

SOLAR AND STORAGE INVESTMENT PROPOSAL GUIDANCE

To be considered for an investment, please submit a proposal to NJEDA for review. We suggest including the following items in your proposal, as applicable. This list is meant to serve as guidance, but does not constitute a formal requirement. Note, not all items will be relevant to each project. NJEDA staff will follow up if additional or clarifying information is needed should the project be determined to be a potential investment opportunity.

- Desired NJEDA investment (amount of investment and requested terms)
- Overview of the proposed solar/storage project including technology, size, location, and related technical details
- Project team members and demonstration of related qualifications and experience
- Project budget including costs and revenue
- Other sources of funding and project financial partners
- Interconnection plan and status
- Offtake agreements and related contracts
- Status of permitting and any related required approvals
- Projected environmental and community benefits
- Project schedule
- Overall alignment with NJEDA's Investment Evaluation Criteria (see website and linked Board memo) and State energy/climate goals

Proposals and related information can be sent to cleanenergy@njeda.gov or one of the NJEDA's Clean Energy staff members for review.
