

**New Jersey Commission on Science, Innovation and Technology (CSIT)
Clean Tech Research and Development (R&D) Voucher Program Pilot,
Round 3
Amended - Notice of Funding Availability – August 31, 2026**

This amended NOFA (dated August 31, 2026) clarifies the processing of voucher applications and review periods for completion of documentation for the full application. All other program requirements, including program details and restrictions, remain unchanged from the previous NOFA.

All updates to the prior NOFA are bolded below:

The New Jersey Commission on Science, Innovation and Technology (CSIT) continues to review and accept online applications for the Clean Tech Research and Development (R&D) Voucher Program Pilot, Round 3, on a rolling basis as long as program funds are available. No fees will be charged for this program.

Funding from this program is used to support for-profit entities only. Non-profit organizations are not eligible to apply.

Comprehensive information about the Clean Tech R&D Voucher Program Pilot Round 3 is available at <https://www.njcsit.gov/grant-programs/>. Questions concerning this Program and Notice of Funding Availability should be submitted to csitvoucher@njcsit.gov.

Purpose

This grant opportunity is issued by the New Jersey Commission on Science, Innovation and Technology (CSIT) in collaboration with the New Jersey Economic Development Authority (NJEDA), which are seeking applications from qualified applicants for the Clean Tech Research and Development (R&D) Voucher Program Pilot, Round 3 (“Program”) to support early-stage companies in the State.

The goal of the Program is to support New Jersey based early-stage clean tech/clean energy company efforts to accelerate the development and innovation of clean technologies and to transform new discoveries from the research stage into commercially viable technologies, leading to industry and investor interest in the following target areas:

- Chemicals/Advance Materials
- Energy Distribution/Storage
- Energy Efficiency
- Energy Generation
- Green Buildings
- Transportation
- Waste Processing
- Water and Agriculture

Overview

The available budget as of August 20, 2026, is \$878,541, enough to fund approximately 22 awards.

The Program will be implemented by CSIT and technical support will be provided at core facilities, such as participating universities/colleges, federal labs, NJEDA approved strategic innovation centers and other New Jersey approved non-profit organizations.

The objectives of the Program are to:

- i. improve awareness, access to and utilization of New Jersey's world-leading equipment, facilities and makerspaces; and
- ii. subsidize access to research and development equipment, facilities and makerspaces for small New Jersey-based companies that are developing innovative technologies in the clean energy/clean tech space.

Program Details

The Program will subsidize technological research and development at New Jersey participating core facilities by allowing voucher awardees to access equipment and facilities. Each approved voucher will be valid for a period of twelve months (starting from date of the execution of the grant agreement). Any unused approved voucher amounts will not be reimbursed after the twelve-month period. At CSIT's sole discretion, an extension may be granted for one three-month period if requested in writing prior to the expiration of the executed grant agreement.

Provided that funding is available, all complete applications that meet the eligibility criteria, and are in compliance with the required documentation, are eligible for funding. The total funding and potential award amount is based upon current information about funding availability. CSIT reserves the right to increase that award amount and number of awards should additional funds become available.

Project work may not commence until the grant agreement has been fully executed by CSIT and the Grantee has received a copy of such agreement.

Eligibility

To be eligible for the Clean Tech Research and Development (R&D) Voucher Program Pilot, Round 3, the applicant company must:

- Be authorized and in good standing company to conduct business in NJ. Non-profit entities are not eligible
- Have a current NJ Tax Clearance Certificate listing CSIT. All certificates listing another state agency will be rejected.
- Have no more than fifty (50) full-time equivalent (“FTE”) workers (FTE calculated on a 35- hour work week) at time of application.
- Have a minimum of one (1) full-time worker (calculated on a 35-hour work week). A worker may be a founder, consultant or contractor and may be paid or unpaid.
- Have 50% or more of the cumulative hours worked by all workers, founders, and contractors be conducted in NJ (calculated on an FTE of 35 hours per week).
- Have less than or equal to five million dollars (\$5,000,000) in prior calendar year sales revenue (excluding grant revenue). Company must submit tax filings or other documentation showing prior-year Gross Receipts or Sales.
- Have been awarded less than three (3) voucher awards across all rounds of Catalyst R&D (Rounds 1 and 2) and Clean Tech R&D (Rounds 1, 2 and 3) combined over the lifetime of the company.

Successful Grantees must commit for two years following the execution of the Grant Agreement to the following:

- At least 50% of the total of all employees, contractors and consultants must conduct all their work from a New Jersey location; and
- All Voucher recipients must annually report economic impact data to CSIT for 2 years from the date of execution of the Voucher Grant Agreement.

The applicant company must obtain a signed letter of support, budget, and scope of work from a core facility to show that it is capable of and willing to provide the services that will be supported by the voucher.

The applicant company must be developing or testing clean technologies intended to avoid emissions of, or recapture of, greenhouse gases and/or criteria pollutants, or to enable such avoidance or recapture in the following target areas:

- Chemicals/Advance Materials
- Energy Distribution/Storage
- Energy Efficiency

- Energy Generation
- Green Buildings
- Transportation
- Waste Processing
- Water and Agriculture.

To participate, a core facility must:

- be in a two or four-year college or university (public, state, or non-profit) located in New Jersey, a federal lab facility or a non-profit R&D organization located in New Jersey, or NJEDA approved Strategic Innovation Center;
- allow outside businesses to utilize research and development facilities on fee-for-service basis; and
- provide a contact person to facilitate requests and participate in Clean Tech R&D Voucher Committee meetings.

All applicant projects must be for a minimum technology development level of TRL 1 (*Basic research*) through a maximum developmental level of TRL 7 (*Full- scale, similar prototypical system demonstrated in relevant environment*). Please see below Attachment A for an explanation of these US Department of Energy definitions.

Eligible Uses of Voucher

Eligible applicants can receive vouchers up to \$40,000 to defray the costs associated with the following services or use of necessary supplies and activities at participating core facilities:

- Access to core facility labs, equipment, makerspaces and technology centers;
- Use of core facility equipment and technicians for testing and validating;
- Training in preparation for independent use of the facility equipment or makerspaces;
- Access to datasets available at participating CSIT core facilities; and
- Supplies and consumables needed in the operation of equipment at the core facility.

The vouchers are to be used toward the approved Project. Requests for payment that are unrelated to the Project will be rejected. The following uses are **ineligible** for reimbursement under the Program:

- Manufacturing products for sale or commercial use;
- Real estate rental expenses; and
- Patient clinical trial expenses

Grant Amounts

Eligible applicants can receive vouchers of up to \$40,000. Applicants can apply for multiple CSIT vouchers up to a cap of \$40,000 in the aggregate over any 12-month period. Applications that would exceed that cap will not be reviewed.

Application Submission and Review Process

Applications will continue to be reviewed and accepted on a rolling basis as long as Program funds are available. Applicants will be notified of their funding status once the review of their submitted documentation is completed.

The Program operates under a 2-step application process

Step 1: Initial (draft applications) are accepted on a rolling basis and completed using the CSIT on-line application portal. All companies must begin their application by completing the intake portion of the application. This includes questions concerning the applicant: the proposed scope of work, the types of equipment and core facility or facilities needed to access to complete the project, and if known, the specific location of such core facility/facilities, and program eligibility information.

In order to be considered for an award, the draft application must fully and clearly describe:

1. The research and development to be performed.
2. The equipment that will be needed to complete the project.

If the initial requested core facility cannot perform the work, CSIT will share the draft application with representatives from other core facilities. Potential matches, if identified, will be forwarded to the applicant, however, it is the sole responsibility of the applicant to secure the written support of a core facility.

If a core facility is not secured within six (6) months of the draft application submission date, the draft application will be rejected as incomplete.

To complete Step 1, applicants must confirm a commitment from a partner core facility to access equipment and conduct the proposed project. The applicant must then develop and finalize, along with the core facility, the following documents:

1. Core facility Letter of Support on facility letterhead
2. Agreed upon Statement of Work between applicant and core facility
3. Agreed upon budget between applicant and core facility

CSIT will review the letter of support, statement of work and budget, and if approved by CSIT, applicants will receive a submission code and proceed to Step 2.

Step 2: Full application submission will continue once a match has been made with a participating core facility and CSIT receives and approves the Letter of Support, Statement of Work, and Budget from the applicant and core facility. **The Applicant has 6 weeks to complete the full application following receipt of a CSIT submission code. The application will be rejected if not received within this timeframe.**

In addition to the documents above, applications submitted to the Program **must** include the following:

1. Completed online application via CSIT Portal along with the information below included in the application:
 - a. Signed Application Certification;
 - b. Completed CSIT Legal Debarment Questionnaire; and
 - c. Employee Log - listing all current company employees, work address, and number of hours worked per week and employee verification documentation type.
2. Summary of the most recent internal applicant company payroll (detailing information on each employee of the company, number of hours worked per week and primary work location).
3. Current employee verification information as appropriate for the applicant company's structure and staffing. i.e., most recent Federal 941, NJ WR-30 (W2 employees) or 1099 (contractors), Shareholder Agreement, or K-1.
4. Company tax filing: Federal 941 and either an NJ-CBT-100 (Schedule A), Form-1065 or Form -1040 (Schedule C), or whichever is applicable to the organizational form of your business, showing the total Gross Receipts or Sales for the entire prior year.
5. Current New Jersey tax clearance certificate listing only New Jersey Commission on Science, Innovation and Technology. Instructions on how to obtain a tax clearance can be found at <https://www.nj.gov/treasury/taxation/busasst.shtml>. Only certificates listing CSIT as the Agency will be accepted. All certificates that do not specifically list CSIT will be rejected.

All submitted applications will be reviewed by CSIT for document completeness and eligibility. Applicants with missing documentation will receive a resubmission letter from CSIT to provide any missing or incomplete documentation within ten (10) business days. For NJ Tax Clearance Certificates only, applicants will have thirty (30) business days to submit.

Successful applicants must execute a voucher agreement with CSIT detailing the terms and conditions of the voucher, and use of the voucher at the respective core facility. At CSIT's sole discretion, a voucher project may be extended once for a three-month period if requested by the voucher recipient in writing 30 days prior to the expiration of the voucher agreement.

CSIT's Executive Director has the delegated authority to permit non-material changes to the scope of work and budget of an executed voucher agreement, provided that (1) the overall voucher funding does not increase, (2) there are no material changes to the scope of work, and (3) applicants remain compliant with the program eligibility requirements

Project Completion and Distribution of Grant Funding

From the effective date of the grant agreement, grantees will have up to 12 months to complete their voucher projects and submit a detailed written invoice from the participating core facility. The invoice must align with the budget that was submitted with the application and include details such as: equipment used, dates and hours used, technician hours, etc.

The Grantee is then required to submit the following documents for CSIT review:

1. CSIT Annual Report (submitted via link to MS Forms)
2. Invoice Details Report (submitted through NJEDA Portal)
3. Current Tax Clearance Certificate (submitted through NJEDA Portal)
4. Current Employee Log (submitted through NJEDA Portal)
5. Current Employee Documentation (submitted through NJEDA Portal)

Once all the required reports have been accepted by CSIT, the Grantee will receive a requisition form from CSIT to proceed with the disbursement of funds. The core facility must be reimbursed by the Grantee within 2 weeks of receiving funds from CSIT. The Grantee is directly responsible for any unpaid funds to the participating core facility, including but not limited to costs that exceed the amount of the approved voucher.

Compliance and Reporting

For two (2) years from the date of the execution of the grant agreement, 50% of all work conducted by all Grantee's employees, contractors and consultants must be conducted in a New Jersey location. This will be confirmed by having the Grantee submit an employee log and employee verification documentation annually during the two-year period.

All Grantees must report economic impact data to CSIT for a period of two years from the execution of the Grant Agreement by submitting a CSIT Annual report using an MS Forms link. All other required compliance documents are to be submitted using the NJEDA portal. The Grantee will receive automated reminders for compliance reporting.

Grantees may be asked to participate in future CSIT/NJEDA alumni activities, such as serving as a panel member or participating in interviews about their Program experience.

Fees

No fees will be collected by CSIT for this Program.

Additional Requirements and Information

As part of the review process, CSIT conducts sister agency checks with the New Jersey Department of Labor (DOL) and Department of Environmental Protection (DEP) on all completed applications. To be recommended for an award, applicants must be in good standing with both DOL and DEP.

Confidentiality

Applications received will be reviewed only by staff of CSIT, NJEDA and participating universities/colleges, federal labs and non-profit organizations. However, all applications submitted will be subject to requests for disclosure, including but not limited to, requests

pursuant to the Open Public Records Act ("OPRA") N.J.S.A. 47:1A-1 et seq. If the applicant believes that information contained in its proposal merits confidential treatment pursuant to OPRA, any such purportedly confidential information submitted to the Authority must be specifically identified and marked as "confidential" by the applicant.

Additional Information

Comprehensive information about the Clean Tech R&D Voucher Program Pilot Round 3 is available at [CSIT Active Grant Programs](#).

Questions concerning this Program and Notice of Funding Availability should be submitted csitvoucher@njcsit.gov.

State and Federal Requirements

Funding for this grant is subject to State and Federal statutes including, but not limited to, the following, which may impact affiliates: N.J.S.A. 52:32-60.1, et seq., which prevents the New Jersey government entities from certain dealings with businesses engaged in prohibited activities in Belarus or Russia; Compliance with the list of "Specially Designated Nationals and Blocked Persons" promulgated by the Office of Foreign Assets Control (OFAC), <https://sanctionssearch.ofac.treas.gov>; N.J.S.A. 24:6I-49 which provides that the following are not eligible for most State or local economic incentives (a) a person or entity issued a license to operate as a cannabis cultivator, manufacturer, wholesaler, distributor, retailer, or delivery service, or that employs a certified personal use cannabis handler to perform work for or on behalf of a cannabis establishment, distributor, or delivery service; and (b) a property owner, developer, or operator of a project to be used, in whole or in part, by or to benefit a cannabis cultivator, manufacturer, wholesaler, distributor, retailer, or delivery service, or to employ a certified personal use cannabis handler to perform work for or on behalf of a cannabis establishment, distributor, or delivery service; and N.J.S.A. 52:13D-12, et seq., which prohibits a member of the Legislature or a State officer or employee or their partners or a corporation in which they owns or controls more than 1% of the stock to undertake or execute any contract, agreement, sale, or purchase of \$25.00 or more, made, entered into, awarded or granted by any State agency, with certain limited exceptions including grant awards by the New Jersey Commission on Science, Innovation and Technology

Attachment A: Technology Readiness Level¹

(TRL) TRL 1

Basic Research: Initial scientific research has been conducted. Principles are qualitatively postulated and observed. Focus is on new discovery rather than applications

TRL 2

Applied Research: Initial practical applications are identified. Potential of material or process to solve a problem, satisfy a need, or find application is confirmed

TRL 3

Critical Function or Proof of Concept Established: Applied research advances and early-stage development begins. Studies and laboratory measurements validate analytical predictions of separate elements of the technology

TRL 4

Lab Testing/Validation of Alpha Prototype Component/Process: Design, development and lab testing of components/processes. Results provide evidence that performance targets may be attainable based on projected or modeled systems

TRL 5

Laboratory Testing of Integrated/Semi-Integrated System: System Component and/or process validation is achieved in a relevant environment

TRL 6

Prototype System Verified: System/process prototype demonstration in an operational environment (beta prototype system level)

TRL 7

Integrated Pilot System Demonstrated: System/process prototype demonstration in an operational environment (integrated pilot system level)

TRL 8

System Incorporated in Commercial Design: Actual system/process completed and qualified through test and demonstration (pre-commercial demonstration)

TRL 9

System Proven and Ready for Full Commercial Deployment: Actual system proven through successful operations in operating environment, and ready for full commercial deployment

¹ TRL levels summarized from Department of Energy (DOE) [Report](#)
