gov/dep/watersupply under "forms" and "well permitting."

Please note, persons responsible for meeting the monitoring and reporting requirements identified above, as defined pursuant to N.J.A.C. 7:26E-8.4(a), should notify the Department if they are relinquishing the obligation for these requirements and identify the person who is assuming the obligation. Names, addresses and telephone numbers of the relinquishing and assuming parties should be reported to the Department at the address identified above for submittal of the Biennial Certification.

In addition, please note the Department will not consider the Biennial Certification submittal complete without the $375 fee in accordance with N.J.A.C. 7:26C-9.2(a).

Lastly, please note that since the expiration date for the Classification Exception Area has already passed, the person responsible for submitting the Biennial Certification should propose in Section 6 entitled 'CEA Status' the intent to assess the current ground water quality by complying with N.J.A.C. 7:26E-8.6(a)7, by collecting at least two rounds of ground water samples such that the time between sampling events shall account for seasonal fluctuations in the ground water table and the number of ground water samples collected are representative of the entire horizontal and vertical extent of the ground water classification exception area.

If you require copies of Department Guidance Documents or applications, many of these are available on the internet http://www.state.nj.us/dep/srp. If you have any questions regarding this matter contact Donald Kakas, Case Manager at (609) 633-2279 prior to the date indicated.

Sincerely,

Donald Kakas for

RE: Classification Exception Area (CEA) Biennial Certification Due
Allied Building Supply Co
101 Elizabeth Ave
Linden, NJ 07036
SRP PI# 012948
Activity # PFR000001 - 012948

Dear Sir or Madam:

The New Jersey Department of Environmental Protection (Department) has determined that you are a person responsible for continuing obligations related to the remediation of the above referenced site. For contaminated sites where the remedy includes leaving ground water contamination at levels that exceed the applicable Ground Water Quality Standards in conjunction with the establishment of a Classification Exception Area (CEA), the remedy must be monitored and a Biennial Certification Monitoring Report must be submitted to the Department every 2 years from the date that the CEA was established. Parties responsible for this obligation are specified at N.J.A.C. 7:26E-8.4(a)1 and 2, and include the party who conducted the remediation as well as subsequent owners and operators.

A Biennial Certification to confirm the protectiveness of the remedy pursuant to N.J.A.C. 7:26E-8.6(c) is overdue and you are required to submit it **within 90 days of your receipt of this letter**. Failure to evaluate site conditions and submit this biennial certification is a violation, subject to penalty assessment in accordance with subchapter 10 of the Department Oversight of the Remediation of Contaminated Sites (Oversight Rules), N.J.A.C. 7:26C.

The Biennial Certification form and directions for completing and submitting the biennial certification can be found on the Department's website at http://www.nj.gov/dep/srp/forms/. The website also contains links to the Technical Requirements (including N.J.A.C. 7:26E-8) and the Oversight Rules, which contain information regarding penalties. Completed Biennial Certifications shall be submitted within **90 days** to:

Trenton, NJ 08625-0413
Attn: Robert Soboleski, Bureau Chief

Please be advised, for the purposes of compliance with N.J.A.C. 7:26E-8.6(a)2.i and ii only, regarding the requirement to review the New Jersey Statewide Water Supply Plan, the Department has determined that, relative to the purpose of this section, there are no significant changes in the 25 year ground water use planning horizon for the State's aquifers. Therefore, persons responsible for Biennial Certifications for Classification Exception Areas do not need to review the New Jersey Water Supply Master Plan. However, the local municipality and/or county governments, and water purveyors should be contacted regarding any changes that have occurred or may be planned.

Well searches are also required as part of the evaluation pursuant to N.J.A.C. 7:26E-8.6(a)3. However, the Department is experiencing a delay in the processing of well search requests made through the Bureau of Water System and Well Permitting. In an effort to reduce the number of requests, the Department has developed a web-based tool that identifies new well permits in a given area. This tool is available at http://www.nj.gov/dep/srp/guidance/ceacompliance/, and is an acceptable means of meeting your requirements outlined in N.J.A.C. 7:26E-8.6(a)3. If you prefer to satisfy the well search requirements using the traditional means, information regarding Department's well searches may be found in the Division of Water Supply's website at http://www.nj.gov/dep/watersupply under "forms" and "well permitting."

Please note, persons responsible for meeting the monitoring and reporting requirements identified above, as defined pursuant to N.J.A.C. 7:26E-8.4(a), should notify the Department if they are relinquishing the obligation for these requirements and identify the person who is assuming the obligation. Names, addresses and telephone numbers of the relinquishing and assuming parties should be reported to the Department at the address identified above for submittal of the Biennial Certification.

In addition, please note the Department will not consider the Biennial Certification submittal complete without the $375 fee in accordance with N.J.A.C. 7:26C-9.2(a).

If you require copies of Department Guidance Documents or applications, many of these are available on the internet http://www.state.nj.us/dep/srp. If you have any questions regarding this matter contact Donald Kakas, Case Manager at (609)633-2279 prior to the date indicated.

Sincerely,

Robert Soboleski, Bureau Chief

RE : Classification Exception Area (CEA) Biennial Certification Due
Allied Building Supply Co
101 Elizabeth Ave
Linden, NJ 07036
SRP PI# 012948
Activity # PFR000001 - 012948

Dear Sir or Madam:

The New Jersey Department of Environmental Protection (Department) has determined that you are a person responsible for continuing obligations related to the remediation of the above referenced site. For contaminated sites where the remedy includes leaving ground water contamination at levels that exceed the applicable Ground Water Quality Standards in conjunction with the establishment of a Classification Exception Area (CEA), the remedy must be monitored and a Biennial Certification Monitoring Report must be submitted to the Department every 2 years from the date that the CEA was established. Parties responsible for this obligation are specified at N.J.A.C. 7:26E-8.4(a)1 and 2, and include the party who conducted the remediation as well as subsequent owners and operators.

A Biennial Certification to confirm the protectiveness of the remedy pursuant to N.J.A.C. 7:26E-8.6(c) is overdue and you are required to submit it **within 90 days of your receipt of this letter**. Failure to evaluate site conditions and submit this biennial certification is a violation, subject to penalty assessment in accordance with subchapter 10 of the Department Oversight of the Remediation of Contaminated Sites (Oversight Rules), N.J.A.C. 7:26C.

The Biennial Certification form and directions for completing and submitting the biennial certification can be found on the Department's website at http://www.nj.gov/dep/srp/forms/. The website also contains links to the Technical Requirements (including N.J.A.C. 7:26E-8) and the Oversight Rules, which contain information regarding penalties. Completed Biennial Certifications shall be submitted within **90 days** to:

New Jersey Department of Environmental Protection
Bureau of Operation Maint & Monitoring
401 East State Street
P.O. Box 413
Trenton, NJ 08625-0413
Attn: Robert Soboleski, Bureau Chief

Please be advised, for the purposes of compliance with N.J.A.C. 7:26E-8.6(a)2.i and ii only, regarding the requirement to review the New Jersey Statewide Water Supply Plan, the Department has determined that, relative to the purpose of this section, there are no significant changes in the 25 year ground water use planning horizon for the State's aquifers. SRP PI# 012948
PFR000001
93-06-24-1425 BUST C2-CEA

Dear Sir or Madam:

Upon reviewing its records, the New Jersey Department of Environmental Protection (Department) has determined that you are the person responsible for continuing obligations related to the remediation of the above referenced site. Persons responsible for conducting remediation who choose to leave contamination in ground water exceeding the applicable Ground Water Quality Standards under N.J.A.C. 7:9C in conjunction with the establishment of a Classification Exception Area (CEA), and subsequent owners and operators, are required to periodically evaluate site conditions and submit a report to the Department in accordance with subchapter 8 of the Technical Requirements for Site Remediation (Technical Requirements), N.J.A.C. 7:26E. Specifically, N.J.A.C. 7:26E-8 requires the person responsible for the remediation to evaluate the ongoing protectiveness of the selected remedy and submit a biennial certification every two years as of the date the CEA was originally established, until such time as the Ground Water Quality Standards are met. The Department requires this report in order to ensure the remediation of the site remains protective of human health and the environment. Department records indicate that we have not received this report for the above referenced site.

Failure to evaluate site conditions and submit this certification are non-minor violations subject to penalty assessment in accordance with the subchapter 10 of the Department Oversight of the Remediation of Contaminated Sites (Oversight Rules), N.J.A.C. 7:26C. In addition, such failure may also result in the loss of the Covenant Not to Sue. However, the Department will provide a period of time during which persons responsible for performing these evaluations will have the opportunity to come into compliance prior to the assessment of penalties. This period of time will end on September 18, 2007 and only applies to biennial certifications that were/are due on or before September 18, 2007.

The biennial certification form and directions for completing and submitting the biennial certification can be found on the Department's website at http://www.nj.gov/dep/srp/forms/.The website also contains links to the Technical Requirements (including N.J.A.C. 7:26E-8) and the Oversight Rules, which contain information regarding penalties. Completed biennial certifications shall be submitted to:

New Jersey Department of Environmental Protection
Bureau of Operation Maint & Monitoring
401 East State Street
P.O. Box 413
Trenton, NJ 08625-0413
Attn: Robert Soboleski, Bureau Chief

Please be advised, for the purposes of compliance with N.J.A.C. 7:26E-8.6(a)2.i and ii only, regarding the requirement to review the New Jersey Statewide Water Supply Plan, the Department has determined that, relative to the purpose of this section, there are no significant changes in the 25 year ground water use planning horizon for the State's aquifers. Therefore, persons responsible for biennial certifications for Classification Exception Areas do not need to review the New Jersey Water Supply Master Plan. However, the local municipality and/or county governments, and water purveyors should be contacted regarding any changes that have occurred or may be planned.

Well searches are also required to be conducted as part of the evaluation pursuant to N.J.A.C. 7:26E-8.6(a) 3. However, the Department is experiencing a delay in the processing of well search requests. In an effort to reduce the number of requests, the Department has evaluated available data and identified municipalities where no new potable wells have been installed. A list of these municipalities is available at http://www.nj.gov/dep/srp/guidance/ceacompliance/. Therefore, for Biennial certifications due before September 18, 2007, if the subject CEA is wholly within and further than 800 feet from the boundary of the municipalities listed at http://www.nj.gov/dep/srp/guidance/ceacompliance/, a well search does not have to be conducted. For all other municipalities not listed, and for biennial certifications due after September 18, 2007, a well search must be conducted. If you have requested a well search in order to meet your obligations, and the well search is scheduled for a date past September 18, 2007, submit the Biennial Certification when it is due, and before September 18, 2007, indicating the date of the well search. The Department will expect the well search results to be submitted within 30 days of the date that the well search is completed. Alternately, you may request an extension for the submittal of the complete Biennial Certification including the well search results. If an extension is requested in order to accommodate the receipt of well search results it will automatically be approved. Information regarding Department's well searches may be found in the Division of Water Supply's website at http://www.nj.gov/dep/watersupply/ under "forms" and "well permitting."

Please note the Department will not review the biennial certification without the $250 fee in accordance with N.J.A.C. 7:26C-9.2(a).

If you have any questions or require additional information regarding this letter, please contact Robert Soboleski at (609) 292-3215.

Sincerely,

Edward W. Putnam, Assistant Director
Remedial Response Element

CEA Information

Subject Item	*Description*
CEA100151187	CEA defined as property boundary

Subject Item	*Affected Aquifer*	*Vertical Depth*
CEA100151187	Passaic Formation	50

Subject Item	*Classification*
CEA100151187	II-A

Contaminant

This CEA/WRA applies only to the contaminants listed in the table below, The ground water quality criteria / primary drinking water standards for these contaminants are listed in parts per billion (ppb). All constituents standards (N.J.A.C. 7:9:9-6) apply at the designated boundary.

Subject Item	*Contaminant*	*Concentration (1)*	*GWQS (2)*
CEA100151187	Benzene	8 Micrograms Per Liter	1 Micrograms Per Liter
CEA100151187	Ethylbenzene	1220 Micrograms Per Liter	700 Micrograms Per Liter
CEA100151187	Toluene	1020 Micrograms Per Liter	1000 Micrograms Per Liter
CEA100151187	Xylenes (total)	2720 Micrograms Per Liter	1000 Micrograms Per Liter

Note: *(1)* Maximum concentration detected at the time of CEA establishment
(2) Ground Water Quality Standards

CEA Boundaries: The Horizontal and Vertical Boundaries of the CEA are found on Exhibit B (CEA/WRA Location Map)

Projected Term of CEA:

Subject Item	*Date Established*
CEA100151187	11/16/1998

Subject Item	*Duration in Years* (999" is equivalent to "indeterminate" duration)
CEA100151187	3

Subject Item	*Date Lifted*
CEA100151187	

Comment

Note **Since groundwater quality data indicates exceedance of contaminants above the Primary Drinking Water Standards, and the designated uses of Class II-A aquifers include potable use, the CEA established for this site is also a Well restriction Area. The extent of Well Restriction shall coincide with the boundaries of the CEA**

Well Restrictions set within the boundaries of the CEA

Subject Item	*Restriction*
CEA100151187	Double Case Wells: With the exception of monitoring wells installed into the first water bearing zone, any proposed well to be installed within the CEA/WRA boundary shall be double cased to an appropriate depth in order to prevent any vertical contaminant migration pathways. This depth is either into a confining layer or 50 feet below the vertical extent of the CEA.
CEA100151187	Sample Potable Wells: Any potable well to be installed within the footprint of the CEA/WRA shall be sampled annually for the parameters of concern. The first sample shall be collected prior to using the well. If contamination is detected, contact your local Health Department. If the contamination is above the Safe Drinking Water Standards, then the NJDEP Hot Line should be called. Treatment is required for any well that has contamination above the Safe Drinking Water Standards.
CEA100151187	Evaluate Production Wells: Any proposed high capacity production wells in the immediate vicinity of the CEA/WRA should be pre-evaluated to determine if pumping from these wells would draw a portion of the contaminant plume into the cone of capture of the production wells or alter the configuration of the contaminant plume.

Site Specific Well Restrictions

Subject Item	*Restriction*

*This report has a mandatory remediation timeframe

SECTION D. JUSTIFICATION FOR EXTENSION

1. Describe the cause or causes of the need for additional time to complete the work:

Delay in processing NJDEP well search request. Regarding the replacement monitoring wells, consultant procurement and funding of this work is required prior to proceeding with the job.

2. Describe in detail the steps taken to minimize the additional time needed to complete the work:

The Receptor Evaluation Form will be completed, and the well search summary maps will be prepared in GIS. The Receptor Evaluation will be finalized upon receipt of the well search from the NJDEP. A consultant will be retained and funding secured to complete the replacement monitoring well installation and sampling activities by October 1, 2011.

3. Additional information:

4. Mark below as applicable:

☒ This extension meets all of the requirements stipulated under N.J.A.C. 7:26C-3.2 for an extension of a regulatory timeframe and shall be deemed approved unless the Department notifies the requestor in writing that the extension is denied.

☐ This extension of a ☐ mandatory, or ☐ expedited site specific timeframe meets all of the conditions and requirements to be deemed granted as stipulated under N.J.A.C. 7:26C-3.5.

☐ This request for an extension of a regulatory, mandatory or expedited site specific timeframe requires written Department approval pursuant to N.J.A.C. 7:26C-3.2-3.5.

RE: ***Receptor Evaluation***
NJ TRANSIT
Linden Station Park and Ride
101 West Elizabeth Avenue
Linden, New Jersey
SRP Program Interest Number 012948

Dear Case Assignment Personnel:

On behalf of NJ TRANSIT, Dewberry-Goodkind, Inc. (Dewberry) is submitting this Receptor Evaluation for the above referenced site in accordance with N.J.A.C. 7:26E-1.14 to 1.19. This initial Receptor Evaluation is required due to the presence of groundwater contamination associated with the historic operations by Allied Building Supply, a former owner of the property.

No receptors have been identified within the applicable search radii around the site.

If you have any questions, please do not hesitate to contact me at 973-576-9648.

Regards,

William S. S. Pendexter, Ph.D., P.G.
Senior Project Manager

SECTION A. SITE NAME AND LOCATION

Site Name: NJ TRANSIT Linden Station Park and Ride

List all AKAs: Former Allied Building Supply

Street Address: 101 West Elizabeth Avenue

Municipality: Linden (Township, Borough or City)

County: Union Zip Code: 07036

Mailing Address if different than street address: NJ TRANSIT, One Penn Plaza East, 8th Floor, Newark, NJ 07105

Program Interest (PI) Number(s): 012948 Case Tracking Number(s): 93-06-24-1425

The purpose of this form is to document the existence of receptors and the actions taken to protect receptors and is required unless an unrestricted remedial action is completed before the due date of the **Initial** Receptor Evaluation. At the time of the initial or interim Receptor Evaluation the Department acknowledges that the remedial investigation may not be fully complete. The Receptor Evaluation should be completed in accordance with requirements and timeframes in the Technical Requirements for Site Remediation and is an ongoing process as the extent of contamination is defined. The Receptor Evaluation should be submitted within the Mandatory Timeframes.

☒ Initial Submission ☐ Interim Submission
☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION B. ON SITE AND SURROUNDING PROPERTY USE

1. Identify any sensitive populations/uses that are currently on-site or surrounding property usage within 200 feet of the site boundary (check all that apply):

	On-site	Off-site
None of the following	☒	☐
Residences or residential property	☐	☒
Public or Private Schools grades K-12	☐	☐
Child care centers	☐	☐
Public parks, playgrounds or other recreation areas	☐	☐
Other sensitive population use(s) Explain _____	☐	☐

If any of the above applies, attach a list of addresses, facility names, type of use, and a map depicting each location relative to the site.

2. Current site uses (check all that apply):
☐ Industrial ☐ Residential ☐ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

3. Planned future site uses and offsite use within 200 ft of site boundary (check all that apply):
☐ Industrial ☒ Residential ☒ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

Provide a map depicting the location of the proposed changes in land use.

☒ Initial Submission ☐ Interim Submission
☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION C. DESCRIPTION OF CONTAMINATION

1. Identify if any of the following exist at the site (check all that apply):
   - ☐ Free product [N.J.A.C. 7:26E-1.8]
   - ☐ Residual product [N.J.A.C. 7:26E-1.8]
   - ☐ Other high concentration source materials not identified above (e.g., buried drums, containers, unsecured friable asbestos)

   Explain _____
2. If this evaluation is submitted with a technical document that includes this information, proceed to Section D. Otherwise attach a brief summary of all currently available data and information to be included in the site investigation or remedial investigation report.

   ☒ Initial Submission ☐ Interim Submission
   ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION D. GROUND WATER USE

1. The requirement for ground water sampling has been triggered. If "No," proceed to Section F..... ☒ Yes ☐ No
2. Ground water is contaminated above the Ground Water Remediation Standards [N.J.A.C.7:9C]..... ☒ Yes ☐ No

   Or ☐ Awaiting laboratory data with the expected due date: _____

   If "Yes," provide the date that the laboratory data were available and contamination exists above the Ground Water Remediation Standards. Date 09/17/1993

   If "No," or awaiting laboratory data proceed to Section F.
3. Identify if any of the following conditions exist based on the well search [N.J.A.C.7:26E-1.17(a)] (check all that apply):
   - ☐ Potable wells located within 1000 feet from the downgradient edge of the currently known extent of contamination.
   - ☐ Potable well located 250 feet upgradient or 500 feet side gradient of the currently known extent of contamination.
   - ☐ Ground water contamination is located within a wellhead protection area Tier 1 or Tier 2 (WHPA). Tier: Identify if **Tier 1** ☐ or **Tier 2** ☐.
4. Complete and attach the Well Search spreadsheet.
5. Potable use wells have been identified in the well search and the area has been canvassed for additional ground water use (potable and irrigation wells, etc.). NA ..... ☐ Yes ☐ No
6. Potable wells and non-potable use wells were identified and ☐ potable well and /or ☐ non-potable use well sampling has been conducted. NA ..... ☐ Yes ☐ No
7. Contamination identified above Ground Water Remediation Standards but not suspected to be from the site (if "Yes," provide justification) NA ..... ☐ Yes ☐ No
8. Potable wells were sampled and results were above State or Federal Drinking Water Standard NA ..... ☐ Yes ☐ No

   Date _____ Or ☐ Awaiting laboratory data with the expected due date _____

   If "Yes" to #8 for potable well contamination not attributable to background follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   IEC was abated ..... ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____
9. Receptors abated as part of mitigation (provide a brief narrative description) NA ..... ☐ Yes ☐ No
10. Non-potable use wells were sampled and results were above GWQS. NA

    Date _____ Or ☐ Awaiting laboratory data and the expected due date: _____

    ☒ Initial Submission ☐ Interim Submission
    ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION E. VAPOR INTRUSION (VI)

1. Contaminants present in ground water exceed vapor intrusion ground water screening levels (see NJDEP Vapor Intrusion Guidance) that trigger a VI evaluation. ..... ☐ Yes ☒ No

Or ☐ Awaiting laboratory data and the expected due date: _____

Provide the date that the laboratory data was available and confirmed contamination above the Vapor Intrusion trigger levels. _____

If "No," or awaiting laboratory data, proceed to Section F.

1. Identify and locate on scaled map any structures/sensitive populations that exist within the following distances from ground water contamination with concentrations above the Ground Water Screening Levels for Vapor Intrusion or specific threats (check all that apply):

☐ 30 feet of dissolved petroleum hydrocarbon contamination in ground water.
☐ 100 feet of any free product or any non-petroleum dissolved volatile organic ground water contamination.
☐ No structures exist within the specified distances
☐ Unsaturated zone contamination
☐ Landfills on or adjacent to site
☐ Elemental mercury
☐ Other_____
☐ Methanogenic conditions
☐ Elevated soil gas or indoor vapors
☐ Basement or sump contains contaminated ground water or product

3. A VI evaluation has been conducted of the structures to address threats identified ..... ☐ Yes ☐ No
4. The vapor intrusion pathway is not a concern at or adjacent to the site (if "yes", attach justification) ..... ☐ Yes ☐ No
5. Contamination identified but not suspected to be from the site (if "Yes," attach justification) ..... ☐ Yes ☐ No
6. Indoor air sampling was conducted and results were above the Department's proposed vapor intrusion Rapid Action Levels. ..... ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   Provide the date that the laboratory data was received and detected contamination above the proposed vapor intrusion Rapid Action Levels. _____

   If "Yes" to #6 above, required actions for contamination follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   The IEC receptor engineering system response for receptor control was implemented for all identified structures. ..... ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____

7. Indoor air sampling was conducted and results were above the Department's Indoor Air Screening Levels but at or below the proposed vapor intrusion Rapid Action Levels. ..... ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   If "Yes" to #7 above, required actions are:

   Vapor Concern Response Action Form notification of the exceedances of the data has been completed (date _____) ..... ☐ Yes ☐ No

   A plan to mitigate and monitor the exposure has been submitted (date _____) ..... ☐ Yes ☐ No

   The mitigation response action report has been submitted (date _____) ..... ☐ Yes ☐ No

8. The vapor intrusion investigation is being completed and stepping out as part of the site investigation or remedial investigation (if "No" attach justification) ..... ☐ Yes ☐ No

☒ Initial Submission ☐ Interim Submission
☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION F. ECOLOGICAL RECEPTORS

1. Identify any of the following conditions that exist based on the investigations conducted to date (check all that apply):

   The results of a baseline ecological evaluation [N.J.A.C.7:26E- 3.11] required that a remedial investigation of ecological receptors [N.J.A.C.7:26E-4.7] is conducted ..... ☐ Yes ☒ No

   Provide the name(s) of any surface water body on or within 200 feet of the site. _____

Free product or residual product is located within 100 feet from an ecological receptor..... ☐ Yes ☒ No

2. Available data indicates an impact on ecological receptor(s), surface water or sediment. ..... ☐ Yes ☒ No

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION G. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation:

Representative First Name: Martin Representative Last Name: Judd

Title: Senior Director- Environmental Services Unit

Phone Number: (973) 491-7980 Ext: Fax: (973) 461-4460

Mailing Address: One Penn Plaza East, 8th Floor

City/Town: Newark State: New Jersey Zip Code: 07105

Email Address: mjudd@njtransit.com

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Martin O Judd Date: 7/11/11

Name/Title: Martin Judd/Senior Director **No Changes Since Last Submittal** ☐

SECTION H. NON-LSRP SITE REMEDIATION PROFESSIONAL STATEMENT

First Name: Charles Last Name: Stebbins

Phone Number: (973) 576-9641 Ext: Fax: (973) 428-8509

Mailing Address: 600 Parsippany Road, Suite 301

City/Town: Parsippany State: New Jersey Zip Code: 07054

Email Address: cstebbins@dewberry.com

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

Signature: Charles L. Stebbins Date: 07/12/11

Name/Title: Charles L. Stebbins/Senior Project Manager **No Changes Since Last Submittal** ☐

Company Name: Dewberry-Goodkind, Inc.

Submit this form to the assigned case manager, municipal clerk and designate health department. If there is no assigned case manager, submit this form to:

Receptor Evaluation Narrative
New Jersey TRANSIT Linden Station And Park and Ride
Linden, Union County, New Jersey

The environmental issues at the NJ TRANSIT Linden Station and Park & Ride (Program Interest #012948), located at 101 West Elizabeth Avenue in Linden, New Jersey are related to historic operations at the Allied Building Supply site. This property was purchased by NJ TRANSIT in 1994 and is currently used as an asphalt-paved commuter parking lot for the adjacent Linden Station (Figure 1). Specifically, the former operations at the site included one 2,000-gallon gasoline underground storage tank (UST), and one 550-gallon heating oil UST, both of which were removed along with associated piping on June 24, 1993. Post remedial activities completed at the site included the excavation of gasoline-impacted soil, post-remediation sampling, and a groundwater investigation. No post removal soil samples were collected after removal of the 550-gallon fuel oil UST due to collapse of the excavation during the removal activities. Soil sampling analytical results from the heating oil UST were submitted to the New Jersey Department of Environmental Protection (NJDEP). Subsequently, additional soil was removed and post excavation sampling results were below NJDEP Soil Cleanup Criteria (SCC). The NJDEP issued a no further action (NFA) for the 2,000-gallon gasoline UST on November 16, 1998.

Groundwater investigation activities, including the installation of five groundwater monitoring wells, were performed from 1993 through 1998. Analytical results from multiple groundwater sampling events indicated elevated levels of benzene, toluene, ethylbenzene, and total xylenes (BTEX) and lead above the NJDEP Ground Water Quality Standards (GWQS). A proposal to establish a Classification Exception Area (CEA) with a remedial approach of monitored natural attenuation was approved by the NJDEP on November 16, 1998. NJDEP correspondence dated August 13, 2009 required that NJ TRANSIT submit a CEA Biennial Certification for the site.

The vapor intrusion pathway is not a concern on or adjacent to the site as the site is entirely paved with asphalt and there are no structures within 30 feet of the monitoring wells.

The site is not located within any wellhead protection area.

The only sensitive receptors identified within the 200-foot search radius are residential dwellings (Figure 2 and Table 1). No potable or non-potable wells were identified within the well search radius (Figure 3).

To Whom It May Concern:

Please find attached a copy of the above Receptor Evaluation (RE). The RE was originally submitted to the NJDEP Bureau of Case Assignment & Initial Notice on July 13, 2011. We are resubmitting the document at this time due to NJ TRANSIT's receipt of a Compliance Assistance Alert letter dated January 27, 2012.

We would appreciate it if you could confirm receipt of the RE prior to March 1, 2012.

If you have any questions, please feel free to contact me at (973) 576-9641 or (201) 315-8513.

RECEPTOR EVALUATION FORM

☒ Non-LSRP (Existing Cases) ☐ LSRP ☐ Subsurface Evaluator

Date Stamp
(For Department use only)

SECTION A. SITE NAME AND LOCATION

Site Name: NJ TRANSIT Linden Station Park and Ride

List all AKAs: Former Allied Building Supply

Street Address: 101 West Elizabeth Avenue

Municipality: Linden (Township, Borough or City)

County: Union Zip Code: 07036

Mailing Address if different than street address: NJ TRANSIT, One Penn Plaza East, 8th Floor, Newark, NJ 07105

Program Interest (PI) Number(s): 012948 Case Tracking Number(s): 93-06-24-1425

The purpose of this form is to document the existence of receptors and the actions taken to protect receptors and is required unless an unrestricted remedial action is completed before the due date of the **initial** Receptor Evaluation. At the time of the initial or interim Receptor Evaluation the Department acknowledges that the remedial investigation may not be fully complete. The Receptor Evaluation should be completed in accordance with requirements and timeframes in the Technical Requirements for Site Remediation and is an ongoing process as the extent of contamination is defined. The Receptor Evaluation should be submitted within the Mandatory Timeframes.

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION B. ON SITE AND SURROUNDING PROPERTY USE

1. Identify any sensitive populations/uses that are currently on-site or surrounding property usage within 200 feet of the site boundary (check all that apply):

	On-site	Off-site
None of the following	☒	☐
Residences or residential property	☐	☒
Public or Private Schools grades K-12	☐	☐
Child care centers	☐	☐
Public parks, playgrounds or other recreation areas	☐	☐
Other sensitive population use(s) Explain _____	☐	☐

If any of the above applies, attach a list of addresses, facility names, type of use, and a map depicting each location relative to the site.

2. Current site uses (check all that apply):

☐ Industrial ☐ Residential ☐ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

3. Planned future site uses and offsite use within 200 ft of site boundary (check all that apply):

☐ Industrial ☒ Residential ☒ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

Provide a map depicting the location of the proposed changes in land use.

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION C. DESCRIPTION OF CONTAMINATION

1. Identify if any of the following exist at the site (check all that apply):
   - ☐ Free product [N.J.A.C. 7:26E-1.8]
   - ☐ Residual product [N.J.A.C. 7:26E-1.8]
   - ☐ Other high concentration source materials not identified above (e.g., buried drums, containers, unsecured friable asbestos)

   Explain _____
2. If this evaluation is submitted with a technical document that includes this information, proceed to Section D. Otherwise attach a brief summary of all currently available data and information to be included in the site investigation or remedial investigation report.

   ☒ Initial Submission ☐ Interim Submission
   ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION D. GROUND WATER USE

1. The requirement for ground water sampling has been triggered. If "No," proceed to Section F..... ☒ Yes ☐ No
2. Ground water is contaminated above the Ground Water Remediation Standards [N.J.A.C.7:9C]..... ☒ Yes ☐ No

   Or ☐ Awaiting laboratory data with the expected due date: _____

   If "Yes," provide the date that the laboratory data were available and contamination exists above the Ground Water Remediation Standards. Date 09/17/1993

   If "No," or awaiting laboratory data proceed to Section F.
3. Identify if any of the following conditions exist based on the well search [N.J.A.C.7:26E-1.17(a)] (check all that apply):
   - ☐ Potable wells located within 1000 feet from the downgradient edge of the currently known extent of contamination.
   - ☐ Potable well located 250 feet upgradient or 500 feet side gradient of the currently known extent of contamination.
   - ☐ Ground water contamination is located within a wellhead protection area Tier 1 or Tier 2 (WHPA). Tier: Identify if **Tier 1** ☐ or **Tier 2** ☐.
4. Complete and attach the Well Search spreadsheet.
5. Potable use wells have been identified in the well search and the area has been canvassed for additional ground water use (potable and irrigation wells, etc.). NA ☐ Yes ☐ No
6. Potable wells and non-potable use wells were identified and ☐ potable well and /or ☐ non-potable use well sampling has been conducted.. NA ☐ Yes ☐ No
7. Contamination identified above Ground Water Remediation Standards but not suspected to be from the site (if "Yes," provide justification)..... NA ☐ Yes ☐ No
8. Potable wells were sampled and results were above State or Federal Drinking Water Standard NA ☐ Yes ☐ No

   Date _____ Or ☐ Awaiting laboratory data with the expected due date _____

   If "Yes" to #8 for potable well contamination not attributable to background follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   IEC was abated ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____
9. Receptors abated as part of mitigation (provide a brief narrative description)..... NA ☐ Yes ☐ No
10. Non-potable use wells were sampled and results were above GWQS. NA

    Date _____ Or ☐ Awaiting laboratory data and the expected due date: _____

    ☒ Initial Submission ☐ Interim Submission
    ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION E. VAPOR INTRUSION (VI)

1. Contaminants present in ground water exceed vapor intrusion ground water screening levels (see NJDEP Vapor Intrusion Guidance) that trigger a VI evaluation. ..... ☐ Yes ☒ No

Or ☐ Awaiting laboratory data and the expected due date: _____

Provide the date that the laboratory data was available and confirmed contamination above the Vapor Intrusion trigger levels. _____

If "No," or awaiting laboratory data, proceed to Section F.

1. Identify and locate on scaled map any structures/sensitive populations that exist within the following distances from ground water contamination with concentrations above the Ground Water Screening Levels for Vapor Intrusion or specific threats (check all that apply):

☐ 30 feet of dissolved petroleum hydrocarbon contamination in ground water.
☐ 100 feet of any free product or any non-petroleum dissolved volatile organic ground water contamination.
☐ No structures exist within the specified distances
☐ Unsaturated zone contamination
☐ Landfills on or adjacent to site
☐ Elemental mercury
☐ Other_____
☐ Methanogenic conditions
☐ Elevated soil gas or indoor vapors
☐ Basement or sump contains contaminated ground water or product

3. A VI evaluation has been conducted of the structures to address threats identified . ☐ Yes ☐ No
4. The vapor intrusion pathway is not a concern at or adjacent to the site (if "yes", attach justification) ☐ Yes ☐ No
5. Contamination identified but not suspected to be from the site (if "Yes," attach justification) ☐ Yes ☐ No
6. Indoor air sampling was conducted and results were above the Department's proposed vapor intrusion Rapid Action Levels. ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   Provide the date that the laboratory data was received and detected contamination above the proposed vapor intrusion Rapid Action Levels. _____

   If "Yes" to #6 above, required actions for contamination follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   The IEC receptor engineering system response for receptor control was implemented for all identified structures. ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____

7. Indoor air sampling was conducted and results were above the Department's Indoor Air Screening Levels but at or below the proposed vapor intrusion Rapid Action Levels. ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   If "Yes" to #7 above, required actions are:

   Vapor Concern Response Action Form notification of the exceedances of the data has been completed (date _____) ☐ Yes ☐ No

   A plan to mitigate and monitor the exposure has been submitted (date _____) ☐ Yes ☐ No

   The mitigation response action report has been submitted (date _____) ☐ Yes ☐ No

8. The vapor intrusion investigation is being completed and stepping out as part of the site investigation or remedial investigation (if "No" attach justification) ☐ Yes ☐ No

☒ Initial Submission ☐ Interim Submission
☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION F. ECOLOGICAL RECEPTORS

1. Identify any of the following conditions that exist based on the investigations conducted to date (check all that apply):

   The results of a baseline ecological evaluation [N.J.A.C.7:26E- 3.11] required that a remedial investigation of ecological receptors [N.J.A.C.7:26E-4.7] is conducted ☐ Yes ☒ No

   Provide the name(s) of any surface water body on or within 200 feet of the site. _____

Free product or residual product is located within 100 feet from an ecological receptor..... ☐ Yes ☒ No

2. Available data indicates an impact on ecological receptor(s), surface water or sediment. ..... ☐ Yes ☒ No

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION G. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation:

Representative First Name: Martin Representative Last Name: Judd

Title: Senior Director- Environmental Services Unit

Phone Number: (973) 491-7980 Ext: Fax: (973) 461-4460

Mailing Address: One Penn Plaza East, 8th Floor

City/Town: Newark State: New Jersey Zip Code: 07105

Email Address: mjudd@njtransit.com

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Receptor Evaluation Narrative
New Jersey TRANSIT Linden Station And Park and Ride
Linden, Union County, New Jersey

The environmental issues at the NJ TRANSIT Linden Station and Park & Ride (Program Interest #012948), located at 101 West Elizabeth Avenue in Linden, New Jersey are related to historic operations at the Allied Building Supply site. This property was purchased by NJ TRANSIT in 1994 and is currently used as an asphalt-paved commuter parking lot for the adjacent Linden Station (Figure 1). Specifically, the former operations at the site included one 2,000-gallon gasoline underground storage tank (UST), and one 550-gallon heating oil UST, both of which were removed along with associated piping on June 24, 1993. Post remedial activities completed at the site included the excavation of gasoline-impacted soil, post-remediation sampling, and a groundwater investigation. No post removal soil samples were collected after removal of the 550-gallon fuel oil UST due to collapse of the excavation during the removal activities. Soil sampling analytical results from the heating oil UST were submitted to the New Jersey Department of Environmental Protection (NJDEP). Subsequently, additional soil was removed and post excavation sampling results were below NJDEP Soil Cleanup Criteria (SCC). The NJDEP issued a no further action (NFA) for the 2,000-gallon gasoline UST on November 16, 1998.

Groundwater investigation activities, including the installation of five groundwater monitoring wells, were performed from 1993 through 1998. Analytical results from multiple groundwater sampling events indicated elevated levels of benzene, toluene, ethylbenzene, and total xylenes (BTEX) and lead above the NJDEP Ground Water Quality Standards (GWQS). A proposal to establish a Classification Exception Area (CEA) with a remedial approach of monitored natural attenuation was approved by the NJDEP on November 16, 1998. NJDEP correspondence dated August 13, 2009 required that NJ TRANSIT submit a CEA Biennial Certification for the site.

The vapor intrusion pathway is not a concern on or adjacent to the site as the site is entirely paved with asphalt and there are no structures within 30 feet of the monitoring wells.

The site is not located within any wellhead protection area.

The only sensitive receptors identified within the 200-foot search radius are residential dwellings (Figure 2 and Table 1). No potable or non-potable wells were identified within the well search radius (Figure 3).

TABLE 1

Trenton, NJ 08625

RE: ***Receptor Evaluation***
NJ TRANSIT
Linden Station Park and Ride
101 West Elizabeth Avenue
Linden, New Jersey
SRP Program Interest Number 012948

Dear Case Assignment Personnel:

On behalf of NJ TRANSIT, Dewberry-Goodkind, Inc. (Dewberry) is submitting this Receptor Evaluation for the above referenced site in accordance with N.J.A.C. 7:26E-1.14 to 1.19. This initial Receptor Evaluation is required due to the presence of groundwater contamination associated with the historic operations by Allied Building Supply, a former owner of the property.

No receptors have been identified within the applicable search radii around the site.

If you have any questions, please do not hesitate to contact me at 973-576-9648.

Regards,

William S. S. Pendexter, Ph.D., P.G.

Compliance Assistance Alert

Subject: Allied Building Supplies
101 Elizabeth Ave
Linden,
PI # : 012948
Activity # : PFR000001

Dear Mr. Martin Judd :

The New Jersey Department of Environmental Protection (Department) is sending this "Compliance Assistance Alert" to advise you that our data management system, which tracks the progress of the remediation of the contamination at the subject location, indicates you have not submitted the following document(s):

* An Initial Receptor Evaluation pursuant to N.J.A.C. 7:26E-1.15.

This Compliance Assistance Alert is intended to advise you of the fact that the mandatory remediation timeframe for submission as established in N.J.A.C. 7:26C-3.3 is March 1, 2012. The opportunity to request an extension to a March 1, 2012 mandatory timeframe has passed, therefore the item(s) listed above must be submitted by March 1, 2012, or the Department intends to use all available enforcement tools to compel compliance, including the assessment of penalties of up to $20,000 per day for each violation and, for regulated underground storage tank systems, the revocation of tank registration certificates required to dispense product. The Department also intends to enforce the "direct oversight" requirements related to missed mandatory remediation timeframes authorized by the Site Remediation Reform Act (SRRA; N.J.S.A. 58:10C-27), including the requirements to establish a remediation trust fund and implement a Department-selected remedial action. Please note that if you fail to submit the required document(s) by March 1, 2012, you must hire a licensed site remediation professional (LSRP) immediately thereafter, if one has not already been retained.

Please note that if you make the required submission and your case existed prior to November 4, 2009, an LSRP still must by hired by May 7, 2012. If this matter is the result of an event that triggered remediation on or after November 4, 2009, you were required to retain an LSRP 45 days after the triggering event.

This letter is sent as a courtesy to encourage your prompt attention to this matter before the Department has no other alternative under the law but to pursue the statutorily mandated direct oversight requirements noted above. Please be advised that this "Compliance Alert" is not an Administrative Order issued pursuant N.J.S.A. 52:14B-1 et seq. Should you need information regarding the SRRA or the March 1, 2012 mandatory timeframe, please visit www.nj.gov/dep/srp/ or contact the on duty Site Remediation Program Compliance Manager at (609) 633-1480, or contact an LSRP. A list of current temporary LSRPs can be found at http://www.nj.gov/dep/srp/srra/lsrp/temporary_lsrp_list.htm.

Sincerely,

Kevin F. Kratina, Acting Assistant Director
Assignment and Enforcement Element

CASE SUMMARY

ALLIED BUILDING SUPPLY
101 ELIZABETH AVENUE
LINDEN CITY, UNION COUNTY

PI# 012948
CASE # 93-06-24-1425

A review of the file indicates that there were two USTs on site: a 2000 gallon gasoline UST, and a 550 gallon #2 fuel oil UST. The gasoline UST is being handled under BUST. The #2 fuel oil UST was sampled and a MW was installed, however, it is not regulated and the work was not done under a MOA. Therefore, there has been no determination by DEP if all environmental concerns associated with the #2 fuel oil UST have been addressed.

The site is currently owned by NJ Transit (as of December 1993) and is a paved parking lot for commuters.

At one time, Allied Building Supply and possible Selrite Millwork operated at the Site. However, at this time, it does not appear that Allied Building Supply or Selrite Millwork conducted manufacturing operations on site. It appears that operations were limited to retail sale of building materials.

CONCLUSION: As per Bob, this case is not a priority at this time. Don't close out…but it can go on the bottom of the list.

5/30/12: Will be handled under active PFR000001 case – post NFA monitoring

Subject: Pl# 012948 Allied Building Supply

Don,

I recently got assigned this case to look into the AA issue involving the 550 gallon fuel oil tank.

Do you know if this tank ever get addressed ?

Do site conditions indicate that contamination from this tank may still be an issue ?

Any info you can provide will be helpful. Thanks.

Bradi

Hi Lynne,

I'm guessing you're busy as hell packing everything...but are you handling a 500 gallon HO tank as part of this site. It's on my AA case list.

Bradi

Dontakas is cm. Lynne only handled CEA issue.

Mr. Motter observed five (5) drums labelled: MW-1 soil 8/29/93; MW-1 Development Water 8/30/93; MW-1 Soil 8/29/93; MW-1 Soil 8/29/93; and SB-2 Soil 8/29/93 located on the concrete pad. These drums were filled with material. Five (5) empty or partially rubble filled drums were also observed scattered throughout the site.

Based upon the observations during the site investigation, the following deficiencies shall be addressed as required below. The results of the additional remedial investigations required shall be submitted as part of a Remedial Action Workplan (RAW), previously required by the Department's August 12, 1994 letter to Allied Building Supplies' representatives and due January 31, 1995.

Remedial Investigation

A. **Monitoring Well MW-1**

Allied Building Supplies shall either locate and restore monitoring well MW-1 or locate and properly abandon monitoring well MW-1 and re-install a replacement monitoring well MW-1A within ten feet (10') of the former MW-1 location. Allied Building Supplies shall submit boring logs and the monitoring well construction details (Well Certification Forms A and B, enclosed) for all newly installed monitoring wells. Allied Building Supplies shall submit a Well Abandonment Form for all abandoned monitoring wells.

B. **Waste Disposal**

Pursuant to N.J.A.C. 7:26-8.5, Allied Building Supplies shall determine if the drummed wastes are hazardous wastes. Allied Building Supplies shall provide any sample results and the rationale used for the categorization of all wastes generated by this investigation and/or cleanup to assure proper handling and disposal. Please be advised that improper waste treatment, storage or disposal of hazardous wastes is a violation of State and Federal Hazardous Waste Regulations. As a reminder, all non-hazardous waste must be removed from the site to an approved facility within six months after generation. Allied Building Supplies shall remove all hazardous waste to an approved facility within 90 days after generation. Interim storage of hazardous waste shall be in accordance with N.J.A.C. 7:26-9. The storage of hazardous waste in piles is strictly prohibited. Please be advised that all soils reuse plans must be prepared in accordance with the "Management of Excavated Soils" guidance document and shall receive prior approval from the Department before their implementation.

C. **Heating Oil Tank and MW-3**

Oversite of the 550-gallon fuel oil tank which was abandoned in place is being transferred to the Bureau of Field Operations, Case Assignment Section for reassignment. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Mark Pederson
401 E. State Street, 4th Floor
CN 028
Trenton, NJ 08625

oils area

Enclosed find a Memorandum of Agreement (MOA) package which will allow Allied Building Supplies to address this area of concern under an MOA managed by the Bureau of Field Operations. It should be noted that the monitoring well installed to monitor the abandoned tank is located over twenty-five feet from the abandoned tank in a side gradient direction.

Certification

Certifier: John Robinson
Certifier ID: 61086
Challenge/Response Question: What is your mother's maiden name?
Challenge/Response Answer: ******
Certification PIN: ******
Date/Time of Certification: 04/12/2022 15:15

(1) I certify, as a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C-1 et seq. to conduct business in New Jersey, that for the remediation described in this submission, and all attachments included in this submission, I personally: Managed, supervised, or performed the remediation conducted at this site that is described in this submission, and all attachments included in this submission; and/or periodically reviewed and evaluated the work performed by other persons that forms the basis for the information in this submission; and/or completed the work of another site remediation professional, licensed or not, after having: (1) reviewed all available documentation on which I relied; (2) conducted a site visit and observed the then-current conditions and verified the status of as much of the work as was reasonably observable; and (3) concluded, in the exercise of my independent professional judgment, that there was sufficient information upon which to complete any additional phase of remediation and prepare workplans and reports related thereto;

(2) I certify:

- That I have read this submission and all attachments to this submission;
- That in performing the professional services as the licensed site remediation professional for the entire site or each area of concern, I adhered to the professional conduct standards and requirements governing licensed site remediation professionals provided in N.J.S.A. 58:10C-16;
- That the remediation conducted at the entire site or each area of concern, that is described in this submission and all attachments to this submission, was conducted pursuant to and in compliance with the remediation requirements in N.J.S.A. 58:10C-14.c;
- That the remediation described in this submission, and all attachments to this submission, was conducted pursuant to and in compliance with the regulations of the Site Remediation Professional Licensing Board at N.J.A.C. 7:26I; and
- That the information contained in this submission and all attachments to this submission is true, accurate, and complete.

(3) I certify, when this submission includes a response action outcome, that the entire site or each area of concern has been remediated in compliance with all applicable statutes, rules, and regulations and is protective of public health and safety and the environment.

(4) I certify that no other person is authorized or able to use any password, encryption method, or electronic signature that the Board or the Department have provided to me.

(5) I certify that I understand and acknowledge that:

- If I knowingly make a false statement, representation, or certification in any document or information I submit to the Department I may be subject to civil and administrative enforcement pursuant to N.J.S.A. 58:10C-17.a.1(a) through (f) by the Board, including but not limited to license suspension, revocation, or denial of renewal; and
- If I purposely, knowingly, or recklessly make a false statement, representation, or certification in any application, form, record, document or other information submitted to the Department or required to be maintained pursuant to the Site Remediation Reform Act, I shall be guilty, upon conviction, of a crime of the third degree and shall, notwithstanding the provisions of subsection b. of N.J.S.2C:43-3, be subject to a fine of not less than $5,000 nor more than $75,000 per day of violation, or by imprisonment, or both.

(6) I certify that I have read this certification prior to signing, certifying, and making this submission.

RE: Retention

101 ELIZABETH AVE
Linden City, Union County

SRP-PI:	012948
Activity Number Reference:	RET220001
Hired To Address:	Specific Known Contaminated AOC(s)

Dear Henry Matri:

This letter serves to advise you that an LSRP Notification of Retention Form has been received by the New Jersey Department of Environmental Protection (NJDEP) at\or for the case(s) noted above. The NJDEP confirms that John Q Robinson Jr was retained on April 12, 2022.

On May 7, 2009, the Site Remediation Reform Act (SRRA) was enacted. SRRA establishes criteria for the licensing of site remediation professionals who will assure that contaminated sites are remediated in accordance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E. SRRA authorizes the NJDEP to establish mandatory timeframes for the completion of each phase of remediation. These timeframes, as well as other requirements of the Act, have been codified in regulations that became effective on November 4, 2009. The complete rule can be found at www.state.nj.us/dep/srp/regs/arrcs/arrcs_rule.pdf. N.J.A.C. 7:26C-2.4 identifies the requirements with which you must comply.

Per NJDEP's records, the following case types have been identified for this case:

Case#	*Case Type*
PFR000001	Regulated UST

**Note: For some Retentions, Remedial Action Permits, some Childcare facilities and for some computer tracking system issues there will be no Case Types.

Please note that the case that was chosen at Allied Building Supplies is for monitoring a restricted or limited restricted NFA. Please be aware that N.J.A.C. 7:26C-7.6 (a) states:

The person responsible for conducting the remediation shall apply for a remedial action permit pursuant to N.J.A.C. 7:26C-7.4 within two years after the last biennial certification was due to the Department, but in no case later than May 7, 2014, when both of the following apply:

1. The Department has not yet issued a remedial action permit for a remedial action; and
2. The Department has issued a restricted or limited restricted use no further action letter.

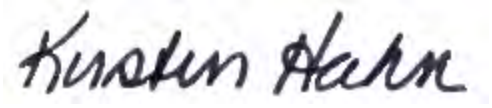
Remedial Action Permit applications can be found at:
http://www.nj.gov/dep/srp/srra/forms/rem_action_permit_app_soil.pdf,
http://www.nj.gov/dep/srp/srra/forms/rem_action_prot_cert_gw.pdf

If you have any questions regarding this retention please contact the Bureau of Remedial Action Permitting at (609) 984-1351

Our records have indicated that you have modified the Responsible Party for this retention. You must submit a Site and Contact Information Update form which can be found at http://www.nj.gov/dep/srp/srra/forms/ to have the Responsible Party verify this modification.

The contact information provided above is based on information previously provided to the NJDEP. If you have questions on any of the above contact information, you can contact the Compliance Assistance Duty Officer at (609) 633-1464.

Sincerely,



Kirstin Hahn, Bureau Chief
Bureau of Case Assignment & Initial Notice

This report retrieves all approved/accepted well documents received by the NJDEP that have been electronically data managed. Cancelled permits where no well was drilled are not displayed. Each row displays information for a permit, record, or decommissioning.

Location Methods
The Location Method column explains how the location of the well was determined. The most common methods are:
Digital Image - This method is only acceptable for well permits or decommissionings. Locations should be within approximately 200 feet of the actual well location.
GPS - Global Positioning System. These locations should be accurate.
Prop Loc - Hard Copy - Located by the well driller using the atlas grid system. These locations specify a point in an atlas grid cell. The well could be located anywhere within that cell.
Survey frm Benchmark - Locations collected by a licensed surveyor. Locations should be accurate.

NOTES:
This is NOT a Well Registry Report but a report on Well Permits issued by the Department and reflects the data provided in the well permit, record, and decommissioning at the time of document submission and may not reflect the current information on lot and block, address or construction or ownership of the wells.

Please refer to information available at http://www.state.nj.us/dep/watersupply/pw_permit.html for more information regarding detailed well searches if this report does not provide the information you need.

Well Permit numbers. After Sept 2008 the format of the well permit number was changed to accommodate the submission of online well permitting applications. The letter P (denotes a paper application) and E (denotes an electronic application) followed by the year and a consecutive number. Prior to September 2008 the permit numbers were based in the NJ Atlas Grid system.

Dates displayed indicate the permit approval date for permits, drilling end date for records, or sealed date for decommissionings

Proposed capacity and depth is displayed for permit rows and finished capacity and depth is displayed for record and decommissioning rows.

Please note that if REDACTED appears in the report it means that the information is not available over the internet, but can be provided upon written request to the Bureau of Water Systems and Well

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J.S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office? * ☐ YES ☐ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modification(s)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

* TANKS WERE REMOVED IN ACCORDANCE WITH AN UNDERGROUND STORAGE TANK Closure PLAN DATED MAY 1993

X Other (please specify) Tanks Removed, Property Sold

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

MA

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations? ☐ YES ☐ NO
   If Yes, does the secondary containment system comply with all provisions of these regulations? ☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)? ☐ YES ☐ NO
   If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☐ NO
   If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
   If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☐ NO

N/A

SECTION C **RECORDKEEPING/COMPLIANCE**

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☐ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☐ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☐ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☐ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☐ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☐ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☐ NO

N/A

SECTION D **FINANCIAL RESPONSIBILITY**

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

_____ Type

_____ Carrier/Issuing agency

___/___/___ Date Effective

_____ Policy Number

$_____ Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment."

x _____ (Signature)

*** ANNUAL CERTIFICATION ***
UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Applicability and Compliance
Registration and Billing Section

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO.
2. Facility Location: 1011 WEST ELIZABETH AVE. (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   BLOCK 2254 LOT 10
3. Owner's mailing address: P.O. BOX 13817 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07083 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): DANIEL WINTERS (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1515 (NUMBER)
7. Total number of facility underground storage tanks: 0 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): ☐☐☐☐☐☐
9. Status of owner: (mark one) A. ☐ CURRENT B. ☒ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☐ YES B. ☐ NO N/A

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☐ YES ☐ NO N/A

(Type) _____ (Company/Carrier) _____

(Policy Number) _____ (Expiration Date) _____

UST NO. 0129486

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federallly regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?
☐ YES ☒ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modification(s)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

_____ Other (please specify)

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?
☐ YES ☒ NO
If Yes, does the secondary containment system comply with all provisions of these regulations?
☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?
☐ YES ☒ NO
If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☒ NO
If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☒ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4,5(h)? ☐ YES ☑ NO

SECTION D

   BLOCK 0215 LOT 001.10
3. Owner's mailing address: P.O. BOX 3187 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 070183187 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): AL FIORE (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1555 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 0002000
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☒ YES ☐ NO

LIABILITY (Type)	Royal INS. (Company/Carrier)
N-SP-21406V-000 (Policy Number)	9/1/98 (Expiration Date)

UST NO. 0129486

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

JUN 0 1 1988

Bureau of Ground Water Quality Management
Underground Storage Tank Section
(609)984-9736

COMPLIANCE WITH THIS REGISTRATION WILL MEET ALL REGISTRATION REQUIREMENTS OF THE FEDERAL LAW, P.L. 93-616, THE HAZARDOUS AND SOLID WASTE AMENDMENTS OF 1984, SUBTITLE I, SECTIONS 9001-9010.

General Facility Information

1. Facility name: ALLIED BUILDING SUPPLY CO
2. Facility location: 1011 WEST ELIZABETH AVENUE
   NUMBER AND STREET
   LINDEN
   CITY OR MUNICIPALITY
   UNION COUNTY | NJ STATE | 07036 ZIP CODE
3. Owner's mailing address: 681 RAHWAY AVENUE
   NUMBER AND STREET
   UNION
   CITY OR MUNICIPALITY
   UNION COUNTY | NJ STATE | 07083 ZIP CODE
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator) JOHN SAUER
   PERSON OR TITLE
6. Contact telephone number: 201 AREA CODE | 862 EXCHANGE | 4010 NUMBER
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 33 for each tank)
8. Total facility underground storage tank capacity (gallons): 00002000
9. Type and status of owner (mark all that apply).
   A. ☒ CURRENT B. ☐ FORMER C. ☐ STATE OR LOCAL GOVERNMENT D. ☐ PRIVATE OR CORPORATE E. ☐ OWNERSHIP UNCERTAIN F. ☐ FEDERAL GOVT. (GSA FACILITY I.D. NUMBER)
10. Two copies of a site plan are submitted with this registration. A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are operating or existing, (E); abandoned, (A); or closed, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. 12948

11. All underground tanks used after January 1, 1974 including those taken out of operation, **(UNLESS THE TANK WAS REMOVED FROM THE GROUND)** must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Abandoned, A; or Closed C.

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO
2. Facility Location: 1011 WEST EIGHTEENTH AVE. (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   BLOCK 0054 LOT 0010
3. Owner's mailing address: P.O. BOX 13817 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07083-3817 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): AL FIORE (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 1555 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 000200
9. Status of owner: (mark one) A. ☒ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☒ YES ☐ NO

Liability (Type)
N-SP-214064-000 (Policy Number)
Royal INS. (Company/Carrier)
9/4/92 (Expiration Date)

UST NO. 0129486

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and the Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE: The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payble to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing.

PENALTY: Failure by onwer or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J..S.A. 58:10A-10.

EMERGENCY: If a discharge or spill occurs, the NJDEPE Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

UPGRADE EXEMPTION: Residential heating oil underground storage tanks are exempt from all upgrade requirements.

DATES TO KNOW (critical deadlines)

December 22, 1989 - All federally regulated tank systems installed before 1965 (or of unknown age) must have installed leak detection.
December 22, 1990 - All federally regulated tank systems installed between 1965-1969 must have installed leak detection.
December 22, 1991 - All federally regulated tank systems installed between 1969-1974 must have installed leak detection.
December 22, 1992 - All federally regulated tank systems installed between 1974-1979 must have installed leak detection.
December 22, 1993 - All regulated tanks must install cathodic protection, monitoring systems and, spill/overfill protection (non-residential heating oil tanks exluded).
August 6, 1994 - All non-residential heating oil tanks installed prior to August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
August 6, 1995 - All non-residential heating oil tanks installed on or after August 6, 1974 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 - All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office?
☐ YES ☒ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
_____ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modification(s)
_____ Other (please specify)

PLEASE USE REGISTRATION FORM WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations?
☐ YES ☒ NO
If Yes, does the secondary containment system comply with all provisions of these regulations?
☐ YES ☐ NO

2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)?
☐ YES ☒ NO
If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).

3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☒ NO
If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☒ NO

Tier 2.10

SECTION C **RECORDKEEPING/COMPLIANCE**

Please answer all the questions in this Section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have cathodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6? ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D **FINANCIAL RESPONSIBILITY**

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

Royal Insurance / Brownell, Kretson, Waldron & Lee Agency — Carrier/Issuing agency

9, 4, 91 — Date Effective

N-SP-2 14064-000 — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows
: For corporations, by the vice president or higher
: For sole proprietorships, by the proprietor
: For partnerships, by the general partner
: For government or public agency, by the principal executive officer or ranking official

NOTE: IF THE PERSON SIGNING CERTIFICATION No. 2 IS THE SAME AS THE PERSON SIGNING CERTIFICATION No. 1, THEN CERTIFICATION No. 1 ONLY NEEDS TO BE SIGNED. (If different persons are required to sign No. 1 and No. 2, then they must do so.)

No. 1

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, incaccurate or incomplete information, including fines and/or imprisonment."

Annual Certification Questionnaire

Compliance with this Annual Certification will meet all requirements of State Law P.L. 1986, c. 102, The Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21) and The Underground Storage Tank Regulations (N.J.A.C. 7:14B-1 through 15).

IMPORTANT INFORMATION

FEE	The Fee Schedule is printed on the reverse side of the billing invoice. Please make your payment instrument payable to: "Treasurer", State of New Jersey. Use of the enclosed return envelope will expedite processing of your certification.
PENALTY	Failure by owner or operator of a regulated underground storage tank to comply with any requirement of the State UST Act of regulations may result in the penalties set forth in N.J.S.A. 58:10A-10.
EMERGENCY	If a discharge or spill occurs, the NJDEP Hotline at (609) 292-7172 must be called IMMEDIATELY - 24 hours a day.

DATES TO KNOW (critical deadlines)

December 22, 1989 -	All tank systems installed before 1965 (or of unknown age) must have installed leak detection (federally regulated tanks only).
December 22, 1990 -	All tank systems installed between 1965-1969 must have leak detection (federally regulated tanks only).
December 22, 1990 -	All pressure piping must have line leak detection and have done a precision test if tank system lacks a monitoring system (federally regulated tanks only).
September 3, 1991 -	All regulated tanks must install cathodic protection, monitoring systems, and spill/overfill protection (except residential heating oil).
December 22, 1993 -	All agricultural tanks installed before September 3, 1986 must install cathodic protection, monitoring systems, and spill/overfill protection.
December 22, 1998 -	All regulated hazardous waste substance systems must have secondary containment (petroleum products and waste oil tank systems excluded).

SECTION A — REGISTRATION & BILLING

Have there been any changes to this facility's registration status during the last twelve months that have not been reported to this office? ☑ YES ☐ NO

If YES, please check the appropriate type of change(s) below and complete the enclosed REGISTRATION QUESTIONNAIRE (black bar on face of the form) with NEW information ONLY. Then, complete the remainder of this form and submit to this office.

_____ Company Name and Address
_____ Facility Location
_____ Operator
✓ Contact Person
_____ Type of Product(s) Stored
_____ Spills, accidents, leaks or releases
_____ Substantial Modification(s)

PLEASE USE REGISTRATION FORM — WITH BLACK BAR AT THE TOP FOR REPORTING THIS INFORMATION

✓ Other (please specify)
Owners Address

If NO, please complete the remainder of this form and return to this office.

SECTION B — MONITORING SYSTEMS

1. Does this facility have a secondary containment system which was installed before the effective date of the UST Technical regulations? ☐ YES ☑ NO
   If Yes, does the secondary containment system comply with all provisions of these regulations? ☐ YES ☐ NO
2. Does this facility have a monitoring system which is in compliance with N.J.A.C. 7:14B-4.5(e) (for systems installed prior to the effective date of these regulations) or N.J.A.C. 7:14B-6 (for systems installed after the effective date of these regulations)? ☐ YES ☑ NO
   If No, please be aware that the facility must meet the appropriate deadline. (See Dates to Know at top of this page).
3. Does this facility have an UST system installed prior to 1965 or of unknown age? ☐ YES ☑ NO
   If Yes, has the facility installed a leak detection system that complies with all provisions of the Federal UST Technical Regulations 40 CFR 280.40? ☐ YES ☐ NO
   If No, were the closure procedures completed as required by the Federal UST Technical Regulations 40 CFR 280.71, 72? ☐ YES ☑ NO

SECTION C

RECORDKEEPING/COMPLIANCE

Please answer all the questions in this Section on a facility basis. ~~y~~ one tank not in compliance requires a "NO" answer for the entire facility.

1. Does this facility have catbodic protection systems? ☐ YES ☑ NO
   If Yes, are the systems properly operated and maintained as required by the UST Technical Regulations Subchapter 6. ☐ YES ☐ NO
2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator as required by Subchapter 6.6? ☐ YES ☑ NO
3. Are the proper monitoring, testing, sampling, repair and inventory records kept on-site as required by Subchapter 6.6? ☐ YES ☑ NO
4. Is the proper Release Response Plan kept on-site per Subchapter 5.5? ☐ YES ☑ NO
5. Does the facility have spill and overfill protection systems per Subchapter 5.2(a) (5)? ☐ YES ☑ NO
   If yes, are they properly operated and maintained as required by the UST Technical Regulations? ☐ YES ☑ NO
6. Have all Fill Ports been permanently marked as per API #1637 as stated in Subchapter 4.5(h)? ☐ YES ☑ NO

SECTION D

FINANCIAL RESPONSIBILITY

All facilities are required to obtain financial responsibility assurance by the deadlines listed in Subchapter 14. Please list the appropriate financial information below:

Liability — Type

CIGNA — Carrier/Issuing agency

1/1/91 — Date Effective

MFSC-1985516B — Policy Number

$ _____ — Amount

CERTIFICATIONS

Who must sign?

CERTIFICATION NO. 1:

Must be signed by the highest ranking individual at the facility with overall responsibility

CERTIFICATION NO. 2:

Must be signed as follows

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Underground Storage Tanks
Registration Section
1-800-722-TANK

Use this form ONLY when submitting corrections/changes to registration at Annual Certification

General Facility Information

1. Facility Name: ALLIED BUILDING SUPPLY CO
2. Facility Location: 1011 WEST LINDEN AVE. (NUMBER AND STREET)
   LINDEN (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07036 (ZIP CODE)
   BLOCK 00257 LOT 00110
3. Owner's mailing address: P.O. BOX 3187 (NUMBER AND STREET)
   UNION (CITY OR MUNICIPALITY)
   UNION (COUNTY) NJ (STATE) 07083-1087 (ZIP CODE)
4. Owner's name: DANIEL WINTERS
5. Contact person (Facility Operator): ALL FLOORS (PERSON OR TITLE)
6. Contact telephone number: 908 (AREA CODE) 964 (CHANGE) 4555 (NUMBER)
7. Total number of facility underground storage tanks: 0001 (Complete Questions 12 thru 32 for each tank)
8. Total facility underground storage tank capacity (gallons): 00020000
9. Status of owner: (mark one) A. ☐ CURRENT B. ☐ FORMER
10. Type of owner (mark one) A. ☐ State B. ☒ Commercial C. ☐ Local D. ☐ Federal E. ☐ Charitable or Public School F. ☐ Residence G. ☐ Ownership Uncertain
11a. Two copies of a site plan are submitted with this registration A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER, an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary. Include all tanks that are: E (existing/in use), P (empty), M (emergency), A (abandoned), C (other). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

11b. Do you have financial responsibility assurance? ☑ YES ☐ NO

Liability (Type)
CIGNA (Company/Carrier)
MFCD 1985168 (Policy Number)
1/1/92 (Expiration Date)

UST NO. _____

ALL underground tanks, including those taken out of operation (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this registration. All in-ground tanks shall be reported as underground tanks on this questionnaire regardless of their current status; Existing, E; Empty, P; Emergency, M; Abandoned, A; or Other, C.

ANNUAL CERTIFICATION
QUESTIONNAIRE

SECTION A:

Have there been any changes in this facility's registration status during the past twelve months that have not already been reported to the Bureau of Underground Storage Tanks on a Standard Reporting Form?

☒ NO ☐ YES

If NO, please complete Sections B, D, E and return this form with the top half of the billing invoice and the appropriate fee.

If YES, please check the appropriate type of change (s) below that occurred and complete the enclosed Registration Questionnaire with the NEW information ONLY and sign the questionnaire and return it along with the top half of the billing invoice, this form and the appropriate fee.

____ Company Name and Address (ownership change)

____ Facility location

____ Operator(s)

____ Contact Person(s)

____ Type of product(s) stored

____ Spills, accidents or leaks

____ Other (explain)

(OVER)

SECTION B:

Are inventory records maintained on-site?

☐ NO ☒ YES

Have any unaccountable losses been discovered at your facility?

☒ NO ☐ YES

NOTE It is required that all leaks be reported to the NJDEP within 24 hours of discovery by contacting the NJDEP Hotline telephone number (609) 292-7172.

SECTION C:

Failure by owner or operator of an underground storage tank to comply with any requirement of the State Act or this chapter may result in the penalties set forth in N.J.S.A. 58:10A-10.

SECTION D:

CERTIFICATION

*** This registration form shall be signed by the highest ranking individual at the facility with overall responsibility for that facility. (7:14B-2.3 (a) 1). ***

"I certify under penalty of law that the information provided in this document is true, accurate and complete. I am aware that there are significant civil and criminal penalties for submitting false, inaccurate or incomplete information, including fines and/or imprisonment.

11. Two copies of a site plan are submitted with this registration. A. ☒ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility or property boundary, buildings and the location of ALL underground storage tanks. EITHER an existing engineering site plan, if available, OR a neat and legible hand-drawn sketch of the site may be submitted. In either case the site plan or sketch MUST show the location and distances that tanks, buildings, and dispensers are from the facility's property boundary (include all tanks that are operating or existing, #1 abandoned, (A); or out of service, (C). Each underground tank on the site plan or sketch shall be numbered in accordance with the instructions for question 12. The number assigned to a tank on the site plan or sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

UST NO. _____

All underground tanks, including those taken out of operation, (UNLESS THE TANK WAS REMOVED FROM THE GROUND) must be included in this exploration. All in-ground tanks must be reported as underground tanks on this questionnaire regardless of their current status: Existing, E; Abandoned, A; or out of service, O.

UNDERGROUND STORAGE TANK REGISTRATION QUESTIONNAIRE

Bureau of Underground Storage Tanks
Registration Section
1-800-722-TANK

COMPLIANCE WITH THIS REGISTRATION WILL MEET ALL REQUIREMENTS OF STATE LAW, P.L. 1986, c. 102 THE UNDERGROUND STORAGE OF HAZARDOUS SUBSTANCES ACT N.J.S.A. 58:10A-21 et seq.

Owner/Facility Information

1. Facility name: Allied Quick Stop #1 Co
2. Facility location: 101 West Pt Pleasant Ave
   Lakewood
   Ocean NJ 08701
3. Owner's mailing address: 251 Mercury Avenue
   Union
   Union NJ 07083
4. Owner's name: Diana Williams
5. Contact person at facility (Operator): Diana Williams
6. Contact telephone number: 201 364 4123
7. Total number of facility underground storage tanks: 002 (Complete Questions 12 thru 19 for each tank)
8. Total facility underground storage tank capacity (gallons): 00002
9. Status of owner (mark one): A. ☒ current B. ☐ previous
10. Type of owner (mark one): A. ☐ state B. ☒ private C. ☐ commercial D. ☐ federal agency E. ☐ local gov't unit F. ☐ other
11. Two copies of a site plan are submitted with this application: A. ☐ YES B. ☐ NO

Submit two (2) copies of SITE PLAN showing facility property boundary, building and the location of all underground storage tanks. If THERE are existing engineering site plan, if available, OR a neat and to-scale sketch may be submitted in lieu. Site plan must show the following: MUST show the distances between tanks, buildings, and property lines (property boundary); indicate if tank is in use, currently operating, temporarily out of service, or abandoned. Also indicate the location of vent lines, fill ports, and dispensers. Each underground tank must be clearly labeled in accordance with the response to question 12. The number assigned to each tank on the site plan sketch MUST match and be identical to the tank identification number assigned to that tank on this form.

INCLUDE FACILITY NAME, OWNER'S NAME, FACILITY ADDRESS AND TELEPHONE NUMBER ON ALL SITE PLANS.

Re: Open Public Records Act Request #2024-670

Dear Ms. Jagger:

The City of Linden ("City") records custodian received your Open Public Records Act ("OPRA") requests on July 26, 2024.

Your OPRA request seek the following records: 101 W. Elizabeth Avenue (see attached)

Records are being provided to you as per your request with redactions in accordance with N.J.S.A. 47:1A-1(24) Privacy Interest and N.J.S.A. 47:1A-1.1(16) Personal Identifying Information from the Construction Code, Fire, Board of Health, Tax Assessor and Engineering Departments. Please be advised that the Planning Board does not have any records relative to your request.

Though the Clerk's Office processes all of the OPRA Requests for the City, we cannot answer questions regarding documents obtained from other departments. If you have any questions regarding the documents you received, please see the below list of Department phone numbers that can assist you further. Thank you for your attention in regard to this matter.

Construction Code: (908)474-8459
Engineering Department: (908)474-8469
Fire Department: (908)474-4560
Health Department: (908)474-8409
Police Records: (908)474-8555
Tax Assessor: (908)474-8439
Tax Collector: (908)474-8434

Very truly yours,

Joseph C. Bodek
City Clerk

Christopher Rooney
Deputy Chief
Fire Official

RE: Classification Exception Area (CEA) Biennial Certification and CEA Lift Request
Former Allied Building Supply Co. (aka NJ TRANSIT Linden Station Parking Lot 2)
101 West Elizabeth Avenue (Block 254, Lot 10), Linden, New Jersey
Program Interest No. 012948
Case No. 93-06-24-1425
CEA Subject Item ID No. CEA100151187

To Whom It May Concern:

On behalf of the New Jersey Transit Corporation (NJ TRANSIT), Dewberry Engineers Inc. (Dewberry) herein presents a Classification Exception Area (CEA) Biennial Certification for the above-referenced property. As part of this CEA Biennial Certification, Dewberry requests that the New Jersey Department of Environmental Protection (NJDEP) remove or lift the existing CEA on the property based on the results of a recent groundwater investigation conducted at the site by Dewberry.

In 2022, Dewberry performed a groundwater investigation at Area of Concern - 1 (AOC-1). AOC-1 includes the CEA for benzene, toluene, ethylene, and total xylenes (BTEX). The CEA was established by others in 1998 after the excavation and removal of a 2,000-gallon gasoline underground storage tank (UST) and petroleum-impacted soil in 1993. NJ TRANSIT purchased the property in 2000 and converted the site into a commuter parking lot for the Linden Station on the Northeast Corridor.

Dewberry conducted a targeted investigation of AOC-1 groundwater consisting of the installation and sampling of four pre-packed temporary well points, and the installation, development, and sampling of a replacement monitoring well, MW-1R, in the former source area (the suspected location of greatest BTEX concentration). The temporary well points approximated the locations of four former downgradient, cross-gradient, and upgradient monitoring wells. We sampled the temporary well points and collected two rounds of groundwater samples from permanent monitoring well MW-1R. BTEX was either non-detect or detected below the NJDEP Class II-A Ground Water Quality Standards in all of the temporary well point samples and in the well MW-1R samples from both rounds. In addition, due to these results, we abandoned well MW-1R. We have provided the well abandonment forms for this well and the other previously existing monitoring wells at the site (MW-1, MW-2, MW-3, MW-4, MW-5, and MW-6).

Please find attached the following documents in support of our request to remove/lift the CEA:

- 1 - Groundwater Remedial Action Protectiveness/Biennial Certification Form
- 2 - Classification Exception Area/Well Restriction Area (CEA/WRA) Fact Sheet Form
- 3 - NJDEP No Further Action (NFA) Letter
- 4 - Laboratory Data Summary Tables
- 5 - CEA Map with Locations of Former and Current Wells
- 6 - Well Abandonment Reports

Based on these findings, the remedial remedy of groundwater natural attenuation implemented at AOC-1 was successful. These results justify the removal/lifting of the CEA.

If you have any questions, please feel free to contact me at (973) 576-9635 or (201) 602-2407.

Sincerely,

John Q. Robinson, Jr., CPG, PG, GISP, LSRP
Project Manager/Senior Hydrogeologist

SECTION B. FEES

☐ Ground Water Remedial Action Protectiveness/Biennial Certification Form for a Ground Water RAP .....(No Fee)

Have all outstanding Ground Water RAP annual fees been paid? ..... ☐ Yes ☐ No

☒ Post-NFA Cases (Sites without a Ground Water RAP): Ground Water Remedial Action Protectiveness/Biennial Certification Form

Note: A Ground Water RAP Initial Application is required to be submitted with this form. Please see the Compliance Notice: Post-NFA cases requiring remedial action permits, which includes the fee breakdown: https://www.nj.gov/dep/srp/enforcement/post_nfa_compliance_notice.pdf.

	Effective on or Before June 30, 2022	**Effective July 1, 2022**
MNA	$5,130	$5,610
Active System	$5,240	$5,720

SECTION C. FEE BILLING CONTACT PERSON

☒ Changed Since Last Submission of the Ground Water Remedial Action Protectiveness/Biennial Certification Form

Date of RAP Contact Information Change Form Submission: _____

Business Name: New Jersey Transit Corporation

First Name of Contact: H. Michael Last Name of Contact: Matri

Title: Director of Remediation, Tanks & Waste

Phone Number: (862) 338-5096 Ext.: _____ Fax: -

Mailing Address: One Penn Plaza East, 8th Floor

Municipality: Newark State: New Jersey Zip Code: 07105

Email Address: hmatri@njtransit.com

SECTION D. PERSON(S) RESPONSIBLE FOR CONDUCTING THE REMEDIATION

1. Has the mailing address changed for the Person(s) Responsible for Conducting the Remediation that is currently listed on the Ground Water RAP for the site? ..... ☐ Yes ☒ No

   If "**Yes**", provide the date of the Ground Water RAP Modification Application submission: _____

2. Has the Contact Person/Information changed since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ..... ☒ Yes ☐ No

   If "**Yes**", provide the date of the RAP Contact Information Change Form submission: _____

SECTION E. CURRENT OWNER(S) OF THE SITE

1. Has the Property Owner changed from what is currently listed on the Ground Water RAP for the site? ☐ Yes ☒ No

   If "**Yes**", provide the date of the RAP Transfer/Change of Property Ownership Application submission: .....

2. Has the mailing address changed for the Property Owner that is currently listed on the Ground Water RAP for the site? ..... ☐ Yes ☒ No

   If "**Yes**", provide the date of the Ground Water RAP Modification Application submission:

3. Has the Contact Person/Information changed since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ..... ☒ Yes ☐ No

   If "**Yes**", provide the date of the RAP Contact Information Change Form submission: .....

SECTION F. ATTACHED DOCUMENTS

Attach electronic copies of the following documents in an email to srp_submissions@dep.nj.gov*: *(Check all that apply)*

**See instructions for how to handle submissions associated with a Post-NFA Case.*

- ☒ Ground Water Remedial Action Protectiveness/Biennial Certification Form using the current form on the NJDEP Website (Required).
- ☒ A summary of the ground water sampling results by monitoring well in tabular format to this form, including all historical ground water sampling data associated with the Ground Water RAP (Required).
- ☐ The last four ground water contour maps completed for the site, which includes the extent of the CEA/WRA, monitoring well and AOC locations on it, and the direction of ground water flow at the site (Required).
- ☐ All well inspection reports/logs that have been completed since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form (Required).
- ☐ The results of the required updated well search to this form, including a scaled map and a table indicating which wells were previously evaluated (Required).
- ☐ The field sampling sheets since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form (Required).
- ☐ A table summarizing the monitoring well construction details (below ground surface (bgs)) for all the monitoring wells associated with the Ground Water RAP (Required).
- ☐ A contaminant concentration table that compares the GWQS changes and order of magnitude analysis associated with the Ground Water RAP (Required).
- ☐ The Contaminants of Emerging Concern (CECs) evaluation completed associated with the Ground Water RAP (Required).
- ☐ A summary of the Technical Impracticability (TI) Determination and a 5-year evaluation, if applicable.
- ☐ A current Tax Map of the property if the block and lot has changed for the CEA/WRA, if applicable.
- ☐ The vapor intrusion sampling results, including a scaled site map indicating the location of all structures investigated for vapor intrusion, if applicable.
- ☐ Any vapor intrusion sampling results as required from the Operation, Maintenance, & Monitoring (OMM) Plan for the vapor intrusion engineering control(s)/mitigation system(s) for the permit, including the NJDEP Vapor Intrusion Mitigation Monitoring and Maintenance Checklist.
- ☐ Any vapor intrusion sampling results as required from the Vapor Intrusion Long-Term Monitoring Plan for the permit, if applicable.
- ☐ The summary of the inspection and a scale site map clearly identifying the buildings with Indeterminate Vapor Intrusion Pathway status, including the address and block/lot of each building, if applicable.
- ☐ The completed Remediation Cost Review and RFS/FA Form with a detailed cost estimate, if applicable.
- ☐ The homeowner or condominium association's annual budget that includes funds for the operation, maintenance, and monitoring of the engineering control(s) associated with the Ground Water RAP, if applicable.
- ☐ The annual statements confirming the value of the Financial Assurance Instrument, if applicable.

SECTION G. REMEDIAL ACTION AND CEA/WRA INFORMATION

1. Type of Ground Water Remediation

a. ☒ **Monitored Natural Attenuation**

1) Has ground water sampling been conducted at the site since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☒ Yes ☐ No

If "**Yes**", attach a summary of the ground water sampling results by monitoring well in tabular format to this form, including all historical ground water sampling data for the site.

2) Has ground water sampling been conducted in accordance with the Ground Water Monitoring Plan for the site? ☒ Yes ☐ No

If "**No**", provide justification for deviating from the Ground Water Monitoring Plan and attach additional documentation if needed:

3) Do the results of the ground water sampling demonstrate that contaminant concentrations have decreased to or below the applicable Ground Water Quality Standards for two ground water sampling events accounting for seasonal fluctuation at the site pursuant to N.J.A.C. 7:26C-7.9(f)? ☒ Yes ☐ No ☐ N/A

If "**Yes**", then submit a Ground Water RAP Termination Application and skip the rest of this section.

4) Is there still a decreasing trend of contaminant concentrations in the ground water? ☒ Yes ☐ No

If "**No**", provide the date of Ground Water RAP Modification submission or the justification supporting the protectiveness of the ground water remedial action in Section L below: _____

5) Is the ***behavior*** of the ground water contaminant plume considered to be shrinking or stable? ☒ Yes ☐ No

If "**Yes**", check off only one of the following: ☒ Shrinking ☐ Stable

If "**No**", provide the date of Ground Water RAP Modification submission or the justification supporting the protectiveness of the ground water remedial action in Section L below: _____

6) Is the ground water plume reaching the sentinel wells or sentinel monitoring points? ☐ Yes ☒ No

If "**Yes**", provide the date of Ground Water RAP Modification submission with the required additional ground water delineation data: _____

7) Is MNA still the appropriate ground water remedial action for the site? ☒ Yes ☐ No

If "**No**", provide an explanation:

b. ☐ **Active Remediation**

Provide the type of remediation: _____

1) Has ground water sampling been conducted at the site since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☐ No

   If "**Yes**", attach a summary of the ground water sampling results by monitoring well in tabular format to this form, including all historical ground water sampling data for the site.

2) Has ground water sampling been conducted in accordance with the Ground Water Monitoring Plan for the site? ☐ Yes ☐ No

   If "**No**", provide justification for deviating from the Ground Water Monitoring Plan and attach additional documentation if needed:

3) Do the results of the ground water sampling demonstrate that contaminant concentrations have decreased to or below the applicable Ground Water Quality Standards for two ground water sampling events accounting for seasonal fluctuation at the site pursuant to N.J.A.C. 7:26C-7.9(f)? ☐ Yes ☐ No ☐ N/A

   If "**Yes**", then submit a Ground Water RAP Termination Application and skip the rest of this section.

4) Is there still a decreasing trend of contaminant concentrations in the ground water? ☐ Yes ☐ No

   If "**No**", provide the date of Ground Water RAP Modification submission or the justification supporting the protectiveness of the ground water remedial action in Section L below: _____

5) Is the ***behavior*** of the ground water contaminant plume considered to be shrinking or stable? ☐ Yes ☐ No

   If "**Yes**", check off only one of the following: ☐ Shrinking ☐ Stable

   If "**No**", provide the date of Ground Water RAP Modification submission or the justification supporting the protectiveness of the ground water remedial action in Section L below: _____

6) Is the ground water plume reaching the sentinel wells or sentinel monitoring points? ☐ Yes ☐ No

   If "**Yes**", provide the date of Ground Water RAP Modification submission with the required additional ground water delineation data: _____

7) Is the ground water remedial action performing as designed? ☐ Yes ☐ No

   If "**No**", provide an explanation:

8) Has the active ground water treatment system been shutdown for longer than 48-hours since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☐ No ☐ N/A

   If "**Yes**", provide an explanation for the shutdown, including the duration of the shutdown and whether or not the shutdown rendered the Remedial Action not protective of public health, safety and of the environment:

2. Has a Technical Impracticability (TI) Determination been approved? ☐ Yes ☒ No

   If "**Yes**", please provide the date of the TI Approval Letter from the Department: _____

   Attach a summary of the TI Determination and a 5-year evaluation, if applicable.

3. Since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form, has any ground water contamination been determined to have migrated onto the site/property from an off-site source that is not included in the Ground Water RAP? ☐ Yes ☒ No

   If "**Yes**", provide the communication center number that was received when called into the Hotline and a discussion of the issue below.

   Hotline Communication Center Number: _____

   Discussion:

4. Has the ground water flow direction changed at the site such that the sentinel well(s) is no longer downgradient and protective of all receptors? ☐ Yes ☒ No

   If "**Yes**", provide the date of Ground Water RAP Modification submission with the required additional ground water delineation data: _____

5. Has the CEA/WRA been revised for any reason that did not require conducting additional remediation? ☐ Yes ☒ No

   If "**Yes**", provide the date of Ground Water RAP Modification submission: _____

6. Did the Municipal Block and Lot number(s) of the CEA/WRA change since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☒ No

   If "**Yes**", attach a current Tax Map of the property and list the former and new Municipal Block and Lot numbers of the CEA/WRA below:

   Former Municipal Block and Lot Number(s):

   _____

   New Municipal Block and Lot Number(s):

   _____

7. Did you provide hard copies of this form to the municipal and county clerks for each municipality and county in which the CEA/WRA is located; the local, county and regional health department for each municipality and county in which the CEA/WRA is located; each current owner of the site; each current operator of the site; each current property owner within the footprint of the CEA/WRA; the Pinelands Commission or the Highlands Commission, as applicable? ☒ Yes ☐ No

8. Have any monitoring wells associated with the CEA/WRA been damaged, vandalized, repaired, replaced, decommissioned, or could not be located? ☒ Yes ☐ No

   If "**Yes**", describe what occurred and attach additional documentation as necessary (i.e., maintenance and evaluation logs for all the monitoring wells, a copy of any Well Abandonment Report(s), construction specifications for each new/replacement well, documentation that the Bureau of Water Allocation and Well Permitting was contacted for any monitoring wells that could not be located, etc.):

   The Well Abandonment Report for historic monitoring well MW-1 could not be located. The remaining historic wells (MW-2 through MW-6) have Well Abandonment Reports. The search documentation, including correspondence with the NJDEP Bureau of Water Allocation and Well Permitting, is included in Attachment 6 of this submittal.

9. Has a replacement monitoring well(s) been installed since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☒ Yes ☐ No

   If "**Yes**", was the replacement well installed within 10 feet of the former well location? ☒ Yes ☐ No

   If "**No**", then either:

   Provide the justification supporting the protectiveness of the ground water remedial action in Section L below

   or

   Provide the date of the Ground Water RAP Modification Application submission: _____

   Attach the construction specifications for each new well.

10. Since the Ground Water RAP was issued, did the comparison conducted pursuant to N.J.A.C. 7:26C-7.9(b)2 require the submission of a Ground Water RAP Modification Application? ☐ Yes ☐ No

    If "**Yes**", provide the date of Ground Water RAP Modification Application Submission: _____

11. Did the comparison conducted above reveal a change in the Ground Water Quality Standards? ☐ Yes ☐ No

    If "**Yes**", did the Ground Water Quality Standards change by an order of magnitude? ☐ Yes ☐ No

    If "**Yes**", does the change require a modification of the Ground Water RAP? ☐ Yes ☐ No

    If "**Yes**", provide the date of Ground Water RAP Modification Application Submission: _____

    Attach a contaminant concentration table that compares the GWQS changes and order of magnitude analysis.

Contaminants of Emerging Concern (CECs): The permittee(s) is required to evaluate whether there is the potential that the compounds listed below may have been manufactured, used, handled, stored, disposed or discharged at the AOC(s) associated with the Ground Water RAP. Evaluation does not mean analysis. Evaluation means using your professional judgement to determine if the compounds are potential contaminants of concern at the AOC(s) associated with the Ground Water RAP. The evaluation of these compounds should be the same as any other compound. Additional information on CECs can be found at https://www.nj.gov/dep/srp/emerging-contaminants/.

12. Is 1,4-dioxane a potential contaminant of concern at the AOC(s) associated with the Ground Water RAP and does it require further remedial investigation? ☐ Yes ☐ No

13. Is perchlorate a potential contaminant of concern at the AOC(s) associated with the Ground Water RAP and does it require further remedial investigation? ☐ Yes ☐ No

14. Are per- and polyfluoroalkyl substances (PFAS), including but not limited to perfluorononanoic acid (PFNA), perfluorooctanoic acid (PFOA), and perfluorooctane sulfonic acid (PFOS) potential contaminants of concern at the AOC(s) associated with the Ground Water RAP and does it require further remedial investigation? ☐ Yes ☐ No

15. Is 1,2,3-trichloropropane (1,2,3-TCP) a potential contaminant of concern at the AOC(s) associated with the Ground Water RAP and does it require further remedial investigation? ☐ Yes ☐ No

    Attach the results of the required emerging CECs evaluation:

    If "**Yes**" to any of the questions12 to 15 above, then provide a discussion of how this issue is being addressed:

SECTION H. SITE USE, CHANGES, AND DISTURBANCES

1. Indicate current site use:

☐ Industrial	☐ Child Care Facility	☐ Park or Recreational Use	☐ Solar Panels
☐ Residential	☐ Hospital	☐ Vacant	☒ Other: Commuter Lot
☐ Commercial	☐ Landfill	☒ Government Facility	
☐ School	☐ Agricultural	☐ Road/Right of Way	

2. Has the site use(s) changed since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☒ No

3. Have site use changes occurred or disturbances of the land, such as installation of a detention basin, taken place that has rendered the ground water remedial action not protective of public health, safety and of the environment? ☐ Yes ☒ No

If "**Yes**", provide the date of the Ground Water RAP Modification Application submission: _____

SECTION I. CURRENT OR PLANNED WATER USE WITHIN THE WELL SEARCH AREA

1. Water use within the CEA/WRA when CEA/WRA was established *(check all that apply)*

- ☐ Potable
- ☐ Well Head Protection Area
  - ☐ Tier 1 ☐ Tier 2 ☐ Tier 3
- ☐ Irrigation
- ☐ Industrial
- ☐ Geothermal
- ☐ Not Applicable

2. Current water use within the CEA/WRA Boundaries *(check all that apply)*

- ☐ Potable
- ☐ Well Head Protection Area
  - ☐ Tier 1 ☐ Tier 2 ☐ Tier 3
- ☐ Irrigation
- ☐ Industrial
- ☐ Geothermal
- ☐ Not Applicable

3. Are there any planned changes in water use for the aquifers in which the CEA/WRA is located since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☐ No

Check all the sources that were evaluated to determine planned changes in water use:

- ☐ Municipal Master Plans
- ☐ Zoning Plans
- ☐ Local water purveyor plans and planning data pertaining to the existence of water lines and proposed future installation of water lines, wells or well fields
- ☐ Local and County ordinances restricting installation of potable wells
- ☐ Local and County boards of health
- ☐ Local planning officials

4. Have any changes in water use altered the areal extent or the duration of the CEA/WRA? ☐ Yes ☐ No

5. Has the required well search identified any wells installed within one mile up-gradient, side-gradient, and down-gradient of the CEA/WRA since the last submittal of the Ground Water Remedial Action Protectiveness/Biennial Certification Form? ☐ Yes ☐ No

Attach the results of the required updated well search to this form, including a scaled map and a table indicating which wells were previously evaluated.

If "**Yes**", check all that apply:

☐ Potable	☐ Industrial	☐ Community Supply Well	☐ Irrigation
☐ Geothermal	☐ Production	☐ Non-Community Supply Well	

If you checked one of the above, was it necessary to sample the well pursuant to N.J.A.C. 7:26 E-1.14? ☐ Yes ☐ No

6. Did or will the actual or planned changes reported in items 1-5 above render the remedial action that includes the CEA/WRA not protective of public health, safety and of the environment? ☐ Yes ☐ No

   If "**Yes**", provide the date of the Ground Water RAP Modification Application submission: _____

7. Are any Point of Entry Treatment (POET) water systems currently installed at any buildings as a result of this ground water contamination? (If a POET water system was installed, but not required for the remediation, check "No") ☐ Yes ☐ No

   If "**Yes**", attach the ground water sampling results and provide a discussion of this issue below:

   Note: A Ground Water RAP Modification Application should be submitted if the POET water system was installed as a result of ground water contamination and it is not included in the Ground Water RAP for the site.

SECTION J. VAPOR INTRUSION

1. Are compounds of potential vapor intrusion concern included in the CEA/WRA? ☒ Yes ☐ No

   If "**Yes**", then complete this section; otherwise proceed to the next section

2. Based on the most recent data available or ground water data collected for the Ground Water Remedial Action Protectiveness/Biennial Certification Form, are any contaminants of concern currently above the Vapor Intrusion Ground Water Screening Levels that require a vapor intrusion investigation pursuant to N.J.A.C. 7:26E-1.15? ☐ Yes ☒ No

   If "**Yes**", attach a table with the vapor intrusion sampling results, a scaled site map indicating the location of all structures investigated for vapor intrusion, and provide a discussion of those results below or provide a written explanation with the reasons for not evaluating the vapor intrusion pathway.

3. Were there any changes in property use for the site or surrounding properties that required a vapor intrusion investigation pursuant to N.J.A.C. 7:26C-7.9(b)7? ☐ Yes ☒ No

   If "**Yes**", attach a table with the vapor intrusion sampling results, a scaled site map indicating the location of all structures investigated for vapor intrusion, and provide a discussion of those results below or provide a written explanation with the reasons for not evaluating the vapor intrusion pathway:

4. Have any vapor intrusion engineering controls/mitigation systems been installed as a result of this ground water contamination? (If a system was installed, but not required for the remediation (i.e., there is not a complete VI pathway requiring the system), check "**No**") ☐ Yes ☒ No

If "**Yes**", indicate the type of engineering control that was implemented: *(check all that apply)*

- ☐ Sub-Slab Depressurization System (SSDS)
  - ☐ Active ☐ Passive
- ☐ Sub-Slab Ventilation System
- ☐ Soil Vapor Extraction System
- ☐ Other (specify): _____

Attach any vapor intrusion sampling results as required from the OMM Plan for the vapor intrusion engineering control(s)/mitigation system(s) for the permit, including the NJDEP Vapor Intrusion Mitigation Monitoring and Maintenance Checklist. Provide a scaled site map that clearly identifies the building(s) and/or structure(s) with the vapor intrusion engineering control(s)/mitigation system(s) in place, including the address and block and lot of each impacted property.

Note: A Ground Water RAP Modification Application should be submitted if the vapor intrusion engineering controls/mitigation systems is not included in the Ground Water RAP for the site.

5. Is there soil gas contamination above the Soil Gas Screening Levels beneath any buildings that require long-term monitoring? ☐ Yes ☐ No

If "**Yes**", attach documentation of building inspections and/or any vapor intrusion sampling results as required from the Vapor Intrusion Long-Term Monitoring Plan for the permit.

Note: A Ground Water RAP Modification Application should be submitted if the Vapor Intrusion Long-Term Monitoring Plan is not included in the Ground Water RAP for the site.

6. Are there any buildings with an Indeterminate Vapor Intrusion Pathway status? ☐ Yes ☐ No

If "**Yes**", have annual inspections been completed to determine the change in use? ☐ Yes ☐ No

Attach a summary of the inspections and a scale site map clearly identifying the buildings with Indeterminate Vapor Intrusion Pathway status, including the address and block/lot of each building.

Note: A Ground Water RAP Modification Application should be submitted if the Indeterminate Vapor Intrusion Pathway status is not included in the Ground Water RAP for the site.

SECTION K. FINANCIAL ASSURANCE

1. Does the remedial action include a ground water or vapor intrusion engineering control? ☐ Yes ☒ No

If "**No**", proceed to the next section.

2. Is Financial Assurance required for the site? ☐ Yes ☒ No

If "**Yes**", attach a completed Remediation Cost Review and RFS/FA Form with a detailed cost estimate.

3. If the Financial Assurance Instrument is a Line of Credit, Remediation Trust Fund, Surety Bond, or Environmental Insurance Policy, have annual statements confirming the value of the Financial Assurance Instrument been submitted pursuant to the permit schedule? ☐ Yes ☐ No

If "**No**", attach the annual statements confirming the value of the Financial Assurance Instrument.

4. If the current owner of the site is either a homeowner association or a condominium association, have copies of the annual budget that includes funds for the operation, maintenance, and monitoring of the engineering control(s) at the site been submitted pursuant to the permit schedule? ☐ Yes ☐ No

If "**No**", attach copies of the association's annual budget that includes funds for the operation, maintenance, and monitoring of the engineering control(s) at the site.

SECTION L. OTHER INFORMATION PROVIDED

List any other pertinent information to support the Ground Water Remedial Action Protectiveness/Biennial Certification Form. This section should include a discussion of any new information or ground water data as it relates to the protectiveness of the ground water remedial action for the site.

This is a post-NFA scenario where we completed the groundwater investigation work and now, based on the results of the investigation, are requesting to remove/lift the existing CEA at the site. Consequently, a Remedial Action Permit for groundwater is not proposed.

SECTION M. PERSON WITH PRIMARY RESPONSIBILITY FOR PERMIT COMPLIANCE / PERSON RESPONSIBLE FOR MONITORING THE PROTECTIVENESS OF THE REMEDIAL ACTION INFORMATION AND CERTIFICATION

Affiliation/Name of Organization: New Jersey Transit Corporation

Representative First Name: John Representative Last Name: Geitner

Title: Director - Environment, Energy & Sustainability

Phone Number: (973) 491-7017 Ext: Fax:

Mailing Address: One Penn Plaza East, 8th Floor

Municipality: Newark State: New Jersey Zip Code: 07105

Email Address: jgeitner@njtransit.com

This certification shall be signed by the person with primary responsibility for permit compliance/person responsible for monitoring the protectiveness of the remedial action in accordance with the Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

I also understand that engineering and institutional controls must be evaluated and maintained to ensure they remain protective of public health and safety and the environment.

Based upon the information provided herein, I hereby certify that the remedial action(s) implemented at the site that includes engineering and/or institutional controls remains protective of public health and safety and the environment.

Signature: John Geitner Digitally signed by John Geitner Date: 2023.01.24 10:20:37 -05'00' Date:

Name/Title: John Geitner/Senior Director-Environment, Energy & Sustainability

Completed forms should be emailed to srp_submissions@dep.nj.gov*.

*All Ground Water Remedial Action Protectiveness/Biennial Certification forms associated with a Post-NFA Case must continue to be submitted on a CD by mail with the accompanying fee to the following address:

Bureau of Case Assignment & Initial Notice
Site Remediation Program
NJ Department of Environmental Protection
401-05H
PO Box 420
Trenton, NJ 08625-0420

SECTION N. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 748586

First Name: John Last Name: Robinson

Phone Numbers: (201) 602-2407 Ext.: Fax:

Mailing Address: 600 Parsippany Road, Suite 301

Municipality: Parsippany State: New Jersey Zip Code: 07054

Email Address: jrobinson@dewberry.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with N.J.S.A. 58:10C-14, and N.J.S.A. 58:10B-1.3b(1) and (2).

(1) I certify, as a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C-1 et seq. to conduct business in New Jersey, that for the remediation described in this submission, and all attachments included in this submission, I personally: Managed, supervised, or performed the remediation conducted at this site that is described in this submission, and all attachments included in this submission; and/or periodically reviewed and evaluated the work performed by other persons that forms the basis for the information in this submission; and/or completed the work of another site remediation professional, licensed or not, after having: (1) reviewed all available documentation on which I relied; (2) conducted a site visit and observed the then-current conditions and verified the status of as much of the work as was reasonably observable; and (3)concluded, in the exercise of my independent professional judgment, that there was sufficient information upon which to complete any additional phase of remediation and prepare workplans and reports related thereto.

(2) I certify:

- *That I have read this submission and all attachments to this submission;*
- *That in performing the professional services as the licensed site remediation professional for the entire site or each area of concern, I adhered to the professional conduct standards and requirements governing licensed site remediation professionals provided in N.J.S.A. 58:10C-16;*
- *That the remediation conducted at the entire site or each area of concern, that is described in this submission and all attachments to this submission, was conducted pursuant to and in compliance with the remediation requirements in N.J.S.A. 58:10C-14.c;*
- *That the remediation described in this submission, and all attachments to this submission, was conducted pursuant to and in compliance with the regulations of the Site Remediation Professional Licensing Board at N.J.A.C. 7:26I; and*
- *That the information contained in this submission and all attachments to this submission is true, accurate, and complete.*

(3) I certify, when this submission includes a response action outcome, that the entire site or each area of concern has been remediated in compliance with all applicable statutes, rules, and regulations and is protective of public health and safety and the environment.

(4) I certify that no other person is authorized or able to use any password, encryption method, or electronic signature that the Board or the Department have provided to me.

(5) I certify that I understand and acknowledge that:

- *If I knowingly make a false statement, representation, or certification in any document or information I submit to the Department I may be subject to civil and administrative enforcement pursuant to N.J.S.A. 58:10C-17.a.1(a)through (f) by the Board, including but not limited to license suspension, revocation, or denial of renewal; and*
- *If I purposely, knowingly, or recklessly make a false statement, representation, or certification in any application, form, record, document or other information submitted to the Department or required to be maintained pursuant to the Site Remediation Reform Act, I shall be guilty, upon conviction, of a crime of the third degree and shall, notwithstanding the provisions of subsection b. of N.J.S.2C:43-3, be subject to a fine of not less than $5,000 nor more than $75,000 per day of violation, or by imprisonment, or both.*

(6) I certify that I have read this certification prior to signing, certifying, and making this submission.

CEA/WRA FACT SHEET FORM

New Jersey Department of Environmental Protection
Site Remediation and Waste Management Program

CLASSIFICATION EXCEPTION AREA / WELL RESTRICTION AREA (CEA/WRA) FACT SHEET FORM

Date Stamp
(For Department use only)

SECTION A. SITE INFORMATION

Site Name: Former Allied Building Supply Co. (aka NJ TRANSIT Linden Station Parking Lot 2)

Program Interest (PI) Number(s): 012948

Case Tracking Number(s) for this submission: 93-06-24-1425

This form must be attached to the Cover / Certification Form if not submitted through the Remedial Phase Report Online Service

1. Indicate the reason for submission of this form *(see instructions)*:

☐ New CEA ☐ Revise CEA ☐ Reestablish CEA ☐ Existing CEA with no changes
☐ CEA for historic fill ☐ CEA for Historically Applied Pesticides (HAP) ☒ CEA lift/removal

If you are submitting this form for an existing CEA provide the CEA Subject Item ID: CEA100151187

2. Indicate the type of ground water Remedial Action (RA):

☒ Natural ☐ Active ☐ Final RA not yet selected

3. Is this form being submitted with a Remedial Action Permit (RAP) Form (for Soil or Ground Water)?.... ☐ Yes ☒ No

SECTION B. CEA COMPONENT AND VAPOR INTRUSION INFORMATION

Name of document that includes the CEA Fate and Transport Description: Application for Classification Exception Area

Date of document: 08/26/1998

1. **Ground Water Classification:** What is the ground water classification within the CEA as per N.J.A.C. 7:9C?

(Check all that apply)

☐ Class I-A
☐ Class I-PL Pinelands Protection Area
☐ Class I-PL Pinelands Preservation Area
☒ Class II-A
☐ Class III-A
☐ Class III-B

2. **Contaminant Data:** This CEA/WRA applies only to the contaminants listed below with concentrations above, or assumed to be above, numeric values established for the applicable classification area via the Ground Water Quality Standards (GWQS), N.J.A.C. 7:9C. Except for historic fill CEAs based on assumed ground water contamination, list the maximum contaminant value for all ground water data that could be representative of **current** conditions for any well or sampling point used to establish the CEA. See form instructions before entering data into the below table.

Contaminant	Concentration (1)	GWQS (2)	SWQS(3)	GWSL(4)
Benzene	ND	1		
Toluene	ND	600		
Ethylbenzene	440	700		
Total Xylenes	940	1,000		

Notes: (1) Maximum concentration in Micrograms Per Liter
(2) New Jersey Ground Water Quality Standards, N.J.A.C. 7:9C-1.7 and 1.9(c)
(3) Surface Water Quality Standards, N.J.A.C. 7:9B - Applicable only where contaminants in the CEA may discharge to a surface water body.
(4) Current NJDEP Vapor Intrusion (VI) Ground Water Screening Levels (GWSL) available at http://www.nj.gov/dep/srp/guidance/vaporintrusion/

☐ Check if attaching the form Addendum to list additional contaminants and associated information.

3. **CEA Boundaries and VI Pathway Status:** Year of tax map used: 1998

Are there volatile contaminants in the CEA? ☒ Yes ☐ No

Is there LNAPL currently found in the CEA? ☐ Yes ☒ No

For CEA revisions only:

☐ Check if CEA Boundary has changed (*See instructions*)

☐ Check if Block and Lot numbers have changed (*See instructions*)

List the block(s) and lot(s) included in the areal extent of the CEA and check the appropriate boxes:

Block	Lot(s)	Check if off-site	Check if VI pathway was evaluated*	Check if VI pathway status is indeterminate*
254	10	☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐

☐ Check if attaching an Addendum to list additional Blocks/Lots and associated information. *(see instructions)*

*Follow instructions for parcels where the vapor intrusion (VI) pathway was evaluated and the status is indeterminate.

Direction of ground water flow: East (*If multiple water bearing zones exist within the CEA and/or there is no predominant flow direction, see instructions.*)

Vertical depth of CEA: 50 (ft bgs) **and** -21.77 (msl).

Horizontal extent of CEA: 3 Indicate units: ☒ acres or ☐ square feet

Name(s) of the affected Geologic Formation(s)/Unit(s) (*see instructions if multiple formations/units affected*):

Passaic Formation

Narrative description of proposed CEA boundaries:

The CEA boundary is defined as the property line.

4. **Projected Term of CEA:** *(Based on modeling/calculations in the fate and transport description)*

Proposed Duration in Years: _____ Anticipated Expiration Date: _____

or ☐ indeterminate (*Review instructions before selecting* "Indeterminate" *for the CEA duration.*)

5. **ATTACH AND/OR SUBMIT THE FOLLOWING:** (*see instructions for additional information/requirements*)

Exhibit A: Site Location Maps – Based on USGS Quadrangle Map;

Exhibit B: CEA Map and Cross Section Figure – See N.J.A.C 7:26C- 7.3(c)1 and 2 and instructions regarding what is required to be included on the map and the cross-section figure.

Exhibit C: GIS Deliverables – CEA Boundary Extent Map. The CEA Boundary Extent Map shall be submitted via email to srpgis_cea@dep.nj.gov. (*See the instructions for detailed GIS deliverable requirements.)*

Identify format of CEA Boundary Extent Map being submitted: ☐ Shape File ☐ CAD File ☐ N/A

If there is a CEA map already on NJ-GeoWeb, does it need to be revised? ☐ Yes ☐ No ☐ N/A

SECTION C. CURRENT GROUND WATER USE DOCUMENTATION

1. Indicate the year of the most recent well search completed per N.J.A.C. 7:26E-1.14: _____

2. If this Fact Sheet form is for a revised CEA or an existing CEA with no changes, have new wells been installed since the CEA was established? ☐ Yes ☐ No ☐ N/A

3. Are there any pumping wells (e.g., potable, industrial, irrigation or recovery wells) within the foot print of the CEA? ☐ Yes ☐ No

   If "Yes" list/attach list of the type and status of any pumping well(s) within CEA:

SECTION D. WELL RESTRICTION INFORMATION

Certain well restrictions relevant to potable ground water use, such as "Double Case Wells", "Sample Potable Wells", and "Evaluate Production Wells", are consistently set within the boundaries of all CEAs established by the NJDEP in Class I and II-A areas (*see instructions*).

1. Are there any other site-specific well restrictions relevant to potable ground water use that should be set within or near the boundaries of the proposed CEA? ☐ Yes ☐ No

   If "Yes", describe below any such site-specific well restrictions proposed for this CEA:

SECTION E. PUBLIC NOTIFICATION REQUIREMENTS

1. Indicate which of the following entities have been notified pursuant to N.J.A.C. 7:26C-7.3(d) and the dates each notification was sent. (*check all that apply*)

   ☒ Municipal and county clerk(s) ..... Dated mailed: 02/24/2023

   ☒ Local, county or regional health department(s) ..... Dated mailed: 02/24/2023

   ☐ Designated County Environmental Health Act agency (if applicable) ..... Dated mailed: _____

   ☐ County Planning Board ..... Dated mailed: _____

   ☐ Pinelands Commission (if applicable) ..... Dated mailed: _____

   ☐ Owners of real property overlying CEA foot print ..... Dated mailed: _____

2. **List of Names and Addresses** – List below and/or in an attachment, the names/addresses of all persons notified pursuant to N.J.A.C. 7:26C-7.3(d) based on the proposed CEA boundaries. If the site property owner differs from the person responsible for conducting the remediation, check here ☐ and enter the site owner's name and address first in the table below. *See instructions for more information regarding the address list.*

Entity or Owner Name	**Notification Address Used** If owner address differs from property address overlying CEA, add an " * " after the address.	**Blocks/Lots overlying CEA owned by this person** Block	Lot(s)
Linden City Clerk	301 North Wood Avenue, Linden, NJ 07036		
Linden Health Dept.	605 South Wood Avenue, Linden, NJ 07036		
Union County Clerk	2 Broad Street, Elizabeth, NJ 07207		
Union County Health Mgmt	400 North Avenue East, Westfield, NJ 07090		
H. Michael Matri, NJ TRANSIT	One Penn Plaza East, Newark, NJ 07105		

ADDENDUM
Classification Exception Area / Well Restriction Area
Fact Sheet Form

Section B. CEA Component and Vapor Intrusion Information

1. **Contaminant Data** (continued): This CEA/WRA applies only to the contaminants listed on page 1 and in the table below with concentrations above, or assumed to be above, numeric values established for the applicable classification area via the GWQS, N.J.A.C. 7:9C. Except for historic fill CEAs based on assumed ground water contamination, list below the maximum contaminant value for all ground water data that could be representative of current conditions for any well or sampling point used to establish the CEA. See form instructions before entering data into the tables below.

Contaminant	Concentration [1]	GWQS [2]	SWQS [3]	VI GWSL [4]

Notes:
[1] Maximum concentration in Micrograms Per Liter
[2] New Jersey Ground Water Quality Standards, N.J.A.C. 7:9C-1.7 and 1.9(c)
[3] Surface Water Quality Standards, N.J.A.C. 7:9B - Applicable only where contaminants in the CEA may discharge to a surface water body.
[4] Current NJDEP Vapor Intrusion (VI) Ground Water Screening Levels (GWSL)

2. **CEA Boundaries and VI Pathway Status** (continued): List additional parcels included in the CEA. Attach additional Addendum sheets if necessary to list all blocks and lots within the CEA.

For CEA revisions, check here if block and lot numbers have changed: ☐

Block	Lot(s)	Check if off-site	Check if VI pathway was evaluated*	Check if VI pathway status is indeterminate*
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐
		☐	☐	☐

* Follow instructions for parcels where the vapor intrusion (VI) pathway was evaluated and status is indeterminate.

Re: Area of Concern: 2,000 Gallon Gasoline Underground Storage Tank
Limited Restricted Use
No Further Action Letter and Covenant Not to Sue
Allied Building Supplies
101 West Elizabeth Avenue
Block 254 Lot 10
Linden, Union County
Case #93-06-24-1425
UST #0129486
KCSL # NJL600081798
Closure #C93-2092

NOV 16 1998

Dear Mr. Winters:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area of concern as specifically referenced above, except as noted below, so long as Allied Building Supplies did not withhold any information from the Department. This action is based upon information in the Department's case file and Allied Building Supplies' final certified report dated August 26, 1998. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Remedial Investigation and Remedial Action pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the 2,000 gallon Gasoline Underground Storage Tank and no other areas.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination Allied Building Supplies as well as each subsequent owner, lessee and operator (collectively "Successors") shall comply with each of the following:

Name and Address Changes

Pursuant to N.J.S.A. 58:10B-12, Allied Building Supplies and the Successors shall inform the Department in writing whenever its name or address changes, within 14 calendar days after the change.

Well Sealing

Pursuant to N.J.S.A. 58:4A, Allied Building Supplies and the Successors shall properly seal all monitoring wells installed as part of a remediation that will no longer be used for ground water monitoring. A certified and licensed well driller shall seal the wells in accordance with the requirements of N.J.A.C. 7:9-9. The well abandonment forms shall be completed and submitted to the Bureau of Water Allocation. Please call (609) 984-6831 for forms and information.

Monitoring of Compliance

Pursuant to N.J.S.A. 58:10B-13.1, Allied Building Supplies and the Successors shall conduct monitoring for compliance and effectiveness of the institutional control specified in this document and submit a certification to the Department biennially in writing that the institutional control is being properly maintained and continues to be protective of public health and safety and the environment. Any such certification shall include the information relied upon to determine that no changes have occurred.

CLASSIFICATION EXCEPTION AREA (CEA)
AND WELL RESTRICTION AREA (WRA)

Because concentrations of contaminants remain above the Ground Water Quality Standards, N.J.A.C. 7:9-6 et seq., a CEA and WRA are required, at this time, as institutional controls.

This CEA and WRA are based, in part, on the aquifer and contaminant data and evaluations provided in the above referenced report and/or case file. The CEA and WRA is the area defined by the property boundary and identified on the enclosed map. Any special conditions or restrictions for water use within the WRA will be administered by the Department's Bureau of Water Allocation.

This CEA and WRA apply to benzene, toluene, ethylbenzene and xylenes only. All other constituent standards apply within the CEA. All constituent standards (N.J.A.C. 7:9-6) apply at the designated boundary. All designated ground water uses within this area are suspended for the duration of the CEA. Pursuant to N.J.A.C. 7:9-6.4, "designated use" means a present or potential use of ground water within a ground water classification area as determined by N.J.A.C. 7:9-6.5. Pursuant to N.J.A.C. 7:9-6.5, this area is presently designated as Class II-A. The primary designated use for Class II-A ground water is potable water; secondary uses include agricultural and industrial water.

The duration of the CEA and WRA is set at three years from the date of this letter. This is greater than the predicted duration for contaminant degradation in the above referenced report. The Ground Water Quality Standards that apply to the compounds of concern are: benzene 1 ppb; toluene 1000 ppb; ethylbenzene 700 ppb and xylenes 1000 ppb. Should concentrations of contaminants reach their respective criteria prior to the CEA and WRA expiration date as demonstrated through ground water sampling, the Department will consider any requests to terminate the CEA and WRA. However, the expiration of the three year period prior to contaminant concentrations reaching the Ground Water Quality Standards would not constitute approval to utilize the ground water for its designated purposes. Compliance with the Ground Water Quality Standards may be determined by Allied Building Supplies by demonstrating that the Ground Water Quality Standards have been met for the referenced constituent(s) through ground water sampling from monitoring well: MW-1. Please note that Allied Building Supplies has the option of maintaining these wells for sampling purposes or sealing these wells and utilizing an acceptable method of ground water sampling to demonstrate compliance with the Ground Water Quality Standards. Compliance may be determined by Allied Building Supplies at the termination of the CEA and WRA or sooner. The Department's evaluation of the ground water sampling results, to determine compliance with the Ground Water Quality Standards, would be through a Memorandum of Agreement (MOA) or other oversight document, executed between Allied Building Supplies and the Department.

COVENANT NOT TO SUE

The Department issues this Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.1. That statute requires a covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against the following:

(a) the person who undertook the remediation;
(b) subsequent owners of the subject property;
(c) subsequent lessees of the subject property; and
(d) subsequent operators at the subject property,

for the purposes of requiring remediation to address contamination which existed prior to the date of the final certified report for the area of concern specifically referenced above, or payment of cleanup and removal costs for such additional remediation.

Any person who may benefit from this Covenant is barred from making a claim against the Spill Compensation Fund, N.J.S.A. 58:10-23.11i, and the Sanitary Landfill Facility Contingency Fund, N.J.S.A. 13:1E-105, for any costs or damages relating to the remediation covered by this Covenant. All other claims against these funds will be controlled by the corresponding statutes and their implementing regulations.

Allied Building Supplies, and each subsequent owner, lessee and operator, during that person's ownership, tenancy or operation, shall maintain those controls and conduct periodic compliance monitoring in the manner the Department requires.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that either:

(a) any person with the legal obligation to comply with any condition in this No Further Action Letter has failed to do so; or
(b) any person with the legal obligation to maintain or monitor any engineering or institutional control has failed to do so.

This Covenant Not to Sue, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant Not to Sue in the lines supplied below and the Department has received one copy of this document with original signatures of the Department and the person who undertook the remediation.

NOTICES

Bureau of Field Operation's Case Assignment

This No Further Action Determination specifically does not address the 550 gallon fuel oil underground storage tank. Allied Building Supply was notified of the case transfer to the Bureau of Field Operation's Case Assignment Section by letter on December 8, 1994.

Pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C) you may have an opportunity to remediate the site, or portion of the site, on a voluntary basis under a Memorandum of Agreement (application enclosed) or otherwise. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Section Chief
401 East State Street - 5th Floor
P.O. Box 434
Trenton, NJ 08625-0434

Direct Billing

Please be advised that pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C et seq.) Allied Building Supplies is required to reimburse the Department for oversight of the remediation. The Department will be issuing a bill within the next four months.

Thank you for your attention to these matters. If you have any questions, please contact Bill Brown, Case Manager at (609) 777-1386.

Sincerely,

Kevin F. Kratina, Chief
Bureau of Underground Storage Tanks

RE: *Abandonment of Lost Wells: PI 012948 Allied Building Supply Co., a.k.a. NJ TRANSIT Linden Station Lot 2.*

Dear NJDEP Representative,

On behalf of NJ TRANSIT, Dewberry Engineers Inc. is sending this letter to inform you that six monitoring wells at the former Allied Building Supply Co. facility, now known as the NJ TRANSIT Linden Station Lot 2, cannot be located. The site has been paved over with asphalt. A geophysical investigation conducted at the six well locations was unsuccessful in locating these wells. A request for information was submitted to the NJDEP office of Well Permitting. Well abandonment reports for five of the wells were located (attached). No information was recovered for monitoring well MW-1. The information regarding the wells is summarized below:

1. Responsible party/property owner:

   Mr. John Geitner
   Director of Site Remediation, Tanks, and Waste
   NJ TRANSIT Corporation
   One Penn Plaza East, 7th Floor
   Newark, New Jersey 07105

2. The facility and location information:

   NJ TRANSIT Linden Station Lot 2, 101 Elizabeth Ave., City of Linden, Union County, Block 254 Lot 10. NJ State Plane Coordinates: North 654269, East 560658

3. NJDEP **PI No. 012948**

4. Date when it was discovered that the well was lost: **March 10, 2022 Site Visit**

5. The approximate date the wells were lost: **2001**

6. Circumstances resulting in the well being lost: **The site was paved to create a rail commuter parking lot and it is not known if well MW-1 was abandoned.**

7. Detailed description of the action(s) taken to locate all monitoring wells including MW-1: **A geophysical investigation consisting of the collection of electromagnetic (EM) metal detection data in the vicinity of each former monitoring well was conducted along parallel transects separated by five feet. Ground penetrating radar (GPR), metal detection and**

magnetometry data were collected over the former and proposed (MW-1R) well locations. Line tracing data was also collected in an effort to detect buried utilities. The results indicated that two subsurface metallic anomalies were detected in the vicinity of MW-3 and MW-5, but none of the six former monitoring wells were identified. Well abandonment reports have subsequently been found for wells MW-3 and MW-5.

Well permit number and well construction specifications, if known. A completed individual well search questionnaire was submitted for each of the six former monitoring wells. The well permit number for former monitoring well MW-1 is 26-34471. According to the NJDEP Bureau of Records, records of the well is not available (Attachment 2). The well abandonment reports for the other five former monitoring wells (MW-2, MW-3, MW-4, MW-5, and MW-6, from the Bureau of Records) are presented in Attachment 3. MW-1 was likely abandoned with the other five monitoring wells at the site.

Sincerely,

John Robinson

Subject: Geophysical Investigation Results
Alfred Building Products Site
101 Elizabeth Avenue
Linden, New Jersey

Dear Mr. Robinson,

Subsurface Environmental Technologies (SET) Geophysics Department presents this report to Dewberry of Parsippany, New Jersey describing the methods and results of a geophysical investigation conducted at the Alfred Building Products Site located at 101 Elizabeth Avenue in Linden, New Jersey. For this project, SET surveyed several locations where buried monitoring wells (MW) may be present, as defined by Dewberry in the field. The field activities for this investigation were completed by SET on Thursday April 14, 2022.

Objectives

The primary objective of this geophysical survey was to locate six (6) buried monitoring wells that were though to exist at the site. The geophysical data was analyzed closely for these targets. To meet the objective of the investigation, SET used the hand-held electromagnetic (HHEM), radiofrequency (RF), and ground-penetrating radar (GPR) methods.

Survey Grids

The HHEM, GPR and RF data were acquired in the scan mode over the discrete areas described above. Scans were collected in a radial pattern about each discrete location to provide optimal subsurface coverage. In the event that a buried utility or feature was detected, the boring location was moved to a location where no buried anomalies were observed. The positions of all detected pipelines and anomalies were marked on the ground with spray paint.

Geophysical Methods

Hand-Held Electromagnetic Methods

The hand-held electromagnetic method uses the principle of electromagnetic induction to detect shallowly-buried metal objects such as underground storage tanks (USTs), metal utility conduits,

Subject: [EXTERNAL] Lost Monitoring Wells: Allied Building Supply Co., PI-012948, a.k.a. NJ TRANSIT Linden Station Lot 2

Hi,

We are completing a Remedial Action Report for the above references site and request a search for well abandonment records for six historical monitoring wells. The individual well search questionnaires are attached for MW-1, MW-2, MW-3, MW-4, MW-5, and MW-6. The well locations have been paved over, and a geophysical survey did not indicate their presence.

Thank you,

John

FIGURE DATE JUNE 2nd 2022	ORTHOPHOTO FLOWN BY NEW JERSEY OFFICE OF GIS	

Results

SET has enclosed 2 figures with this report. Figure 1 is an annotated, geo-referenced orthophoto that shows the approximate locations of the six wells as placed by Dewberry, and Figure 2 shows site photographs of five of the well locations. The results of the geophysical survey are summarized below.

Buried Monitoring Wells

SET detected a few "spot" anomalies near the marked well locations where historic data indicated their presence. SET placed pink circles at those locations where the geophysical data provided responses that were consistent with a possible buried metal object roughly the size of a metal well cap. The site photos presented in Figures 2 and 3 show these locations for MW-1 through MW-5. No photograph of MW-6 was available, however SET did not detect any suspicious anomalies in that survey area. For those locations where no metal anomalies were detected, it may be that the metal well caps were removed during the parking lot construction. PVC wells are extremely difficult to detect.

Data Quality

The data quality for this project was good. The HHEM, RF, and GPR responses at the site were consistent and correlated well between profiles. The interpretations presented in this report are based on observed geophysical responses, visual observations, and historical information.

Closing

The geophysical data collection and interpretation methods used in this investigation are consistent with standard practices applied to similar geophysical investigations. The correlation of geophysical responses is based on the past results of similar surveys, although it is possible that some variation could exist at this site. Due to the nature of geophysical data, no guarantees have been made or inferred regarding the presence or absence of additional objects or targets beyond those identified or beyond the detection limits of the instrumentation used in this investigation.

If you have any questions, please contact me 609-480-9382. It was a pleasure working with you on this project, and look forward to conducting geophysical investigations for you in the future.

Sincerely,

Peter Miller

Peter T. Miller PhD, P.G.
Senior Geophysicist, SET

reinforced concrete slabs, manhole covers, and miscellaneous metal debris. To complete this task, the operator carries the hand-held radio transmitter-receiver unit above the ground and continually scans the surface. A primary coil broadcasts a radio signal from the transmitter. This primary radio signal induces secondary electrical currents in metal objects. These secondary currents, in turn, produce a magnetic field which is detected by the receiver.

The HHEM instrument SET typically uses for shallow investigations is a Fisher TW-6 pipe and cable locator by Fischer, Inc. This instrument operates by generating both a unitless meter reading and an audible signal response when near a metal object. The peak instrument response usually occurs when the unit is directly over the object.

Ground Penetrating Radar (GPR) Method

The ground-penetrating radar (GPR) method was used to provide subsurface imaging information throughout the areas of investigation. The GPR method is based upon the transmission of repetitive, radio-frequency electromagnetic (EM) pulses into the subsurface. When the transmitted energy of down-going wave contacts an interface of dissimilar electrical character, part of the energy is returned to the surface in the form of a reflected signal. This reflected signal is detected by a receiving transducer and is displayed on the screen of the GPR unit as well as being recorded on the internal hard drive. The received GPR response remains constant as long as the electrical contrast between media is present and constant. Lateral or vertical changes in the electrical properties of the subsurface result in equivalent changes in the GPR responses. The system records a continuous image of the subsurface by plotting two-way travel time of the reflected EM pulse versus distance traveled along the ground surface. Two-way travel time values are then converted to depth using known soil velocity functions.

The GPR field procedures involved (1) instrument calibration, (2) test run completion, (3) production profile collection and recording, and (4) data storage for subsequent processing and analysis in the office. Each radar profile was examined for characteristic GPR signatures that may indicate the presence of buried targets. A Geophysical Survey System SIR System 2 and a 400 megahertz (MHz) antenna were used with a recording window of 60 nanoseconds (ns) to provide the required depth penetration and subsurface detail.

Radio-Frequency Method

The RadioDetection RD4000 multi-frequency utility locating system was used for this project. This instrument consists of a receiver/tracer and a remote transmitter, which operates at frequencies between 8 kHz and 200 kHz. The unit provides audio and visual feedback to the operator when a utility that is coupled with the transmitted signal is crossed. The transmitter produces a radio-frequency signal in the utility to be traced by either induction coupling or direct hookup. The receiver output provides measured field strength of the received signal and varies an audible pitch that is dependent upon the distance to the utility. By carefully adjusting the gain of the receiver, it is possible to determine the location of the utility and to separate it from possible adjacent utilities. In addition, the receiver can be used in 60 Hz passive mode to identify active electrical lines or lines that possess an induced current.

Re: Abandonment of Lost Wells
Allied Building Supply Co. – NJT Linden Station
101 Elizabeth Ave
Municipality: Linden, County: Union
Block: 254, Lot: 10
NJDEP PI#: 012948
Permit Number(s): 2600034471

Dear Mr. Robinson,

On August 26, 2022, the Bureau of Water Allocation and Well Permitting (Bureau) received your request to have the referenced wells listed as lost and therefore unable to be decommissioned in accordance with the Well Construction and Maintenance; Sealing of Abandoned Wells Rule, N.J.A.C. 7:9D Subchapters 1 through 4. Based on the submitted information documenting actions taken to locate the wells, the Bureau concurs that all reasonable efforts have been made to locate the referenced wells and will identify these wells as "Lost" in the Well Permitting Database.

You are hereby advised that the determination that a well is lost does not release the property owner from the obligation to have the well decommissioned in accordance with the well rules referenced above. Lost wells are considered to be part of the real property. Should redevelopment of the property or evidence of the location of the well become evident in the future, the lost well must be decommissioned by a New Jersey licensed driller of the proper class. The well driller will need to contact the Bureau in advance of filing the decommissioning report.

New Jersey is an Equal Opportunity Employer. Printed on Recycled Paper and Recyclable.

If you have any questions, please contact Jeremy Wick by phone at (609) 984-6831 or via the Well Permitting Section email address, wellpermitting@dep.nj.gov.

Regards,

Joseph J. Mattle

RE: Classification Exception Area (CEA) Biennial Certification and CEA Lift Request
Former Allied Building Supply Co. (aka NJ TRANSIT Linden Station Parking Lot 2)
101 West Elizabeth Avenue (Block 254, Lot 10), Linden, New Jersey
Program Interest No. 012948
Case No. 93-06-24-1425
CEA Subject Item ID No. CEA100151187

To Whom It May Concern:

On behalf of the New Jersey Transit Corporation (NJ TRANSIT), Dewberry Engineers Inc. (Dewberry) herein presents a Classification Exception Area (CEA) Biennial Certification for the above-referenced property. As part of this CEA Biennial Certification, Dewberry requests that the New Jersey Department of Environmental Protection (NJDEP) remove or lift the existing CEA on the property based on the results of a recent groundwater investigation conducted at the site by Dewberry.

In 2022, Dewberry performed a groundwater investigation at Area of Concern - 1 (AOC-1). AOC-1 includes the CEA for benzene, toluene, ethylene, and total xylenes (BTEX). The CEA was established by others in 1998 after the excavation and removal of a 2,000-gallon gasoline underground storage tank (UST) and petroleum-impacted soil in 1993. NJ TRANSIT purchased the property in 2000 and converted the site into a commuter parking lot for the Linden Station on the Northeast Corridor.

Dewberry conducted a targeted investigation of AOC-1 groundwater consisting of the installation and sampling of four pre-packed temporary well points, and the installation, development, and sampling of a replacement monitoring well, MW-1R, in the former source area (the suspected location of greatest BTEX concentration). The temporary well points approximated the locations of four former downgradient, cross-gradient, and upgradient monitoring wells. We sampled the temporary well points and collected two rounds of groundwater samples from permanent monitoring well MW-1R. BTEX was either non-detect or detected below the NJDEP Class II-A Ground Water Quality Standards in all of the temporary well point samples and in the well MW-1R samples from both rounds. In addition, due to these results, we abandoned well MW-1R. We have provided the well abandonment forms for this well and the other previously existing monitoring wells at the site (MW-1, MW-2, MW-3, MW-4, MW-5, and MW-6).

Please find attached the following documents in support of our request to remove/lift the CEA:

- 1 - Groundwater Remedial Action Protectiveness/Biennial Certification Form
- 2 - Classification Exception Area/Well Restriction Area (CEA/WRA) Fact Sheet Form
- 3 - NJDEP No Further Action (NFA) Letter
- 4 - Laboratory Data Summary Tables
- 5 - CEA Map with Locations of Former and Current Wells
- 6 - Well Abandonment Reports

NJDEP
#15
2/28/2023

Based on these findings, the remedial remedy of groundwater natural attenuation implemented at AOC-1 was successful. These results justify the removal/lifting of the CEA.

If you have any questions, please feel free to contact me at (973) 576-9635 or (201) 602-2407.

Sincerely,

John Q. Robinson, Jr., CPG, PG, GISP, LSRP
Project Manager/Senior Hydrogeologist

RE: ***Receptor Evaluation***
NJ TRANSIT
Linden Station Park and Ride
101 West Elizabeth Avenue
Linden, New Jersey
SRP Program Interest Number 012948

Dear Case Assignment Personnel:

On behalf of NJ TRANSIT, Dewberry-Goodkind, Inc. (Dewberry) is submitting this Receptor Evaluation for the above referenced site in accordance with N.J.A.C. 7:26E-1.14 to 1.19. This initial Receptor Evaluation is required due to the presence of groundwater contamination associated with the historic operations by Allied Building Supply, a former owner of the property.

No receptors have been identified within the applicable search radii around the site.

If you have any questions, please do not hesitate to contact me at 973-576-9648.

Regards,

William S. S. Pendexter, Ph.D., P.G.
Senior Project Manager

RECEPTOR EVALUATION FORM

☒ Non-LSRP (Existing Cases) ☐ LSRP ☐ Subsurface Evaluator

Date Stamp
(For Department use only)

SECTION A. SITE NAME AND LOCATION

Site Name: NJ TRANSIT Linden Station Park and Ride

List all AKAs: Former Allied Building Supply

Street Address: 101 West Elizabeth Avenue

Municipality: Linden (Township, Borough or City)

County: Union Zip Code: 07036

Mailing Address if different than street address: NJ TRANSIT, One Penn Plaza East, 8th Floor, Newark, NJ 07105

Program Interest (PI) Number(s): 012948 Case Tracking Number(s): 93-06-24-1425

The purpose of this form is to document the existence of receptors and the actions taken to protect receptors and is required unless an unrestricted remedial action is completed before the due date of the **Initial** Receptor Evaluation. At the time of the initial or interim Receptor Evaluation the Department acknowledges that the remedial investigation may not be fully complete. The Receptor Evaluation should be completed in accordance with requirements and timeframes in the Technical Requirements for Site Remediation and is an ongoing process as the extent of contamination is defined. The Receptor Evaluation should be submitted within the Mandatory Timeframes.

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION B. ON SITE AND SURROUNDING PROPERTY USE

1. Identify any sensitive populations/uses that are currently on-site or surrounding property usage within 200 feet of the site boundary (check all that apply):

	On-site	Off-site
None of the following	☒	☐
Residences or residential property	☐	☒
Public or Private Schools grades K-12	☐	☐
Child care centers	☐	☐
Public parks, playgrounds or other recreation areas	☐	☐
Other sensitive population use(s) Explain _____	☐	☐

If any of the above applies, attach a list of addresses, facility names, type of use, and a map depicting each location relative to the site.

2. Current site uses (check all that apply):

☐ Industrial ☐ Residential ☐ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

3. Planned future site uses and offsite use within 200 ft of site boundary (check all that apply):

☐ Industrial ☒ Residential ☒ Commercial ☐ Agricultural
☐ School or child care ☐ Government ☐ Park or recreational use
☐ Vacant ☒ Other Public Transit Authority

Provide a map depicting the location of the proposed changes in land use.

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION C. DESCRIPTION OF CONTAMINATION

1. Identify if any of the following exist at the site (check all that apply):
   - ☐ Free product [N.J.A.C. 7:26E-1.8]
   - ☐ Residual product [N.J.A.C. 7:26E-1.8]
   - ☐ Other high concentration source materials not identified above (e.g., buried drums, containers, unsecured friable asbestos)

   Explain _____
2. If this evaluation is submitted with a technical document that includes this information, proceed to Section D. Otherwise attach a brief summary of all currently available data and information to be included in the site investigation or remedial investigation report.

   ☒ Initial Submission ☐ Interim Submission
   ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION D. GROUND WATER USE

1. The requirement for ground water sampling has been triggered. If "No," proceed to Section F..... ☒ Yes ☐ No
2. Ground water is contaminated above the Ground Water Remediation Standards [N.J.A.C.7:9C]..... ☒ Yes ☐ No

   Or ☐ Awaiting laboratory data with the expected due date: _____

   If "Yes," provide the date that the laboratory data were available and contamination exists above the Ground Water Remediation Standards. Date 09/17/1993

   If "No," or awaiting laboratory data proceed to Section F.
3. Identify if any of the following conditions exist based on the well search [N.J.A.C.7:26E-1.17(a)] (check all that apply):
   - ☐ Potable wells located within 1000 feet from the downgradient edge of the currently known extent of contamination.
   - ☐ Potable well located 250 feet upgradient or 500 feet side gradient of the currently known extent of contamination.
   - ☐ Ground water contamination is located within a wellhead protection area Tier 1 or Tier 2 (WHPA).
     Tier: Identify if **Tier 1** ☐ or **Tier 2** ☐.
4. Complete and attach the Well Search spreadsheet.
5. Potable use wells have been identified in the well search and the area has been canvassed for additional ground water use (potable and irrigation wells, etc.). NA ..... ☐ Yes ☐ No
6. Potable wells and non-potable use wells were identified and ☐ potable well and /or ☐ non-potable use well sampling has been conducted.. NA ..... ☐ Yes ☐ No
7. Contamination identified above Ground Water Remediation Standards but not suspected to be from the site (if "Yes," provide justification)..NA ..... ☐ Yes ☐ No
8. Potable wells were sampled and results were above State or Federal Drinking Water Standard. NA ..... ☐ Yes ☐ No

   Date _____ Or ☐ Awaiting laboratory data with the expected due date _____

   If "Yes" to #8 for potable well contamination not attributable to background follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   IEC was abated ..... ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____
9. Receptors abated as part of mitigation (provide a brief narrative description)..NA ..... ☐ Yes ☐ No
10. Non-potable use wells were sampled and results were above GWQS. NA

    Date _____ Or ☐ Awaiting laboratory data and the expected due date: _____

    ☒ Initial Submission ☐ Interim Submission
    ☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION E. VAPOR INTRUSION (VI)

1. Contaminants present in ground water exceed vapor intrusion ground water screening levels (see NJDEP Vapor Intrusion Guidance) that trigger a VI evaluation. ..... ☐ Yes ☒ No

Or ☐ Awaiting laboratory data and the expected due date: _____

Provide the date that the laboratory data was available and confirmed contamination above the Vapor Intrusion trigger levels. _____

If "No," or awaiting laboratory data, proceed to Section F.

1. Identify and locate on scaled map any structures/sensitive populations that exist within the following distances from ground water contamination with concentrations above the Ground Water Screening Levels for Vapor Intrusion or specific threats (check all that apply):

☐ 30 feet of dissolved petroleum hydrocarbon contamination in ground water.
☐ 100 feet of any free product or any non-petroleum dissolved volatile organic ground water contamination.
☐ No structures exist within the specified distances
☐ Unsaturated zone contamination ☐ Methanogenic conditions
☐ Landfills on or adjacent to site ☐ Elevated soil gas or indoor vapors
☐ Elemental mercury ☐ Basement or sump contains contaminated ground water or product
☐ Other_____

3. A VI evaluation has been conducted of the structures to address threats identified . ☐ Yes ☐ No
4. The vapor intrusion pathway is not a concern at or adjacent to the site (if "yes", attach justification) ☐ Yes ☐ No
5. Contamination identified but not suspected to be from the site (if "Yes," attach justification) ☐ Yes ☐ No
6. Indoor air sampling was conducted and results were above the Department's proposed vapor intrusion Rapid Action Levels. ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   Provide the date that the laboratory data was received and detected contamination above the proposed vapor intrusion Rapid Action Levels. _____

   If "Yes" to #6 above, required actions for contamination follow the IEC Guidance Document at http://www.nj.gov/dep/srp/guidance/srra/iec_guidance_draft.pdf.

   The IEC receptor engineering system response for receptor control was implemented for all identified structures ☐ Yes ☐ No

   Date _____ NJDEP Case Manager _____
7. Indoor air sampling was conducted and results were above the Department's Indoor Air Screening Levels but at or below the proposed vapor intrusion Rapid Action Levels ☐ Yes ☐ No

   Or ☐ Awaiting laboratory data

   If "Yes" to #7 above, required actions are:

   Vapor Concern Response Action Form notification of the exceedances of the data has been completed (date _____) ☐ Yes ☐ No

   A plan to mitigate and monitor the exposure has been submitted (date _____) ☐ Yes ☐ No

   The mitigation response action report has been submitted (date _____) ☐ Yes ☐ No
8. The vapor intrusion investigation is being completed and stepping out as part of the site investigation or remedial investigation (if "No" attach justification) ☐ Yes ☐ No

☒ Initial Submission ☐ Interim Submission
☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION F. ECOLOGICAL RECEPTORS

1. Identify any of the following conditions that exist based on the investigations conducted to date (check all that apply):

   The results of a baseline ecological evaluation [N.J.A.C.7:26E- 3.11] required that a remedial investigation of ecological receptors [N.J.A.C.7:26E-4.7] is conducted ☐ Yes ☒ No

   Provide the name(s) of any surface water body on or within 200 feet of the site._____

Free product or residual product is located within 100 feet from an ecological receptor..... ☐ Yes ☒ No

2. Available data indicates an impact on ecological receptor(s), surface water or sediment. ..... ☐ Yes ☒ No

☒ Initial Submission ☐ Interim Submission

☐ No Change (if no change, indicate last RE date and skip to Section G: _____)

SECTION G. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: _____

Representative First Name: Martin Representative Last Name: Judd

Title: Senior Director- Environmental Services Unit

Phone Number: (973) 491-7980 Ext: _____ Fax: (973) 461-4460

Mailing Address: One Penn Plaza East, 8th Floor

City/Town: Newark State: New Jersey Zip Code: 07105

Receptor Evaluation Narrative
New Jersey TRANSIT Linden Station And Park and Ride
Linden, Union County, New Jersey

The environmental issues at the NJ TRANSIT Linden Station and Park & Ride (Program Interest #012948), located at 101 West Elizabeth Avenue in Linden, New Jersey are related to historic operations at the Allied Building Supply site. This property was purchased by NJ TRANSIT in 1994 and is currently used as an asphalt-paved commuter parking lot for the adjacent Linden Station (Figure 1). Specifically, the former operations at the site included one 2,000-gallon gasoline underground storage tank (UST), and one 550-gallon heating oil UST, both of which were removed along with associated piping on June 24, 1993. Post remedial activities completed at the site included the excavation of gasoline-impacted soil, post-remediation sampling, and a groundwater investigation. No post removal soil samples were collected after removal of the 550-gallon fuel oil UST due to collapse of the excavation during the removal activities. Soil sampling analytical results from the heating oil UST were submitted to the New Jersey Department of Environmental Protection (NJDEP). Subsequently, additional soil was removed and post excavation sampling results were below NJDEP Soil Cleanup Criteria (SCC). The NJDEP issued a no further action (NFA) for the 2,000-gallon gasoline UST on November 16, 1998.

Groundwater investigation activities, including the installation of five groundwater monitoring wells, were performed from 1993 through 1998. Analytical results from multiple groundwater sampling events indicated elevated levels of benzene, toluene, ethylbenzene, and total xylenes (BTEX) and lead above the NJDEP Ground Water Quality Standards (GWQS). A proposal to establish a Classification Exception Area (CEA) with a remedial approach of monitored natural attenuation was approved by the NJDEP on November 16, 1998. NJDEP correspondence dated August 13, 2009 required that NJ TRANSIT submit a CEA Biennial Certification for the site.

The vapor intrusion pathway is not a concern on or adjacent to the site as the site is entirely paved with asphalt and there are no structures within 30 feet of the monitoring wells.

The site is not located within any wellhead protection area.

The only sensitive receptors identified within the 200-foot search radius are residential dwellings (Figure 2 and Table 1). No potable or non-potable wells were identified within the well search radius (Figure 3).

NATIONAL RAILROAD PASSENGER CORPORATION

A corporation organized and existing under the laws of the District of Columbia, having an office at 400 North Capitol Street, N.W., Washington, D.C., 20001, hereinafter referred to as the Grantor

and

NEW JERSEY TRANSIT CORPORATION

An instrumentality of the State of New Jersey, successor to the Commuter Operating Agency of the New Jersey Department of Transportation (COA), having an office at McCarter Highway and Market Street, Newark, New Jersey, 07101, hereinafter referred to as the Grantee.

WHEREAS, pursuant to the Regional Rail Reorganization Act of 1973, as amended (Act), the Final System Plan (FSP) of the United States Railway Association (USRA) designated for conveyance by the Consolidated Rail Corporation (Conrail) to Grantor certain rail station and other operating properties; and

COUNTY OF UNION
CONSIDERATION 157,589.00
REALTY TRANSFER FEE Ex
DATE 1-31-86 BY [illegible]

Prepared by: Arnold Adams

Arnold Adams, Esquire
National Railroad Passenger Corporation
400 North Capitol Street, NW
Washington, D.C. 20001

WHEREAS, Grantee believes the FSP, by amendment of the USRA Board of Directors adopted on March 3, 1976, offered the COA options exercisable within 900 days after conveyance to acquire certain of the passenger rail station and associated parking facilities to be conveyed to Grantor which exercise time was subsequently extended by Congress to three years after conveyance (April 1, 1979); and

WHEREAS, on April 1, 1976, Conrail deeded to Grantor the aforementioned properties, and on the same date Grantor gave Conrail a purchase money mortgage on the aforementioned properties; and

WHEREAS, on December 9, 1976, Grantor gave a second mortgage covering the aforementioned properties to the United States of America acting through the Federal Railroad Administration (FRA), which mortgage secured a Note dated December 9, 1976; and

WHEREAS, on September 15, 1978 and March 31, 1979, the COA, predecessor to Grantee, delivered by hand to Grantor checks for monies representing the net liquidation value of the properties as established by USRA; and

WHEREAS, a dispute arose between Grantor and Grantee as to the nature and extent of the rights, options and interests, if any, granted by USRA to COA; and

WHEREAS, Grantee has filed a motion before the Special Court, Regional Rail Reorganization Act of 1973, Misc. No. 75-3(A), to adjudicate its option rights and Grantor has opposed that motion; and

WHEREAS, Grantor has filed a complaint before the Special Court, Regional Rail Reorganization Act of 1973, No. 81-1, against USRA challenging the USRA's interpretation of the Act with respect to Grantee's options; and

WHEREAS, the parties have agreed to settle this action and to reflect the terms and conditions for such settlement in an Agreement (the Settlement Agreement) which Settlement Agreement is attached hereto and incorporated herein as Appendix A, followed by the formal conveyance by Grantor of the rail stations and operating properties by deeds in fee or by easements, as appropriate.

NOW, THEREFORE, the Grantor, for and in consideration of the sum of One Hundred Fifty-Seven Thousand Five Hundred Eighty-Nine Dollars ($157,589.00) and other good and valuable consideration, lawful money of the United States of America, unto it well and truly paid by the said Grantee, at or before the sealing and delivery of this Deed, the receipt whereof is hereby acknowledged, does by these presents grant, convey, remise, release and forever Quitclaim unto the said Grantee, its successors and assigns:

A. All of the Grantor's right, title and interest, legal and equitable, in and to the real property located in the State of New Jersey, County of Union, as described in Exhibit A to Appendix A attached to this Deed as a part hereof, together with all of the appurtenances, hereditaments, franchises, ways, waters, minerals, rights, privileges, improvements, fixtures, licenses, leaseholds, reversions, easements, rights under operating trackage and joint

facility agreements, rents, issues, profits and other interests and items belonging to or in any way appertaining to such real property, including but not limited to all real property items that would properly be recorded in Accounts 1 through 45 and 90 of the Property Accounts prescribed by the Interstate Commerce Commission for Railroad Companies in its Uniform System of Accounts, 49 C.F.R. Part 1201, to the extent that such interests and items belong or in any way appertain to such real property, except as those interests and items belong or appertain to the real property hereinafter reserved and excepted.

B. 1. The easement of reasonable and necessary access over the Grantor's adjacent property to permit Grantee access for maintenance, ingress, egress, etc., as specified in the Settlement Agreement, provided that such easement shall not interfere with Grantor's enjoyment of its adjacent property and any uses to which it may put such property.

2. Permanent easements for Parcels described in Exhibit A and denominated by the initial letter "E" for rail purposes, including rights to use, maintain and improve this property. Additionally, Grantor expressly conveys all its right, title and interest to all existing platforms, lighting facilities, signs and other appurtenances situate on these easement parcels.

Covenants as to Grantor's Acts: Grantor promises that Grantor has committed no act to encumber the property, within the intent of N.J.S.A. 46:4-6.

RESERVING AND EXCEPTING, HOWEVER, TO THE GRANTOR:

C. 1. The easements and rights reserved by Grantor in the Settlement Agreement to the property conveyed to Grantee hereby.

2. Easements for the existing rights of Conrail (Conrail easements) reserved in the Settlement Agreement.

D. All mineral rights retained by the Grantor's predecessors in title in any parcel as to which an interest in the surface is not conveyed by this Deed.

TO HAVE AND TO HOLD the real property and the easements and rights hereby conveyed to the Grantee, free and clear of any liens and encumbrances insofar as said real property, easements and rights were conveyed to Grantor so free and clear by Grantor's immediate predecessor in title or interest therein and free from Grantor's acts, BUT SUBJECT, HOWEVER, to (i) those easements and rights reserved and excepted pursuant to Paragraphs C and D, (ii) all existing licenses, easements, leases (other than those which may have been created to secure payment of a financial obligation), and operating, trackage right and joint facility agreements, (iii) Operating Rights Grants, if any, from the Grantor to a third party conveyed pursuant to the Act; and (iv) the obligation of the Grantee to use, operate, maintain and repair the real property conveyed by this Deed so as to permit the Grantor freely to exercise its railroad service.

The Grantor hereby covenants that the Grantor will perform, execute, acknowledge and deliver any and all such further acts, deeds, assignments and other instruments as may be reasonably requested by the Grantee to convey, confirm, clarify, identify or

more precisely describe the real property and the easements and rights conveyed by this Deed or intended so to be in order to carry out the intent of this Deed in light of the designations contained in the FSP which has been certified to the Special Court by the United States Railway Association pursuant to the Act, and to effect the recordation of, or otherwise perfect, this Deed and all such other deeds, assignments and instruments under any applicable statute, ordinance, rule or regulation.

All of the covenants of the Grantor and the Grantee, respectively, shall be deemed to be real covenants and shall run with the land.

THE WORDS "Grantor" and "Grantee" used herein shall be construed as if they read "Grantors" and "Grantees," respectively, whenever the sense of this instrument so requires and whether singular or plural, such words shall be deemed to include in all cases the successors and assigns of the respective parties.

IN WITNESS WHEREOF, the said Grantor has caused this Deed to be duly executed as of the day and year first herein written.

SETTLEMENT AGREEMENT COVERING
AMTRAK/NJ TRANSIT
900 DAY OPTION PROPERTIES

This Settlement Agreement (Agreement) is made this 13th day of DECEMBER 1982, between the National Railroad Passenger Corporation (Amtrak), a corporation organized and existing under the laws of the District of Columbia with an office at 400 North Capitol Street, N.W., Washington, D.C. 20001, and the New Jersey Transit Corporation (NJ Transit), successor to the Commuter Operating Agency of the New Jersey Department of Transportation (COA), with an office at McCarter Highway and Market Street, Newark, New Jersey.

WHEREAS, pursuant to the Regional Rail Reorganization Act of 1973, as amended (Act), the Final System Plan (FSP) of the United States Railway Association (USRA) designated for conveyance by the Consolidated Rail Corporation (Conrail) to Amtrak certain rail station and other operating properties; and

WHEREAS, NJ Transit believes the FSP, by amendment of the USRA Board of Directors adopted on March 3, 1976, offered the COA options exerciseable within 900 days after conveyance to acquire certain of the passenger rail station and associated parking facilities to be conveyed to Amtrak, which exercise time was subsequently extended by Congress to three years after conveyance (April 1, 1979); and

WHEREAS, on April 1, 1976, Conrail deeded to Amtrak the aforementioned properties, and on the same date Amtrak gave Conrail a purchase money mortgage on the aforementioned properties; and

WHEREAS, on December 9, 1976, Amtrak gave a second mortgage covering the aforementioned properties to the United States of America acting through the Federal Railroad Administrator (FRA), which mortgage secured a Note dated December 9, 1976; and

WHEREAS, on September 15, 1978, and March 31, 1979, the COA delivered by hand to Amtrak checks for monies representing the net liquidation value of the properties as established by USRA; and

WHEREAS, a dispute arose between Amtrak and NJ Transit as to the nature and extent of the rights, options and interests, if any, granted by USRA to NJ Transit; and

WHEREAS, NJ Transit has filed an action before the Special Court, Regional Rail Reorganization Act of 1973, Misc. No. 75-3(A), to adjudicate its option rights and Amtrak has opposed that action; and

WHEREAS, Amtrak has filed a complaint before the Special Court, Regional Rail

BOOK 3401 PAGE 933

Reorganization Act of 1973, No. 81-1, against USRA challenging the USRA's interpretation of the Act with respect to NJ Transit's options; and

WHEREAS, the parties have agreed to settle this action and to reflect the terms and conditions of such settlement in this Agreement, followed by the formal conveyance by Amtrak of the rail stations and operating properties by deeds in fee or by easements, as appropriate,

NOW, THEREFORE, in consideration of the benefits conferred herein, the parties intending to bind their successors and assigns agree as follows:

ARTICLE I

NJ TRANSIT ACQUIRED PROPERTIES

101. Conveyance

(a) Definitions

(1) "Fee Properties"

Those properties conveyed herein by Amtrak to NJ Transit in fee simple.

(2) "Easement Properties"

Those properties in which Amtrak retains fee simple title but conveys to NJ Transit an easement for rail purposes such as parking, station platform, rail connection, etc.

(3) "Acquired Properties"

When referred to collectively herein Fee Properties and Easement Properties shall be referred to as "Acquired Properties."

(b) Amtrak

(1) Subject to the reservation of rights set forth herein, Amtrak will convey by deed or deed of easement to NJ Transit those properties described in Section 106 and Article III including but not limited to buildings, facilities, platforms, parking lots and land as shown and described in Exhibit A and Exhibits E-1 and E-2.

(2) Deeds in the form attached as Exhibit B conveying Amtrak's interest in the Acquired Properties will be quitclaim and will follow the general format and content of those deeds previously conveyed by Conrail to Amtrak, except that Amtrak will covenant against grantor's acts in that it has delivered the deeds without encumbrances (except encumbrances by virtue of the agreements described in Sections 101(c)(2) and 103(c) and easements and licenses

PG 3481 - 940

such as those granted to utility companies) and free of any liens. Because of the provisions of Section L.09(a)(1) of the December 9, 1976 second mortgage held by FRA, Amtrak asserts that FRA does not possess such a lien on the Acquired Properties as to impede their conveyance. Amtrak will, however, obtain a release of any interest held by the United States in the Acquired Properties for the period of time for which it has retained control over the Acquired Properties, that is, from April 1, 1976, to the date of delivery of the deeds. Amtrak covenants that the April 1, 1976 purchase money mortgage held by Conrail on the Acquired Properties has been satisfied, discharged and recorded with the Secretary of State, State of New Jersey. The date of acquisition as set forth in the deeds will be July 1, 1981.

(3) NJ Transit shall have easements over adjacent Amtrak property as may be reasonable and necessary for access for maintenance, ingress, egress, etc., to Acquired Properties provided that such easements shall not interfere with Amtrak's enjoyment of its adjacent property and any uses to which it may put such property.

(c) NJ Transit

(1) NJ Transit will accept deeds containing the Amtrak reservations set forth in this Agreement.

(2) Conrail Easements - Amtrak reserves existing rights established for Conrail operations by the Northeast Corridor (NEC) Freight Operating Agreement and the NEC Commuter Operating Agreement between Amtrak and Conrail dated April 1, 1976.

(3) Upon delivery of deeds by Amtrak, NJ Transit will simultaneously record the deeds and file a release of the Lis Pendens filed against the Acquired Properties and recorded in Union, Mercer and Middlesex Counties.

102. Consideration

Amtrak will accept as the entire monetary consideration for the conveyance of the Acquired Properties the net liquidation value of the Acquired Properties as established by USRA, as set forth in letters dated September 15, 1978 and March 31, 1979 to Amtrak. It is stipulated and

BOOK 3461 PAGE 941

agreed for the purposes of this Agreement that no additions, betterments or improvements have been made to any of the properties by Amtrak.

103. Rights Reserved to Amtrak

(a) Easements

(1) Amtrak reserves easements for continuous access to and through the Acquired Properties and for inspecting, maintaining, improving, supplementing, reducing, or relocating any track, catenary system, signal system, communications system, components of any such system, slopes, drains, bridges, buildings or any other structures or facilities used in the operation of its railroad service.

(2) In the exercise of its easement rights, Amtrak will first obtain the approval of NJ Transit for all work to be performed on the Fee Properties or on platforms, or other NJ Transit owned improvements or Easement Properties except that prior NJ Transit approval will not be required for access to such properties by Amtrak employees for the purpose of routine inspections and emergency repairs.

(3) The procedure for obtaining NJ Transit review and approval is as follows: Amtrak will give prior written notice of the nature, extent, location and schedule of the work to be performed. Within thirty (30) days of receipt of notice NJ Transit will inform Amtrak of its approval or that the work will cause adverse impact to NJ Transit property, operations or maintenance or the costs thereof. Failure of NJ Transit to comment shall be construed as approval. If adverse impact should be found, NJ Transit will recommend changes and Amtrak and NJ Transit will agree on changes which will lessen or eliminate this impact. NJ Transit approval will not be withheld unreasonably.

(b) Current Amtrak Occupancies and Relocation

Amtrak currently occupies all or portions of certain buildings and lands conveyed pursuant to this Agreement for storage of materials, offices, operating facilities, employee parking, etc. (solely used facilities). A list of these solely used facilities as of July 1, 1981 is attached hereto as Exhibit C. Amtrak may continue to occupy these premises for the purposes listed without fee except for costs. In the event that a relocation request is made by NJ Transit, Amtrak will first endeavor to

BOOK 3461 PAGE 942

relocate on Amtrak property. If this is not feasible, NJ Transit will make available an alternative site acceptable to Amtrak. Cost allocations for Amtrak solely used facilities and for relocation are set forth in Section 105(a)(3).

(c) Longitudinal and Transverse Occupancies and Revenues

Amtrak will retain rights and revenues for current and future longitudinal wire occupancies traversing the Fee Properties which are or may be attached to existing Amtrak catenary structures or placed in existing signal and communication ducts.

Amtrak will also retain rights and revenues for those portions of longitudinal or transverse underground occupancies in its property including Easement Properties.

(d) NEC Parking

In order to protect access by Amtrak passengers for parking in lots which will be owned and operated by NJ Transit, the deeds for such lots will state that: "In administering parking arrangements at stations served by Grantor, Grantee will regulate the use of the lots in a manner which does not impair their usefulness to intercity rail passengers."

(e) Engineering Review

(1) In the event that work is to be performed by NJ Transit or its agents or contractors on the Acquired Properties which might affect operations or maintenance of the NEC, Amtrak reserves the right for its Chief Engineer to review and approve the plans for this work, except that prior approval will not be required for routine inspections, emergency repairs, and cleaning of platforms, buildings and grounds.

(2) The procedure for obtaining Amtrak review and approval is as follows: NJ Transit will give prior written notice of the nature, extent, location and schedule of the work to be performed. Within thirty (30) days of receipt of notice, Amtrak will inform NJ Transit of its approval or that the work will cause adverse impact to Amtrak property, operations or maintenance or the costs thereof. Failure of Amtrak to comment shall be construed as approval. If adverse impact should be found, Amtrak will recommend changes and NJ Transit and Amtrak will agree on changes which will lessen

BOOK 3461 PAGE 943

or eliminate this impact. Amtrak approval will not be withheld unreasonably.

104. Revenues on Acquired Properties - Transfer of Existing Agreements

(a) Revenues

Amtrak and NJ Transit will retain revenues generated on their respective fee properties except as set forth below:

(1) Wire and Pipe Occupancies

With the exception of the reservations to Amtrak set forth above in Section 103(c), transverse and longitudinal wire and pipe occupancy net revenues shall be received according to the ownership of the fee involved. For existing occupancies, Amtrak and NJ Transit will use their best efforts to identify these occupancies and divide net revenues therefrom in proportion to the extent of the fee involved. Both parties reserve the right to negotiate new separate agreements for existing or new occupancies on, over and under their respective properties, except as set forth in Section 103(c).

(2) Parking Revenues

NJ Transit shall receive all revenues generated by rail passenger parking on the Acquired Properties with the exception of Princeton Junction as set forth in Article II of this Agreement.

(3) Advertising Revenues

NJ Transit shall receive all revenues from advertising located on the Acquired Properties except as set forth below:

(i) Princeton Junction and Trenton

Amtrak will share equally with NJ Transit net advertising revenues received from advertising located on the Princeton Junction and Trenton Acquired Properties.

(ii) Easement Properties

With regard to Easement Properties, NJ Transit will receive all revenues from advertising located on platforms on Easement Properties. On non-platform portions of Easement Properties, NJ Transit will receive revenues derived from advertising directed primarily at rail passengers while Amtrak will receive revenues from advertising directed primarily at non-rail passengers, such as highway users.

BOOK 3161 PAGE 944

(b) Transfer of Existing Leases and Other Agreements to NJ Transit

As of the effective date of this section, Amtrak will assign or otherwise transfer to NJ Transit all leases, subleases and other agreements covering the Fee Properties and those Easement Properties for which NJ Transit is entitled to revenues under this section. Amtrak will identify these agreements and supply NJ Transit with copies of same prior to transfer.

(c) The effective date of this section is April 1, 1982.

105. Allocation of Maintenance Costs and Responsibilities - Capital Improvements

(a) Maintenance Cost Allocation

(1) Jointly Used Acquired Properties

Cost allocation for expenses incurred in maintaining jointly used Acquired Properties shall be apportioned between Amtrak and NJ Transit according to their respective passenger use of said Acquired Properties as determined by passenger on and off count surveys taken from time to time. For the purpose of this allocation, maintenance expenses are defined as those costs incurred in the upkeep of existing facilities, buildings and grounds including but not limited to cleaning, repairing and refurbishing. Not included in maintenance expenses are capital improvements or alterations made to existing facilities, buildings and grounds at a future date or construction of new facilities or buildings. See Subsection (c) below.

(2) Acquired Properties Not Used by Amtrak

Expenses related to maintaining Acquired Properties which are not used by Amtrak will be the responsibility of NJ Transit.

(3) Solely Used Amtrak Facilities and Relocation Costs

(i) Amtrak will bear all costs of those solely used Amtrak facilities designated or reserved in Section 103(b) and Exhibit C, and of other solely used Amtrak facilities on the Fee Properties which may be added subsequently.

(ii) In the event that NJ Transit requests Amtrak to move its operation from a solely used facility, referred to in (i)

BOOK 3101 PAGE 945

above, relocation costs will be borne by NJ Transit. Relocation costs will be limited to those costs reasonably incurred in the physical movement of Amtrak's facility, including movement of equipment, records and other property associated therewith, to a new location as provided in Section 103(b). In the event that Amtrak chooses to relocate without a relocation request by NJ Transit, costs of relocation will be borne by Amtrak. Upon relocation for whatever reason, Amtrak will leave the vacated NJ Transit property in a clean and safe condition; however, deterioration caused by reasonable wear and tear, acts of God and acts beyond Amtrak's control are excepted.

(b) Maintenance Responsibilities

(1) Interim Period - Amtrak and NJ Transit realize that an interim period will be required to effect an orderly transition in station maintenance responsibility. During this period, Amtrak will continue to be responsible for maintenance and will be reimbursed by NJ Transit for NJ Transit's share of such maintenance except that in the case of Trenton, the current agreement covering maintenance shall continue in effect. This interim period will commence on the effective date of this section and continue through December 31, 1982, unless sooner terminated or extended in writing by the parties.

(2) Following the interim period, NJ Transit or its contractor will be responsible for maintenance of the Acquired Properties, except solely used Amtrak facilities as set forth in (3) below.

(3) Amtrak or its contractor will be responsible for maintenance of its solely used facilities.

(c) Capital Improvements and Alterations

Where capital alterations, additions or construction are undertaken at the request of and for the sole benefit of one party, that party shall bear all costs. If undertaken at the request of and for the benefit of both parties, as agreed in advance by the parties, costs will be apportioned by passenger count as set forth in Subsection (a)(1) above or as determined by the parties.

BOOK 3461 PAGE 946

(d) Effective Date

The effective date of this section is April 1, 1982.

106. Individual Acquired Properties

(a) General Property Conveyance Principles

The property boundaries for individual Acquired Properties are established based upon the following principles:

Generally, Amtrak will retain ownership of a standard 150 foot wide NEC right-of-way; however, in those instances where passenger station buildings encroach in whole or in part upon this width, Amtrak's retained right-of-way will be narrowed accordingly to permit NJ Transit to own the underlying land on which the buildings are located. Platforms within the right-of-way will be owned and controlled by NJ Transit and the underlying land will remain in the ownership of Amtrak with NJ Transit having appropriate easements for the use of such land for platform purposes. In a similar fashion, parking space which encroaches upon the right-of-way line will remain in the ownership of Amtrak with NJ Transit having an easement for such parking space.

(b) Active Station Properties

(1) Edison

Amtrak will convey to NJ Transit the property identified in Exhibit A-1.

(2) Elizabeth

Amtrak will convey to NJ Transit the property identified in Exhibit A-2.

(3) Jersey Avenue

Amtrak will convey to NJ Transit the property identified in Exhibit A-3.

(4) Linden

Amtrak will convey to NJ Transit the property identified in Exhibit A-4.

(5) Metro Park

Amtrak will convey to NJ Transit the property identified in Exhibit A-5.

(6) Metuchen

Amtrak will convey to NJ Transit the property identified in Exhibit A-6.

BOOK 3461 PAGE 947

(7) New Brunswick

Amtrak will convey to NJ Transit the property identified in Exhibit A-7.

(8)North Elizabeth

Amtrak will convey to NJ Transit the property identified in Exhibit A-8.

(9)North Rahway

Amtrak will convey to NJ Transit the property identified in Exhibit A-9.

(10)Princeton Junction

Amtrak will convey to NJ Transit the property identified in Exhibit A-10. The property identified in Exhibit A-10 together with other property owned by NJ Transit and Amtrak, all as identified in Exhibit D, shall be subject to the Amtrak/NJ Transit Agreement for Princeton Junction Properties as set forth in Article II below.

(11) Rahway

Amtrak will convey to NJ Transit the property identified in Exhibit A-11.

(12)Trenton

Amtrak will convey to NJ Transit the property identified in Exhibit A-12

(c) Inactive Station Properties

(1) Adams

Amtrak will convey to NJ Transit the property identified in Exhibit A-13 with the assurance by NJ Transit that no Amtrak maintenance of way property is affected at this location. NJ Transit will convey to Amtrak without fee an ingress and egress easement over its adjacent property to the Amtrak's proposed maintenance of way location.

(2) Deans

Amtrak will convey to NJ Transit the property identified in Exhibit A-14 .

BOOK 3461 PAGE 949

(3) Monmouth Junction

Amtrak will convey to NJ Transit the property identified in Exhibit A-15.

(4) Plainsboro

Amtrak will convey to NJ Transit the property identified in Exhibit A-16.

ARTICLE II

PRINCETON JUNCTION AGREEMENT

201. Intent of Parties

(a) Amtrak and NJ Transit hereby enter into an agreement (Princeton Junction Agreement) for the development of the entire Princeton Junction Properties as identified herein in Exhibit D. Exhibit D encompasses all properties owned at Princeton Junction by NJ Transit and Amtrak, including air rights over these properties (Princeton Junction Properties). This Princeton Junction Agreement shall be duly recorded by Memorandum of Agreement in Mercer County, New Jersey, situs of the properties.

(b) If in the future NJ Transit should conclude and Amtrak concur that joint development of the Princeton Junction Properties is not feasible or desirable, or that some disposition of the properties other than joint development offers the most feasible opportunity for maximizing the parties' return on the Princeton Junction Properties consistent with the goals set forth in Section 202, the proceeds, however realized, from such other development or disposition shall be shared by the parties equally in consideration of the settlement evidenced by the Agreement; except that, in no event shall Amtrak share under this subsection in revenues received from the Princeton Junction Properties currently used or developed in the future for rail passenger service for so long as these properties continue to be used for such service.

202. Goals

The goals of this Princeton Junction Agreement shall be: to enhance public transportation facilities serving Princeton Junction, which facilities include the Princeton Dinky, NEC commuter and intercity rail services and bus services; to stimulate increased usage of these public transportation

BOOK 3461 PAGE 940

facilities by encouragement of commercial and other development particularly suited to intercity and commuter rail passenger interests and occupations; to generate additional revenues for both parties through the fullest possible commercial development of the property consistent with the parties' transportation needs; and to attract private initiative and capital to assist in these goals.

203. General Provisions

(a) Amtrak will convey to NJ Transit the property as delineated in Exhibit A-10.

(b) The parties will immediately commence selection of a developer or developers of the Princeton Junction Properties, as set forth in Exhibit D, and will make a good faith effort to select such developer or developers within twelve (12) months of the execution of the Agreement, as more particularly set forth in Subsection (g) below.

(c) Each party will receive from the developer or developers necessary rights for the protection of right-of-way, station properties, parking needs, and other operating needs.

(d) Development terms will include a complete listing of permitted uses acceptable to NJ Transit and Amtrak.

(e) The development will be operated as a joint venture by NJ Transit and Amtrak or a wholly owned subsidiary of Amtrak, in which venture each party will be an equal partner. Either party will have a right of veto over development plans which unreasonably impinge upon areas needed for station, right-of-way, parking, or upon its other operating needs, or which violate the list of permissible uses under Subsection (d) above.

(f) Net income from development of the Princeton Junction Properties will be shared by the parties equally.

(g) The parties shall initiate development of the Princeton Junction Properties substantially as outlined below:

1. Amtrak and NJ Transit agree that they will use their best efforts to promote the fullest possible development of the entire Princeton Junction Properties consistent with applicable federal and state law as well as the parties' legitimate operating needs and interesst.
2. Upon execution of this Agreement, the parties agree to give

BOOK 3461 PAGE 950

prompt and serious consideration to any and all development proposals which either party may have received to date.

3. In the event none of those proposals are found acceptable, the parties agree that within six months of execution of this Agreement, they will solicit proposals for the development as a whole of the entire Princeton Junction Properties.

4. The parties will endeavor to agree as to the best proposal received as a result of that solicitation, and they further agree that neither party will reject the proposal which they collectively agree is the best proposal except upon presentation in writing to the other of reasonable economic or operating grounds.

5. If a development proposal is accepted which requires the developer to seek the elimination of restrictions on full development, such as height restrictions or other restrictive zoning ordinances, the parties agree to use their best efforts to support the elimination of those restrictions.

(h) 1. NJ Transit shall keep the number of spaces now available for parking and the revenues received therefrom forever, regardless of joint development (current spaces).

2. During the interim period prior to joint development, NJ Transit may, in a manner which does not diminish prospects for or value of joint development, construct additional rail passenger parking spaces (additional spaces) and retain all the revenues received therefrom.

3. When joint development has occurred and non-rail parking resulting from development is taking place (new spaces), parking spaces and parking revenues on the Princeton Junction properties will be allocated as follows:

   A. All current spaces and revenues therefrom will remain with NJ Transit, except as specified in D below.

   B. All revenues from new spaces shall be shared equally.

   C. Additional spaces required for joint development and revenues received therefrom shall be shared equally by the parties as new spaces. Additional spaces unaffected by joint development and the revenues received therefrom shall be

BOOK 3461 PAGE 951

retained by NJ Transit. Spaces added from time to time as appropriate for use of rail passengers and independent of joint development and the revenues therefrom shall be retained by NJ Transit.

D. If joint development requires use of any current spaces thereby diminishing NJ Transit's guarantee, the parties shall agree on other spaces, which collectively shall be of comparable revenue value, currently and prospectively, to go to NJ Transit to maintain the level of the guarantee.

204. Failure to Undertake Development

Failure of the parties to undertake a joint development of Princeton Junction as set forth in this Article shall not abrogate the remaining covenants and agreements set forth in the other Articles of this Agreement.

ARTICLE III

NJ TRANSIT ACQUIRED EASEMENTS AT SECAUCUS AND KEARNY

301. Secaucus Transfer and Connection

(a) Amtrak will convey to NJ Transit an easement as delineated on the map attached hereto as Exhibit E-1 for the purposes of construction, operation and maintenance of a transfer and/or connection facility at Secaucus, New Jersey. Consideration shall be predicated on the net liquidation value of the property previously established by USRA.

(b) Amtrak reserves the right to review and approve the plans for construction or operation of those facilities which may have an impact on the NEC. Such review will follow the procedures set forth in Section 103(e)(2).

302. Kearny Connection

(a) Amtrak will convey to NJ Transit an easement as delineated on the map attached hereto as Exhibit E-2 for the purposes of construction, operation and maintenance of a connection facility at Kearny, New Jersey. Consideration shall be predicated on net liquidation value of the property previously established by USRA.

(b) Amtrak reserves the right to review and approve plans for construction or operation of those facilities which may have an impact on the NEC.

BOOK 3461 PAGE 952

Such review will follow the procedures set forth in Section 103(e)(2).

ARTICLE IV

NJ TRANSIT ACQUIRED USE AND OCCUPANCY RIGHTS

401. Sunnyside Yard, New York

(a) Amtrak will continue to extend to NJ Transit the use, including ingress and egress, of appropriate portions of Sunnyside Yard as set forth in Exhibit F-1, for (1) maintenance of equipment used in NJ Transit's commuter passenger service, and (2) storage and staging of trains that originate and terminate out of Penn Station, New York City. Amtrak also agrees to permit NJ Transit to expand such use, so long as space is available and such proposed expansion does not interfere with Amtrak's current or anticipated intercity rail passenger operations.

(b) NJ Transit will assume its portion of the costs related to maintaining and operating this facility as agreed to by the parties or as established by a duly authorized third party such as the Interstate Commerce Commission.

(c) Amtrak reserves the right to develop or dedicate to commercial or non-rail use those portions of Sunnyside Yard not used or reasonably necessary for NJ Transit's commuter rail service as set forth in Subsection (a) above.

402. Harrison Yard

(a) Amtrak will grant to NJ Transit exclusive use and occupancy rights to property and facilities at Harrison, New Jersey as delineated in Exhibit F-2 annexed hereto and designated the Harrison (CNJ) Yard (CNJ Yard).

(b) In consideration of the settlement evidenced by this Agreement and the use and occupancy of the CNJ Yard, NJ Transit will assume maintenance of way and facility expenses for the CNJ Yard.

ARTICLE V.

GENERAL PROVISIONS

501. Claims for Personal Injury and Property Damage

A. Amtrak will, without regard to negligence or fault, indemnify and hold NJ Transit harmless from and against any and all claims for liability for personal injury, death or property damage by Amtrak employees arising

BOOK 3481 PAGE 953

in the course of their employment and by ticketed Amtrak passengers whose claims arise as a result of an act or occurrence on the Acquired Properties.

B. Each party will, without regard to negligence or fault, indemnify and hold the other harmless from and against any and all claims for liability for personal injury, death, or property damage by any person (other than employees or ticketed passengers of a party) alleging injury or damage occurring on Acquired Properties maintained by that party as set forth in Section 105.

C. NJ Transit will, without regard to negligence or fault, indemnify and hold Amtrak harmless from and against any and all claims for liability for personal injury, death or property damage by NJ Transit employees arising in the course of their employment or by ticketed NJ Transit passengers whose claims arise as a result of an act or occurrence on the Acquired Properties.

D. Each party agrees to provide the other prompt notice of all claims or suits wherein the other party is or may be liable under this indemnity provision. Each party agrees further to provide an indemnifying party full cooperation in the investigation of defense of any claim or suit covered herein.

502. Administrative Costs of Agreement

Each party will bear costs incurred in settlement, administering and carrying out the provisions of the Agreement in accordance with the obligations set forth. Particularly, Amtrak will bear all costs of preparation and delivery of deeds, deeds of easement and releases, transferal to NJ Transit of existing agreements and identification of existing wire and pipe occupancies. NJ Transit will continue to prepare maps and descriptions at its cost and will bear costs of recordation of documents in the State of New Jersey.

503. Subject to Availability of Funds

Pursuant to N.J.S.A. 27:25-17 all expenses incurred by NJ Transit shall be payable from funds available to the corporation therefor and no liability or obligation shall be incurred by the corporation beyond the extent to which monies are available. Furthermore, no debt or liability of the corporation shall be deemed or construed to create or constitute a debt, liability, or a

BOOK 3461 PAGE 354

loan or pledge of the credit of the State. In accordance with N.J.S.A. 27:25-17, all obligations of NJ Transit established by this Agreement which require expenditure of funds are subject to the availability of funds; provided, however, that in the event NJ Transit funds are not available to fund an obligation arising under a section of this Agreement, Amtrak will be relieved of any contractual obligation which would have arisen under that section.

504. Notice

All notices required by this Agreement shall be sent by certified mail, return receipt requested, to the parties at the addresses listed below, unless either party shall inform the other party in writing of any changes in or additions to designated parties or addresses:

Amtrak: Vice President Operations and Maintenance
Amtrak
400 N. Capital Street, N.W.
Washington, D.C. 20001

NJ Transit: Executive Director
NJ Transit Corporation
McCarter Highway & Market Street
P.O. Box 10009
Newark, NJ 07101

505. Entire Agreement and Severability

This Agreement together with the Princeton Junction Agreement embodies the entire agreement between the parties. If any provision herein is invalid, it shall be considered deleted herefrom and shall not invalidate the remaining provisions.

506. Modification

This Agreement may be modified only by written agreement of the parties.

507. Assignment

A party to this Agreement shall not assign or otherwise permit transfer of this Agreement, or of the rights or obligations set forth herein, except as set forth herein or with the prior written approval of the other party.

508. Special Court Actions - Stipulation and Withdrawal

Within ninety (90) days of the execution of this Agreement, a stipulation will be presented to the Special Court that affirms the execution of this Agreement. The parties will subsequently advise the Court when Amtrak

has conveyed to NJ Transit by deed, deed of easement and other documents specified herein the properties identified in Articles I, III and IV of this Agreement. After conclusion of the final conveyance, Amtrak will withdraw its complaint against USRA with prejudice, and the parties will dismiss the other complaints and motions with prejudice.

509. **Non-Precedence**

It is agreed by the parties that determinations set forth herein shall not be interpreted as precedence for other agreements.

510. **Best Efforts and Good Faith**

The parties covenant that they have entered into this Agreement in a spirit of good faith and shall use their best efforts to promptly carry forth its provisions. Wherever in this Agreement the consent or approval of either party is required or where either party has a veto power over the action of the other, such approval shall not be unreasonably withheld and such veto power shall not be unreasonably exercised.

511. **Effective Date of Agreement**

The effective date of this Agreement shall be April 1, 1982 except where otherwise provided in an Article or Section hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement.

Document No. _____

D E E D

THIS DEED made the _____ day of _____ one thousand nine hundred and eighty-two (1982).

By and Between

NATIONAL RAILROAD PASSENGER CORPORATION

A corporation organized and existing under the laws of the District of Columbia, having an office at 400 North Capitol Street, N.W., Washington, D.C. 20001, hereinafter referred to as the Grantor

and

NEW JERSEY TRANSIT CORPORATION

An instrumentality of the State of New Jersey, successor to the Commuter Operating Agency of the New Jersey Department of Transportation (COA), having an office at McCarter Highway and Market Street, Newark, New Jersey 07101, hereinafter referred to as the Grantee

WHEREAS, pursuant to the Regional Rail Reorganizaton Act of 1973, as amended (Act), the Final System Plan (FSP) of the United States Railway Association (USRA) designated for conveyance by the Consolidated Rail Corporation (Conrail) to Grantor certain rail station and other operating properties; and

WHEREAS, Grantee believes the FSP, by amendment of the USRA Board of Directors adopted on March 3, 1976, offered the COA options exerciseable within 900 days after conveyance to acquire certain of the passenger rail station and associated parking facilities to be conveyed to Grantor which exercise time was subsequently extended by Congress to three years after conveyance (April 1, 1979); and

WHEREAS, on April 1, 1976, Conrail deeded to Grantor the aforementioned properties, and on the same date Grantor gave Conrail a purchase money mortgage on the aforementioned properties; and

WHEREAS, on December 9, 1976, Grantor gave a second mortgage covering the aforementioned properties to the United States of America acting through the Federal Railroad Administrator (FRA), which mortgage secured a Note dated December 9, 1976; and

WHEREAS, on September 15, 1978, and March 31, 1979, the COA, predecessor to Grantee, delivered by hand to Grantor checks for monies representing the net liquidation value of the properties as established by USRA; and

WHEREAS, a dispute arose between Grantor and Grantee as to the nature and extent of the rights, options and interests, if any, granted by USRA to COA; and

WHEREAS, Grantee has filed an action before the Special Court, Regional Rail Reorganization Act of 1973, Misc. No. 75-3(A), to adjudicate its option rights and Grantor has opposed that action; and

WHEREAS, Grantor has filed a complaint before the Special Court, Regional Rail Reorganization Act of 1973, No. 81-1, against USRA challenging the USRA's interpretation of the Act with respect to Grantee's options; and

WHEREAS, the parties have agreed to settle this action and to reflect the terms and conditions for such settlement in an Agreement (the Settlement Agreement) which Settlement Agreement is attached hereto and incorporated herein as Appendix A, followed by the formal conveyance by Grantor of the rail stations and operating properties by deeds in fee or by easements, as appropriate.

NOW, THEREFORE, the Grantor, for and in consideration of the sum of _____, lawful money of the United States of America, unto it well and truly paid by the said Grantee, at or before the sealing and delivery of this Deed, the receipt whereof is hereby acknowledged, does by these presents grant, convey, remise, release and forever Quitclaim unto the said Grantee, its successors and assigns:

BOOK 3461 PAGE 986

A. All of the Grantor's right, title and interest, legal and equitable, in and to the real property located in the State of New Jersey, County of _____ as described in Exhibit A attached to this Deed as a part hereof, together with all of the appurtenances, hereditaments, franchises, ways, waters, minerals, rights, privileges, improvements, fixtures, licenses, leaseholds, reversions, easements, rights under operating, trackage and joint facility agreements, rents, issues, profits and other interests and items belonging to or in any way appertaining to such real property, including but not limited to all real property items that would properly be recorded in Accounts 1 through 45 and 90 of the Property Accounts prescribed by the Interstate Commerce Commission for Railroad Companies in its Uniform System of Accounts, 49 C.F.R. Part 1201, to the extent that such interests and items belong or in any way appertain to such real property, except as those interests and items belong or appertain to the real property hereinafter reserved and excepted.

B. 1. The easement of reasonable and necessary access over the Grantor's adjacent property to permit Grantee access for maintenance, ingress, egress, etc., as specified in the Settlement Agreement provided that such easements shall not interfere with Grantor's enjoyment of its adjacent property and any uses to which it may put such property.

2. Permanent easements for Parcels described in Exhibit A and denominated by the initial letter "E" for rail purposes, including rights to use, maintain and improve this

property. Additionally, Grantor expressly conveys all its right, title and interest to all existing platforms, lighting facilities, signs and other appurtenances situate on these easement parcels.

3. Covenants as to Grantor's Acts: Grantor promises that Grantor has done no act to encumber the property, within the intent of N.J.S.A. 46:4-6.

RESERVING AND EXCEPTING, HOWEVER, TO THE GRANTOR:

C. 1. The easements and rights reserved by Grantor in the Settlement Agreement to the property conveyed to Grantee hereby.

2. Easements for the existing rights of Conrail (Conrail easements) reserved in the Settlement Agreement.

D. All mineral rights retained by the Grantor's predecessors in title in any parcel as to which an interest in the surface is not conveyed by this Deed.

TO HAVE AND TO HOLD the real property and the easements and rights hereby conveyed to the Grantee, free and clear of any liens and encumbrances insofar as said real property, easements and rights were conveyed to Grantor so free and clear by Grantor's immediate predecessor in title or interest therein and free from Grantor's acts, BUT SUBJECT, HOWEVER, to (i) those easements and rights reserved and excepted pursuant to Paragraph C and D, all existing licenses, easements, leases (other than those which may have been created to secure payment of a financial obligation), and operating, trackage right and joint facility agreements, (iii) Operating Rights Grants, if any, from

the Grantor to a third party conveyed pursuant to the Act; and (iv) the obligation of the Grantee to use, operate, maintain and repair the real property conveyed by this Deed so as to permit the Grantor freely to exercise its railroad service.

The Grantor hereby convenants that the Grantor will perform, execute, acknowledge and deliver any and all such further acts, deeds, assignments and other instruments as may be reasonably requested by the Grantee to convey, confirm, clarify, identify or more precisely describe the real property and the easements and rights conveyed by this Deed or intended so to be in order to carry out the intent of this Deed in light of the designations contained in the FSP which has been certified to the Special Court by the United States Railway Association pursuant to the Act, and to effect the recordation of, or otherwise perfect, this Deed and all such other deeds, assignments and instruments under any applicable statute, ordinance, rule or regulation.

The Grantee hereby covenants that the Grantee will perform, execute, acknowledge and deliver any and all such further acts, deeds, assignments and other instruments as may be reasonably requested by the Grantor to confirm, clarify, identify or more precisely describe the real property and the easements and rights reserved and excepted from this conveyance or intended so to be in order to carry out the intent of this Deed in light of the designations contained in such Final System Plan, and to effect the recordation of, or otherwise perfect, this Deed and all such other deeds, assignments and instruments under any applicable statute, ordinance, rule or regulation.

All of the covenants of the Grantor and the Grantee, respectively shall be deemed to be real covenants and shall run with the land.

THE WORDS "Grantor" and "Grantee" used herein shall be construed as if they read "Grantors" and "Grantees," respectively, whenever the sense of this instrument so requires and whether singular or plural, such words shall be deemed to include in all cases the successors and assigns of the respective parties.

IN WITNESS WHEREOF, the said Grantor has caused this Deed to be duly executed the day and year first herein written.

DEED 49283

Prepared by: (Print signer's name below signature)
RONALD J. NELSON, ESQ.

This Deed is made on December 20, , 1993 .

BETWEEN

101 WEST ELIZABETH AVENUE CORP.,

a corporation of the state of NEW JERSEY
having its principal office at 581 Rahway Avenue, Union, New Jersey 07083
referred to as the Grantor.

AND

NEW JERSEY TRANSIT CORPORATION, an instrumentality of the State of New Jersey,

whose post office address is One Penn Plaza East, Newark, New Jersey 07105-2246
referred to as the Grantee.

The word "Grantee" shall mean all Grantees listed above.

Transfer of Ownership. The Grantor grants and conveys (transfers ownership of) the property described below to the Grantee. This transfer is made for the sum of EIGHT HUNDRED THOUSAND and 00/100 ($800,000.00) DOLLARS

The Grantor acknowledges receipt of this money.

Tax Map Reference. (N.J.S.A. 46:15-2.1) Municipality of Linden
Block No. 254 Lot No. 10 Account No.
☐ No property tax identification number is available on the date of this Deed. (Check box if applicable.)

Property. The property consists of the land and all the buildings and structures on the land in the City of Linden
County of Union and State of New Jersey. The legal description is:

BEING known and designated as Lot 10 Block 254 on the official Tax Map of the City of Linden and being described as follows:

BEGINNING at a point in the southeasterly line of (West) Elizabeth Avenue distant northeasterly along same 75.00 feet from the northeasterly line of Lumber Street and running; thence

1) North 47 degrees 50 minutes East along said line of West Elizabeth Avenue 357.16 feet to the southwesterly line of land now or formerly of Meeker Wood; thence

2) South 57 degrees 42 minutes East along said land of Meeker Wood 258.67 feet to land now or formerly of the Pennsylvania Railroad; thence

3) South 47 degrees 50 minutes West along said land of the Pennsylvania Railroad 368.13 feet; thence

4) North 55 degrees 20 minutes West 255.95 feet to the point and place of BEGINNING.

SUBJECT to agreements, easements, encumbrances, conditions, liens, and other restrictions of record and such facts as an accurate survey may disclose.

BEING the same premises conveyed to 101 West Elizabeth Avenue Corp., a New Jersey Corporation, by Deed from Leo Neiwirth, Fiscal Agent for Allied Lumber Company, Inc. dated November 26, 1979 and recorded in the Office of the Register of Union County on November 28, 1979, in Deed Book 3205, Page 91.

BEING the same premises conveyed to 101 West Elizabeth Avenue Corp., a New Jersey Corporation, by Deed from 101 West Elizabeth Avenue Corp. dated March 19, 1981 and recorded in the Office of the Register of Union County on April 23, 1981 in Deed Book 3253, Page 683.

CONSIDERATION $800,000.00
REALTY TRANSFER FEE $8,000.00
DATE 12/21/93

Promises by Grantor. The Grantor promises that the Grantor has done no act to encumber the property. This promise is called a "covenant as to grantor's acts" (N.J.S.A. 46:4-6). This promise means that the Grantor has not allowed anyone else to obtain any legal rights which affect the property (such as by making a mortgage or allowing a judgment to be entered against the Grantor).

Signatures. This Deed is signed and attested to by the Grantor's proper corporate officers as of the date at the top of the first page. Its corporate seal is affixed.

Attested by:

DOUGLAS WINTERS Secretary

101 WEST ELIZABETH AVENUE CORP.

DANIEL J. WINTERS President

STATE OF NEW JERSEY, COUNTY OF UNION SS.:

I CERTIFY that on December 20 , 19 93 ,

DOUGLAS WINTERS

personally came before me and this person acknowledged under oath, to my satisfaction, that:

(a) this person is the secretary of 101 WEST ELIZABETH AVENUE CORP. the corporation named in this Deed;

(b) this person is the attesting witness to the signing of this Deed by the proper corporate officer who is DANIEL J. WINTERS the President of the corporation;

(c) this Deed was signed and delivered by the corporation as its voluntary act duly authorized by a proper resolution of its Board of Directors;

(d) this person knows the proper seal of the corporation which was affixed to this Deed;

(e) this person signed this proof to attest to the truth of these facts; and

(f) the full and actual consideration paid or to be paid for the transfer of title is $ 800,000.00 (Such consideration is defined in N.J.S.A. 46:15-5.)

Signed and sworn to before me on December 20 , 19 93 .

Consideration $ 800,000-
Realty Transfer Fee $ Ex C*
Date 12-21-93 By DS
*Use symbol "C" to indicate that fee is exclusively for county use.

(1) PARTY OR LEGAL REPRESENTATIVE (See Instructions #3, 4 and 5 on reverse side)

Deponent, DANIEL J. WINTERS (Name), being duly sworn according to law upon his/her oath deposes and says that he/she is the President of 101 West Elizabeth Avenue Corp. (State whether Grantor, Grantee, Legal Representative, Corporate Officer, Officer of Title Co. Lending Institution etc.) in a deed dated _____, transferring real property identified as Block No. 254 Lot No. 10 located at 101 West Elizabeth Avenue, Linden, New Jersey (Street Address, Municipality, County) Union County and annexed hereto

(2) CONSIDERATION (See Instruction #6)

Deponent states that, with respect to deed hereto annexed, the actual amount of money and the monetary value of any other thing of value constituting the entire compensation paid or to be paid for the transfer of title to the lands, tenements or other realty, including the remaining amount of any prior mortgage to which the transfer is subject or which is to be assumed and agreed to be paid by the grantee and any other lien or encumbrance thereon not paid, satisfied or removed in connection with the transfer of title is $ 800,000.00

(3) FULL EXEMPTION FROM FEE Deponent claims that this deed transaction is fully exempt from the Realty Transfer Fee imposed by c.49, P.L. 1968, for the following reason(s). Explain in detail. (See Instruction #7.) Mere reference to exemption symbol is not sufficient

7(b) to an instrumentality of the State of New Jersey

(4) PARTIAL EXEMPTION FROM FEE *NOTE: All boxes below apply to grantor(s) only. ALL BOXES IN APPROPRIATE CATEGORY MUST BE CHECKED. Failure to do so will void claim for partial exemption. (See Instructions #8 and #9)*

Deponent claims that this deed transaction is exempt from the increased portion of the Realty Transfer Fee imposed by c. 176, P.L. 1975 for the following reason(s):

a) **SENIOR CITIZEN** (See Instruction #8)
- [ ] Grantor(s) 62 yrs. of age or over.*
- [ ] One or two family residential premises
- [ ] Owned and occupied by grantor(s) at time of sale.
- [ ] No joint owners other than spouse or other qualified exempt owners.

b) **BLIND** (See Instruction #8)
- [ ] Grantor(s) legally blind.*
- [ ] One or two family residential premises
- [ ] Owned and occupied by grantor(s) at time of sale
- [ ] No joint owners other than spouse or other qualified exempt owners.

DISABLED (See Instruction #8)
- [ ] Grantor(s) permanently and totally disabled.*
- [ ] One or two family residential premises
- [ ] Receiving disability payments
- [ ] Owned and occupied by grantor(s) at time of sale
- [ ] Not gainfully employed
- [ ] No joint owners other than spouse or other qualified exempt owners

*IN THE CASE OF HUSBAND AND WIFE, ONLY ONE GRANTOR NEED QUALIFY

c) **LOW AND MODERATE INCOME HOUSING** (See Instruction #8)
- [ ] Affordable According to H.U.D. Standards
- [ ] Meets Income Requirements of Region.
- [ ] Reserved for Occupancy.
- [ ] Subject to Resale Controls.

d) **NEW CONSTRUCTION** (See Instruction #9)
- [ ] Entirely new improvement
- [ ] Not previously used for any purpose.
- [ ] Not previously occupied.

Deponent makes this Affidavit to induce the County Clerk or Register of Deeds to record the deed and accept the fee submitted herewith in accordance with the provisions of c. 49, P.L., 1968.

1.0 INTRODUCTION

This Remedial Investigation Addendum Report summarizes the following activities which have taken place at the Allied Building Supply Company site at 101 West Elizabeth Avenue, Linden, New Jersey:

- Gasoline UST removal in June 1993.
- Gasoline UST excavation site assessment conducted in July 1993.
- Soil boring investigation and installation of one monitoring well in August 1993.
- Installation of three additional monitoring wells for contaminant delineation, soil boring sample collection from former gasoline tank excavation, post excavation soil sampling from heating oil UST excavation, and collection of soil samples from the soil pile associated with the gasoline tank excavation, to evaluate soil quality for disposal or reuse options in November 1993.
- A well search for potable wells within a one-mile radius of the site.

The well search has been ordered but not yet received, and will be forwarded to the agency when it has been received. Due to extreme weather conditions and snow cover, the elevation of the well casings have not yet been surveyed; this activity should be completed the week of 2/18/94 and the Form Bs will be submitted under separate cover.

2.0 PREVIOUS INVESTIGATIONS

2.1 Tank Closure Activities

The gasoline tank was removed on June 24, 1993 in accordance with an approved closure plan submitted by **Tri-State Environmental Consultants, Inc.** in Fort Lee, New Jersey in May 1993. The tank was removed by **JCB Environmental Contractors** of Greenbrook, New Jersey. A few small holes were noted in one side of the tank and small streaks of visibly impacted soil were noted. The Environmental Hotline was called and a discharge reported (Case No. 93-06-24-1425-2).

Approximately 70 tons of soil was removed during the tank removal and stockpiled onsite. A confirmation report was sent by **Bressler, Amery & Ross**, attorneys for the owner.

2.2 Investigation of Tank Grave

On July 26, 1993 soil samples were collected from the tank grave by **Sailer Environmental Incorporated** of Madison, Connecticut. Four side wall samples, two floor samples, and one duplicate sample were collected from the tank grave. Sample results are presented in Table 1, and sample locations are shown on Figure 1.

Based upon the analytical results from the soil samples, only two samples exceeded soil cleanup criteria for only one parameter, total xylenes, by a marginal amount. The report recommended installation of a ground water monitoring well.

2.3 Soil Boring/Well Installation

Three soil borings and one monitoring well were installed at the site on August 30, 1993 under the direction of **American Resource Consultants** of Doylestown, PA. Soil samples were collected from each soil boring and analyzed for volatile organic compounds. Results are summarized in Table 2, and boring locations are shown on Figure 2. A ground water sample was collected from the well on September 3, 1993.

The only soil sample exceeding the NJDEPE proposed soil "impact to ground water" cleanup guidelines was at the water table in well MW-1, and only exceeded the cleanup criteria for xylene (10 mg/kg). No other sample in the vicinity of the tank reported any exceedences of cleanup criteria, and the report recommended no further action for soils. The ground water sample reported anomalous levels of gasoline constituents.

3.0 FIELD ACTIVITIES

Field activities for this investigation included the following tasks:

Task 1 - Installation of Ground Water Monitoring Wells

Task 2 - Collection of Soil Samples

Task 3 - Collection of Ground Water Samples

Details of each task are presented in the following sections.

3.1 Task 1 - Installation of Ground Water Monitoring Wells

Three 4" diameter ground water monitoring wells designated as MW-2, MW-3 and MW-4 were installed at the **Allied** site on November 19, 1993. The monitoring wells were installed utilizing a truck mounted air rotary drilling rig operated by **Summit Drilling Company** and supervised by a **Vectre Corporation** hydrogeologist. Figure 3 is a site plan depicting the location of the newly installed wells, as well as existing well MW-1 (installed in August 1993 by a previous consultant). Well logs and copies of the well permits are provided in Appendix A.

Borings for monitoring wells MW-2 and MW-4 were advanced to a depth of 20 feet below grade, and well MW-3 was advanced to a depth of 15 feet below grade. Drill cuttings were field screened with a ThermoEnvironmental Model 580B organic vapor meter (OVM) utilizing a photoionization detector. No OVM readings above zero were noted in any well.

After drilling to the appropriate depth the wells were completed in accordance with **NJDEPE** guidance documents and specifications. Each well was constructed with 4-inch diameter PVC solid casing and 0.020-inch slotted well screen. Each well was developed with a bailer and completed with a flush-mounted manhole and locking cap. Well construction details are presented in Appendix A.

3	SEL-V1	

Subsurface materials consisted of seven to nine feet of red silty clay, overlying a fine to medium-grained sand varying in thickness from three to seven feet, underlain by red silty clay to the bottom of the hole. Well MW-3 was the most productive well, due to the thickest sand unit and shallowest water table. Wells MW-2 and MW-4 exhibited slow recharge characteristics, due to a lack of saturated thickness in the sand unit in MW-2 and a thinner sand unit in MW-4. Based upon purge rates during sampling, well MW-1 also has a relatively slow recharge rate.

Based upon local topography and surface hydrology, ground water flow is inferred to be southwest, towards Peach Orchard Brook. Well MW-2 was installed upgradient, well MW-3 was installed to assess the heating oil tank, and well MW-4 was installed to assess downgradient ground water conditions.

3.2 Soil Sample Collection

Soil samples were collected on November 24, 1994. A total of seven soil samples plus a field blank were collected. Soil sample locations are shown on Figure 4.

Soil Pile Samples

Soil excavated during removal of the gasoline tank was accumulated in three distinct piles at the **Allied** site. Location of the piles is shown on Figure 4. Soil pile #1 (sample SP1) is approximately 20 yd^3, soil pile #2 (sample SP2) is approximately 10 yd^3, and soil pile #3 (sample SP3) is approximately 45 yd^3 in volume. Each soil pile is approximately two to three feet high over most of its area, and SP1 is approximately four feet high at its highest point. The excavated material was generally sandy, with some clay, and concrete and asphalt pieces mixed in.

Each pile was screened with an OVM to identify the presence of organic vapors. Holes were dug using a shovel through the depth of the pile at several locations. No OVM readings above zero were recorded, and no odor or discoloration was observed. Screening locations are shown on Figure 4.

NOT TO SCALE		
FIGURE NUMBER 4	PROJECT NUMBER SEL-V1	VECTRE™ Corporation

Because field screening procedures did not identify contaminated areas and could not be used to bias the sample locations, a soil sample was collected from each pile at a central location in the thickest section of each pile, to minimize the possibility of collecting samples that had been subjected to intensive weathering and volatilization.

Soil samples for laboratory analysis were retrieved directly from the soil pile with a decontaminated stainless steel trowel by a **Vectre** geologist wearing clean disposable latex gloves. Prior to collection of soil samples, the sampling trowel was thoroughly cleaned and decontaminated using the following procedures:

. Device washed with laboratory cleaner and water
. Device rinsed 3 times with distilled water
. Device rinsed with reagent grade methanol and allowed to dry
. Device rinsed with distilled water
. Device allowed time to dry

The samples were stored in a cooler at approximately 4° C and transported to the laboratory. Samples from the soil piles were analyzed for volatile organic compounds +10 peaks using EPA Method 8240. Analytical results are presented in Section 4.

Heating Oil Tank Excavation Soil Samples

Three samples were collected from the excavation which formerly contained a 550-gallon heating oil tank for the office building on site. Samples were collected from the sidewalls of the excavation, approximately six inches above the water table. Each sample was collected from approximately six to eight inches into the sidewall, to avoid sampling material that was intensively weathered. The samples were comprised of a reddish silty clay. Each sample was collected with a trowel, labeled, and handled as described above. The samples were analyzed for total petroleum hydrocarbons using EPA Method 418.1. Analytical results are presented in Section 4.

Tank Grave Soil Sample Collection

A soil sample was collected from the location of former sample 105-T1-D. The sample was collected approximately 0.5 feet above the water table, using a long-handled soil trier. The sample submitted for analysis was collected from approximately eight to ten inches in the wall, to mitigate the effect of weathering in the open excavation. The sample was comprised of red silty clay. The sample was labeled GT-1 and submitted to a laboratory for analysis of volatile organics plus 10 peaks using EPA Method 8240.

3.3 Ground Water Sample Collection

Groundwater samples were collected from all four monitoring wells on December 7, 1994. Each well was purged at least 3 well volumes using a centrifugal pump, with the exception of MW-2, which was purged 91% of three volumes due to slow recharge. Depth to water and purging data are presented in Table 3.

After purging, each well was sampled using a new, disposable PVC bailer which was used for that well only. The samples were labelled and stored in a cooler at approximatley 4° C for transport to the laboratory. A trip blank and field blank were prepared for quality control/quality assurance and submitted for analysis. All samples were analyzed for volatile organic compounds plus 10 peaks using EPA Method 624. Analytical results are presented in Section 4.

MW-3	15	8.25	6.75	13.23	25
MW-4	20	8.75	11.25	22.05	23

* One foot of water in a 4-inch well equivalent to 0.653 gal

4.0 ANALYTICAL RESULTS

4.1 Soil Sample Results

Soil sample results are summarized on Table 4. A complete laboratory analytical report including QA/QC procedures is provided in Appendix B.

Soil Pile Samples

Analytical results for the soil pile samples reported no target compounds above detection limits. No non-target compounds were reported in samples SP-1 and SP-2, and sample SP-3 reported a total of 0.50 mg/kg non-target compounds.

Heating Oil Tank Samples

Analytical results for the samples collected from the heating oil excavation reported concentrations of total petroleum compounds ranging from 29 mg/kg in OT-1 to 45 mg/kg in OT-3.

Former Gasoline Tank Excavation Soil Boring Sample Results

Analytical results for sample GT-1, collected from the location of previous sample 105-T1-D, reported concentrations of 0.015 mg/kg for total xylenes and 3.95 mg/kg for non-target compounds.

4.2 Ground Water Sample Results

Ground water sample results are summarized on Table 5, and a copy of the laboratory data package is included as Appendix C. No target or non-target compounds were reported above detection limits in monitoring wells MW-2, MW-3, and MW-4. Well MW-1 reported detectable concentrations of benzene, toluene, ethylbenzene, and xylene.

table 4

tab 5

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

Soil Piles

Field screening and analytical results for soil samples collected from the soil piles indicate that no volatile organic compounds were identified in any of the soil piles. Because no compounds were identified above levels of regulatory concern, there are no restrictions on further use of the soil.

Heating Oil Tank Excavation

None of the post-excavation samples collected from the heating oil tank excavation reported concentrations of petroleum hydrocarbons above levels of regulatory concern.

Tank Grave Soil Sample

The soil sample collected from the gasoline tank excavation reported no compounds at concentrations above levels of regulatory concern.

Ground Water

Field screening of drill cuttings and analytical results for ground water samples indicate that none of the three wells installed for this investigation are impacted to any degree by volatile organic compounds. Analytical results for the sample collected from MW-1 report similar levels of BTEX as were reported during an earlier sampling round. Borings conducted in the area during previous investigation reported no soil contamination other than in the borehole converted to MW-1. It is apparent that the problem is very localized, because even in the presence of a transmissive sand no contaminants have been identified in the three other wells installed at the site.

5.2 Recommendations

Soil Piles

As there have been no contaminants detected in the soil piles above levels of regulatory concern, no further action is required and it is recommended that the soil be replaced in the excavation and clean backfill used to restore the site to grade.

Oil Tank Samples

As there have been no contaminants above levels of regulatory concern reported in the oil tank excavation, no further action is recommended beyond restoring to grade.

Tank Excavation

As there have been no contaminants above levels of regulatory concern reported in the resampling of the former soil boring 105-MW1-11 location, no further action is recommended.

Ground Water

The presence of gasoline constituents in MW-1 indicates that a very localized zone of contamination may exist in the immediate area. It is recommended that MW-1 be sampled again in approximately three months to document the natural remediation of ground water in its vicinity through biodegradation and attenuation. It is also recommended that all four monitoring wells be sampled within six months to reconfirm the stability of existing ground water conditions. The ground water samples should be analyzed for BTEX using EPA Method 602.

Re: Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County
Case Number 93-06-24-1425; UST Number 0129486

Dear Ms. Connors:

On June 24, 1993, the New Jersey Department of Environmental Protection (Department) received notification of a discharge of hazardous substances, regulated under the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21 et seq), which occurred from the above referenced facility. On September 23, 1993 and October 7, 1993, the Department sent letters stating the requirements for the proper investigation and the initiation of corrective action at Allied Building Supply's facility. The Department received a report from Tri-State Environmental Consultants, Inc. dated May, 1993 a report from Sailer Environmental Incorporated dated August 11, 1993 and two reports from Vectre Corporation dated February, 1994 and May, 1994 for Allied Building Supply indicating that the following steps were taken in compliance with our requirements.

In June, 1993, a 2,000-gallon steel gasoline underground storage tank (UST) was removed by JBC Environmental and Tri-State Environmental Consultants. Holes were discovered in the tank and visually stained soils observed. Approximately 70 tons of soils were excavated and stockpiled on site. The NJDEP hotline was notified of the discharge. A 550-gallon heating oil UST was abandoned in place at the same time as the 2,000-gallon tank was removed. In July, 1993, seven soil samples were collected from the base and sidewalls of the gasoline tank excavation by Sailer Environmental. Xylene was found to exceed the soil cleanup criteria in two samples and a duplicate. The base sample reported 48 ppm xylenes and the sidewall sample reported 47 ppm xylenes with the sidewall duplicate reporting 194 ppm xylenes. In August, 1993, American Resource Consultants installed three borings around the excavation area and collected six soil samples. All samples were within soil cleanup criteria except sample 105-MW1-11 which exhibited 131 ppm xylenes. This boring was developed into a monitoring well (MW-1). In December, 1993, Vectre Corporation installed three additional groundwater monitoring wells, collected one confirmatory soil sample from the 2,000-gallon gasoline UST excavation and collected three soil samples from the 550-gallon fuel oil tank excavation as well as collecting one soil sample from each soil pile. All soil sample results were below soil cleanup criteria.

Four groundwater monitoring wells are located on site. MW-1 is adjacent to and upgradient of the 2,000-gallon gasoline UST excavation area and recorded elevated levels of BTEX in September, 1993 (7.8 ppm) and December, 1993 (18.150 ppm). MW-2, MW-3 and MW-4 were sampled in December, 1993 with results below the method detection limits for all parameters. December 7, 1993 groundwater data indicates that depth to groundwater is between nine feet and eleven feet and groundwater flow is in an easterly/southeasterly direction. Given the groundwater flow direction, no downgradient wells exist for MW-1 or the 2,000-gallon gasoline UST excavation. No free phase product was observed in the groundwater monitoring wells.

The Allied Building Supply facility is located at 101 West Elizabeth Avenue in a commercial section of Linden, New Jersey. The site is bordered to the northeast and southeast by the new Jersey Transit Parking Lots, to the northwest by Elizabeth Avenue and to the southwest by commercial properties. A well search of the area indicated ninety-three monitoring wells, seven industrial wells, one potable well, six piezometers, one recovery well and three domestic wells within a one mile radius of the site.

Pursuant to the Authority vested in the Commissioner of the New Jersey Department of Environmental Protection (Department) by the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21 et seq.) and duly delegated to the Chief of the Bureau of Underground Storage Tanks, the above referenced Remedial Investigation Workplan, submitted on behalf of Allied Building Supply, is hereby approved by the Department as conditioned below:

I. Remedial Investigation

A. Soil

Allied Building Supply should indicate the linear distance between sample point GT-1 and former sample point 105-MW1-11.

B. Ground Water

Allied Building Supply shall install additional ground water monitoring wells to fully delineate the horizontal and vertical extent of ground water contamination. Contamination shall be delineated to the Ground Water Quality Standards, N.J.A.C. 7:9-6, unless otherwise approved by the Department. At a minimum, ground water monitoring wells shall be installed within the 2,000-gallon gasoline UST excavation area and downgradient of the 2,000-gallon gasoline UST excavation area given that MW-1 is upgradient of the excavation area and contains elevated levels of BTEX. If it is necessary to install wells off-site, Allied Building Supply shall provide documentation of written requests seeking access to install said monitoring wells on off-site properties within thirty (30) calendar days of receipt of this correspondence. Please be advised that N.J.S.A. 58:10B, a statute concerning site remediation, provides a cause of action for persons to obtain access to properties not owned by that person for the purpose of conducting remedial activities at that site. Please see the attached information on this provision of N.J.S.A. 58:10B for further information.

Allied Building Supply shall submit boring logs and the monitoring well construction details (Well Certification Forms A and B, enclosed) for all newly installed monitoring wells.

Allied Building Supply shall sample every monitoring well which does not contain free product and analyze the samples for volatile organics, methyl tertiary butyl ether (MTBE) and tertiary butyl alcohol (TBA) using EPA Method 624 calibrated for xylenes, with a library search (VOs) and for lead using EPA Method 200.7 (ICAP) or EPA 239.2 (Graphite Furnace) calibrated to achieve a method detection limit of 10 ppb. The SW-846 equivalent for this procedure is ICAP 3010/6010, sample prep 3050/6010 Furnace 3020/7421 sample prep 3050/2421.

For each sampling event, Allied Building Supply shall submit a table to include for each monitoring well: 1.) top of casing elevation; 2.) top of screen elevation; 3.) ground water elevation (corrected for free phase product if present); 4.) free phase product elevation (if present); and 5.) free phase product thickness (if present).

For each sampling event, Allied Building Supply shall construct a scaled isopleth map of free product thickness where free product exists, and scaled isopleth maps for dissolved product concentrations. Allied Building Supply shall submit the updated maps with each subsequent submittal.

Allied Building Supply shall construct and submit scaled, ground water table contour maps for each ground water sampling event.

C. **Receptor Evaluation**

The Department has no further requirements at this time.

II. Quality Assurance

All data submitted shall conform to the Reduced Laboratory Deliverables Format in accordance with the "Technical Requirements for Site Remediation", N.J.A.C. 7:26E (also see Enclosure #2), except where specifically indicated.

III. Other

A. **Certification Requirements**

It is important to note that effective April 25, 1992, all persons performing tank services must be certified per N.J.S.A. 58:10A-24.1-8. **All work related to any tank service must now be conducted by, or under the on-site immediate supervision of an individual certified in the activity being conducted.** All documents (permit applications, reports, proposals) submitted to BUST must be prepared and signed by a certified individual.

B. **Field Activity Notification**

Allied Building Supply shall notify the assigned BUST Case Manager at least 14 calendar days prior to implementation of all field activities. If Allied Building Supply fails to initiate sampling within 30 calendar days of the receipt of this letter, any requests for an extension of the required time frames may be denied.

C. Billing

On April 5, 1993, the UST Fee Rule (Amendments and New Rules at N.J.A.C. 7:14B) was proposed. This rule appeared in the February 22, 1994, New Jersey Register. Effective February 22, 1994, the Department will be billing you for the Department's oversight of all work conducted at your site. Documents submitted to the Department in accordance with the "Technical Requirements for Site Remediation" (N.J.A.C. 7:26E) will help reduce the time necessary for the Department oversight of your case. At this time, the Department intends to process bills on a semi-annual basis. Please consult the April 5, 1993 and February 22, 1994, State Registers for details. Copies can be obtained by contacting the Office of Administrative Law at (609) 588-6500. Your case manager should be contacted with any additional questions.

IV. Administrative Requirements

Based upon the above requirements and the data generated to date, Allied Building Supply is required to submit a RAW in accordance with N.J.A.C. 7:26E-6.2 and P.L. 1993, c.139 (S-1070). This document shall be submitted to this Bureau at the above address, within **ninety (90)** days upon receipt of this letter. The RAW shall detail all activities conducted to achieve compliance with the requirements listed in this letter (in the form of a Remedial Investigation Report (RIR) in accordance with N.J.A.C. 7:26E-4.9) and present a comprehensive remedial proposal for all soil and ground water contamination present as the result of the discharge(s) based upon all data collected to date. Please note that only one copy of the Quality Assurance/Quality Control Deliverables is needed. Guidance regarding the minimum requirements and presentation format for this document are provided below and in the enclosures.

It should be noted that if Allied Building Supply completes all of the above requirements and the data indicate that the remedial investigation has not been completed (i.e. contamination not completely delineated), Allied Building Supply shall submit a Remedial Investigation Workplan (RIW) in accordance with N.J.A.C. 7:26E-4.8 within the specified time frame. The RIW shall include a schedule of implementation of the remaining remedial investigation required and the submittal date of the RAW. Allied Building Supply also has the option of completing the remaining remedial investigation in accordance with N.J.A.C. 7:26E-4, followed by the submission of the RIR/RAW. If the latter option is selected, Allied Building Supply shall notify the Case Manager listed below, in writing, within two weeks prior to the specified time frame referenced above. This notification shall include a generic discussion of activities conducted to date and activities to be conducted, as well as a detailed schedule of implementation which includes the submission of the RIR/RAW.

The "Technical Requirements for Site Remediation" rules (N.J.A.C. 7:26E) appeared in the June 7, 1993, New Jersey Register and became effective on July 1, 1993. These rules contain the minimum technical requirements concerning the environmental investigation and remediation at contaminated sites or sites at which contamination is suspected. These rules are being used as the Department's primary technical document, replacing the Division of Responsible Party Site Remediation's Remedial Investigation Guide, the ECRA Cleanup Plan Guide, the Bureau of Underground Storage Tanks' (BUST) Scope of Work document (and appendices) and the BUST Technical Guidance Document.

It should be noted that technical requirements are included in subchapters 7, 8 and 9 of the regulations implementing the Underground Storage of Hazardous Substances Act (N.J.A.C. 7:14B-1-13 and 15). The responsible person(s) that are conducting an environmental investigation/remediation should be following the "Technical Requirements for Site Remediation" to accomplish the investigation. This will allow for consistent evaluation of any discharges and potential impacts.

V. Cleanup Criteria

The Department's most recent general guidance on contaminant cleanup criteria can be found in the April, 1994, edition of the Site Remediation Newsletter. It must be remembered, however, that the actual cleanup goal at a particular site is determined by the Department on a case-by-case basis and may be different than that in the above referenced newsletter. This variation may be due to many factors, including site specific human health and environmental exposure pathways, the presence of site contaminants not addressed in the newsletter, and site specific physical characteristics. In case specific situations, when cleanup criteria are modified from one previously established for that specific site, the Department will make every effort to expeditiously notify the responsible party. Please consult the Case Manager listed below to discuss any modifications which may impact your remedial actions.

If the person conducting a cleanup does not wish to remediate a contaminated site consistent with the newsletter, they shall submit a proposal to the Case Manager listed below that details the site specific circumstances and technical rationale for cleanup goals on a case-by-case basis.

Please note that the Ground Water Quality Standards (N.J.A.C. 7:9-6) have been adopted and appeared in the February 1, 1993, New Jersey Register. This rule adoption may impact requirements for ground water remediation and soil cleanup (i.e. where the soil may contribute contaminants to the ground water above the applicable standards) for a particular site and should be referenced and discussed with the Case Manager listed below.

VI. Remedial Action Workplan Submission

A. The Remedial Action Workplan Format (N.J.A.C. 7:26E-6)

To ensure a complete and timely review of the submittal, the RAW shall be a self-supporting document. As a guide to this process, the following elements shall be included in the formation of the plan:

1. Table of Contents

2. Introduction. Include site acreage, site use during the release, current site use, local land use, local topography, geology, and hydrogeology.

3. Summary of UST-Related Environmental Concerns. This shall include the results of all previous soil and ground water sampling in tabular form, including scaled site maps in the form of a Remedial Investigation Report in accordance with N.J.A.C. 7:26E-4.9. A detailed presentation of the items required (above) in this letter shall be included.

4. Effectiveness Analysis and Certification. This shall include an analysis and certification that the proposed remedial action meets the criteria contained in Section 35 (g) of P.L. 1993, c.139, including an analysis of long and short term effectiveness, implementability, timeliness, cost differential of permanent and nonpermanent remedies (if applicable), and community concerns. Please note that the Effectiveness Analysis and Certification supersedes the Remedial Alternative Analysis in N.J.A.C. 7:26E-5.

5. Summary of Proposed Remedial Actions. This shall include a detailed description of the remedial action and remedial technology(s) to be utilized for each area of concern for site cleanup, the media to be affected by each technology, scaled site maps detailing the areas where remedial action will be conducted (N.J.A.C. 7:26E-6.2(a)6), supporting technical information appropriate to the technology and volumes of each media to be remediated (including vertical and horizontal extent). The following technical information shall be included, where applicable to the remedial technology chosen:

   a. the hydraulic conductivity of the affected aquifer(s), including calculations;
   b. calculations and maps showing the predicted capture zones;
   c. calculations of the optimum pump rate and number of ground water and/or air withdraw points, or trench configuration required to control the plume;
   d. calculation of the ground water velocity prior to pumping;
   e. grain size analyses; and,
   f. soil total organic carbon content and pH.

   Also included shall be a map(s) and description of the ground water monitoring wells to be used to monitor the effectiveness of the remediation, both at the source and at down gradient compliance points.

6. Identification of the treatment and disposal methods to be employed for any ground water or soil to be removed.

7. Cleanup levels to be achieved. Be specific with regard to media and compounds.

8. Summary of any permits necessary to implement the cleanup. Please note that the Department will not approve a RAW which proposes to discharge to a publicly-owned treatment works (POTW) without the prior written consent of the POTW.

9. The RAW shall detail the specific activities that will be used to complete the proposed cleanup objectives.

10. A post-remedial sampling and monitoring plan for each media to be remediated.

11. A specific Schedule of Implementation of the RAW which includes milestones in the project in accordance with N.J.A.C. 7:26E-6.5(a).

12. A proposal for Quarterly Remedial Action Progress Reports for the duration of the cleanup in accordance with N.J.A.C. 7:26E-6.5(b) and (c).

13. Estimate of costs for the proposed remedial actions, which shall include:

a. capital costs;
b. operation and maintenance costs;
c. monitoring system costs;
d. laboratory costs;
e. engineering, legal and administrative costs;
f. contingency costs; and
g. summary of all remedial costs incurred to date (see below).

14. A summary of the **total** costs of the remedial actions conducted to date shall be submitted with any RAW or request for No Further Action. These costs shall be broken down as follows:

    a. tank removal and disposal costs;
    b. capital costs including monitoring systems and equipment;
    c. mobilization costs, operation and maintenance including labor, utilities and repairs;
    d. consulting and labor costs including engineering, environmental, legal and administrative costs;
    e. analytical/laboratory costs;
    f. sample collection costs; and
    g. disposal costs including transportation, waste transfer fees and facility tipping fees.

15. A quality assurance plan including proposed sampling and analytical methods pursuant to N.J.A.C. 7:26E-2.2.

16. A description of the soil and sediment erosion control and monitoring plan, and dust and odor control and monitoring plan, if applicable.

17. An administrative checklist is provided (Enclosure #1) and should be used as additional guidance when formulating the RAW.

B. Data Presentation

Summarized analytical results shall be provided in accordance with N.J.A.C. 7:26E-4.9. Please note that N.J.A.C. 7:26E-4.9 includes, but is not limited to, the requirement that compound specific data presentation is provided in tabular form. The Department recommends that Allied Building Supply refer to the attached "Guidelines for Data Presentation" for additional guidance in the preparation of its submittal (Enclosure #2). Allied Building Supply shall collect all samples in accordance with the sampling protocol outlined in the May 1992 edition of the "NJDEPE Field Sampling Procedures Manual".

C. Permit Applications

All appropriate permit applications shall be submitted either prior to or in concert with the RAW submission. Copies of all permit application cover letters shall be provided with the RAW. In addition, the Department has recently established the Office of Permit Information Assistance (OPIA). OPIA's responsibilities include providing permit information to the public and assisting permit applicants through the permit coordination process when a project requires permits from various programs. OPIA can be reached at (609) 984-0857.

As a reminder, a New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Ground Water (DGW) permit will be required for any remedial system which involves a direct discharge to ground water (re-injection, overland flow, etc.) and some on-site soil treatment technologies which include a discharge to ground water. Since the case manager will be processing the NJPDES-DGW permit, the NJPDES-DGW permit application shall be submitted directly to the BUST Case Manager listed below. The DGW Permit for re-injection will also act as the Treatment Works Approval for the site. However, a licensed operator is required for the treatment system in accordance with N.J.A.C. 7:10-13 et seq. Please note that if ground water remediation activities result in a discharge to surface water, Allied Building Supply shall also obtain a NJPDES Discharge to Surface Water Permit (DSW), Category B (Industrial/Commercial Surface Water Discharge) or Category B4B (General Ground Water Petroleum Products Clean-up (GPPC) Permit). Any

discharge to a POTW in excess of 25,000 gallons per day requires a NJPDES Significant Indirect User Permit (NJPDES-SIU), Category L (Indirect Discharge to POTW). If ground water will be treated prior to discharge to surface water or to a POTW, a Treatment Works Approval (TWA) shall also be obtained. Air discharges from any remedial systems also require permit applications to be submitted to the Bureau of New Source Review. Finally, surface or ground water withdrawal in excess of 100,000 gallons per day (or 10,000 gallons or more in critical aquifers) requires approval by the Department. For further information contact, the Bureau of Permit Management (NJPDES-DSW or SIU) at (609) 984-4428, the Bureau of Connection and Construction (TWA) at (609) 984-4429, the Bureau of New Source Review (Air Permits) at (609) 292-6716, or the Bureau of Water Allocation (ground water withdrawal) at (609) 292-2957.

If Allied Building Supply fails to submit the required report within the referenced due date, this case will be referred to the Bureau of Applicability and Compliance (BAC) for review. The Department may initiate enforcement action including, but not limited to, the assessment of penalties and revocation of tank operating registrations pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B-12. The Department reserves the right to implement all enforcement measures, including the right to revoke tank operating registrations and assess penalties from the original due date.

If the tank(s) at the referenced facility is/are regulated under the federal Hazardous and Solid Waste Amendments of 1984 and Allied Building Supply fails to comply with the above requirements, this case may be referred to the United States Environmental Protection Agency (USEPA) for violations of 40 CFR Part 280.

Please note, pursuant to N.J.S.A. 58:10A-21 et seq. and N.J.A.C. 7:14B et seq., the owner and operator of the regulated underground storage tanks are strictly liable for compliance with these requirements. Violators are liable for penalties of up to $50,000 per day for each day of continuing violation and revocation of tank registrations.

If you should have any questions regarding this matter, please contact Allan Motter, Case Manager, of the Bureau of Underground Storage Tanks at (609) 984-3156.

Sincerely,

Erick P. Kinsel

Remedial Action Workplan Addendum
Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County, New Jersey

UST #0129486
NJDEP Case #93-06-24-1425

February 23, 1995

1.0 Introduction

Brinkerhoff Environmental Services, Inc. (BES) was retained by SELRITE Millwork Corporation to prepare a Remedial Action Workplan (RAW) Addendum for Allied Building Supplies (Allied) in accordance with the August 12, 1994 NJDEP correspondence addressed to Mr. Daniel Winters of Allied. The site is located at 101 West Elizabeth Avenue, Linden, Union County (see Figure 1). The RAW Addendum included the installation of two (2) groundwater monitoring wells, groundwater sampling and laboratory analysis.

During previous site activities, the casing and upper two (2) feet of monitoring well MW-1 had been damaged. This well was repaired two weeks before sampling was performed.

The following report presents the results of the investigation, including a request for natural attenuation at this site.

2.0 Groundwater Investigation

2.1 Monitoring Well Installation and Repair

On November 30, 1994, two (2) four (4) inch PVC monitoring wells were installed at the site by Diamond Drilling Company, Inc. Monitoring well MW-5 was installed within the former UST excavation at the downgradient edge and MW-6 was installed downgradient of the former excavation (see Figure 2). Monitoring well records are included as Exhibit I of this report.

During previous site activities monitoring well MW-1 was damaged. On December 29, 1994, MW-1 was repaired by Diamond Drilling. The protective casing and upper two feet of solid PVC were repaired. With the exception of the upper two feet of the well, MW-1 was relatively free of debris. The well was purged to assure any debris in the well was removed.

Wells MW-1, MW-5 and MW-6 were surveyed to a site bench mark by a licensed surveyor. All six (6) wells are tied to the same benchmark. Certification Forms A and B are included in Exhibit I of this report.

2.2 Groundwater Sampling

On January 16, 1995, the six (6) monitoring wells located on the property were sampled by BES personnel in accordance with the May 1992 NJDEP *Field Sampling Procedures Manual*. The samples were collected within two feet of the static water level after purging the wells a minimum of three standing columns of water. The monitoring well samples were collected with a dedicated stainless steel and Teflon bailer which was laboratory cleansed, then transferred to sealed laboratory glassware suitable for volatile organic compounds and lead. Monitoring well data forms are included in Exhibit II of this report.

2.3 Groundwater Analytical Summary

The samples collected, designated MW-1 through MW-6 and a field and trip blank, were submitted to a New Jersey certified laboratory, Accredited Laboratories, Inc., for analysis. Samples were analyzed for volatile organic compounds with a forward library search (VO+10), MTBE, TBA, and lead. Laboratory analytical results are included as Exhibit III of this report and summarized in Table I, below.

TABLE I
Groundwater Sampling Results
Volatile Organic Compounds, MTBE, TBA and Lead
Allied Building Supply
January 16, 1995
(results in ppb)

Sample ID	Benzene	Toluene	Ethylbenzene	Total Xylenes	MTBE	TBA	Lead	TIC's
MW-1	~~35~~ 37	79	60	267	50U	50U	~~46~~ 12	~~189~~ 263
MW-2	5U	5U	5U	5/10U	50U	50U	10U	~~298~~ 8
MW-3	5U	5U	5U	5/10U	50U	50U	10U	ND
MW-4	5U	5U	5U	5/10U	50U	50U	10U	ND
MW-5	5U	5U	5U	5/10U	50U	50U	~~12~~	ND
MW-6	5U	5U	5U	5/10U	50U	50U	15.8	ND
Field Blank	5U	5U	5U	5/10U	50U	50U	10U	ND
Trip Blank	5U	5U	5U	5/10U	50U	50U	-	ND
*NJDEP Standard	1	1,000	700	40	700	500	10	-

U-Not detected above instrument detection limit. Preceding number is detection limit; ND-Compound not detected; *NJDEP Class II-A Specific Groundwater Quality Criteria; Please note that MW-1 and MW-5 were inadvertently mislabeled during sampling activities. Corrections have been made on the attached laboratory data.

Volatile organic compounds and lead were detected in sample MW-1. Benzene was detected at a concentration of 35 parts per billion (ppb), total xylenes were detected at a concentration of 267 ppb, and lead was detected at a concentration of 46 ppb. Lead was also detected in samples MW-5 and MW-6 at concentrations of 12 ppb and 15 ppb, respectively. No other volatile organic compounds were detected, with the exception of trace levels of methlyene chloride and acetone, common laboratory contaminants.

Groundwater sampling results show a decrease in the level of petroleum related compounds in MW-1 since the previous sampling event conducted by Vectre, Inc. in December 1993. The December 1993 sampling event reported benzene at 350 ppb, toluene at 7,500 ppb, ethylbenzene at 1,600 ppb and xylenes at 2,230 ppb.

2.4 Site Hydrogeology

Subsurface soil consists of red clayey fine sand with some medium coarse sand pebbles and shale fragments to a depth of 17.5 feet below grade, the maximum depth of stratigraphic section drilled.

Depth to groundwater ranged from 2.17 feet in MW-5 to 12.43 feet in MW-6. The shallow depth of groundwater in MW-5, located within the former UST excavation, is likely due to perched water within the former tank field area. Groundwater flow direction is toward the northeast as shown on Figure 3 - Groundwater Contour Map. A small anomaly in flow direction is present at MW-5. This well is located within the former tank excavation and shows a false high in depth to groundwater, caused by water perched within the former excavation. Monitoring well data is presented in Table II, below.

TABLE II
Monitoring Well Data
Allied Building Supply
January 16, 1995
(results in feet)

	MW-1	MW-2	MW-3	MW-4	MW-5	MW-6
Casing Elevation	29.23	30.29	27.98	28.19	29.71	30.60
Well Depth	15.15	19.55	14.45	19.45	12.61	17.09
Depth to Screen	2.98	N/A	N/A	N/A	N/A	7.52
Depth to Groundwater	9.76	11.11	8.18	8.49	2.17	12.43
Product Thickness	0.0	0.0	0.0	0.0	0.0	0.0
Groundwater Elevation	19.47	19.18	19.80	19.70	27.54	18.17

3.0 Recommendations

BES conducted a remedial investigation at Allied Building Supplies, which included the installation and sampling of groundwater monitoring wells.

Groundwater sampling results showed gasoline related volatile organic compounds in only one (1) of the six (6) monitoring wells on-site. Benzene was detected at 35 ppb and xylenes were detected at 267 ppb in well MW-1, which is located on the immediate upgradient edge of the former tank excavation. Monitoring wells MW-2, MW-5 and MW-6, located downgradient to slightly side gradient of the former UST excavation, reported no detectable gasoline related volatile organics.

Lead was detected in three (3) monitoring wells at levels ranging from 12 ppb in MW-5, 15 ppb in MW-6 and 46 ppb in MW-1.

BES recommends natural attenuation be considered as a mechanism for remediation at this site. Laboratory analytical data and site specific geologic and hydrogeologic conditions favor natural attenuation. Only one (1) well has shown localized levels of gasoline related volatile organics and no gasoline related volatile organics were detected in downgradient wells. The abundant clay in subsurface sediment and the perched water present within the former tank excavation suggest a slow groundwater flow rate at this site. The combination of both a limited extent of impacted groundwater and a slow migration rate indicate natural attenuation will be effective in preventing any off-site migration of contaminants.

An in-depth discussion of natural attenuation as an appropriate remedial method for this site is set forth in the Remedial Action Workplan dated May 1994, which was previously submitted to your attention.

This report was prepared and is respectfully submitted by:

Remedial Action Report
Allied Building Supplies
101 West Elizabeth Avenue
Linden, Union County, New Jersey
UST #0129486
NJDEP Case #93-06-24-1425

February 27, 1996

1.0 TECHNICAL OVERVIEW

The Allied Building Supplies (Allied) site is located at 101 West Elizabeth Avenue in the City of Linden, Union County, New Jersey (see Figure 1). A Remedial Action Workplan (RAW) was submitted by Vectre Corporation for the Allied site in May of 1994. The RAW proposed natural remediation/attenuation as the remedial alternative for the site.

In January of 1995, Brinkerhoff Environmental Services, Inc. (BES) was retained by SELRITE Millwork Corporation to conduct a site investigation for the Allied site. The remedial investigation was conducted to provide supportive data to the May 1994 RAW, and included the installation of two (2) ground water monitoring wells (MW-5 & MW-6), and collection and analysis of ground water samples. Figure 2 is a site map depicting well locations relative to property boundaries and structures.

Following the investigation, BES prepared a Remedial Action Workplan Addendum (RAWA) dated February 23, 1995, summarizing well installation, ground water sampling and results. Elevated levels of lead were detected in Wells MW-1, MW-5, and MW-6, and elevated levels of benzene and xylenes were detected in Well MW-1, during the January 6, 1995 ground water sampling event. Hydrogeological data collected during the investigation indicated a ground water mound was present in the area of the former gasoline underground storage tank (UST) excavation area surrounding Well MW-5 (see Figure 3).

The following Remedial Action Report (RAR) addresses outstanding issues regarding the Allied investigation, including recommendations for Case Closure through natural attenuation and designation of a Classification Exception Area (CEA). Activities conducted as part of this RAR are discussed below.

Previous soil sampling and analysis indicated elevated levels of xylenes remained in the soil surrounding the former gasoline UST excavation. BES supervised excavation of soil in the area of the elevated xylene samples, collected postexcavation soil samples, and disposed of contaminated soil removed from the excavation.

Four (4) on-site ground water monitoring wells were resampled using the "Low Flow" sampling methodology to reduce turbidity and sediment within the samples. A Ground water contour map was prepared for the sampling event. To assess aquifer characteristics necessary for calculating

contaminant transportation and degradation rates, rising head slug tests were conducted on Wells MW-2 and MW-6.

Activities associated with this RAR were conducted in accordance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E. Sampling was performed in accordance with May 1992 NJDEP *Field Sampling Procedures Manual*. Cleanup Standards were based on the Soil Cleanup Criteria, revised on February 3, 1994 and Ground Water Quality Standards, N.J.A.C. 7:9-6.

2.0 SOIL REMEDIATION

Since previous soil sampling results indicated elevated levels of xylenes remained in the soil along the southern perimeter of the former gasoline UST excavation, BES proposed to excavate and dispose of additional soil in this area. Previous soil sampling results are summarized in Table 1, below, and depicted on Figure 4.

Table 1
Previous Soil Sampling Results
(Results in ppm)

Sample #	Xylenes	*NJDEP
105-T1-01 [1]	**47**	10
105-T1-D [1]	**194**	10
105-T1-05 [1]	**48**	10
105MW1-11 [2]	**131**	10

*NJDEP - NJDEP Impact to Ground Water Soil Cleanup Criteria; [1]Samples collected by Sailer Environmental in July 1993; [2]Samples collected by American Resources Consultants, Inc. and reported in September 1993.

On January 24, 1996, under the supervision of BES, Disposal Systems Inc. excavated additional soil in the area of the former gasoline UST and as depicted in Figure 4. Approximately 15 tons of soil were removed from the area, and disposed of through Soil Remediation of Philadelphia. A soil disposal manifest is included in Exhibit I of this report.

Soil types encountered during the excavation included a brown to red-brown sandy silt loam and gravel fill material (within the former excavation area) and a red silty clay loam native soil (outside the former excavation area). At a depth of 10 feet below grade, soil lithology changed from a red silty clay loam to a fine sandy loam. Soil was excavated to a depth of 12.5 feet below grade. Samples were collected at 10.5 feet below grade, where soil was moist to wet, but not saturated. Soils were completely saturated at 11 feet below grade. Ground water was encountered at 10.5 feet below grade during excavation.

Three (3) postexcavation soil samples (EXS-1, EXS-2 and EXS-3) were collected from the west and south sidewalls of the excavation, as depicted on Figure 4. Postexcavation soil sampling results are summarized in Table 2 below, and presented in Exhibit II of this report.

The excavated soil was field screened using an Hnu photoionization detector. Readings ranged from 150 to 200 meter units for the soil excavated. Headspace readings on split samples collected at the location of soil samples ranged from five (5) to 25-meter units (see Table 2).

Sample #	Depth	Hnu Readings	Xylenes	*NJDEP
EXS-1	10.5'	5 - 10	<0.1	10
EXS-2	10.5'	< 5	ND	10
EXS-3	10.5'	20 - 25	<0.1	10

Hnu Readings are reported in meter units; ND - Denotes compound was not detected above the method detection limit; *NJDEP Impact to Ground Water Soil Cleanup Criteria.

Postexcavation soil sampling results indicate xylene concentrations are below NJDEP Impact to Ground Water Soil Cleanup Criteria.

3.0 GROUND WATER INVESTIGATION

3.1 Ground Water Monitoring, Sampling & Analysis

On December 21, 1995, four (4) of the six (6) on-site monitoring wells, MW-1, MW-2, MW-5 and MW-6, were sampled by BES personnel. Samples were collected within two (2) feet of the static water level after purging the wells a minimum of three (3) standing columns of water using the NJDEP approved "Low Flow" purging methodology for metals in ground water. Ground water samples were collected using dedicated bailers, then transferred to laboratory-cleansed glassware suitable for volatile organic compounds and lead. Monitoring well sampling data forms, detailing well gauging information, are included in Exhibit III of this report.

3.2 Ground Water Analytical Results

Samples MW-1, MW-2, MW-5 and MW-6, including a field and trip blank, were analyzed by a New Jersey certified laboratory, Accredited Laboratories, Inc. Samples were analyzed for volatile organic compounds with a forward library search (VO+10) calibrated for xylenes, methyl tertiary butyl-ether (MTBE), tertiary butyl-alcohol (TBA), and lead. Laboratory analytical results are summarized in Table 3 below, and presented in Exhibit IV of this report.

Table 3
Ground Water Sampling Results
Volatile Organic Compounds, MTBE, TBA and Lead
December 21, 1995
(Results in ppb)

Compound	MW-1	MW-2	MW-5	MW-6	*NJDEP Standard
Benzene	**120**	ND	ND	ND	1
Toluene	**4400**	ND	ND	ND	1000
Ethylbenzene	**3200**	ND	ND	ND	700
Xylenes	**6400**	ND	3.5	ND	~~40~~ (1000)
MTBE	ND	ND	ND	ND	~~700~~ (70)
TBA	ND	ND	ND	ND	500
Lead	**12.6**	ND	ND	ND	10

ND - Denotes compound was not detected above the method detection limit *NJDEP Class II-A Ground Water Quality Standards.

Benzene, toluene, ethylbenzene, xylenes (BTEX) and lead were detected in Sample MW-1, at concentrations above the NJDEP Class II-A Ground Water Quality Standards (GWQS). Xylenes were detected in Sample MW-5 at 3.5 parts per billion (ppb), below the NJDEP Class II-A GWQS of 40 ppb.

Historical ground water sampling results indicate a general decreasing trend in the level of petroleum-related volatile organic compounds in MW-1 since the initial sampling event conducted by Vectre, Inc. in December 1993. Table 4 is a summary of historical Ground Water Data.

Table 4
Historical Ground Water Sampling Results
Wells MW-1, MW-5 & MW-6
(Results in ppb)

	MW-1			MW-5			MW-6			*NJDEP
Compound	12/93	1/95	12/95	12/93	1/95	12/95	12/93	1/95	12/95	
Benzene	**350**	35	**120**	NI	ND	ND	NI	ND	ND	1
Toluene	**7500**	79	**4400**	NI	ND	ND	NI	ND	ND	1000
Ethylbenzene	**1600**	60	**3200**	NI	ND	ND	NI	ND	ND	700
Xylenes	**8700**	267	**6400**	NI	ND	3.5	NI	ND	ND	~~40~~ (1000)
Lead	NA	**46**	**12.6**	NI	12	ND	NI	15	ND	10

NA - Denotes sample was not analyzed for compound; NI - Denotes well was not yet installed; ND - Denotes compound was not detected above the method detection limit; *NJDEP - NJDEP Class II-A Ground Water Quality Standards.

From January of 1995 to December of 1995, lead concentrations have decreased from 46 ppb to 12.6 ppb in Well MW-1, and from 12 ppb and 15 ppb to nondetect in Wells MW-5 and MW-6, respectively. The decrease in lead concentrations is most likely due to implementation of the "Low Flow" sampling methodology for metals in ground water. The nondetectable levels reported

in MW-5 and MW-6, after using the low flow purging method, indicated that the lead previously detected was likely the result of suspended solids and not impacted ground water.

Previous sampling for volatile organic compounds and lead reported nondetectable levels in Wells MW-2, MW-3, and MW-4.

The reason for the increase in sampling results from January 1995 and December 1995 may be the result of the use of the slow purge sampling method, which would cause less volatilization of organic compounds during purging and sample collection.

3.3 Well Search

A well search was conducted by Vectre Corporation as part of the May 1994 RAW. The search included all domestic, industrial, potable and monitoring wells within a one (1) mile radius of Allied. The search identified three (3) domestic wells, seven (7) industrial wells, one (1) potable well, six (6) piezometers, one (1) recovery well and 93 monitoring wells within one (1) mile of the site. The depth of the domestic wells and potable well are greater than 100 feet and the wells do not draw water from the shallow water table aquifer. A canvass of the area revealed no wells located within 500 feet of the site. Basements were not identified immediately downgradient of the site.

3.4 Aquifer Characteristics & Classification Exception Area Application

On December 21, 1995, prior to well purging and sampling, the six (6) on-site ground water monitoring wells were gauged. Monitoring well gauging data is presented in Table 4, below.

Table 5
Monitoring Well Gauging Data
December 21, 1995
(Results in feet)

Monitoring Well	MW-1	MW-2	MW-3	MW-4	MW-5	MW-6
Headspace Reading	60	0	0	0	0	0
Casing Elevation	29.23	30.29	27.98	28.19	29.71	30.60
Well Depth	12.61	19.55	14.45	19.45	15.15	17.09
Depth to Screen	2.98	N/A	N/A	N/A	N/A	7.52
Depth to Ground Water	9.59	10.72	7.93	7.73	2.05	11.89
Product Thickness	0.00	0.00	0.00	0.00	0.00	0.00
Ground Water Elevation	19.64	19.57	20.05	20.46	27.66	18.71

N/A - Data not available.

Depth to ground water ranged from 2.05 feet in Well MW-5 to 11.89 feet in Well MW-6 during the December 21, 1995 sampling event. Ground water flow is toward the north to north-northeast, as depicted on Figure 5 - Ground Water Contour Map. This flow direction represents a

increased precipitation during the past 60 days. The ground water flow direction in January 1995 was toward the northeast. A small anomaly in flow direction is present surrounding Well MW-5, located within the former gasoline UST excavation, and may be due to mounded water within the former tank field area.

3.4.1 Hydraulic Conductivity

To evaluate hydraulic conductivity, BES field personnel conducted aquifer "slug" testing on Wells MW-2 and MW-6. A volume of water was removed from each well using a dedicated stainless steel bailer while monitoring changes in static water level over time using a Hermit Data Logger. A quantitative hydrogeologic assessment of the data was performed using the AQTESOLV ground water modeling program. The slug test data was analyzed using the Bouwer and Rice method for unconfined aquifers. Hydraulic conductivity and ground water and pollutant transport rates were calculated using the slug test data and AQTESOLV modeling calculations. Slug test data is included in Exhibit V of this report.

3.4.2 Ground Water Velocity

The rate of ground water movement in the area of concern was determined using the ground water velocity equation derived from a combination of Darcy's law and the velocity equation of hydraulics. Ground water velocity was then expressed as:

$$Vs = K \times i/ne$$

Where:

Vs = seepage velocity
K = hydraulic conductivity (calculated from slug test data)
i = hydraulic gradient (calculated from ground water flow data)
ne = effective porosity (assumed at 20%)
x = multiplication symbol

Ground water velocity in the area of concern was then calculated:

$$Vs = 0.0002592 \text{ ft/min} \times 0.01 \text{ ft/ft} / 0.20 \qquad 1.296 \times 10^{-4} \text{ cm/sec}$$
$$Vs = 0.000013 \text{ ft/min}$$

Assuming a porosity of 20%, and using a calculated hydraulic gradient of 0.01 feet per foot obtained from the most recent ground water contour map, ground water velocity is determined to be 6.83 feet per year.

3.4.3 Pollutant Transport Rate

Applying a pollutant transport rate calculation to the ground water velocity rate, calculated above, the following retardation factor is derived:

$$Rd = 1 + (KOC \times foc \times pb/ne)$$

Where:

Rd = retardation factor
KOC = soil sorption coefficient (63 - standard benzene coefficient)
foc = fraction of organic carbon (assumed at 0.005)
pb = bulk density (assumed at 1.5 g/ml.)
ne = effective porosity (assumed at 20%)

The retardation factor is then calculated:

$$Rd = 1 + (63 \times 0.005 \times 1.5/0.20)$$
$$Rd = 3.36$$

The pollutant (benzene) transport rate is then calculated as follows:

$$Vpt = V/Rd$$
$$Vpt = 6.83 \text{ ft/yr.}/3.36$$

Using this formula, assuming a bulk density of 1.5 grams per milliliter, a fraction of organic carbon content of 0.5%, and a porosity of 20%, the benzene transport rate is calculated to be approximately 2.03 ft/yr. This slow contaminant transport rate explains why gasoline related volatile compounds have not been detected in Well MW-2, located down gradient of the former UST's.

Based on the benzene transport rate calculated above, an average benzene half-life of 200 days, and an initial benzene concentration of 350 ppb, dissolved benzene concentrations are expected to naturally degrade to 1.0 ppb within approximately 4.6 years and 9.3 feet downgradient of Well MW-1. A CEA designation is requested, using natural attenuation as the method of remediation, for a duration of five (5) years and 20 feet downgradient of Well MW-1, as depicted on Figure 6 - Classification Exception Area Designation Map.

4.0 CONCLUSIONS AND RECOMMENDATIONS

BES conducted a remedial investigation at Allied Building Supplies, located at 101 West Elizabeth Avenue in the City of Linden, Union County, New Jersey. The investigation included additional soil removal in the former gasoline UST excavation area, disposal of contaminated soil removed from the excavation, collection and analysis of postexcavation soil samples, and collection and analysis of ground water samples from Wells MW-1, MW-2, MW-5 and MW-6.

4.1 January 24, 1996 Postexcavation Soil Sampling

Postexcavation soil sampling results reported xylenes below Impact to Ground Water Soil Cleanup Criteria in the area of the former gasoline UST excavation area. Less than one-tenth (0.1) of one part per million (ppm) of xylenes were detected in two (2) of the three (3) soil samples (EXS-1 & EXS-3). Xylenes were not detected above the method detection limit in sample EXS-2. Therefore, No Further Action (NFA) is requested with regard to soils in the subject area.

4.2 December 21, 1995 Ground Water Sampling

Benzene, toluene, ethylbenzene, xylenes, and lead were detected in Well MW-1 at concentrations above the NJDEP Class II-A GWQS. Xylenes were detected in Well MW-5 at 3.5 ppb, below the NJDEP Class II-A GWQS of 40 ppb. Lead was not detected above the method detection limit in samples MW-2 and MW-6.

Historical ground water sampling results indicate a decreasing trend in BTEX compounds detected in Well MW-1. Lead concentrations have decreased from 46 ppb to 12.6 ppb in Well MW-1, and from 12 ppb and 15 ppb to nondetect in Wells MW-5 and MW-6, respectively, when the slow purge methodology is applied to sampling protocol. The decrease in lead using the slow purge methodology suggests that the elevated lead levels were the result of suspended solids and not impacted ground water. Lead levels have decreased in MW-1 to just over the GWQS for lead of 10 ppb (sample reported lead at 12.6 ppb).

4.3 Recommendations

BES recommends natural attenuation be considered as a mechanism for remediation and case closure at this site. Laboratory analytical data and site specific geologic and hydrogeologic conditions favor natural attenuation. Only one (1) well, MW-1, showed elevated levels of gasoline-related volatile organics. Abundant clay content in subsurface sediments, and the mounded water present within the former tank excavation, suggest a slow ground water flow rate at this site, which has been verified through evaluation of aquifer slug test data. The combination of a limited extent of impacted ground water, a slow migration rate, the presence of a low permeability soil type, the removal of the source, and the lack of receptors in the area suggest natural attenuation will be an effective option for this site.

Based on the benzene transport rate calculated above, an average benzene half-life of 200 days, and an initial benzene concentration of 350 ppb, dissolved benzene concentrations are expected to naturally degrade to 1.0 ppb within approximately 4.6 years and 9.3 feet downgradient of Well MW-1. A CEA designation is requested, using natural attenuation as the method of remediation, for a duration of five (5) years and 20 feet downgradient of Well MW-1, as depicted on Figure 6 - Classification Exception Area Designation Map.

Regarding the slightly elevated levels of lead detected in MW-1, BES is proposing that the CEA include the lead detected in this well. The level of lead present in MW-1 was just slightly over the GWQS for lead of 10 ppb (sample reported lead at 12.6 ppb). It is BES' opinion that the lead level in MW-1 should decrease further over time and that lead will not migrate beyond the proposed CEA boundary at a level over the GWQS.

A five (5) year CEA should allow for the variations in subsurface conditions, which affect the natural remediation process, and provide adequate time for natural remediation to occur. Completed CEA and Well Restriction Forms are attached in Exhibit VI.

A well search conducted by Vectre Corporation as part of the May 1994 RAW identified three (3) domestic wells, seven (7) industrial wells, one (1) potable well, six (6) piezometers, one (1) recovery well and 93 monitoring wells within a one (1) mile radius of the site. A canvass of the area did not reveal wells within 500 feet of the site. Basements were not identified within the immediate area of the site.

BES is proposing no additional sampling and analysis for the subject site. Based on the slow contaminant transport rate, lack of receptors in the area and lack of migration to date, BES is proposing implementation of the CEA for five (5) years. After five (5) years, the CEA can be removed with one (1) confirmation sample collected in the former excavation area.

Re: Allied Building Supply
101 West Elizabeth Avenue
Linden, NJ
Case No. 93-06-24-1425

Dear Sir:

Presented herein is an application for a Classification Exception Area for the property located at 101 West Elizabeth Avenue, Linden, NJ. Attached are analytical data, calculations and drawings to support this application. These attachments include historical analytical data on the monitoring wells on this site, a drawing which displays the historical groundwater gradient on the site, and the results of the modeling calculations to predict the fate and transport of BTEX at this site. The data and modeling predict a very slow rate of transport of the contaminants and does not predict that potential receptors will be impacted.

This site had a discharge from an underground gasoline storage tank and/or piping prior to 1993. A total of six groundwater monitoring wells have been installed on or near this site as part of the site investigation. Through the eight rounds of sampling which has occurred over the past five years, only MW#1 has indicated contaminants at levels above the applicable Groundwater Quality Standards. Furthermore, the level of these contaminants have been significantly reduced over this period through natural processes.

It has been reported that a well search was previously performed in support of the management of this case and the results were submitted to the NJDEP. This well search indicated no downgradient wells to be within ¼ miles of the site.

The direction of groundwater flow is indicated to be toward the east. The closest potential receptor in this direction is the storm sewer collection system which is located in the parking lot for the Linden Rail Station. This system is approximately 75 feet from the property line of this site.

The native soils at this site are have been characterized as a silty clay during well installations. Based on this characterization, the hydraulic conductivity at this site has been estimated to be approximately 3E-3 ft/day. Groundwater elevations have been measured in the various monitoring wells during each sampling episode. These data indicate that the groundwater gradient is approximately 0.005 ft/ft (See Figure 1). The porosity of the silty clay soils has been estimated to be <0.5. Based on the foregoing data, the actual groundwater flow rate is calculated to be 3E-5 ft/day. At this flow rate, the plume is predicted to be essentially stagnant. Even using other more conservative assumptions, the maximum distance for the migration of the BTEX plume is predicted to be less than 15 feet from the source located at or near MW#1. Therefore, the plume is predicted not to impact receptors and is predicted not to travel beyond the limits of the property boundary.

Based on these analyses, a Classification Exception Area is proposed for this site to the limits of the property boundaries.

Thank you for your consideration. If you have any questions on this matter, please contact me at your convenience.

Very truly yours,

J. David Calvert, PE, CSP

Closure #C93-2092.

NOV 16 1998

Dear Mr. Winters:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area of concern as specifically referenced above, except as noted below, so long as Allied Building Supplies did not withhold any information from the Department. This action is based upon information in the Department's case file and Allied Building Supplies' final certified report dated August 26, 1998. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Remedial Investigation and Remedial Action pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the 2,000 gallon Gasoline Underground Storage Tank and no other areas.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination Allied Building Supplies as well as each subsequent owner, lessee and operator (collectively "Successors") shall comply with each of the following:

Name and Address Changes

Pursuant to N.J.S.A. 58:10B-12, Allied Building Supplies and the Successors shall inform the Department in writing whenever its name or address changes, within 14 calendar days after the change.

Well Sealing

Pursuant to N.J.S.A. 58:4A, Allied Building Supplies and the Successors shall properly seal all monitoring wells installed as part of a remediation that will no longer be used for ground water monitoring. A certified and licensed well driller shall seal the wells in accordance with the requirements of N.J.A.C. 7:9-9. The well abandonment forms shall be completed and submitted to the Bureau of Water Allocation. Please call (609) 984-6831 for forms and information.

Monitoring of Compliance

Pursuant to N.J.S.A. 58:10B-13.1, Allied Building Supplies and the Successors shall conduct monitoring for compliance and effectiveness of the institutional control specified in this document and submit a certification to the Department biennially in writing that the institutional control is being properly maintained and continues to be protective of public health and safety and the environment. Any such certification shall include the information relied upon to determine that no changes have occurred.

CLASSIFICATION EXCEPTION AREA (CEA)
AND WELL RESTRICTION AREA (WRA)

Because concentrations of contaminants remain above the Ground Water Quality Standards, N.J.A.C. 7:9-6 et seq., a CEA and WRA are required, at this time, as institutional controls.

This CEA and WRA are based, in part, on the aquifer and contaminant data and evaluations provided in the above referenced report and/or case file. The CEA and WRA is the area defined by the property boundary and identified on the enclosed map. Any special conditions or restrictions for water use within the WRA will be administered by the Department's Bureau of Water Allocation.

This CEA and WRA apply to benzene, toluene, ethylbenzene and xylenes only. All other constituent standards apply within the CEA. All constituent standards (N.J.A.C. 7:9-6) apply at the designated boundary. All designated ground water uses within this area are suspended for the duration of the CEA. Pursuant to N.J.A.C. 7:9-6.4, "designated use" means a present or potential use of ground water within a ground water classification area as determined by N.J.A.C. 7:9-6.5. Pursuant to N.J.A.C. 7:9-6.5, this area is presently designated as Class II-A. The primary designated use for Class II-A ground water is potable water; secondary uses include agricultural and industrial water.

The duration of the CEA and WRA is set at three years from the date of this letter. This is greater than the predicted duration for contaminant degradation in the above referenced report. The Ground Water Quality Standards that apply to the compounds of concern are: benzene 1 ppb; toluene 1000 ppb; ethylbenzene 700 ppb and xylenes 1000 ppb. Should concentrations of contaminants reach their respective criteria prior to the CEA and WRA expiration date as demonstrated through ground water sampling, the Department will consider any requests to terminate the CEA and WRA. However, the expiration of the three year period prior to contaminant concentrations reaching the Ground Water Quality Standards would not constitute approval to utilize the ground water for its designated purposes. Compliance with the Ground Water Quality Standards may be determined by Allied Building Supplies by demonstrating that the Ground Water Quality Standards have been met for the referenced constituent(s) through ground water sampling from monitoring well: MW-1. Please note that Allied Building Supplies has the option of maintaining these wells for sampling purposes or sealing these wells and utilizing an acceptable method of ground water sampling to demonstrate compliance with the Ground Water Quality Standards. Compliance may be determined by Allied Building Supplies at the termination of the CEA and WRA or sooner The Department's evaluation of the ground water sampling results, to determine compliance with the Ground Water Quality Standards, would be through a Memorandum of Agreement (MOA) or other oversight document, executed between Allied Building Supplies and the Department.

COVENANT NOT TO SUE

The Department issues this Covenant Not to Sue pursuant to N.J.S.A. 58:10B-13.1. That statute requires a covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against the following:

(a) the person who undertook the remediation;
(b) subsequent owners of the subject property;
(c) subsequent lessees of the subject property; and
(d) subsequent operators at the subject property.

for the purposes of requiring remediation to address contamination which existed prior to the date of the final certified report for the area of concern specifically referenced above, or payment of cleanup and removal costs for such additional remediation.

Any person who may benefit from this Covenant is barred from making a claim against the Spill Compensation Fund, N.J.S.A. 58:10-23.11i, and the Sanitary Landfill Facility Contingency Fund, N.J.S.A. 13:1E-105, for any costs or damages relating to the remediation covered by this Covenant. All other claims against these funds will be controlled by the corresponding statutes and their implementing regulations.

Allied Building Supplies, and each subsequent owner, lessee and operator, during that person's ownership, tenancy or operation, shall maintain those controls and conduct periodic compliance monitoring in the manner the Department requires.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that either:

(a) any person with the legal obligation to comply with any condition in this No Further Action Letter has failed to do so; or
(b) any person with the legal obligation to maintain or monitor any engineering or institutional control has failed to do so.

This Covenant Not to Sue, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant Not to Sue in the lines supplied below and the Department has received one copy of this document with original signatures of the Department and the person who undertook the remediation.

NOTICES

Bureau of Field Operation's Case Assignment

This No Further Action Determination specifically does not address the 550 gallon fuel oil underground storage tank. Allied Building Supply was notified of the case transfer to the Bureau of Field Operation's Case Assignment Section by letter on December 8, 1994.

Pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C) you may have an opportunity to remediate the site, or portion of the site, on a voluntary basis under a Memorandum of Agreement (application enclosed) or otherwise. Please direct all correspondence to:

New Jersey Department of Environmental Protection
Bureau of Field Operations
Case Assignment Section
Attention: Section Chief
401 East State Street - 5th Floor
P.O. Box 434
Trenton, NJ 08625-0434

Direct Billing

Please be advised that pursuant to the Procedures for Department Oversight of the Remediation of Contaminated Sites (N.J.A.C. 7:26C et seq.) Allied Building Supplies is required to reimburse the Department for oversight of the remediation. The Department will be issuing a bill within the next four months.

Thank you for your attention to these matters. If you have any questions, please contact Bill Brown, Case Manager at (609) 777-1386.

Sincerely,

Kevin F. Kratina, Chief
Bureau of Underground Storage Tanks

LEASE NO. L1732.1770-02

OPERATING AGREEMENT AND LEASE

BETWEEN

NEW JERSEY TRANSIT CORPORATION

AND

THE CITY OF LINDEN

This Operating Agreement and Lease (the "Agreement") is effective as of January 1, 2004 between New Jersey Transit Corporation, an instrumentality of the State of New Jersey, with an office at One Penn Plaza East, Newark, New Jersey 07105-2246 ("NJ Transit" or "Lessor") and the City of Linden, a municipal corporation of the State of New Jersey, with offices at 301 N. Wood Avenue, Linden, New Jersey 07036 (the "Lessee").

This Agreement supercedes and cancels any and all agreements, leases and covenants currently in effect between the parties for the Agreement Premises, as hereinafter defined in Paragraph 3. Lessor hereby leases to Lessee, and Lessee hereby accepts from Lessor the Demised Premises, as defined in Paragraph 1 hereof. In addition, Lessee has agreed to place a parcel of property (the Linden Premises, as hereinafter defined) within the ambit of this Agreement and has proposed to institute a preferential parking program whereby Lessee may reserve one hundred (100) parking spaces for the exclusive use of residents of the City of Linden. In connection therewith, Lessee has agreed to provide an opinion of its legal counsel that it has the legal basis to institute such a program. Intending to be legally bound under this Agreement and in consideration of the revenues to be paid and the covenants and other good and valuable consideration contained herein, Lessor and Lessee hereby agrees as follows:

1. <u>DEMISED PREMISES AND AGREEMENT PREMISES</u>:
The premises hereby leased to the Lessee (the "Demised Premises") consists of three parcels (including station building) as follows, all as depicted on Exhibit A, attached hereto and made a part hereof:

Parcel (Lot) 1	2.663 acres (including station building)
Parcel (Lot) 2	1.51 acres
Allied Lot	2.075 acres

Many of the terms of this Agreement also apply to the use, operation, management and maintenance of Parcel (Lot) 3 (the "Linden Premises"), owned by Lessee and also depicted on Exhibit A.

2. **TERM; RENEWAL OPTIONS:**

(a) The initial term of this Agreement (the "Term") shall be five (5) years commencing as of January 1, 2004 (the "Commencement Date") and terminating on December 31, 2008, unless sooner terminated as hereinafter provided (the "Termination Date").

3. **USE; SCOPE OF SERVICES TO BE PROVIDED BY LESSEE:**

(a) The Demised Premises and the Linden Premises (together, the "Agreement Premises") shall be used as commuter parking lots and a commuter train station only. The parking facilities are to be maintained for the benefit and service of the commuter public. Except as described in Paragraph 3(c) below, all parking spaces on the Agreement Premises shall be available to the commuting public on a first come/first served basis and for a uniform fee, without regard to residency. The Agreement Premises shall not be used for any other purpose without the prior written consent of Lessor, whose consent may be granted or denied in its sole and absolute discretion. Lessee shall, at its sole cost, apply for and maintain in good standing throughout the term of the Agreement, all permits and licenses required by any authority from whom any permit or license must be obtained in order for Lessee to lawfully operate the Agreement Premises. Lessee shall comply with all governmental laws, regulations and rules with respect to the use, maintenance, operation and occupancy of the Agreement Premises.

(b) The individual parcels shall be used as follows, including for the provision of parking spaces in compliance with the Americans with Disabilities Act:

Parcel #	Number of Spaces	Including # of ADA spaces	Daily or Permit
1	146	4	Daily
2	93	*	Permit
Allied Lot	235	*	Permit
Lot 3	94	*	Daily

*There shall be a total of 9 ADA spaces allocated on Lots 2, 3 and/or the Allied Lot.

(c) All permit and daily spaces shall be available for use by the commuting public on a first come, first served basis, without regard to residency, except that Lessee may offer up to 100 permit spaces at the reduced rate set forth in Section 4(b) to residents of the City of Linden.

(d) Lessee may oversell parking permits by an amount equal to no more than ten percent (10%) of the permit spaces, or 33 spaces. Should Lessee desire to increase the number of oversold spaces it may, from time to time, submit a request to NJ Transit accompanied by evidence of the reasons supporting such increase. NJ Transit may approve or disapprove such an increase in its sole discretion.

(e) Lessee shall provide all services associated with the management, operation and maintenance of the Agreement Premises in a first-class manner, consistent with generally accepted standards and practices within the parking industry. Lessee and NJ Transit expressly understand and agree that this Agreement and the Exhibits thereto, including the scope of services detailed in the Scope of Services for the Management, Operation and Maintenance of NJ TRANSIT's Linden Rail Station Parking Facility ("Scope of Services"), which are attached hereto as Exhibit B and made a part hereof, set forth all of the promises, agreements, conditions and understandings between NJ TRANSIT and Lessee relative to the Agreement Premises, and

that there are no promises, agreements, conditions or understandings, either oral or written, between them other than as set forth in this Agreement.

(f) NJ TRANSIT and Lessee agree that the Scope of Services provides additional direction beyond this Agreement, and that in the event of a discrepancy between the Agreement and Scope of Services, the Scope of Services shall govern.

4. FEES, PARKING FEES AND REVENUES; RENT PAYMENTS :

(a) Parking Fees:

NJ TRANSIT shall establish the rate structure for all parking fees to be charged at the Demised Premises and the allocation of spaces by fee level. Changing the parking fees and allocations is subject to Lessor's written approval. Where Federal monies are used to rehabilitate or modernize parking facilities, Federal guidelines and regulations shall be followed, and, in the event of any conflict, shall supersede the terms of this Agreement.

(b) No Discrimination:

Lessee may not discriminate between Linden residents and non-residents with respect to charging for or availability of parking spaces, except that, in accordance with the following requirements and in view of Lessee's agreement to subject the Linden Premises (Lot 3) to the terms of this Agreement, Lessee may offer up to one hundred permits for permit parking to residents of the City of Linden for a reduced rate. Prior to the implementation of such a preferential parking program, Lessee must provide an opinion of its municipal attorney that there is little or no legal impediment to such a program. To the extent permitted to do so by law, Lessee hereby agrees to indemnify and defend NJ Transit and the State of New Jersey and hold them harmless against any and all damages (including attorneys fees) that may result from a challenge brought against NJ Transit or the State alleging that the preferential parking program violates constitutional, statutory and/or common law rights, other than those claims resulting from the gross negligence, intentional misconduct or criminal acts of the Indemnified Parties.

(c) Parking Lot Fund Account:

In order to ensure that revenues are used to offset the Agreement Premises' operating and maintenance costs, Lessee shall establish a parking lot fund account (the "Parking Lot Fund Account"). All revenues generated from the parking lots located on the Agreement Premises shall be deposited into the Parking Lot Fund Account and disbursed as hereinafter provided.

(d) Rent:

Except as set forth in Paragraph 4(f), below, Lessee shall pay to Lessor, as Rent, forty percent (40%) of all income derived from the Agreement Premises, including but not limited to, parking fees. Rent shall be submitted to Lessor by the first day of the second month following the end of each quarter.

(e) Payments to Lessor:

All payments to Lessor shall be sent to the following address:

New Jersey Transit Corporation
P. O. Box 35451
Newark, New Jersey 07193-5451

(f) Lessee may retain all revenues derived from subleases and permits for space in the station building.

5. FINANCIAL REPORTS AND RECORDS:

Along with the quarterly rent payment, Lessee shall submit to Lessor a copy of the Quarterly Financial Report on the form contained in Exhibit "D" herein, and copies of the daily and permit transaction reports called for in Scope of Services, Section VI.2 and VI.3, respectively. By February 1 following each year of the term of this Agreement, Lessee shall also submit an Annual Financial Report in the form contained in Exhibit "D" herein.

6. AUDIT AND INSPECTION OF RECORDS AND FINANCIAL REPORTS:

For a period of three (3) years following the Termination Date, upon written demand therefor by Lessor to Lessee, Lessee shall permit Lessor or its authorized representatives to inspect and make copies of all documents, records, data, leases, subleases, financial reports, budgets and memoranda whatsoever prepared or kept or related to gross revenue from parking or other activities at the Agreement Premises. All such documents, records, data, leases, subleases, financial reports, budgets and memoranda relating to the Agreement Premises shall be kept and not destroyed until three (3) years after the Termination Date, unless applicable Federal regulations mandate that all records be maintained for a longer period of time. In that event, the Federal time period will control. Lessor retains the right to audit Lessee's records and books pertaining to the Agreement Premises. If any such audit discloses an error prejudicial to Lessor in an amount in excess of Two Thousand Dollars ($2,000.00), Lessee shall, within five (5) days of notice of same, pay to Lessor the cost of such audit and examination, together with the amount of the error. Lessee shall not use for any financial gain or otherwise any data that it collects from, or receives about, customers of the parking facility. It shall use any such data solely for operation of the facility for Lessor and shall use all reasonable efforts to prevent disclosure of that data to persons unauthorized to view or use that data.

7. UTILITIES:

Lessee, at Lessee's sole cost and expense, shall arrange for the provision of all utilities necessary for the safe operation and maintenance of the Demised Premises and shall pay, directly to the billing authority and prior to the due date for same, the cost of all such utilities and services including, but not limited to, electric service, gas, heat, water and air-conditioning relating to the Demised Premises.

8. MAINTENANCE AND RESTRIPING:

(a) Lessee, at Lessee's sole cost, shall perform all maintenance services as described in Exhibit "B" attached hereto and shall keep the Agreement Premises in a clean, sanitary and safe condition and in good order and repair sufficient to ensure the continued structural integrity and aesthetic appearance of the Agreement Premises. Lessee must keep a complete up to date record of all maintenance and repairs, and this record must be made available to Lessor at any time. If the Lessee is unable to provide any of the maintenance services described in Exhibit "B" by use of its own employees and equipment, Lessee may contract with a maintenance contractor for such maintenance services. Any such contract must include specifications described in Exhibit "B" and must comply with applicable Federal, State and local regulations including the regulations pertaining to public bidding and procurements in the event Lessee is directed to do so by Lessor. Lessee shall perform weekly site inspections of the Demised Premises for elements covered by this Section and Exhibit "B". Lessee shall promptly respond to any and all

emergency calls regarding the Agreement Premises on a twenty-four (24) hour basis, seven (7) days per week. Lessee shall provide Lessor, prior to the execution of this Agreement, with a valid twenty-four (24) hour, seven (7) days per week emergency telephone number of the authorized representative of Lessee. Additionally, Lessee shall on a daily basis clean the waiting areas and restrooms of the adjacent Linden Train Station as described in Exhibit "B".

(b) Lessee shall, at Lessee's expense, be responsible for restriping and minor resurfacing (including but not limited to pothole repairs) of the Agreement Premises' parking lots from time to time so as to keep them in first-class condition, in accordance with Exhibit "B" attached hereto.

9. ALTERATIONS, ADDITIONS OR IMPROVEMENTS:

(a) All major capital improvements to the parking lots and station building owned by NJ TRANSIT will be the responsibility of NJ TRANSIT. Should Lessee seek to undertake alterations or improvements beyond those undertaken by NJ TRANSIT, Lessee shall not make any such alterations or improvements (hereinafter "Alterations") on or to the Agreement Premises without the prior written consent of Lessor, which may be granted or denied in Lessor's sole and absolute discretion. Any approved Alterations shall be constructed at Lessee's sole cost and expense.

(b) Prior to construction of any Alteration by Lessee, Lessee shall submit to Lessor a list of proposed Alterations which shall be subject to review and prior written approval of Lessor as described in subparagraph C of this paragraph. Lessee shall be responsible for all flagging costs for work performed within eighteen (18) feet of the center of the tracks. Lessor will designate those Alterations which must be removed by Lessee upon the Termination Date of this Agreement and those Alterations which will be considered permanent. As to those Alterations deemed to be permanent, Lessee agrees and covenants that Lessor shall become the owner thereof upon installation, unless otherwise specified herein. Such Alterations shall be free and clear of any right, title or interest therein of Lessee or any other party and shall not be encumbered by liens or other legal actions. This list of permanent Alterations shall become a part of this Agreement upon review and written approval of Lessor.

(c) No Alterations shall be commenced until plans and specifications therefor shall have been submitted to and approved in writing by Lessor within sixty (60) days of its receipt of same and, if required, by the New Jersey Department of Community Affairs and any other governmental agency having jurisdiction over the Agreement Premises. All Alterations must be completed in a good and workmanlike manner and in accordance with the approved plans and specifications, and with all applicable laws or regulations. Lessor may specify the time by which such approved Alterations must be completed. Lessee must pay for all work promptly; such repairs, Alterations or improvements must not result in any liens or encumbrances on the leasehold estate or the improvements. Lessor reserves the right to inspect the Alterations during construction and upon completion of such work to assure conformity with approved plans. All required permits, approvals and authorizations must be obtained by Lessee from local municipal bodies or applicable state government entities prior to such Alterations.

(d) To the extent permitted by law to do so, Lessee shall indemnify, defend, and save harmless the State of New Jersey, Lessor, their subsidiaries, agents, officials, employees and servants, and any other operating authorities Lessor may designate (the "Indemnified Parties")

and each and every one of them, against all claims, actions or proceedings made against Lessee or the Indemnified Parties arising out of or on account of construction work performed by or on behalf of Lessee, other than those claims resulting from the gross negligence, intentional misconduct or criminal acts of the Indemnified Parties, and Lessee shall, at its own expense, appear, defend and pay all charges of attorneys and all costs and other expenses arising therefrom or incurred in connection therewith, and, if any judgment shall be rendered against the Indemnified Parties, Lessee shall, at its own expense, satisfy and discharge the same.

(e) During the performance of the work on any approved Alterations, Lessee shall carry Five Million Dollars ($5,000,000) of contractors liability insurance, as well as Railroad Protective Insurance, if required by Lessor, and Worker's Compensation and Employer's Liability Insurance, if required by law. Lessor shall be named as an additional insured on Lessee's contractors liability insurance.

(f) Lessor shall have access to and the right to examine any operations, books, documents, papers, and records of Lessee involving transactions related to any Alterations for a period of three (3) years after the Termination Date; accordingly Lessee shall keep all records related to construction of the Alterations by Lessee for three years after the Termination Date.

(g) Alterations shall not adversely affect passenger safety, services or the operation of trains.

(h) Prior to the time Lessee shall commence the Alterations, Lessee shall post with Lessor a performance bond for the entire cost of the Alterations. Said cost shall be certified by Lessee, the architect and/or the building contractor performing the work. Such certification shall also provide the actual amount to be expended and the length of time for completion of the Alterations. In the event said Alterations shall not be completed within the certified time period, Lessor, in addition to any other rights and remedies set forth herein, shall have the right to use the performance bond funds to complete the Alterations. If Lessee and/or contractors fully and faithfully comply with the provisions as hereinabove stated, the funds or any balance thereof shall be returned to Lessee after satisfactory completion of the work. The funds deposited shall bear no interest. In the event the Alterations are not completed within the time as certified and Lessor causes the Alterations to be completed, any monies not expended shall be retained by Lessor as and for liquidated damages.

(i) For the term of this Agreement, Lessee shall bear all risk of damage, loss, theft, or destruction to alterations, partial or complete. Any and all replacements to, repairs of, or substitution of parts for the Agreement Premises in general, shall also be at the sole cost and expense of Lessee. In the event of any loss, theft or destruction of an Alteration, the Alteration shall be restored or replaced by another unit of substantially the same value and specifications as the unit it replaces, subject to the approval of Lessor.

10. <u>LESSOR'S RESERVATION OF RIGHTS</u>:

(a) Title to the Demised Premises shall remain in Lessor.

(b) Lessor reserves, and therefore does not hereby lease, air rights above the Demised Premises.

(c) Lessor reserves the right to enter upon the Agreement Premises to inspect the Agreement Premises without notice to Lessee and, if Lessor determines that covenants or obligations of Lessee are not being fulfilled, Lessor may, but shall not be obligated to, fulfill any of Lessee's covenants or obligations under the Agreement whereupon Lessee shall immediately pay to Lessor as additional Rent any sums incurred by Lessor. Such inspection or absence of inspection shall not be construed to relieve Lessee of its obligations herein.

(d) Lessor reserves the right, with prior notification to Lessee, to provide, expand, reduce or terminate Passenger-Related Services, as hereinafter defined, on the Demised Premises and to expand, reduce or terminate passenger operations serving the Demised Premises if, in Lessor's opinion, conditions warrant. "Passenger-Related Services" shall include services and facilities within the Demised Premises designed to serve the riding public including, but not limited to, bus loading zones, ticket offices or machines, waiting rooms, parking facilities, station buildings, shelters and canopies.

(e) Lessor reserves the right of its employees and/or its designated representatives to use free of charge two (2) parking spaces at the Agreement Premises for the parking of vehicles in close proximity to the station building.

(f) Lessor reserves the right to keep, maintain and have continued use and access to all railroad-related operational equipment and functions including, but not limited to, the signal equipment, poles, wire and cable lines, public address systems, pipe lines and drainage facilities located on, under or crossing the Demised Premises. If relocation of any railroad related operational equipment is desired by Lessee, Lessee will submit a written request in the manner set forth in Paragraph 11(g). Lessor reserves the right to approve or disapprove the relocation, in its sole discretion. Any relocation by Lessee without the prior written consent of Lessor shall constitute grounds for termination of this Agreement and any permit or sublease.

(g) Lessor hereby reserves unto itself, its agents, contractors and licensees, the right to construct, use, operate, maintain, repair and renew any of its facilities or railroad related equipment, including, but not limited to, trackage, pipes, conduits or tunnels, and any electric power, communication or signal transmission lines, together with poles and guys therefore, and any other of its facilities as may now exist or may hereafter be placed upon, under or over the Demised Premises, it being agreed that this Agreement is subject and subordinate to any and all such rights, easements and uses. Lessor's agents, employees, servants, invitees, contractors and subcontractors are hereby granted unimpeded access to the Demised Premises for the purposes set forth in this section.

11. LESSEE COVENANTS:

(a) Lessee covenants and agrees that Lessee has examined the Demised Premises and has entered into this Agreement without any representation by Lessor as to the condition hereof. Lessee covenants and agrees that it shall accept the Demised Premises in "as is" condition as of the date of this Agreement.

(b) Lessee further recognizes that it enters into this Agreement with the understanding that Lessor is operating a railroad business adjacent to the Agreement Premises and that this railroad business by its nature may create conditions which may be hazardous or offensive. Lessee shall occupy the Agreement Premises in a careful, safe and orderly manner so

as not to interfere in any way with the safety, convenience or circulation of train passengers, or the services, operations or maintenance of or by Lessor or its subsidiaries or any other operating railroad, or with any structure or facilities appurtenant to the business of Lessor or other operating railroad.

(c) Lessee shall observe all reasonable rules and regulations established by Lessor from time to time, provided that Lessee shall be given reasonable notice of any newly-established rules which shall not unreasonably interfere with Lessee's use of the Agreement Premises, unless required as a matter of law.

(d) Lessee shall not permit loud noises to emanate from the Demised Premises.

(e) Sales messages employed by Lessee or any permittee, as well as all displays and advertising used by Lessee or any permittee, must be in good taste and must not mislead consumers.

(f) Lessee covenants that it shall close and lock the commuter waiting room, or cause its sublessee to close and lock the commuter waiting room if a ticket agent is not in the station building. Lessee shall occupy the station building, at a minimum, from 6:30 a.m. to 9:30 a.m. and from 4:00 p.m. to 7:00 p.m. Lessee shall also maintain the bathrooms in a sanitary condition and perform other services necessary for the comfort and convenience of the passengers.

(g) Lessee or permittee may request in writing permission to relocate or make modifications to Passenger-Related Services, Railroad-Related Services, operational equipment and functions including, but not limited to, signal equipment, poles, wire and cable lines, public address systems, pipe lines and drainage facilities located on or crossing the Demised Premises. Railroad-Related Services includes services, facilities or space required for railroad operations, such as storage areas, maintenance bases, platforms, operation offices, and the like. Lessee's written request shall include the reasons for such modifications as well as the plans and specifications for the modifications. Any permitted modifications shall be undertaken so as not to interfere with the operation of the railroad from 6:30 a.m. to 9:30 a.m. or from 4:00 p.m. through 7:00 p.m. daily. Lessor shall review and approve or disapprove the request in writing within sixty (60) days of receipt thereof. No request for modification shall be considered approved and no implementation of the request shall be commenced until Lessor's approval is received in writing. All modification and/or relocation shall be performed at the sole cost of Lessee or its permittee.

12. <u>TERMINATION UPON DEFAULT; TERMINATION FOR CONVENIENCE</u>:

(a) The following shall constitute a default under this Agreement:

(1) Lessee's failure to pay any revenues due Lessor hereunder, all of such revenues being deemed Rent;

(2) Lessee's failure to observe or perform, or cause to be observed or performed any non-financial terms and conditions under this Agreement, and continuation of this failure thirty (30) days after Lessor's written notice to Lessee specifying the nature of the Lessee's failure; except that a failure as described in this subsection (a) shall not constitute a default if it is a non-financial obligation which cannot, with reasonable diligence, be cured within

thirty (30) days, provided Lessee promptly commences and proceeds to cure the failure with reasonable diligence and in good faith;

(3) Abandonment, vacation or surrender of the Agreement Premises.

(b) If default occurs, Lessor may elect to terminate this Agreement upon thirty (30) days' written notice, unless the default is cured within the time period provided hereinabove. If such notice is given, then at the expiration of the thirty (30) day period, if the default has not been cured, Lessee shall quit and surrender the Demised Premises and any Alterations and Lessor shall be entitled to possession of the Demised Premises and Alterations.

(c) Lessor may terminate this Agreement in non-default circumstance upon six (6) months' written notice to Lessee and thereafter Lessor may reenter the Demised Premises. Lessee covenants and agrees that it will return the Demised Premises to Lessor in same or better condition than that existing on the Commencement Date.

(d) Lessee may terminate this Agreement upon sixty (60) days' written notice to Lessor in the event that Lessor discontinues passenger service to the Linden Rail Station.

13. TERMINATION IN THE EVENT OF CONDEMNATION:

(a) If the whole of any of the property comprising the Agreement Premises shall be acquired or condemned by eminent domain, the term of this Agreement shall cease as to that particular property from the date of title vesting in the condemnor. In such event, the provisions of Paragraph 14 shall apply.

(b) In the event of a partial taking or condemnation of any property comprising the Agreement Premises, if the taking is so substantial, in Lessor's or Lessee's reasonable judgment, as to make it inadvisable to continue to occupy that particular property, Lessee or Lessor may terminate this Agreement as to that particular property by giving written notice to the other party no later than thirty (30) days after the date of title vesting in the condemner, and the effective date of termination as to that property shall be the date of title vesting.

(c) In the event of any taking or condemnation, Lessee hereby assigns all of its rights to collect any award with respect to the Demised Premises to Lessor. Notwithstanding the foregoing, Lessee shall have the right to bring a separate action to recover its relocation expenses, provided such award shall not reduce Lessor's award hereunder.

14. TERMINATION DUE TO FIRE OR CASUALTY; OBLIGATION TO REBUILD:

(a) In the event the Demised Premises are partially or totally damaged or destroyed by fire or other casualty, all proceeds of the all risk insurance policy provided in Paragraph 22 shall be paid to Lessor.

(b) In the event the Demised Premises is partially or totally damaged or destroyed by fire or other casualty, Lessor may terminate this Agreement effective as of the date of such fire or casualty by providing written notice of such termination to Lessee within thirty (30) days of such casualty.

(c) In the event the Demised Premises is destroyed or damaged by fire or other casualty, to the extent that the restoration could not reasonably be completed within ninety (90) days, Lessee may terminate this Agreement effective as of the date of such fire or casualty by providing written notice to Lessor within thirty (30) days of such casualty.

(d) In the event neither party shall terminate the Agreement as a result of such fire or other casualty, Lessor shall restore the Demised Premises (but only to the extent of the insurance proceeds covering such damage), with the exception of the personal property, fixtures, equipment and installations of Lessee and any sublessee or permittee, which shall be restored by Lessee and said sublessee or permittee at their sole cost and expense.

(e) No damages, compensation or claim shall be payable to Lessee for inconvenience, loss of business or annoyance arising from any repair or restoration of any portion of the Demised Premises or of the station.

15. SURRENDER OF DEMISED PREMISES ON TERMINATION DATE:

(a) On or before the Termination Date, Lessee shall quit and surrender the Demised Premises in broom clean and good condition and repair together with all Alterations which may have been made in or attached to the Demised Premises. Upon or prior to surrender, Lessee shall remove any trade fixtures and personal property installed by it and shall repair, at Lessee's sole cost, any damage to the Demised Premises caused thereby. Lessor may require Lessee, at Lessee's sole cost, to restore the Demised Premises to the same condition as it was on the Commencement Date, reasonable wear and tear excepted, including the removal of Alterations (except for those which Lessor deemed to be permanent at the time permission was granted to install them), by notifying Lessee at least thirty (30) days prior to the Termination Date.

(b) Should Lessee fail to fulfill its surrender obligations set forth in subsection (a) above, Lessor may, at Lessee's sole cost and expense, remove from the Demised Premises fixtures, appurtenances, personal property or other additions and may restore or repair the Demised Premises as the case may be. The cost obligations of Lessee shall remain exclusive of and in addition to any price received by Lessor for sale of the property removed. Any trade fixtures not removed by Lessee shall become the property of Lessor, and any monies received from any sale of said fixtures shall be retained by Lessor and Lessor shall not be accountable to Lessee or others for any part of the proceeds of such sale, if any. In lieu of sale or removal, Lessor may, at its election, retain and use the property remaining.

16. ASSIGNING, SUBLETTING:

(a) Other than with respect to the station building or any portion thereof, Lessee shall not assign, transfer or encumber this Agreement, or sublet or otherwise permit the occupancy of the Demised Premise or any part thereof in any manner by any third party without the prior written consent of Lessor, which consent shall be granted or denied in its sole discretion. Lessee may sublet the station building or any portion thereof. Lessee may sublet a space in the station building with the prior written approval of Lessor, which approval shall not be unreasonably withheld or delayed, providing the sublease does not interfere with Lessee's obligations pursuant to Paragraph 11(f) hereof or with any Passenger Related Services.

(b) In the event Lessee shall desire to perform any of the acts listed in subparagraph 16(a), Lessee shall notify Lessor in writing of the name and address of the proposed assignee or

sublessee and any financial information that Lessor may reasonably require to determine the net worth of such assignee or sublessee. In the event Lessor shall consent to such assignment or sublet, such assignment or sublet shall be subject to all of the requirements of "Required Sublease Contract Clauses" attached as Exhibit "C" and made a part hereof, as well as the following provisions, which provisions shall be included in the sublease or assignment:

(1) Lessor shall receive a written document executed by such assignee or sublessee, as the case may be, in which such assignee shall assume all of the obligations of Lessee under the Agreement, or such sublessee shall assume all of the obligations of Lessee with respect to the space being assigned or sublet.

(2) Lessee and each assignee or sublessee of Lessee shall be and remain liable for the observance of all covenants and obligations of Lessee under this Agreement.

(3) Lessee shall submit to Lessor for review all subleases or assignments, prior to execution of same by Lessee. Lessee shall not enter into or execute a sublease or assignment without obtaining the prior written approval of Lessor. Lessee shall deliver to Lessor conformed executed copies of all approved subleases, assignments, municipal permits or any other agreements whatsoever concerning the Demised Premises, which Lessor has approved.

(4) [Intentionally omitted]

(5) An assignee or sublessee shall not use the assigned or subleased space in any manner which violates any term or condition of this Lease, including, but not limited to, Paragraph 3, or in any manner which interferes with or causes interference with railroad operations; nor shall the Lessee be relieved of its maintenance and operational responsibilities to provide Passenger-Related Services on the Demised Premises.

(6) Lessee shall comply with N.J.S.A. 40A:12-24 and applicable regulations regarding rental of space not needed for public use.

(7) If modification or improvements to the station building are contemplated to accommodate a sublessee or assignee, the provisions of this Agreement regarding Alterations shall apply.

(8) Lessee shall remain responsible for maintenance of the assigned or subleased space. Allocation of responsibility for the repair, operation and maintenance of any subleased or assigned space may be made by the Lessee and sublessee or assignee; however, it is expressly understood that the Lessee shall be ultimately responsible to Lessor for the repair, operation and maintenance of assigned or subleased premises.

(9) All requests or communications by an assignee or sublessee to Lessor shall be directed through Lessee. No requests will be processed by Lessor unless prior review and written approval by Lessee has been received.

(10) Assignees or sublessees must comply with the insurance provisions of Paragraph 22 with respect to the subleased or assigned space.

(11) Lessor reserves the right to direct Lessee to cancel or terminate an assignment or a sublease if either the Lessee, the assignee or the sublessee does not adhere to the covenants and conditions set forth in this Lease. .

(c) In any event, the acceptance by Lessor of any rent from any assignee or sublessee or the failure of Lessor to insist upon strict performance of any of the terms, conditions or covenants herein from any assignee or sublessee shall not release Lessee from any and all of the obligations herein during the entire term of this Agreement.

17. PERMITS:

(a) Municipal Permits:

Except as set forth in subparagraph (b), Lessee may issue Municipal Permits for the use and occupancy of the station building. A Municipal Permit shall mean a revocable license which is issued by Lessee for use and occupancy of any part of the Demised Premises and which does not imply exclusive possession and control of the station building. All Municipal Permits issued by Lessee shall be unassignable, and shall indemnify and hold harmless Lessor from all claims resulting from the use of the Demised Premises or any part thereof by the permittee(s). Lessee shall be responsible for assuring that the permittee is covered by general liability insurance at the same dollar levels that Lessee is required to provide for the Demised Premises. This policy shall also name Lessor as an additional insured. Lessee shall ensure that the permittee shall not alter the Demised Premises without Lessor's written approval, and that upon expiration or early termination of each Municipal Permit the permittee shall return all facilities utilized to a safe and clean condition. All proposed Municipal Permits shall be submitted to Lessor for prior written approval, and shall expire before the Termination Date. Lessor reserves the right to direct Lessee to cancel or terminate a permit if Lessee or the permittee does not adhere to the covenants and conditions set forth herein, of if the permit interferes with the safety, operations, convenience, access, service or vehicular and pedestrian traffic. The foregoing rights reserved by Lessor and obligations on Lessee and permittees shall be memorialized in all Municipal Permits.

(b) Lessor Permits:

Lessor shall retain the authority to issue permits concerning the Demised Premises in the following categories of uses:

(1) Air or sub-surface utility installations;

(2) Construction and engineering, and

(3) Movie, television or other filming purposes.

18. PARKING FACILITY POLICY; NOTIFICATION TO LESSOR IN THE EVENT OF FRAUD, THEFT OR DAMAGE:

(a) Lessee shall notify Lessor's Senior Director of Real Estate in writing via fax at (973) 491-7331 within twenty four (24) hours of any report, discovery, or investigation of any actual or possible theft, fraud or damage to the Agreement Premises by an employee or otherwise. Lessee shall submit a written or electronic report that describes the theft, fraud or damage as best as it is able to determine; the action Lessee has taken and/or intends to take, and in the event cause by any personnel of Lessee, the name and job title of the person who is alleged

to have committed the theft, fraud or damage.

19. **ADVERTISING AND SIGNS:**

(a) Lessee's Signs:

(1) No advertising or signs shall be placed on the Demised Premises without Lessor's prior written approval. Lessee shall send to Lessor for written approval a submission concerning all signs proposed to be placed at the Demised Premises. This submission shall contain the location, size, content, purpose and appearance of the proposed signs.

(2) Lessee shall erect in a prominent place or places at each of the parking lots comprising the Agreement Premises a sign or signs indicating to the public that Lessee is responsible for the maintenance and operation of the Agreement Premises. This sign shall contain the address and telephone number at which persons may contact Lessee. All signs shall be maintained in good condition by Lessee during the term of the Agreement and shall be removed by Lessee upon the expiration or earlier termination of this Agreement, or upon Lessor's request and at Lessee's expense.

(b) Lessor's System-wide Sign Agreements:

Lessor reserves the right to continue and to enter into system-wide sign agreements, leases or licenses affecting the Demised Premises. No sign or advertising of Lessee shall interfere with or be contrary to the terms of Lessor's existing system-wide sign agreement.

20. **SECURITY:**

(a) Lessee covenants and agrees to supply adequate security and supervision of the Agreement Premises to ensure the safety of the traveling public and of the Agreement Premises. This security shall include the provision of adequate coverage to ensure smooth flow of traffic during peak hours.

(b) Lessee shall provide Lessor with a twenty-four hour telephone number at which Lessor may notify Lessee of any emergencies at the Agreement Premises.

(c) Lessee shall immediately notify Lessor's Emergency Response Center at (973) 491-8779, or any telephone number subsequently furnished to Lessee, of any emergencies at the Agreement Premises.

21. **INDEMNIFICATION:**

Lessee, at its sole cost and expense, shall to the extent permitted by law, indemnify, defend and save harmless the State of New Jersey, Lessor and its subsidiaries, their agents, servants, invitees, officials and employees, and any other operating authorities Lessor may designate (collectively, the "Indemnified Parties") against all just or unjust claims, demands, actions, suits, causes of action, damages, liabilities, judgments, losses of any kind whatsoever, costs and expenses including, but not limited to, court costs and reasonable counsel fees occurring as a result of any alleged injuries, deaths, personal or property damage, illegal acts or violations of any statute or incidents or any other cause whatsoever which may in any way accrue against the Indemnified Parties, which (except to the degree that it shall be determined that the cause thereof was the gross negligence, intentional misconduct or criminal acts of the Indemnified Parties) (a) arise from or in connection with the granting of this Agreement or with

Lessee's possession, use, occupation, management, repair, maintenance or control of the Agreement Premises or any portion thereof; (b) arise from or in connection with any act or omission of Lessee or Lessee's agents, officials, employees, servants; (c) result from any default, breach, violation or non-performance of this Agreement or any provision thereof by Lessee; or (d) result in injury to person or property or loss of life sustained in or about the Agreement Premises or as a result of Lessee's use or occupancy of the Agreement Premises. Lessee's indemnification obligations hereunder shall expressly include indemnification for any of the above-listed acts or omissions of Lessee's permittees, assignees and/or sublessees. Lessee shall, at its own expense, appear and defend the Indemnified Parties and pay all charges of attorneys and all costs and other expenses arising therefrom or incurred in connection therewith, and if any judgment shall be rendered against Lessor or other Indemnified Party in any action, Lessee shall, at its own expense, satisfy and discharge the same. Lessee shall make no claim against Lessor for or on account of any loss or damage whatsoever including, but not limited to, business losses or losses sustained by fire, wind or water and will cause its insurer to waive subrogation rights against Lessor or any designee of Lessor for any claims resulting from any such loss.

22. INSURANCE:

Lessee shall purchase and maintain a comprehensive general liability policy of insurance. This policy shall protect Lessee, Lessor, Lessor's contractual operators and any other designee of Lessor against liability which arises from any occurrence on or about the Agreement Premises, including access thereto over Lessor's adjacent property and/or which arises from any of the claims indicated in Paragraph 21 against which Lessee is required to indemnify Lessor. The policy is to be written by a good and solvent insurance company authorized to do business in New Jersey with an A.M. BEST Insurance Rating of "A minus" or better or by the Municipal Joint Insurance Fund and the Municipal Excess Liability Fund and must provide primary coverage. The coverage limits of the policy shall be not less than $5,000,000.00 combined single limit per occurrence for bodily injury and property damage. Lessor reserves the right to require reasonable increases in the coverage limits from time to time. Coverage provided under this liability policy shall be on an occurrence basis and shall include, but not be limited to, premises operations liability, personal injury liability, property damage liability, contractual liability, independent contractors liability and products liability. There shall be no coverage exceptions for property containing or adjacent to railroad facilities. Should Lessee be self-insured, it is required to supply annually a letter certifying that Lessee is self-insured and is complying with all regulations required for self-insurance. If self-insured, Lessee shall at its sole expense, pay for all claims and damages described in this section which fall within the deductible or retained amounts or the amount for which Lessee is self-insured, including, but not limited to, costs of preparation, handling of investigations, court costs, counsel fees, settlements, judgments, or otherwise.

(a) Lessee shall provide and maintain Worker's Compensation and Employer's Liability Insurance in accordance with the laws of the State of New Jersey and shall require such insurance by any contractors or agents for their respective employees.

(b) Lessee shall provide and maintain all risk property insurance, payable to Lessor, for the replacement value of the Demised Premises as well as all equipment, installations, fixtures and contents in the Demised Premises.

(c) Lessee shall furnish Lessor with certificates of all such insurance policies prior to taking possession of the Demised Premises evidencing coverage of at least the amounts described above. ALL CERTIFICATES MUST REFERENCE THE AGREEMENT NUMBER. LESSOR AND ANY DESIGNEE OF LESSOR SHALL BE NAMED AS ADDITIONAL INSUREDS. Lessee shall not take any action to cancel or materially change any of the insurance required under this Agreement without Lessor's prior written approval of such cancellation or change. The maintenance of insurance under this Section shall not release Lessee from any liability when liability for injury, death and/or property damage is greater than the insurance coverage. Should Lessee be self-insured, it is required to supply annually a letter certifying the Lessee is self-insured and is complying with all regulations required for self-insurance.

(d) All insurance policies required to be carried under this Agreement shall provide (and any certificate evidencing the existence of any insurance policies shall certify) that: unless Lessor shall be given thirty (30) days written notice of any cancellation or failure to renew, or material change to, the policies, (j) the insurance shall not be canceled and shall continue in full force and effect, (ii) the insurance carrier shall not fail to renew the insurance policies for any reason and (iii) no material change may be made in an insurance policy. Said notice to Lessor shall be sent as set forth in Section 25 hereof and the thirty (30) days shall commence upon receipt of the notice by Lessor. The insurance policy shall pay to Lessor, any designee of Lessor and Lessee as their interests may appear. Each insurance policy required to be maintained under this Agreement shall state that with respect to the interest of Lessor and the Additional Insured, the insurance maintained pursuant to each such policy shall not be invalidated by any action or inaction of Lessee and shall insure Lessor and the Additional Insured regardless of any breach or violation of any warranties, declarations, conditions, or exclusions by Lessee.

23. ENVIRONMENTAL REGULATIONS AND INDEMNITY:

(a) Without limiting any other provisions of this Agreement, Lessee shall maintain and keep at its sole cost the Demised Premises and all facilities thereon in compliance with all applicable federal, state and local environmental laws, rules and regulations including, but not limited to, the New Jersey Spill Compensation and Control Act, N.J.S.A. 58:10-23.11b et seq. (the "Spill Act"), the Industrial Site Recovery Act, N.J.S.A. 13:1K-6 et seq. ("ISRA") and the Underground Storage of Hazardous Substances Act, N.J.S.A. 58:10A-21 et seq.; Lessee shall also comply with all registration and disclosure provisions of laws and regulations designed to prevent or control the discharge of hazardous substances into the land, water and air. Lessee shall be responsible for all investigatory and corrective measures and other such actions as may be required in connection with such laws, rules and regulations resulting from or during Lessee's use and occupancy of the Demised Premises. Lessee shall indemnify, hold harmless and defend Lessor from and against any and all suits, actions, proceedings, costs, fines and claims arising from or alleged to have arisen from a violation of any such environmental law, rule or regulation, arising subsequent to Lessee's possession of the Demised Premises, whenever such suits, actions, claims or proceedings shall be commenced.

(b) Lessee shall take all reasonable and necessary precautions to prevent the spilling of hazardous waste and substances, including petroleum products. If it is determined by the Lessor that adequate steps are not being taken by the Lessee, the Lessor may terminate the Agreement immediately without benefit of prior notice to the Lessee, and the use of the Demised Premises will cease until such time as a plan is accepted and agreed to by the Lessor to insure the environmental security of the Demised Premises and abutting lands.

(c) Lessee shall perform and pay for any registration, testing or remediation required under any federal, state or local law, regulation or rule concerning hazardous wastes and substances and/or underground storage tanks, or above ground tanks as may be applicable, other than hazardous wastes or substances or tanks existing on the Demised Premises prior to the Lessee's possession of the Demised Premises pursuant to this Agreement or any prior lease or occupation and Lessee's responsibility and obligation to register storage tanks, pay fees to test, to clean up or pay to clean up all contamination of the Demised Premises and abutting lands shall survive cancellation or termination of this Agreement.

(d) Lessee hereby agrees to execute such documents Lessor reasonably deems necessary and to make such applications as Lessor reasonably requires to assure compliance with ISRA and the Underground Storage of Hazardous Substances Act. Lessee shall bear all costs and expenses incurred by Lessor associated with any required compliance with such acts resulting from Lessee's use or occupancy of the Demised Premises including, but not limited to, state agency fees, engineering fees, cleanup costs, filing fees and suretyship expenses. As used in this Agreement, ISRA compliance shall include applications for determinations of non-applicability by the appropriate governmental authority. The foregoing undertaking shall survive the termination or sooner expiration of the Agreement and surrender of the Demised Premises and shall also survive sale, lease or assignment of the Demised Premises by Lessor. Lessee shall immediately provide Lessor with copies of all correspondence, reports, notices, orders, findings, declarations and other materials pertinent to Lessee's compliance with DEP requirements under ISRA or any other law, rule or regulation as they are issued or received by the Lessee.

(e) In addition to the provisions set forth herein, Lessee shall not generate, store, manufacture, refine, transport, treat, dispose of or otherwise permit hazardous substances to be present on or about the Demised Premises. As used herein, Hazardous Substances shall be defined as all materials and substances which have been determined to be hazardous to health or the environment, including those defined as a "hazardous chemical," "hazardous substance" or similar term in the Comprehensive Environmental Responsibility Compensation and Liability Act, 42 U.S.C. 9601, et seq., the Resource Conservation and Recovery Act, 42 U.S.C. 6901, et seq., ISRA, the Spill Act, any rules or regulations promulgated thereunder, or in any other present or future applicable federal, state or local law, rule or regulation relating to environmental protection.

(f) Lessee, at its sole cost and expense, shall, to the extent permitted by law, defend, indemnify and hold harmless Lessor and the other Indemnified Parties identified in Section 21 (other than those claims resulting from the gross negligence, intentional misconduct or criminal acts of the Indemnified Parties) from and against any and all just or unjust liabilities, damages, claims, losses, judgments, causes of action, costs and expenses (including the reasonable fees and expenses of counsel) which may be incurred by the Indemnified Parties or threatened against the Indemnified Parties, relating to or arising out of any breach by Lessee of this Section 23 relating to environmental responsibilities, said indemnity and obligations under this Section 23 to survive the expiration or sooner termination of the Agreement.

24. NON-DISCRIMINATION:

The parties agree that the provisions of N.J.S.A. 10:2-1 through 10:2-4 and N.J.S.A. 10:5-31, et. seq., and the rules and regulations promulgated pursuant thereto, are hereby made a part of this Agreement and are binding upon them.

25. NOTICE:

All notices required by this Agreement shall be sent by certified letter, return receipt requested, or by a nationally recognized overnight express mail delivery service to the parties at the addresses listed below, unless either party shall inform the other party in writing of any change in designated parties or addresses:

Lessor:	Senior Director of Real Estate New Jersey Transit Corporation One Penn Plaza East Newark, New Jersey 07105-2246
With a copy to:	Division of Law Public Transportation Section One Penn Plaza East Newark, New Jersey 07105-2246 Attention: Section Chief
Lessee:	Business Administrator The City of Linden 301 N. Wood Avenue Linden, New Jersey 07036

26. LAWS AND REGULATIONS:

The provisions of this Agreement and all rights and obligations herein shall be governed by and construed in accordance with the laws of the State of New Jersey and applicable federal laws.

27. NON-WAIVER BY LESSOR:

The various rights, remedies, options and elections of Lessor expressed herein are cumulative, and the failure of Lessor to enforce strict performance by Lessee of the conditions and covenants of this Agreement or to exercise any election or option or to restore or have recourse to any remedy herein conferred, or the acceptance by Lessor of any installment of Rent after breach by Lessee, in any one or more instances, shall not be construed or deemed to be a waiver or a relinquishment for the future by Lessor of any such conditions and covenants, options, elections or remedies, but the same shall continue in full force and effect.

28. ENTIRE AGREEMENT AND SEVERABILITY:

This Agreement embodies the entire agreement between the parties. It may not be modified or terminated except as provided herein. If any provision is held invalid, it shall be considered deleted and shall not invalidate the remaining provisions.

29. MODIFICATION:

This Agreement may be modified only by prior written agreement of the parties.

30. **SUCCESSORS AND ASSIGNS:**

The covenants, conditions and agreements contained in this Agreement shall bind and inure to the benefit of Lessor and Lessee and their respective successors and, except as otherwise provided in this Agreement, their assigns.

31. **LIMITATION OF LIABILITY:**

Pursuant to N.J.S.A. 27:25-17, any and all debts, expenses or obligations incurred by Lessor shall be payable only from funds available to Lessor, and no liability or obligation shall be incurred by Lessor beyond the extent to which monies are available. All potential liability of Lessor and Lessee hereunder shall be further subject to the provisions of the New Jersey Tort Claims Act, N.J.S.A. 59:1-1 et. seq. and the New Jersey Contractual Liability Act, N.J.S.A. 59:13-1 et. seq. No covenant, representation or obligation of Lessor shall be deemed or construed to create or constitute a debt, liability or a loan or pledge to the credit of the State of New Jersey.

32. **REIMBURSEMENT OF LESSOR:**

If Lessee shall fail or refuse to comply, after ample notification from Lessor, with the performance of any conditions or covenants of the Agreement, Lessor may, at the sole discretion of Lessor, carry out and perform such conditions or covenants at the sole cost and expense of Lessee. Lessee shall, upon Lessor's demand, pay said cost as Rent in full by no later than thirty (30) days after receipt of an appropriate invoice from Lessor.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed on May 19, 2005.

OPERATING AGREEMENT AND LEASE
LEASE # L-

SCOPE OF SERVICES

MANAGEMENT, OPERATION AND MAINTENANCE
OF
NJ TRANSIT'S CITY OF LINDEN STATION AND PARKING FACILITY,

LINDEN, N.J.

* * * * * * * * * * *

I. Introduction

This Scope of Services provides direction to the Lessee in addition to the requirements that the Operating Agreement and Lease imposes on the Lessee. If there is any discrepancy on a matter that both the Agreement and the Scope of Services address, the Scope of Services shall govern. NJ TRANSIT may consider Lessee's failure to comply with or satisfy the Scope of Services a default and a cause for termination of the Agreement.

II. Lessee's General Duties

Lessee shall provide all services associated with the management, operation and maintenance of the parking lots and station building on the Agreement Premises (the "Facility") in a first-class manner consistent with generally accepted standards and practices within the parking industry. Lessee will be responsible for the duties listed below and delineated elsewhere in this Scope of Services.

1. Administer a parking-permit program for customers who purchase quarterly, semiannual or annual parking permits consistent with terms and conditions that NJ TRANSIT sets forth for the purchase of such permits.

2. Collect fees from non-permit (daily) customers every weekday and, if required by NJ TRANSIT, every Saturday, Sunday and holiday.

3. Supply and maintain the on-site daily pay-by-space fee collection equipment at the Facility.

4. Provide prompt and efficient service. The Lessee's employees shall conduct themselves in an orderly and fitting manner and shall be courteous at all times with NJ TRANSIT's customers and employees. The Lessee shall replace any manager or other personnel whom the Lessee or whom NJ TRANSIT, in its sole discretion, deems incompetent, discourteous, uncooperative or dishonest.

5. Assist in a fee-enforcement program.

6. The Lessee will be responsible -- each day -- for providing parking-violation officers a list of occupied parking spaces for which no payment of the required parking fee has been recorded, or that blocks or impairs traffic circulation. The list must be of sufficient quality to serve as credible evidence in court. In addition, the Lessee will be required to post warning notices or demand-for-payment envelopes on the windshields of vehicles that do not display the proper parking permit or that are parked in a space for which no payment has been recorded.

7. Maintain and update signs that tell customers where and how to park and how to pay for parking spaces and replace them in kind as needed.

8. Provide accurate records of revenue collected and remitted.

9. Lessee shall not affix or display its company logo, name or otherwise place its identity on operating equipment or on the Facility without NJ TRANSIT's prior written approval.

III. Customer Information Duties

NJ TRANSIT desires to present the Facility to its customers and the general public in a professional, high-quality manner. Therefore, Lessee shall work with NJ Transit to develop and disseminate customer-service information, as NJ TRANSIT requires and includes, but is not limited to:

(a) All signs, messages and devices used in operation of the Facility shall be subject to NJ TRANSIT's written approval, which shall be granted or denied in its sole and absolute discretion.

(b) Lessee shall maintain a pre-recorded outgoing telephone message device that contains accurate and current information about the Facility, its location, parking fees charged and the procedure for applying for a permit. Said pre-recorded device shall have the ability to leave a message that staff will return during business hours.

(c) (optional): a Website that provides customers updated information about the Facility, its location, parking fees charged and the procedure for applying for a permit, emergency numbers and the ability to leave a message that staff will return during business hours.

IV. Parking Rates and Fee Collection Duties

1. The Lessee shall charge NJ TRANSIT's customers the parking rates that NJ TRANSIT shall set from time to time. NJ TRANSIT shall provide the Lessee written notice of any changes in such rates at least thirty (30) days prior to the proposed effective date. The Lessee shall be responsible for changing all rate signs including pay-by-space fee collection equipment and notices of rates or on any computer-programming changes in the parking and revenue control systems as required to ensure a smooth transaction.

2. NJ TRANSIT shall establish the rate structure for all parking fees to be charged in the Facility and the allocation of spaces by fee level. NJ TRANSIT may change the fees and allocations at its sole discretion.

3. The Lessee shall charge only those rates that NJ TRANSIT has established and shall not waive fees for any customers except as NJ TRANSIT may direct or approve.

4. If the Lessee charges any customer a fee that exceeds the established schedule of rates, the amount by which the actual charge exceeds the established rate shall constitute an overcharge and the Lessee, upon demand by NJ TRANSIT or the customer, shall promptly refund such overcharge to the customer.

5. If the Lessee charges any customer a fee that is less than the established schedule of rates, the amount by which the actual charge is less than the established rate or the amount that the Lessee failed to collect shall constitute an undercharge and, upon demand by NJ TRANSIT, the Lessee shall pay an equivalent amount to NJ TRANSIT.

6. When situations such as the ones listed in (a) and (b) below occur, the Lessee shall exercise reasonable judgment in giving refunds or making on-site fee adjustments. The Lessee shall record each fee adjustment and refund as an exception transaction and report each fee adjustment and refund to NJ TRANSIT. The Lessee shall not give refunds or make fee adjustments for delays in exiting caused by local road conditions.

(a) Delay in exiting as a result of inclement weather (e.g., snow, ice) of such severity that a customer cannot reasonably be expected to retrieve a vehicle without outside assistance. The customer shall be responsible for paying the parking fee up to the date that weather conditions prevented the customer from removing the vehicle.

(b) Delay in retrieving a stolen vehicle and where the vehicle's owner or operator has filed a police report. The customer shall be responsible for paying the parking fee up to the time and date that the owner or operator filed a police report.

V. Revenue Control System Duties
